## Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, averaged slightly higher in February at 79.5 cents per bushel as compared with 79 cents in January, prices having advanced during the last half of the month in spite of unsteadiness in prices in Liverpool and lower quotations for Argentine wheat. Coarse grains were generally lower, western oats being down from 44.2 cents per bushel to 42.7 cents, rye from 54.3 cents per bushel to 50.7 cents, barley from 50.4 cents per bushel to 46.9 cents and flax from \$1.436 per bushel to \$1.422. Flour at Montreal was 10 cents per barrel higher at \$5.30, while rolled oats at Toronto declined 10 cents per ninety pound bag to \$2.05. Raw rubber at New York was fractionally lower at 13.2 cents per pound. In live stock choice steers at Toronto advanced from \$5.54 per hundred pounds to \$5.95 and at Winnipeg from \$4.17 per hundred pounds to \$5.08. Veal calves at Toronto were down from \$7.72 per hundred pounds to \$7.52, while bacon

hogs on the same market were slightly higher at \$8.60 per hundred pounds. Creamery butter at Montreal rose from 24.6 cents per pound to 26.8 cents and at Toronto from 24.8 cents per pound to 27.5 cents. Cold storage holdings at the beginning of February were more than 50 per cent greater than a year ago but 30 per cent lower than in the previous month. Prices of fresh eggs at Montreal were slightly lower at 30.8 cents per dozen as compared with 31 cents the previous month, while at Toronto the price was up fractionally at 29 cents per dozen. Cold storage holdings were much higher at the beginning of February than at the corresponding date last year but were about 50 per cent less than at the beginning of the previous month. Raw cotton at New York was down from an average of 12.7 cents per pound to 12.6 cents. Visible supplies were considerably lower at the beginning of March as compared with the previous month. A grade of spruce lumber was 50 cents per thousand board feet lower at \$15. The price in February a year ago was \$19. Electrolytic copper at Montreal declined from \$7.48 per hundred pounds to \$7.24, while tin at Toronto was down from 55 cents per pound to 54.3 cents.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afforded information as to recent changes in prices in Great Britain and certain other countries. The authorities for the wholesale prices index numbers are named in all cases. The latest table showing cost of living and wholesale prices index numbers for various countries appeared in "Prices in Canada and Other Countries, 1934" issued as a supplement to the LABOUR GAZETTE, January, 1935.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1930 = 100, was 88.3 for January, an advance of 0.6 per cent for the month. Except for decreases in cereals and iron and steel, all groups were included in the advance.

The *Statist* index number, on the base 1867-1877 = 100, was 83.6 at the end of January, an advance of 1 per cent for the month. Foods were 0.5 per cent lower, due to declines in vegetable food and in the sugar, coffee and tea groups. Industrial materials were 1.7 per cent higher with advances in all groups, of which textiles rose 3.6 per cent.

**COST OF LIVING.**—The index number of the Ministry of Labour, on the base July, 1914 = 100, was 142 for February, a decline of one point for the month, due to lower food prices.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base July, 1914 = 100 (gold index), was 71 for January, an increase of 1.4 per cent for the month. Except for a slight decrease in vegetable foods, all groups were included in the advance for the month.

### Germany

**WHOLESALE PRICES.**—The Federal Statistical office index number, on the base 1913 = 100, was 101.1 for January, an increase of 0.1 per cent for the month. The changes in the different groups were small in all cases.

**COST OF LIVING.**—The official index number, on the base 1913-1914 = 100, was 122.4 for January, an increase of 0.2 per cent for the month, due to small advances in food, heat and light and clothing.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926 = 100, was 78.8 for January, an advance of

2.5 per cent over the December level, and is the highest point reached since December, 1930. The groups showing advances over the previous month were farm products, foods, hides and leather products, textile products and chemicals and drugs.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is the sum total of the prices per pound of 96 commodities of common consumption was \$9.7800 at the beginning of February, a gain of 3 per cent over the previous month.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost per capita of a year's supply of commodities was \$176.770 at February 1, an advance of 2.13 per cent for the month, showing an increase in every group except breadstuffs.

**COST OF LIVING.**—The index number of the Department of Labour and Industries, Massachusetts, of the cost of living in Massachusetts, on the base 1913 = 100, was 135.8 for January, an increase of 1.4 per cent, this increase being due entirely to higher food prices.

### Ontario Vocational Guidance Association Organized

In order to give effective organized effort to the problems of vocational guidance and the adjustments attendant upon modern economic tendencies, the Ontario Vocational Guidance Association was recently established. As explained in the introductory circular, for many years the work of assisting individuals to choose, prepare, enter or successfully adjust themselves to occupations had been largely done by welfare bodies and service clubs, etc. It was considered, however, that the time had arrived for centralized and co-ordinated organization to direct the following activities:

To provide a means of exchange of information and viewpoints among those concerned in guidance; to select, organize, and make available to members existing information regarding the occupational world; to aid in the accumulation of new information necessary to adequate guidance through co-operation in research; through group methods to inform young people and parents regarding job requirements, etc.; to develop relations between various guidance and placement agencies; to encourage the establishment of facilities for training of persons in the technique of vocational guidance.

## FATAL INDUSTRIAL ACCIDENTS IN CANADA IN 1934

### Analysed according to Industries, Causes, Localities and Months

**A**N analysis of fatal industrial accidents in Canada during the calendar year 1934, by industries, causes, provinces and months is presented in the accompanying tables. The accidents recorded are those occurring to persons gainfully employed during the course or arising out of their employment. Also included are fatalities from industrial diseases reported chiefly by provincial workmen's compensation boards. Quarterly statements, each giving a table of the accidents occurring during the period covered, appeared in the *LABOUR GAZETTE* for May, August and November, 1934, and February, 1935.

The record is compiled from reports from the following governmental authorities: the Board of Railway Commissioners for Canada; the Explosives Division of the the Federal Department of Mines; the Workmen's Compensation Boards of Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia; the Ontario Chief Factory Inspector; the Ontario Railway and Municipal Board; and the British Columbia Department of Mines. Reports were also received from the correspondents of the *LABOUR GAZETTE*, resident in the principal industrial centres throughout Canada.

Industrial accidents reported in the press are also included in the record after inquiry has been made to avoid duplication. Most of the accidents in agriculture are recorded from press reports, and while it is not known to what extent the accidents in this industry are covered, it is believed that in this respect the record is fairly complete. To a great extent, however, the information obtained from press reports is used to supplement information received from official sources.

Table I gives an analysis of accidents by industries and causes, Table II by provinces and Table III by months, these last two also including summary figures for 1933, which are a final revision of the figures published in the *LABOUR GAZETTE*, March, 1934, by the inclusion of accidents occurring in 1933 which were reported too late for incorporation into

the annual statements. These accidents were included in the supplementary reports in the *LABOUR GAZETTE*, May, August and November, 1934, and February, 1935. The figures for 1934, being still incomplete, are accordingly to some extent not comparable with the completed figures for 1933.

In some industries where considerable changes in figures from year to year appear, these may be attributed to changes in industrial conditions. For example, in logging there was an increase in the number of fatalities from 91 to 113, in the mining group from 112 to 142, in the construction group from 65 to 114, apparently arising out of increased employment in these industries during 1934, with relative increase in exposure to risk. As compared with 1933, there were no marked changes in the accident figures for 1934 in any industry, due to major disasters.

There was no serious disaster resulting in the loss of a very large number of lives during the year under review. Four Eskimo hunters perished in a blizzard near Aklavik, Northwest Territories, on or about January 15. On March 1, a motorman was killed at Britannia Beach, British Columbia, when a mine electric locomotive, out of control, ran over the safety blocks at the end of its track and crashed 600 feet down a shaft killing a shift boss and a control chute man as well. On June 18 three coal miners were killed by a rockslide which followed an explosion at Nacmine, Alberta. While fighting a fire following an explosion on an oil barge at Toronto, Ont., on July 23, the fire chief and two firemen were burned to death and the master of the barge died from burns on September 15. On October 28, the master of a schooner, an engineer and a seaman were drowned near Quebec City, when their schooner was swamped in a storm. When a boat was struck by another freighter on Lake Huron, Ont., on November 21, a steward, watchman, second cook and deck-hand were drowned.

### Fatalities by Causes

The classification of fatal accidents according to causes shows that the largest number, 282, came under the category "by moving trains, vehicles, etc." This includes all accidents due to cars or engines, including mine and quarry cars, and to automobiles and other power vehicles and horse-drawn vehicles, as well as accidents caused by moving implements (both those impelled by power and those drawn by horses), by moving watercraft and by aircraft. The largest number of accidents thus caused, 79, appear under the heading, automobiles and other power vehicles and implements. Also 53 were caused by persons being struck or run over by, or crushed by or between cars and engines, 31 of these being engaged on steam railways; 64 were in connection with water craft (8 of these being in logging, rafts, etc., 30 in fishing and trapping and 22 in water transportation); 36 were caused by animal drawn vehicles and implements (28 of which were in agriculture, accidents primarily caused by animals being classified elsewhere); 19 were due to derailments and collisions (18 in steam railways); 18 were caused by mine and quarry cars, 8 by persons falling from or in cars or engines, and 5 by aircraft.

"Falls of persons" caused 166 fatalities, including 48 falls into pits, shafts, harbours, rivers, etc. (some of which resulted in drowning), 40 falls from elevations, 21 falls from loads, etc., 21 due to collapse of support, 7 from ladders, 7 down stairs and inclines, 7 into tanks, vats, kilns, etc., 6 into holds of vessels, 6 due to falls on the level, and 3 on sharp objects.

Fatalities numbering 142 were caused by "falling objects," of which 50 were due to objects falling in mines and quarries, 47 to falling trees and limbs, 24 to objects falling from elevations, loads, piles, 10 to collapse of structure, 4 to breaking or loosening of straps cables, etc., and 7 to other falling objects.

Next in order as a cause came "dangerous substances," 128 in number, of which 43 were due to explosive substances, 29 to electric current, 25 to hot and inflammable substances and flames, 11 to gas fumes, etc., 9 to steam

escapes, boiler explosions or compressed air, 9 to conflagrations, and 2 to mine explosions from gas, coal dust, etc.

Animals caused 42 fatalities, including 23 due to horses. There were 30 fatalities in connection with the handling of heavy or sharp objects; 30 fatalities were caused by striking against or being struck by objects, of which 23 were due to being struck by objects and 7 to striking against objects. There were 20 fatalities caused by prime movers, 20 by hoisting apparatus, 16 by working machines, and 2 by tools.

The category "other causes" includes 95 fatalities, of which 4 deaths were following infection, 35 due to industrial disease, strain, etc., 4 to drowning not elsewhere specified, 6 to shooting and violence, 17 to cave-ins, land slides, ice jams, etc., 21 to lightning, frost, storms, sunstroke, and 8 accidents as to which no particulars were available.

### Fatalities by Provinces

The classification of fatal accidents according to provinces shows that the largest number, 367, occurred in Ontario. There were 232 in Quebec, 142 in British Columbia, 81 in Nova Scotia, 46 in Alberta, 37 in Saskatchewan, 34 in Manitoba, 25 in New Brunswick, 6 in Prince Edward Island, and 4 in the Yukon and Northwest Territories. In Ontario the largest proportion of fatalities occurred in transportation and public utilities, where there were 62, with 61 in agriculture, 53 in construction, 51 in manufacturing, 49 in mining, non-ferrous smelting and quarrying, 30 in service, 26 in trade, 17 in logging, 11 in electric light and power, and 7 in fishing and trapping. In Quebec the largest number, 49, was also in transportation and public utilities, with 35 in agriculture, 32 in construction, 31 in logging, 31 in service, 24 in manufacturing, 14 in trade, 11 in mining, non-ferrous smelting and quarrying, 3 in electric light and power, and 2 in fishing and trapping. In Nova Scotia and Alberta respectively there were 34 and 13 fatalities in mining, non-ferrous smelting and quarrying, and no other industry suffered so many fatalities in these provinces. In Saskatche-

(Continued from page 295)

wan the largest number, 19, was in agriculture. In Manitoba and New Brunswick the largest numbers were in transportation and public utilities, there being 9 and 6 respectively in this group. In British Columbia there were 54 fatalities in logging, 31 in mining, non-ferrous smelting and quarrying, and 13 in transportation and public utilities.

### Fatalities by Industries

The total number of fatalities recorded for the year was 974, being classified under the various groups of industries as follows: transportation and public utilities, 162, or 16.63 per cent of the total; agriculture, 150, or

15.40 per cent; mining, non-ferrous smelting and quarrying, 142 or 14.58 per cent; construction 114, or 11.71 per cent; logging, 113, or 11.60 per cent; manufacturing, 98, or 10.06 per cent; service, 82, or 8.42 per cent; trade, 48, or 4.93 per cent; fishing and trapping, 45, or 4.62 per cent; electric light and power, 20, or 2.05 per cent.

The table of fatalities by months shows the highest points to have been reached in July and October, 107 being recorded in each of these months, with 104 in May and 100 in August, the average per month being 81.17. The low point for the year, 57, was reached in April. The table gives the number of persons gainfully employed in most of the

industries, the latest census figures available being given in each case. For agriculture, logging, construction, trade, finance and service, etc., the figures were those of the decennial census of 1931; for manufacturing, from the annual census of industry for 1932, for mining, fishing, electric light and power, steam railways, street and electric railways, telegraphs and telephones, and express, from the annual census of industry for 1933.

Prior to 1932 figures had been included showing for each industry the accident frequency, that is the number of fatalities per 1,000 persons employed, while the figures as to numbers employed were not in any

instance those for the year under review, it was considered that they afforded a reasonably accurate estimate for this purpose, namely, to show the accident ratio in each industry as compared with the others. In the case of 1932, 1933 and 1934, however, the difference in numbers employed has been so marked that figures for earlier years, though the latest available, do not afford even approximate estimates and frequency rates based on them would be misleading and are therefore not given. The latest figures available as to numbers employed, however, are included for general comparative purposes.

(a) These fatalities include accidents to fishermen and seamen outside Canadian waters and such accidents are assigned to the provinces in which the various ships were registered, and exclude accidents to Canadian fishermen and seamen on boats registered in another country. For quarterly reports of accidents see the LABOUR GAZETTE for May, August and November, 1934, and February 1935.

(b) Revised figures for 1933.

### Fatal and Non-fatal Accidents in Canada Recorded by Provincial Workmen's Compensation Boards

The Labour Department's records of industrial accidents include only fatal accidents and fatalities arising out of employment, that is from industrial diseases, etc. The only in-

formation of a comprehensive nature as to non-fatal accidents is from the records of the Workmen's Compensation Boards in the various provinces, except that in manufac-

turing, mining, and steam and electric railway operation accidents are dealt with by various governmental departments and commissions, and these are also covered by the Workmen's Compensation Boards.

The annual reports of the Workmen's Compensation Boards are reviewed from time to time in the Labour Gazette, information being given as to accidents, amounts paid in compensation, etc. The annual reports of the

INDUSTRIAL ACCIDENTS, NON-FATAL AND FATAL IN CANADA, 1929, 1930, 1931, 1932, 1933 AND 1934,

(a) Accidents requiring medical treatment but not causing disability for a sufficient period to qualify for this compensation. The period varies in the several provinces; figures not reported by some Boards.

(b) The province of New Brunswick Board reports 1,774 minor accidents in 1929, 1,580 in 1930, and 442 in 1931, involving no compensation or medical aid.

(c) Saskatchewan from July 1, 1930.

(d) Cases of "medical aid only" included only after Sept. 1, 1931.

(e) Preliminary figures.

several Workmen's Compensation Boards for 1933 were summarized in the following issues: New Brunswick, April, 1934, page 331; Ontario, British Columbia and Saskatchewan, May, 1934, pages 428-432; Nova Scotia and Manitoba, June, 1934, pages 523-524; Alberta, July, 1934, pages 646-647; Quebec, October, 1934, pages 920-922.

None of the provincial Boards have jurisdiction over all industries, so that the accidents recorded are those in certain industries only. Most of the Boards deal with accidents in logging, mining, manufacturing, construction, transportation and public utilities, excluding agriculture, trapping, finance, domestic service, etc., but including to some extent fishing, trade and government service.

The accompanying table summarizes the figures as to non-fatal accidents recorded by the several Provincial Workmen's Compensa-

sation Boards for 1929, 1930, 1931, 1932, 1933 and also gives some preliminary figures for 1934. It may be observed that the Department of Labour's figures show 808 fatal industrial accidents as occurring during 1933, while the total number of fatal accidents which were included by the Provincial Workmen's Compensation Boards for that year was 481, these figures including none for Prince Edward Island. This difference is largely accounted for by the fact that the Provincial Boards do not include accidents in all industries. In addition, however, the Board's records include only accidents to employees, while the Labour Department's records include accidents to all persons when occupied in industry, including employers and workmen carrying on their own business, and there are many such, particularly in trucking, trade, etc., as well as in agriculture.

### **Selection of Employees' Representatives for Collective Bargaining in U.S.A.**

A study of the use of employee elections to meet special situations developing under the National Industrial Recovery Act in the United States is given in the January issue of the *Monthly Labour Review*, published by the U.S. Department of Labor.

The device of elections, in which wage earners were given opportunity to indicate their choice of representatives for collective bargaining, was extensively used by the National Labour Board, it is stated. During the life of the Board—from its establishment on August 5, 1933, to its dissolution and replacement by the National Labour Relations Board on July 9, 1934—some 183 elections were conducted in 546 separate plants or other industrial units. Held under the direct supervision of the National Labour Board or of some of its 19 regional labour boards, these elections took place in 36 States and 50 industries, and were participated in by over 100,000 employees. In the larger number of cases they offered a choice between a trade union and some form of non-union employee representation; in a smaller number of cases they offered an opportunity simply to accept or refuse a trade union as representative; and in a few cases a choice between rival trade unions. Among 546 plants or other units in which elections were held, in 408 cases or 74.7 per cent, a trade union won the election. Of 103,714 votes counted, 71,931 or 69.4 per cent, were cast for trade union representation.

Recent experience proves, in the writer's opinion, that Government-sponsored employee

elections may be a useful device in promoting the end of peaceful and stable industrial relations through collective bargaining. Through holding an election, a Government agency as umpire may clarify a situation in which real doubt exists as to who are the representatives of the majority of the employees. It may also through these elections educate both groups in industry in useful techniques in collective bargaining, and thus promote constructive industrial relationships.

As recorded in the last issue of the *LABOUR GAZETTE*, page 100, Dr. I. D. Cotnam (North Renfrew) introduced a resolution in the House of Commons that the provisions of the Old Age Pensions Act should apply to blind people over forty years of age. This resolution, on motion of Hon. W. A. Gordon, Minister of Labour, was referred to the Select Standing Committee on Industrial and International Relations. On February 21, this Committee heard the submissions of representatives from organizations of the blind. During the hearing, statistics were presented which placed the number of blind in Canada between the ages of forty and seventy years, estimated as eligible for pension consideration, at 2,614. A subcommittee of five was appointed to go into the representations made and report on same.

Following this action of the Federal Government in thus referring the question to the Committee, a resolution was introduced in the Legislature of Manitoba to reaffirm its action of 1931 in unanimously favouring a pension scheme for blind persons.

## LEGAL DECISIONS AFFECTING LABOUR

**Time spent awaiting employer's instructions held to be time "on duty"**

A Winnipeg Taxi Company (the defendant in this case) was charged in the magistrate's court that it did unlawfully pay a cab driver in its employ less than the minimum wage required by the city by-laws. In a statement of admitted facts to the magistrate it was indicated that the driver was required, after completing a trip with a passenger, to report to the defendant, from one of a number of telephone stations maintained by the defendant and having direct communication with the defendant's office; and that, upon reporting his intentions, he was free to leave his car (cab) and to return later, or to wait with his car at the telephone station until he received instructions to make a trip. The statement also showed that the employee was paid for the time he was actually engaged in making his trips and until he informed the office by telephone that he had completed the trips and had returned to a telephone station, but was not paid for time spent waiting at a station between trips.

The charge was dismissed by the police magistrate, who in referring the case for the opinion of the Court Appeal asked:

"Was I right in holding that the time spent by the said taxi driver with his cab at the Company's telephone stations was not time 'on duty' within the meaning of that term as used in the taxi-cab by-law?"

It was argued by counsel for the taxi-cab company that it was agreed that when the driver completes his trip and takes his car to a telephone station, and reports that he is there, his employment ceases until a new contract of hiring is made, for he may desert his car or wait in it for further orders.

However, Mr. Justice Dennistoun in his judgment declared that:

"It is hard to accept the statement that a driver may leave his car at a distant point to freeze up in winter or as a temptation to thieves or trespassers at all times, at his pleasure, without any responsibility whatsoever for so doing. A man who did so once would in all probability never be employed again.

"It is more reasonable to hold" he stated, "that so long as a man is in charge of a motor car at a telephone station waiting for order he is 'on duty,' as the by-law puts it, and opinion is expressed that that is what the by-law means."

The decision of the Appeal Court was that the time spent by the taxi-cab driver awaiting

instructions at the company's telephone station was time spent on duty within the meaning of the by-law prescribing a minimum wage for taxi drivers.

*Rex versus Moore Taxi Company Limited (Court of Appeal, Manitoba) Western Weekly Reports, 1935, Vol. 1, page 316.*

**Night Watchman Cannot Claim Fireman's Wage When Firing not his Main Duty**

An action for the difference between the wages of a night watchman and of a fireman, according to the scale approved by the Dominion Government for work undertaken by the Harbour Commissioners of Quebec, was dismissed with costs in the Superior Court of Quebec in November, 1934, on the ground that the plaintiff's duties were those of a night watchman and not those of a fireman.

The contract for the work between the defendant and the Quebec Harbour Commissioners required that the schedule of wages to be paid to all workmen should conform to the Fair Wage Policy of the Dominion Government. Under the wage scale established, a fireman was paid 45 cents an hour and a labourer 40 cents an hour. The plaintiff, after working for some days as a labourer, was offered and accepted the job of night watchman at \$21 a week. Labourers worked when the weather permitted but the watchman was continuously employed and received his wage regularly from January 25 to June 21, 1933. Later, he claimed \$577.45 as the difference between the amount he received and the amount alleged to be due to a fireman, basing his right to action on section 14a of the Professional Syndicates Act as amended in 1931. Section 14a reads:—

"If it be stipulated in any contract that workmen, or the members of the syndicate, union or federation of syndicates shall receive a stated wage, such workmen or members, although not a party to the contract, are entitled to the rate of wages therein stated, notwithstanding any renunciation thereto afterwards agreed upon by them, whether express or implied."

The evidence showed that firemen working during the day fixed the fires for the night so as to maintain only sufficient steam to keep the boilers and pipes from freezing. The watchman had only to add enough coal to keep up the fire during the night. Comparatively little coal was required. The plaintiff had a fireman's certificate but neither the defendant nor the foreman had required such a certificate from him. He had freely

accepted the job of night watchman at the rate of \$21 a week knowing what work he would have to do. The Court held that on the evidence the plaintiff had been hired as a watchman and not as a fireman and that there was no ground for awarding him the amount claimed.

*Michaud v. Nolin et Commissaires du Havre de Quebec* (1935) Vol. 73 *Rapports Judiciaires de Quebec, Cour Superieure*, p. 85.

#### **Court Awards Wage Claim Under Collective Agreements Extension Act (Quebec)**

In the Superior Court of Quebec a painter claimed wages of \$57.10 from his employer, a building contractor, according to the terms of an agreement under the Collective Labour Agreements Extension Act which provided a wage rate of sixty cents an hour for painters in the district of Montreal, and which was in effect since July 21, 1934. The plaintiff further stated that he was a qualified painter and that the defendant refused to pay him the wages stipulated in the agreement, and that he was therefore entitled under the Act to recover from the defendant the amount representing the difference between the agreement rate and the actual wages received.

The defendant claimed that he was not covered by the Act, Order in Council, or wage rates referred to; that the Collective Labour Agreements Extension Act and the Order in Council putting into effect the agreement, constituted a restriction of, and an infringement upon, citizens' rights; that he was not

a construction contractor, but simply engaged in construction and repair work (for himself in this case); that the Order in Council was not compulsory at the time the work was begun; that it did not apply to private undertakings; that the rate of 20-25 cents paid to the plaintiff was the only one agreed to between the parties; that the plaintiff was a casual inexperienced worker (then unemployed); and that the rate of 20-25 cents per hour paid him was a fair and reasonable rate.

The Court held that a contractor building for himself, and on his own property, a certain number of houses remains an "industriel" and is covered by the Collective Labour Agreements Extension Act. It also ruled that should such a contractor not award a contract for the painting work, but himself employ painters at a rate of 20-25 cents per hour, he cannot claim the exception provided by article 5 of Order in Council 1780 (legalizing agreements made between associations of employers and unions of workers). The argument of the plaintiff's inexperience, concluded the Court, is unacceptable in view of the fact that he was issued a competency certificate by the board of examiners created by the Act.

The defendant was ordered to pay the plaintiff the sum of \$57.10 with interest from October 5, 1934, plus costs.

*Michaud versus Forest* (1935), Vol. 73 *Les Rapports Judiciaires de Québec, Cour Supérieure*, p. 42.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

FURTHER improvement was recorded in employment at the beginning of March, according to returns received by the Dominion Bureau of Statistics from 9,062 employers of labour, each with a minimum of fifteen employees, and representative of all industries except agriculture, fishing, hunting and highly specialized business. The working forces of these firms aggregated 902,301 persons, as compared with 885,961 in the preceding month. This increase was considerably above the average gain recorded in the fourteen preceding years for which statistics are available; it also exceeded that noted on March 1 in any earlier year of the record except 1922. The index number (based on the 1926 average as 100) stood at 96.4 as compared with 94.6 in the preceding month, while on March 1 in the last fourteen years it was as follows:—1934, 92.7; 1933, 76.9; 1932, 88.7; 1931, 100.2; 1930, 110.2; 1929, 111.4; 1928, 102.6; 1927, 97.5; 1926, 92.6; 1925, 88.1; 1924, 91.8; 1923, 91.0; 1922, 82.9 and 1921, 89.1.

At the beginning of March, 1935, the unemployment percentage reported to the Department of Labour by local trade unions stood at 18.2, in contrast with 18.1 per cent at the beginning of February, 1935, and with 20.0 per cent at the beginning of March, 1934. The percentage for March was based on the reports forwarded by 1,721 labour organizations, involving a membership of 160,929 persons.

Reports received by the Department of Labour from the offices of the Employment Service of Canada showed declines in the volume of business transacted during February, 1935, when the average daily placements were compared both with those of the preceding month and also with those of February a year ago, construction and maintenance, farming, services, and logging being mainly responsible for the loss in the first instance, and construction and maintenance and farming again registering the heaviest declines under the second comparison. Vacancies in February,

1935, numbered 25,453, applications 41,487, and placements in regular and casual employment 24,138.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting and rent was \$16.10 at the beginning of March as compared with \$16.06 for February. The slight increase during the month was due to the higher cost of foods, mainly meats and butter. Some comparative figures for the cost of the budget are \$16.51 at the beginning of March, 1934; \$21.96 for March, 1930; \$20.96 for March, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.35 for March, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1926 as 100, was 72.0 for March as compared with 71.9 for February; 72.0 for March, 1934; 91.8 for March, 1930; 101.3 for March, 1926; 98.3 for March, 1922; 164.3 for May, 1920 (the post war peak); and 64.7 for March, 1914.

The most recent statistics available reflecting industrial conditions in Canada are given in a table on page 308. The index of the physical volume of business was higher in February than in the preceding month and higher also than in February, 1934. Of the principal factors in the index those used as indicators of mineral production, manufacturing, construction, trade employment, car loadings and exports were higher than in the preceding month, while electric power output and imports were lower. Comparing February, 1935, with the same month in 1934 all these factors were appreciably higher in the former period. Information available for March shows contracts awarded to be lower than in February but higher than in March, 1934. Wholesale prices have showed little movement in recent months, the index being at the same level in March, 1934, and 1935. Employment was at a higher level both as compared with the previous month and with the corresponding month last year. The number of cars loaded during four weeks in March was considerably less than in February but greater than in March a year ago.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(4) Figures for end of previous month.

(5) Figures for four weeks ending March 30, 1935 and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending March 23, February 23 and January 26, 1935, March 24, February 24, and January 27, 1934.

(7) MacLean's Building Review.

During March there were on record thirteen strikes and lockouts, involving 3,276 workers, resulting in a total time loss of 21,043 man working days, as compared with seven disputes involving 1,545 workers with 16,116 days' time loss in February. In March, 1934, there were twenty-nine disputes, involving 7,098 workers, with time loss of 88,642 days. The more important of the disputes during March included strikes of coal miners at Corbin, B.C., coal miners at New Waterford, N.S., and millinery workers at Montreal, P.Q. The only dispute of importance in February involved coal miners at Springhill, N.S., for a few days. In March last year three disputes involved most of the workers and caused nearly all of the time loss, namely loggers in Vancouver Island, B.C., coal miners at Stellarton, N.S., and millinery workers at Montreal, P.Q. Of the thirteen disputes in March, nine were recorded as terminated, two resulting in favour of the employers concerned, two in favour of the workers involved with the results of five being recorded as compromises. The disputes unterminated at the end of the month numbered four and involved some 1,850 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off or definitely declared terminated by the unions involved.

#### **Progress of federal program of social legislation**

Additional measures in the Dominion Government's program of social legislation were introduced in Parliament during the past month. Reviews and summaries of legislation in process of enactment in the pursuance of the Government's social policy have already appeared in the LABOUR GAZETTE as follows: Employment and Social Insurance Act (February, 1935, pages 135-139); Limitation of Hours of Work Act and Weekly Rest in Industrial Undertakings Act (March, 1935, page 233-234); approval of certain Draft Conventions of the International Labour Organization of the League of Nations (February, 1935, page 94).

The first of these enactments—that providing for employment and social insurance—has received its three readings in the House of Commons and its first two readings in the Senate. It was then referred to the Senate Committee on Banking and Commerce in order to permit of representation being made from interested parties. These representations are still being heard.

**Minimum Wages.**—On March 15, the House of Commons gave approval of the Draft Convention of the International Conference con-

cerning the creation of minimum wage fixing machinery (LABOUR GAZETTE, July, 1928, page 751). Four days later a measure to provide for minimum wages, pursuant to this Convention was introduced and given its first reading. The Bill has now received its three readings in the House of Commons.

**Eight Hour Day.**—The Limitation of Hours of Work Act was amended in two important respects, sections 9 and 10 being redrafted. As explained (during its passage through the House of Commons) by Hon. W. A. Gordon, Minister of Labour, under the amended section 10 "power is given to make a regulation which will cover cases of exceptional pressure of work," and "such activities as cannot be strictly adjusted to the eight hour day principle."

Section 9, as amended, gives a period of one year for railway workers in the running trades and the railway companies, who have made agreements on the mileage basis to adjust working conditions under the Act. After pointing out that for many years these agreements had been negotiated on a mileage basis, the Minister of Labour summarized the necessity for the amendment as follows:

"These agreements are extremely complex, they are as complex as the transportation system itself. Having grown up over that long period of time, the representatives of all parties, both the railway companies and the brotherhoods and the labour congress, recognized that it was physically impossible to readjust within a shorter period than twelve months, agreements that would probably have to be entirely changed to an hourly basis rather than a basis of mileage or a combination of both."

#### **Functions of Economic Council of Canada**

In addition to the above, the Dominion Parliament has adopted a Bill (introduced by Right Hon. Sir George H. Perley, Acting for the Prime Minister) providing for the establishment of a national economic council for Canada. According to the Bill, the Council is to consist of the Prime Minister as chairman and fifteen members appointed by the Governor in Council and selected from specialists in social and economic problems, seven of whom are to be drawn from the public service and five from organized bodies, together with three additional members having similar qualifications.

Outlining the purpose and functions of the Council, Hon. Sir George H. Perley, referred to the two broad types of such bodies now established in some thirty countries, i.e. "those having more or less definite executive

functions and those created for advisory purposes alone." The body proposed for Canada was in the latter category. As stated by Sir George: the "economic advisory council is primarily an agency for inquiry and report. It is desirable to emphasize the point that it is not an agency for determining policy; policy must be determined by the government. It is not an agency for administration; administration must be the work of departments and commissions and does not fit in well with the central purpose of the advisory council, namely that of inquiry. While it should contribute towards a more considered and ordered planning of governmental affairs, it is not an agency for controlling the economic activities of the nation."

He further considered that the machinery provided will "solve for some time to come what has undoubtedly developed into a prime need of government—that of keeping abreast of economic thinking in general and of being continuously equipped with the materials required in the formulation of its broader economic policies"....

#### **Report of Royal Commission on Price Spreads**

With recommendations resulting from a comprehensive survey of practically every phase of the country's business and industrial life, the report of the Royal Commission on Price Spreads and Mass Buying was tabled in the House of Commons on April 12. This body was appointed by Parliament on February 2, 1934, as a special select committee to inquire into the causes of price spreads etc., the scope of the inquiry being defined in a resolution moved by the Prime Minister. By Order in Council of July 7, 1934, the committee was constituted a Commission under the Inquiries Act, and on November 19 a second Order in Council clarified the scope of the inquiry and authorized the Commission to continue the investigation, and report on all or any matters referred to it.

The recommendations, embodied in the report now submitted, are contained in a number of major sections, and these will be reviewed (with special reference to the labour features) in a subsequent issue. Broadly, it is recommended that there be more strict control in all avenues of finance, business and industry with greater government participation in industrial relations.

#### **Totals of Dominion relief expenditure**

In the House of Commons debate on the third reading of the Relief Act, 1935 (the text of which is given on page 321 of this issue) the Hon. W. A. Gordon, Minister of Labour, replying to a question,

stated that for the fiscal year ending March 31, 1935, the total amount which the Dominion will have distributed in relief would be approximately \$32,000,000 as compared with \$41,000,000 in the previous year. During the past five year period, he stated that the Dominion had spent \$170,000,000 in relief of various forms, including grants to the dried out areas, the wheat bonus, etc. Analyzing the basis of the advances to provinces for 1935 the Minister stated in part, as follows:—

"Up to the end of July, 1934, a percentage of all relief in municipalities was assumed by the Dominion—one-third. In unorganized territories the percentage assumed by the Dominion was fifty per cent with the provinces. After July 31, and after the conference was held between the Dominion and the provincial premiers; .. a lump sum grant in aid was given to each province. There were discussions with the representatives of the provinces and the amounts were arrived at after a review of what the situation had been in the years prior to 1934 and what the provinces thought they needed and the Dominion considered it could give to them. I do not think that in any instance there was at first unanimity of opinion because it does not need much argument to show that that could scarcely happen, having regard to what had taken place in the years before the grants in aid to the provinces were determined."

#### **Rehabilitation of western drought areas.**

A project for the rehabilitation of drought areas in western Canada was introduced in the House of Commons on April 10 and the Bill given its first reading. In sponsoring this measure, Hon. Robert Weir, Minister of Agriculture, reviewed the immediate objectives sought in this program of reclamation.

While some experimentation had been made in small areas, the Minister explained that such were too localized, and that the efforts attempted had been nullified by surrounding conditions. Continuing, the Minister stated:—

"It is proposed to set aside five very much larger areas, corresponding to a township or thirty-six square miles, three in Saskatchewan, one in Alberta and one in Manitoba. We propose to carry on these investigations and at the same time demonstrate what can be done in the way of reclaiming areas that have been abandoned entirely and given up as well nigh hopeless.

"In addition to that a program is being undertaken to increase as quickly as possible the development of the best grass seeds, grains and clover seeds, and to make them available in these areas, if it is demonstrated in the present year that they will do what we hope

may be done with them. Further, tree planting will be carried on to a limited extent in the first year, increasing in extent from year to year. Careful plans have been drawn up in an effort to assist the farmers and the ranchers in the conservation of the water in the district. Throughout the whole program it is our purpose to assist the farmers, and to demonstrate whether or not the people in these areas can continue to live there with only very little more moisture than they are now receiving. Our first aim is to do everything possible to make these people self-sustaining. Secondly we must decide which areas are best suited for grain growing, which are best suited for ranching, and the best way to handle those areas which are intermediate."

**Senate  
Committee  
recommends  
health  
conference.**

The Senate Standing Committee on Public Health and Inspection of Food, in its second report submitted on April 3, recommended:—

1. The early convening of a conference of Provincial Ministers of Health with the object of ascertaining the general conditions of health throughout Canada.

2. That the Government co-operate with provincial authorities in co-ordinating the most effective measures to maintain and improve health conditions in Canada.

3. That this conference consider the advisability of continuing federal grants to divers bodies and associations which make it their concern to educate the public in the field of social health and prevention of disease and of re-establishing certain grants which have been discontinued, namely: those to the Canadian National Committee for Mental Hygiene and the Canadian Social Hygiene Council.

**Summary of  
mothers'  
allowances  
in Canada.**

A recent compilation prepared by the Canadian Council on Child and Family Welfare indicates that the six Canadian provinces in which mothers' allowances systems are in effect, viz.—Alberta, British Columbia, Manitoba, Nova Scotia, Ontario and Saskatchewan—are expending \$5,200,000 to \$5,300,000 per annum for aid to 15,750 families, having in care approximately 40,200 children. Of the remaining three provinces, no such legislation exists in Quebec or Prince Edward Island, while in New Brunswick an Act was passed in 1930 but never proclaimed. Detailed information on the administration of this legislation in each of the provinces where it is in force is published annually by the respective provincial authorities, and these reports are reviewed in The LABOUR GAZETTE.

**Industrial  
Standards Bill  
in Ontario  
Legislature.**

With the purpose of permitting "the Government to promote and encourage agreements between employers and employees in the various industries and to permit such agreements to be given the force of law for a period of one year," the Industrial Standards Act was introduced in the Ontario Legislature on March 22. By industrial standards is meant the schedule of "the maximum number of hours in each day or of days in the week, or both, which an employee shall be permitted to work;" and the schedule of minimum wages paid to an employee.

Administered by the Minimum Wage Board, the Act is to apply to every business and industry except mining and agriculture, and the term "employee" is all inclusive with the exception of domestic servants. The Minister of Labour is empowered to establish zones within which, upon petition of employees or employers of any industry, a conference may be convened for determining the standards applicable to such industry. Upon agreement on schedules of wages and hours, the Minister is empowered to declare such schedules in force throughout the industry within the defined zone or zones. Local boards in each zone are to hear complaints of employees and employers to whom the schedules apply.

An employer who violates any of the regulations is liable to a fine of not less than \$25 and not exceeding \$100, and in default of payment, to imprisonment not exceeding three months, besides paying the full amount of wages unpaid. Employees who agree to work for less wages or more hours than contained in the schedules will be faced with penalties ranging between \$1 and \$10, or imprisonment for not more than ten days.

**Limitation of  
working hours  
in Nova Scotia.**

As intimated in the Speech from the Throne, there has been introduced in the Nova Scotia Legislature a bill respecting the limitation of the hours of work in certain industrial undertakings. The bill, which was given its first reading on March 14, defines the term "industrial undertakings" as including:—

(a) Mines, quarries, and other works for the extraction of minerals from the earth;

(b) Industries in which articles are manufactured, altered, cleaned, repaired, ornamented, finished, adapted for sale, broken up or demolished, or in which materials are transformed; including ship-building and the generation, transformation and transmission of electricity or motive power of any kind;

(c) Construction, reconstruction, maintenance, repair, alteration, or demolition of any building, railway, tramway, harbour, dock, pier, canal, inland waterway, road, tunnel, bridge, viaduct, sewer, drain, well, telegraphic or telephonic installation, electrical undertaking, gas work, waterwork or other work of construction, as well as the preparation for or laying the foundations of any such work or structure.

The Act is to be administered by a Board of Adjustment, consisting of the Deputy Minister of Labour as chairman, and two other appointed members. This Board is authorized to determine the number of working hours per day or per week, the categories of workmen employed in the establishments covered by the Act, and the districts to which the provisions shall apply as well as the duration of time. It is also provided that the limit of working hours may be exceeded in cases of accident or urgency, etc. Records of wages and hours, and a register of all employees are to be maintained.

#### **Recent trends in United States legislation**

In an article elsewhere in this issue there is given a summary of several measures introduced in the United States Congress.

Though varying in specific purpose, collectively they represent a cross-section of recent developments in the program for industrial recovery instituted by President Roosevelt. At this writing, only one of these measures—the Works Relief Bill—has been finally adopted. Three have advanced through committee, while others are still in committee stage, with representations being heard for and against. An outline is also presented of the effect of the codes on hours of work and earnings.

#### **Employment situation in various countries.**

The March issue of the *Ministry of Labour Gazette* (Great Britain) contains a review of statistics of employment and unemployment in various countries for the period 1929 to 1934. While noting that comparisons based on the statistics presented are subject to qualification owing to variations in the statistical bases of the different countries, yet it is stated that the figures "provide a broad indication of the nature and direction of the changes in the amount of unemployment in each country."

An analysis of the statistics indicates that only in Great Britain, South Africa and Japan were the numbers in employment in 1934 at or near the level of 1929. However, in Canada, United States, Sweden, Germany and Poland

the figures for 1934 showed substantial improvement over those for 1932 and 1933, while in France and Switzerland no improvement was registered, and in Italy the gain was slight. In Czechoslovakia, the last three quarters of 1934 showed a marked increase in employment over the first quarter of the year, the same being also true of Italy.

#### **Registration of Canadian ratifications.**

It has been announced at Geneva that the formal ratification by Canada of the Hours of Work (Industry) Convention, 1919, and the Weekly Rest (Industry) Convention, 1921, was registered with the Secretariat of the League of Nations on March 21, 1935.

Meeting in conference at Montreal on March 26, Mayors and representatives from approximately one hundred Canadian municipalities unanimously adopted a resolution "that from and after April 1, the Dominion Government assume the entire cost of unemployment relief in the Dominion of Canada." This recommendation was subsequently presented before members of the Dominion Cabinet and the delegation was informed that their representations should be made to the provincial governments.

An item in the last issue of the *LABOUR GAZETTE* on page 304 referred to a resolution introduced in the House of Commons by Dr. I. D. Cotnam which called for the application of the Dominion Old Age Pensions Act to blind persons over forty years of age. On motion of Hon. W. A. Gordon, that resolution was referred to the Select Standing Committee on Industrial and International Relations. The Committee in its report to the House unanimously recommended the application of the Act to blind persons reaching 40 years of age. However, in view of the fact that this legislation is not yet in force in New Brunswick and Quebec (as pointed out in the committee report), Dr. Cotnam moved that the resolution be referred back to the Committee with power to bring in a recommendation for a special act covering the nine provinces.

Replying to questions in the Quebec Legislature respecting the provincial Workmen's Compensation Act, Hon. C. J. Arcand, Minister of Labour stated that the number of claims approved for compensation in Schedule I industries in 1934 totalled 14,242. Medical aid only was required in 15,181 other cases. From January 1, 1934 to November 30, 1934, a total of \$436,662.74 was expended in medical assistance in Schedule I.

## STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1935

THE following table shows the number of disputes, workers involved and time loss for March, 1935, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Mar. 1935...	13	3,276	21,043
*Feb. 1935...	7	1,545	16,116
Mar. 1934...	29	7,098	88,642

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time is frequently not received until some time after its commencement.

The number of strikes and lockouts during March shows a considerable increase over the number during February, with increases in the numbers of workers involved and in the time loss incurred, but considerable decreases from the figures for March last year. The increases for the past month were due chiefly to strikes involving coal miners at Corbin, B.C., and at New Waterford, N.S., and millinery workers in Montreal, P.Q., while the only strike of importance in February involved coal miners at Springhill, N.S., for a few days. In March last year strikes of loggers in Vancouver Island, coal miners at Stellarton, N.S., and millinery workers at Montreal, P.Q., involved comparatively large numbers of employees and resulted in considerable time loss.

Five disputes, involving 297 workers, were carried over from February, including a dispute of men's clothing factory workers employed by one firm in Winnipeg, Man., not reported in time for inclusion in the table in the March issue of the LABOUR GAZETTE. Eight disputes commenced during March. Of the thirteen disputes on record, nine terminated during the month, two in favour of the employers involved, two in favour of the workers concerned, while compromise settlements were

reached in five cases. At the end of March, therefore, there were four disputes in progress recorded as strikes or lockouts, namely: coal miners, Corbin, B.C.; compositors, Calgary, Alta.; millinery workers, Montreal, P.Q., and furniture factory workers, Chesley, Ont.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected, but which the unions concerned have not declared terminated. Information is available as to four such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; moulders, Peterborough, Ont., February 27, 1934; compositors, London, Ont., March 1, 1934, two employers; and hat factory workers, Montreal, P.Q., March 5, 1935, one employer, this last being added this month. The dispute involving shoe factory workers employed by one firm at Preston, Ont., commencing September 13, 1934, and carried in this list for some time, is recorded as lapsed by the end of March and has consequently been removed from the list.

In connection with the strike of printing compositors in two newspaper establishments at London, Ont., which commenced on March 1, 1934, the strikers being replaced from time to time (shown in the February issue of the LABOUR GAZETTE as removed from the statistical record to the above paragraph), the department was informed during March that negotiations had been resumed with prospects of a settlement.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A dispute involving deckhands on two steamships at Vancouver and New Westminster, B.C., on February 25 and 26, was noted in the March issue of the LABOUR GAZETTE. Reports from the parties involved show that forty-five men ceased work for one and one-half days, securing their demands for payment of overtime wages at 50 cents per hour after eight hours per day or on Sunday, and increases in wages for firemen from \$60 per month with board, etc., to \$67.50. The strikers were supported by longshoremen refusing to unload the ships. The employer stated that as a re-

sult of these increases in operating costs, it was necessary to lay up two of the ships in operation.

A minor dispute involving deckhands, etc., on a steamship at Vancouver, B.C., on March 25 has been reported in the press. The men ceased work for a few hours, securing payment of wages for overtime work after eight hours, increases in wages for some classes, and one day in seven off.

A similar dispute on another ship at Vancouver on March 26 was also reported, demands for payment of wages for overtime work being conceded, with no cargo to be handled by the crew while in the port.

A stoppage of work for a few hours in two dressmaking establishments in Montreal, P.Q., on March 19 has been reported in the press. It appears that this was done in order to negotiate changes in piece rates.

A minor dispute involving bricklayers and carpenters on two buildings in Toronto for a short time early in March was reported in the press, increases in wages being secured.

A dispute involving coal miners at Princeton, B.C., in February was noted in the March issue of the LABOUR GAZETTE. Reports secured by the Department show that one mine was closed on February 19 owing to financial difficulties, wages not having been paid that month. The management stated that operations under an agreement with the Mine Workers' Union of Canada, to be in effect until November 30, 1935, had involved great losses, due to interference by union officials with the management of the mine, particularly in the hiring of men and placing them in the mine. Arrangements were made to pay the wages due.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**BAKERY EMPLOYEES, TORONTO, ONT.**—As stated in the LABOUR GAZETTE for March a settlement of this dispute affecting one employer was reached early in March, only union members to be employed after certain fixed dates, replacing those taken on during the dispute.

**LEATHER JACKET MAKERS, HAMILTON, ONT.**—This dispute as to wages, distribution of work and alleged excessive overtime under the agreement in effect was settled through the mediation of a conciliation officer of the Provincial Department of Labour. Work was resumed under the terms of the agreement, some of the rates for piece work being adjusted.

**MEN'S CLOTHING FACTORY EMPLOYEES, WINNIPEG, MAN.**—This dispute involving one factory, not reported in time for inclusion in the

March issue of the LABOUR GAZETTE, commenced on February 25, against the discharge of one employee for alleged inefficiency, and was reported terminated at the end of the month, in favour of the workers.

**PRINTING COMPOSITORS, CALGARY, ALTA.**—Compositors in one newspaper establishment, involved in a cessation of work since January 10, 1935, as a result of a reduction in wages, were joined by five compositors in the job printing department on March 6. The dispute was reported unterminated at the end of the month.

**COAL MINERS, NEW WATERFORD, N.S.**—Employees in one mine ceased work on March 14, demanding full pay for time lost through a breakdown of equipment. Work was resumed on the next regular working day. As a result of discussions later between the management and representatives of the miners it was decided to make a complete check of operations in the mine for one week.

**HAT FACTORY WORKERS, MONTREAL, P.Q.**—A number of workers in one establishment ceased work on March 5, demanding recognition of the International Hat, Cap and Millinery Workers' Union and the observance of union wages and working conditions. The employer stated that only eight out of fifty employees ceased work and that operations were being carried on in full, also that he had a verbal agreement with another union. Following intimidation and threats by the strikers a temporary injunction against this was secured in the courts. By the end of the month employment conditions were reported to be no longer affected.

**MILLINERY WORKERS, MONTREAL, P.Q.**—Employees in thirty-five establishments in Montreal ceased work on March 29, the agreement between the United Hatters, Cap and Millinery Workers' International Union and the Millinery Manufacturers' Association having expired and not been renewed with changes proposed by the union, namely wage increases the forty hour week and employment of union members only. On April 1 a settlement was reached for most of the establishments providing for the forty hour week, the "closed shop" and certain wage increases. Negotiations as to the other establishments were to follow.

**UPHOLSTERERS (FURNITURE), TORONTO, ONT.**—Employees in one establishment ceased work on March 1 against the discharge of one employee. The union alleged that this was an attempt to break the agreement in effect until August. Work was resumed on March

## STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1935

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(a) Strikes and Lockouts in progress prior to March, 1935.</b>			
MINING, ETC.— Coal miners, Corbin, B.C.....	200	14,000	Commenced Jan. 21, 1935; against dismissal of worker and for certain changes in conditions; unternminated.
MANUFACTURING— <i>Vegetable Foods—</i> Bakery employees, Toronto, Ont.....	14	28	Commenced Jan. 2, 1935; against discharge of employee; terminated Mar. 2, 1935; compromise.
<i>Fur, Leather, etc.—</i> Leather jacket makers, Ham- ilton, Ont.....	23	391	Commenced Jan. 24, 1935; for increased wages, reduction of overtime and equal distribution of work; terminated Mar. 20, 1935; compromise.
<i>Textiles, etc.—</i> Men's clothing factory work- ers, Winnipeg, Man.....	10	200	Commenced Feb. 25, 1935; against discharge of worker and for recognition of union and shop committee; terminated Mar. 31, 1935; in favour of workers.
<i>Printing and Publishing—</i> Compositors, (printing), Cal- gary, Alta.....	30	780	Commenced Jan. 10, 1935; against decrease in wages; unternminated.
<b>(b) Strikes and Lockouts commencing during March, 1935.</b>			
MINING, ETC.— Coal miners, New Waterford, N.S.....	1,000	1,000	Commenced Mar. 14, 1935; for full pay during repair period; terminated Mar. 15, 1935; in favour of employer.
MANUFACTURING— <i>Textiles, Clothing, etc.—</i> Hat factory workers, Mont- real, P.Q.....	8	100	Commenced Mar. 5, 1935; for union recognition, wages and working conditions; strikers replaced and employment conditions no longer affected by the end of the month.
Millinery workers, Montreal, P.Q.....	1,400	2,800	Commenced Mar. 29, 1935; for renewal of agreement with increased wages, 40 hour week and "closed shop;" unternminated.
<i>Other Wood Products—</i> Furniture upholsterers, Tor- onto, Ont.....	6	84	Commenced Mar. 1, 1935; against discharge of worker; terminated Mar. 16, 1935; compromise.
Furniture factory workers, Chesley, Ont.....	200	1,200	Commenced Mar. 25, 1935; for reinstatement of union employees; unternminated.
<i>Metal Products—</i> Washing machine factory workers, Brantford, Ont.....	40	60	Commenced Mar. 15, 1935; against dismissal of worker and for increase in wages; terminated Mar. 16, 1935; compromise.
CONSTRUCTION— <i>Buildings and Structures—</i> Painters, Toronto, Ont.....	200	100	Commenced Mar. 1, 1935; for a two months' renewal of union agreement; terminated Mar. 2, 1935; in favour of workers.
<i>Shipbuilding—</i> Ship builders, riveters, etc., St. John, N.B.....	125	300	Commenced Mar. 5, 1935; for increased wages; terminated Mar. 7, 1935; compromise.

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which working time was lost to an appreciable extent.

18, all strikers being reinstated, the union agreement continuing in effect, but the discharged employee was not reinstated.

**FURNITURE FACTORY WORKERS, CHESLEY, ONT.**—Employees in two establishments ceased work on March 26, demanding the reinstatement of members of the United Brotherhood of Carpenters and Joiners discharged from time to time following the organization of a local in November, 1934. In a demonstration, in which workers from other towns participated, windows in one factory were broken. The municipal authorities discussed the situation with officials of the Provincial Department of Labour toward the end of the month with a view to securing a settlement.

**WASHING MACHINE FACTORY WORKERS, BRANTFORD, ONT.**—Employees in one establishment ceased work at closing time on March 14, demanding increases in wages and the reinstatement of the chairman of the employees' committee, who had been dismissed when an increase was requested. Following negotiations between union officials and the employer, work was resumed, the chairman being reinstated and an adjustment in the wage pay-

ment system made. Prior to the strike the employees had written to the Department regarding the dispute and they were informed that the conciliation service of the Department was available if desired.

**PAINTERS, TORONTO, ONT.**—Workers employed by eighteen painting contractors ceased work on March 1 for one day demanding a two months' renewal of an agreement with the painters' local of the Building Trades Industrial Union which expired on February 28, this being conceded. It is not reported that all of the 200 painters affected were employed at the time.

**SHIPBUILDERS, RIVETERS, ETC., ST. JOHN, N.B.**—Boilermakers, riveters, welders, angle-smiths, etc., in one establishment ceased work on March 5, demanding increases in wages, changes in working conditions, and a signed agreement. As stated elsewhere in this issue the Chief Conciliation Officer of the Department of Labour brought about a settlement providing for increases of 2½ cents to 10 cents per hour, and changes in working conditions. Other classes of employees, machinists, etc., were later given increases and the agreements reached are outlined elsewhere in this issue.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, in the review of Strikes and Lockouts in Canada and Other Countries, 1934. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only one each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in February was 43 and 15 were still in progress from the previous month, making a total of 58 disputes in progress during the month, involving 14,800 workers with a time loss of 75,000 working days for the month. Of the 43 disputes beginning in February, 6 were

over demands for increases in wages, 6 over proposed wage reductions and 12 over other wage questions, one over working hours, 14 over questions respecting the employment of particular classes or persons and 3 over other questions; one other stoppage was due to sympathetic action. Settlements were reached during the month in 41 disputes, of which 11 were settled in favour of workers, 18 in favour of employers and 12 resulted in compromises; in 5 other disputes, work was resumed pending negotiations.

### Irish Free State

Two strikes of transport workers began March 2, one a partial strike of railway workers at Dublin and other points, which was caused by a dispute between two rival unions, terminated March 12 through the mediation of government officials; the other was of bus and tram workers in Dublin, caused by the dismissal of an employee and also to secure higher wages, was still in effect at the beginning of April.

### United States

The number of disputes beginning in December was 114 and 132 were still in progress from the previous month, making a total of 246 disputes in progress during the month, involving 70,000 workers and resulting in a time loss of 509,000 working days for the month.

## CONCILIATION WORK OF THE DEPARTMENT OF LABOUR FROM DECEMBER 1, 1934, TO MARCH 31, 1935

CONCILIATION proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act, which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

The Department of Labour has on its staff conciliators and mediators who are stationed at Vancouver, Toronto, Ottawa, and Montreal. The territory of the officer resident in Vancouver comprises the four western provinces. The conciliation officer resident in Toronto confines his activities to Ontario, while the officer in Montreal covers the province of Quebec and the Maritime Provinces. The headquarters of the Chief Conciliation officer are at Ottawa.

These officers are also charged with certain duties arising out of the administration of the Fair Wages Policy applying to contracts let by the Dominion Government and to works aided by federal funds.

The following statement covers the more important conciliation matters dealt with during the period from December 1, 1934, to March 31, 1935. (An article covering the period August 1, 1934 to November 30, 1934, appeared in the Labour Gazette, December, 1934, page 1086).

*Compositors, Calgary Alta.*—Early in January, 1935, a dispute arose between the management of the Albertan Publishing Company, Limited, and the compositors in their employ, members of Local No. 449, International Typographical Union, over a proposed wage reduction of 10 cents per hour. The employers stated the financial condition of the company made such reduction imperative, while the employees contended that the Union had a similar agreement with other publishing companies in Calgary and therefore they could not waive the provisions of the existing agreement with the Albertan Company, which agreement would not expire until May 15, 1935. Negotiations between representatives of

the employees and the employing company were not successful and the men ceased work on January 10th. A few days later a mediator of the federal Department of Labour interview the president of the Company and also the International representative of the Typographical Union but was unable to find any basis of settlement. Approximately 20 men were stated to be involved.

*Metal Miners, Flin Flon, Man.*—In January, 1935, the Employees' Welfare Board of the Hudson Bay Mining and Smelting Company, Limited, Flin Flon, Man., brought to the attention of the Department of Labour certain misunderstandings between that Board and the management of the Company relating to an agreement which was at that time under discussion, and asked for certain information on the subject. The Departmental letter in reply, a copy of which was forwarded to the General Manager of the Company, proved of material assistance to the parties in their negotiations.

*Coal Miners, Corbin, B.C.*—On January 21, 1935, approximately 220 coal miners, members of the Mine Workers' Union of Canada, affiliated with the Workers' Unity League, in the employ of the Corbin Collieries, Limited, Corbin, B.C., ceased work, demanding a number of concessions. A mediator of the Federal Department of Labour arrived in Corbin on February 7th and held a conference with the strikers' committee, when all points at issue were discussed. Following this conference the mediator had a lengthy discussion with officials of the Company, which led to a joint conference being held. As a result of this conference the management agreed to concede all of the main demands of the miners but stipulated, however, that the miners must refrain from pit-head strikes and in future deal with disputes in the manner provided for by agreement. A mass meeting of the miners followed but the men declined to ratify this arrangement and instead increased their demands, which were refused by the Company. The departmental mediator found that he was not in a position to be of further assistance.

*Electrician, Niagara Falls, Ont.*—Early in February, 1935, word was received in the Department of Labour that an electrician in the employ of the North American Cyanamid Limited, Niagara Falls, Ont., had been dismissed because of membership in a union, and a request was made for the assistance of the

Department in having this party reinstated. A mediator of the Department proceeded to Niagara Falls and discussed this question with the manager of the Company at that point. The manager, however, maintained that this man had not been dismissed but had merely been laid off and for other reasons than those alleged, and he willingly agreed to take him back in his former position within a short period. The Department has since been advised that this has been done.

*Optical Workers, Toronto, Ont.*—In February, 1935, a request was received in the Department of Labour from the Optical Workers' Union, Toronto, Ont., for mediatorial assistance to bring about agreements with certain optical companies in that city. Correspondence was exchanged on the subject, and an official of the Department interviewed officers of the union concerned. The Departmental official was finally advised that, if later on it was considered that the Department could be of assistance, advice to this effect would be given, but up to the present no further word has been received. Approximately 70 workers were involved in this matter.

*Compositors, Hamilton, Ont.*—On February 2, 1935, a request for mediatorial assistance was received in the Department of Labour from the secretary of Local Union No. 129, International Typographical Union, to deal with a dispute involving members of that union employed on the staffs of the Hamilton Herald and Hamilton Spectator, and an officer of the Department immediately visited Hamilton for this purpose. It was learned that the men had asked for a substantial increase in wages and the institution of a 40-hour week. The Departmental mediator held separate conferences with the interested parties and eventually a basis of settlement was found which was acceptable to those concerned. This arrangement is not covered by a signed agreement and will expire on July 1st next. Approximately 62 printers were involved in the dispute.

*Ship Builders, Saint John, N.B.*—On the afternoon of March 5, 1935, some 125 steel workers employed by the Saint John Dry Dock and Shipbuilding Company, Limited, Saint John, N.B., ceased work, demanding an increase in wages and improvements in working conditions. The conference which was held on the following day between officials of the Company and the strikers' committee failed to effect a settlement, and a request was received in the Department of Labour for mediatorial assistance. A Departmental officer proceeded to Saint John at once, arriving there early on the afternoon of the

7th. He immediately held a conference with the strikers' committee, and later on in the day arrangements were made for a joint conference, during which a basis of settlement of all disputed points was found. Following this conference a mass meeting of the strikers was held at which the Departmental mediator was present, and at this meeting approval was given to the concessions offered by the employing Company. Late that evening a new agreement was drawn up providing for a general increase in wages for all classes of workers concerned and a considerable improvement in working conditions. The strikers returned to work the following morning.

In Ontario 4,880 accidents were reported to the Compensation Board during the month of March, as compared with 4,628 during February, and 4,057 during March of 1934. There were the same number of fatalities reported during March as during February, namely, 21. The total benefits awarded amounted to \$511,469.91, of which \$420,524.42 was for compensation and \$90,945.49 for medical aid. The accidents reported during the first quarter of 1935 numbered 13,884, as compared with 11,794 during the same period last year, and the benefits awarded amounted to \$1,430,635.12, as against \$934,922.51 during the corresponding period of 1934.

The Legislature of Manitoba has appointed a special committee of fifteen members—five representing the employers, five the employees, and five the Legislature—to investigate and report upon the application and administration of the Workmen's Compensation Act, the question of compensation to the families of persons killed while employed in any industry and to the persons injured in employment. The committee is empowered to summon witnesses, take affirmations, and require the production of records, etc. It is to report at the next session of the Legislature.

Following a motion introduced in the British Columbia Legislature to appoint a special committee to examine the Mothers' Pension Act, an amendment was adopted as follows: "That this House approves of the course pursued by the Government in its proposals for the co-ordination of the social welfare services under expert supervision, and is of the opinion that the information which it will be possible to obtain under careful and painstaking administration will result in the protection of the interests of all justly entitled under the provisions of the various acts in that behalf."

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

### Summary of Recent Decisions

**T**WO new decisions, a supplementary hearing in an earlier case and a satisfactory settlement of another case which had been referred back to the disputants for more complete information were given recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the *LABOUR GAZETTE*, November, 1934, page 993, and in previous issues; and the fifth report of the proceedings of the Board, covering the period from October 1, 1930, to September 30, 1933, was issued as a supplement to the issue of December, 1933.

The Board was established under a voluntary agreement concluded in 1918 between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and members of any of the six railway brotherhoods, "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following railway Brotherhoods; the Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

#### **Case No. 439—Canadian National Railways (Central Region) and Brotherhood of Railroad Trainmen.**

A conductor was disallowed a mileage claim while in charge of a snow plough extra. In compliance with orders, he reported for duty at Ottawa for a snow plough extra to Two Rivers and return to Madawaska. He left Ottawa at 2.40 p.m., reached Two Rivers (33 miles past Madawaska, turned at that point and arrived at Madawaska at 3.25 a.m. He was compensated on the basis of continuous time (Ottawa-Two Rivers-Madawaska) being allowed 227 miles for the trip. A new day was claimed for the trip Madawaska to Two Rivers and return.

Supporting this claim, the contention of the employees was that the conductor was ordered

in turn-around service, Ottawa to Two Rivers and return, a distance of 163 miles. This was stated to be in distinct violation of an understanding wherein "It was agreed that men in freight service may be ordered for turn-around trip between terminals where the distance is less than 100 miles, but the first-in-first-out rule must be observed at the turn-around terminal. . . ."

The employees' statement then adds:

"This crew arrived at Madawaska, the distant terminal for unassigned crews operating on this freight section, at 9.20 p.m. Off duty 9.50 p.m. Total time 8 hrs. 5 min., distance 128 miles, claimed 145 miles. Left Madawaska for Two Rivers at 9.50 p.m. returned to Madawaska at 3.25 a.m., total of 5 hrs. 35 minutes. Claimed 120 miles—a total of 265 miles for both trips. Allowed 227 miles or a shortage of 38 miles."

It was further contended that had there been a crew at Madawaska (the sub-division terminal) the conductor would not have been used beyond that point, but since the Company saw fit to use him beyond his distant terminal, "it could only be done as a new trip and paid for accordingly."

The Railway contended that since April 30, 1933, the unassigned service on the Renfrew sub-division (Ottawa to Cache Lake) had been performed by trainmen with home terminal at Ottawa, Madawaska no longer being the terminal for crews in unassigned service.

With reference to the conductor's action at Madawaska, the statement continues: The conductor "took it upon himself to book off duty at Madawaska when passing through Madawaska westbound en route to the turning point, Two Rivers, without any authority or instructions to do so; he not having completed the trip for which he was ordered. This he evidently did with the intention of submitting two time tickets for the trip for which ordered."

Without deciding whether or not Madawaska was a terminal, the Board sustained the claim of the employees for 38 additional miles.

#### **Case No. 440—Canadian National Railways (Central Region) and the Brotherhood of Railroad Trainmen.**

On February 19, 1934, the crew regularly assigned in passenger service operating Trains Nos. 81 and 82 between Montreal and Massena were delayed en route on Train No. 82, Montreal to Massena, to such an extent that they could not be turned out of Massena on

Train No. 81 on February 20 without violating the U.S. Sixteen Hour Law. In order to get a crew to Massena to bring out Train No. 81 on the morning of February 20, it was necessary to operate a special train movement from Montreal to Massena, and this special crew (consisting of a conductor and two brakemen) were ordered from Montreal to Massena and return.

For this trip the special crew were compensated at passenger rates and the employees' contention was that they were entitled to be paid at through freight rates and in support of this claim, Article 8 (a) and Article 16 of the current schedule were quoted.

The railway's statement declared that the special crew was ordered for passenger service and therefore compensated at passenger rates; that a baggage car or combination car could have been used, but this would not have been as convenient for the crew, and had such a car been furnished there would have been no claim for freight rates; and that Article 16 did not apply in this case.

The claim of the employees was sustained.

**Supplement No. 2 to Case No. 426—Canadian National Railways (Atlantic Region) and Brotherhood of Maintenance of Way Employees.**

In a supplemental hearing of Case 426 (LABOUR GAZETTE, May, 1934, page 406, and August, 1934, page 735) a statement was submitted by the employees' representative asking for a further interpretation of the Board's decision. At the original hearing of the case (which concerned the proper pay for carpenters, bridgemen, painters, etc., laid off from the Bridge and Building Department who take jobs as labourers under a B. and B. foreman) the decision of the Board was that when reduction in staff is made carpenters and bridgemen who take jobs as labourers in bridge and building groups are entitled to 42 cents per hour. It was also recommended by the Board that all claims in question should be analysed between the company and the employees on this basis, and if any questions remain in such cases they would be further considered by the Board upon presentation of specific information.

There developed a difference of opinion in the matter of the presence or absence of other labourers employed in the gang at 42 cents per hour rate, and how this factor would effect the application of the 42 cent per hour rate to bridge and building men who take jobs as labourers.

On this point the Board ruled that "there need not necessarily be other labourers in a

bridge and building gang receiving the 42 cent rate to entitle a demoted carpenter or bridgeman working as a labourer to receive such rates."

It now appears that the employees wish the Board to determine what men should be so paid.

**Case No. 416—Canadian National Railways (Central Region) and Order of Railway Conductors and Brotherhood of Railroad Trainmen.**

This case was heard originally on August 8, 1933. It concerned the claim of a conductor and brakeman for 100 miles on two days in September, 1932, when trains 447 and 448 were cancelled between Belleville and Ottawa. The case was referred back to the parties for more complete information, and the parties to the dispute have now advised the Board that a satisfactory settlement has been reached. This case is therefore closed.

**Canadian Coal Production Statistics**

As indicated in a bulletin of the Dominion Bureau of Statistics, the Canadian coal output during October, November and December, 1934, totalled 4,268,741 tons, an advance of 1 per cent over the tonnage produced in the corresponding period of 1933. During the last quarter of 1934 bituminous coal production amounted to 2,687,355 tons, sub-bituminous coal, 196,332 tons and lignite coal, 1,385,054 tons.

Canada imported 4,010,619 tons of coal during the period under review—an increase of 13 per cent over the tonnage imported in the last three months of 1933—while exports of Canadian coal were recorded at 120,884 tons as against 81,214 tons in the last quarter of 1933.

Canadian coal mines furnished employment to 26,931 men in October, 27,678 men in November and 27,164 men in December. The average output per man during this period was 157 tons and the average production per man-day was 2.7 tons.

During the calendar year 1934 Canada produced 13,795,649 tons as compared with 11,903,344 tons in the preceding year. Imports during 1934 totalled 13,813,657 tons made up of 3,537,309 tons of anthracite coal, 10,273,557 tons of bituminous coal and 2,791 tons of lignite coal. Exports of Canadian coal consisted of 294,886 tons of bituminous coal and 11,449 tons of lignite coal. Canada's coal supply in 1934 totalled 27,302,971 tons or 18 per cent above the 1933 level.

## THE RELIEF ACT, 1935

ON March 19, the Hon. W. A. Gordon, Minister of Labour introduced in the House of Commons a measure providing for unemployment and farm relief. This enactment was generally similar in its terms to the Relief Act 1934 (Labour Gazette, April, 1934, page 341).

The text of the Act which has received all its readings, is as follows:

### AN ACT RESPECTING RELIEF MEASURES

Whereas the Provinces may require further assistance in carrying out the necessary relief measures and in meeting financial conditions as the same may arise; and whereas in such event it is in the national interest that Parliament should support and supplement the relief measures of the Provinces and grant them financial assistance in such manner and to such extent as the Governor in Council may deem expedient; and whereas it is necessary to make provision for further expenditure for relief purposes under the Department of National Defence and the Department of the Interior; and whereas for these and similar purposes the powers necessary to insure the speedy and unhampered prosecution of such relief measures and the maintenance of the credit of the Dominion and the Provinces thereof should be vested in the Governor in Council; now, therefore, His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:—

1. This Act may be cited as *The Relief Act, 1935*.

2. Notwithstanding the provisions of any statute or law the Governor in Council may, upon such terms and conditions as may be agreed upon,—enter into agreements with any of the provinces respecting relief measures therein; grant financial assistance to any province and to Canadian Co-operative Wheat Producers Limited by way of loan, advance, guarantee or otherwise; and in respect of such loans, advances and guarantees, may accept such security, enter into such agreements and generally do all such acts and things as the Governor in Council may deem necessary and expedient in the public interest.

3. In addition to the powers conferred under the provisions of any statute or law the Governor in Council may, when Parliament is not in session, take all such measures as in his discretion may be deemed necessary or advisable to maintain, within the competence of Parliament, peace, order and good government throughout Canada; and at all times take all such measures as in his discretion may be deemed necessary or advisable to protect and maintain the credit and financial position of the Dominion or any Province thereof.

4. Without restricting the generality of the terms of the next preceding section hereof and notwithstanding the provisions of any statute or law, the Governor in Council may

(a) Provide for special relief, works and undertakings under control and direction of the Department of National Defence and the Department of the Interior;

(b) Take all such other measures as may be deemed necessary or advisable for carrying out the provisions of this Act.

5. The Governor in Council may pay out of the Consolidated Revenue Fund such moneys as may be necessary for all or any of the purposes of this Act.

6. The Governor in Council shall have full power to make all such orders and regulations as may be deemed necessary or desirable to carry out the purposes and intention of this Act.

7. All orders and regulations of the Governor in Council made hereunder shall have the force of law and may be varied, extended or revoked by any subsequent order or regulation; but if any order or regulation is varied, extended or revoked, neither the previous operation thereof nor anything duly done thereunder shall be affected thereby, nor shall any right, privilege, obligation or liability acquired, accrued, accruing or incurred thereunder be affected by any such variation, extension or revocation.

8. All orders in Council and regulations made under the provisions of this Act shall be laid before the House of Commons forthwith after the making thereof if Parliament is then sitting, or if not, said orders in council or regulations or an abstract thereof disclosing their essential provisions shall be published in the next following issue of the CANADA GAZETTE.

9. A report shall be laid before Parliament within fifteen days after the expiration of this Act, or if Parliament is not then in session, shall be published and made available for distribution by the Department of Labour, containing a full and correct statement of the moneys expended, guarantees given and obligations contracted under this Act.

10. Notwithstanding the expiration of *The Relief Act, 1934*, chapter fifteen of the statutes of 1934, on the thirty-first day of March, 1935, and the provisions of the said Act, all undischarged obligations created under the authority of the said Act may be paid and discharged out of the Consolidated Revenue Fund.

11. This Act shall expire on the thirty-first day of March, 1936, but any obligation or liability incurred or created under the authority of this Act may be paid and discharged out of the Consolidated Revenue Fund notwithstanding the expiration of this Act on the said date.

The Legislature of Alberta adopted a resolution on March 7, which urged that the age limit for old age pensions should be reduced to 60 years and that the age limit for war veterans be placed at 50 years.

The *Canada Gazette* of March 16, contains the by-laws of the pilotage district of the Restigouche river. The regulations define the boundaries of the pilotage district, sets forth the rates for pilotage, license fees together with sections dealing with apprentices, discipline, disputes, etc. Regulations governing pilots in the district of Saint John were given in the LABOUR GAZETTE for January, page 31.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension to all employees and employers in the industry and district by an Order in Council of an agreement affecting quarrymen and cut stone workers (other than granite and marble) throughout the province, a correction of the Order in Council affecting the manufacture of men's and boys' clothing throughout the province, a request for a change in the Order in Council affecting bakers at Three Rivers and district, and applications for the extension of agreements affecting bakers and confectioners at Hull, building trades at Joliette, building trades at Victoriaville, building trades at St. Hyacinthe, and painters at Quebec.

Under the Collective Labour Agreements Extension Act, Quebec, the text of which was printed in the *LABOUR GAZETTE*, May, 1934, page 417, applications may be made to the provincial Minister of Labour by any association of employees or employers which is a party to a collective agreement, to have those terms of such agreement which concern rates of wages and hours of labour made obligatory on all employees and employers in the same trade or industry within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade or industry in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* and for the duration of the agreement. The provisions of an agreement thus made obligatory are to govern all individual labour contracts in the specified trades and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934.

#### QUARRYMEN AND CUT STONE WORKERS (OTHER THAN GRANITE AND MARBLE), PROVINCE OF QUEBEC.

An Order in Council, approved March 26 and published in the *Quebec Official Gazette*, March 30, makes obligatory throughout the province the conditions of an agreement between certain owners of limestone, sandstone, artificial stone, and other stone quarries (except granite and marble quarries) and their employees. (The application for the extension was noted in the *LABOUR GAZETTE*, February, page 149.) The terms of the agreement thus made obligatory are:—

1. The rates of wages shall be the following for each of the trades mentioned below:

Trades.	Wage rate per hour. cents.
Stonecutters . . . . .	50
Apprentice Stonecutters:	
First year . . . . .	15
Second year . . . . .	20
Third year . . . . .	30
Fourth year . . . . .	40
Planermen . . . . .	40
Apprentice planermen:	
First year . . . . .	20
Second year . . . . .	30
Sawyeremen . . . . .	35

2. Stonecutters and apprentice stonecutters shall work a maximum of eight hours per day and forty-four hours per week. Planermen, apprentice planermen and sawyers shall work a maximum of ten hours per day and sixty hours per week. It is however distinctly understood and agreed that the second party shall work reasonable and necessary overtime for the completion of urgent business.

3. Overtime work shall be paid at the rate of time and a quarter, of the regular rates.

4. The territorial jurisdiction covered by this agreement shall comprise and include the entire province of Quebec.

5. It is hereby expressly stipulated and provided that contracts signed or entered upon before the adoption of the Order in Council approving this request are exempt from and unaffected by the provisions of this agreement.

6. This agreement shall extend and apply to operations in connection with all buildings, bridges, walls, monumental work and other operations.

7. It is agreed, in order to encourage the use of limestone for the field (infilling) of buildings, that piece work shall be allowed for rock face stone commonly known as random ashlar, scotch work or petite course, providing that same is not over eleven and three quarters inches (11¾") high, the rate of pay therefore to be such that a rough cutter may earn at least three dollars per day.

8. The present agreement shall be valid from the date of the publication in the *Quebec Official Gazette* of the Order in Council approving the

said request and shall remain in effect until the 31st of December, 1935.

**MEN'S AND BOYS' CLOTHING WORKERS, PROVINCE OF QUEBEC.**—The terms of the Order in Council governing conditions in this industry were published in the *LABOUR GAZETTE*, March, page 238. A correction of this Order in Council was printed in the *Quebec Official Gazette*, March 9, changing the last paragraph of Article 3 (*LABOUR GAZETTE* page 239) to read as follows:

"Any work performed after the hours hereinabove specified shall be considered as overtime and such work shall be paid at the rate of time and one quarter."

**BAKERS AND BREAD DISTRIBUTORS, THREE RIVERS AND DISTRICT.**—A request for a modification of the Order in Council for this industry (*LABOUR GAZETTE*, February, page 148) was printed in the *Quebec Official Gazette*, March 9. The request is that wages for apprentice bakers be fixed at \$5 per week during first year, \$7 during second year and \$10 during third year.

**BAKERS, HULL.**—Application has been made and printed in the *Quebec Official Gazette*, March 23, for the extension of an agreement between certain bakery owners and master bakers and the Association of Employed Bakers and Confectioners, Registered. The minimum wage rates vary with the amount of flour baked per week in the bakery, from \$18 to \$28 per week for first baker and proportionately lower rates for second baker, third baker, etc., with a minimum of \$12 per week for any baker or confectioner.

**BUILDING TRADES, JOLIETTE.**—Application has been made and printed in the *Quebec Official Gazette*, March 16, for the extension of an agreement between the Montreal Builders' Exchange and the Workers' Association of Joliette. The agreement is similar to the one in effect last year, the terms of which were published in the *LABOUR GAZETTE*, November, 1934, page 1004, with certain changes in wage rates, the rates for some classes being decreased and other increased.

**BUILDING TRADES, VICTORIAVILLE.**—Application has been made and printed in the *Quebec Official Gazette*, March 16, for the extension of an agreement between certain contractors and the Workers' Federation of Victoriaville and District, No. 19865. Among the wage rates included are 60 cents per hour for bricklayers, masons and plasterers, 50 cents for carpenters and joiners, 45 cents for electricians and painters, 40 cents for plumbers, steamfitters and tinsmiths, 30 cents for labourers, with a 12½ per cent reduction in these rates for any

contracts of less than \$2,000 in municipalities of a population of less than 4,000.

**BUILDING TRADES, SAINT HYACINTHE.**—Application has been made and printed in the *Quebec Official Gazette*, March 23, for the extension of an agreement between the City of Saint Hyacinthe and certain contractors and the National Catholic Union of Building Workers. Among the wage rates included in the agreement are 50 cents per hour for bricklayers, masons and plasterers, 40 cents for marble setters, ornamental iron workers (erectors), tile setters, terrazzo layers, sheet metal workers, slate and tile roofers, 35 cents for composition roofers, ornamental iron workers (helpers), carpenters and joiners, cement finishers, electricians, hod carriers, lathers, plumbers and steamfitters and stationary enginemen, 30 cents for painters and labourers.

**PAINTERS, QUEBEC.**—Application has been made and printed in the *Quebec Official Gazette*, March 30, for the extension of an agreement between certain painting contractors and the National Catholic Union of Painters of Quebec. The wage rates for journeymen painters are 45 cents per hour in the cities of Quebec and Levis and immediate vicinity and 40 cents in municipalities of a population of less than 5,000 where the general building contract concerned is less than \$5,000. (Last year the wage rate was 40 cents for all work in the city and district.)

The rules and provisions contained in Part I of the Canadian Electrical Code, promulgated by the Canadian Engineering Standards Association, have been incorporated (with certain exceptions and variations) in regulations under the Electrical Energy Inspection Act of British Columbia. These regulations "govern the installation, erection and use in any premises of electrical equipment operating or intended to operate at potentials up to 5,000 volts inclusive."

The arrangement under which the Dominion Department of Pensions and National Health reimburse provincial Workmen's Compensation Boards and employers of pensioners of 25 per cent and upwards, when such pensioners have met with industrial accidents, was renewed for another fifteen months effective from January 1, 1935. This provision has resulted in the employment of many pensioners who would otherwise have been refused employment on account of their war disabilities.

## EDUCATION AND WELFARE IN DEPARTMENT OF NATIONAL DEFENCE UNEMPLOYMENT RELIEF CAMPS

### Survey of Educational Facilities Provided Under Provincial Authorities

THE following survey of education activities and facilities in unemployment relief camps throughout Canada was prepared in the Department of National Defence:

When the scheme for the care of unemployed, single, homeless men in camps administered by the Department of National Defence was instituted it was realized that provision of facilities to enable these men to retain or improve their mental efficiency was of paramount importance. Steps were taken, soon after the camps were established, to provide teachers either from the relief personnel themselves or through the Frontier College, an organization that is supported entirely by voluntary subscriptions from the public generally. By arrangement with the Frontier College, selected men, who were taken on the strength of the projects, worked as labourers with the men during the day and held classes in Elementary and High School subjects during the evenings. This system, within its defined scope, has produced satisfactory results but has suffered through the frequent changes in the labourer-teachers who either returned to Universities to resume their own academic training or secured positions in industry at remunerative rates of wages.

In December, 1933, arrangements were effected with the Minister of Education of British Columbia, Hon. G. M. Weir, whereby the Vancouver Technical School instituted correspondence courses for the men in the relief camps in British Columbia in draughting, engineering, drawing, elementary and advanced electricity, motor mechanics, diesel engines, practical mathematics and geology. In the period 8th January, 1934—30th April, 1934, over 900 men in the camps enrolled for these courses of whom over 30% continued interest in the work and over 25% obtained certificates; these certificates being granted only to those whose work was of a good standard and who were active for the whole course. The educational authorities of Saskatchewan also co-operated during the winter of 1933-34 by supplying lesson outlines, free of charge, to a number of men in the relief camps in that province.

In consequence of the possibilities shown by the excellent results achieved through the co-operation of the Department of Education of British Columbia in the winter of 1933-34, arrangements were made under the Relief Act 1934, so that the system developed in

British Columbia might be extended to other Provinces and to this end all Relief Agreements with the Provinces entered into under authority of the Relief Act 1934 included the following provisions:—

In order to provide for the educational training of men in Dominion Relief Camps the Dominion will—

(1) make available the necessary accommodation for class rooms and will provide light and heat therefor;

(2) provide board, lodging and clothing to the standard relief camp scale for any male teachers, nominated by the Province, who are required and detailed to live in Relief Camps;

(3) provide free transportation for teachers to the Relief Camps on appointment and return on termination of employment thereat;

(4) provide for the transfer of candidates between projects to facilitate the organization of classes.

The Province will be responsible for—

(1) the nomination of teachers and for the payment of their salaries or wages while employed;

(2) the conduct of the classes, whether by correspondence or otherwise; for the setting of examinations, the correction of papers and the issue of certificates of proficiency;

(3) the provision of text books and other educational supplies.

Subject to the aforementioned provisions the details of organization and administration of education in Relief Camps to be arranged by the officers of the Department of National Defence with the Provincial Departments of Education direct.

The educational training carried out during the winter of 1934-35 is summarized as follows:—

*Nova Scotia.*—All men at the Halifax project desiring instruction are accommodated at the Nova Scotia Technical School. Thirty-five commenced courses and 18 are still active.

*New Brunswick.*—Under arrangement made by the Director of Vocational Training, teachers have been furnished for the larger projects and a total of over 200 men are receiving instruction.

*Quebec.*—At present educational activities are confined to the instruction given by Frontier College representatives but the Provincial authorities have undertaken to co-operate fully.

*Ontario.*—No action has been taken by the Provincial authorities, consequently, no instructions beyond that given by the Frontier College representatives is available except at one project in Kingston, where a professor from Queen's University is conducting classes

in shorthand, English and French. His classes have been well attended.

*Manitoba.*—The Provincial Department of Education has instituted correspondence courses in economics, commercial subjects, draughting, electricity, radio, automobile operation and repair, prospecting, etc., and approximately 200 men are enrolled. The Director of Technical Education of Manitoba has expressed himself as very agreeably surprised at the quality of the work sent in by the men.

*Saskatchewan.*—Educational training is being carried out under the supervision of qualified teachers who are on the strength of the camps. Over 300 men are receiving instruction in shorthand, bookkeeping, arithmetic, English, French and Spanish.

*Alberta.*—The Provincial Department of Education authorized the Director of Technical Education to place an educational supervisor on the projects located along and in the vicinity of the Calgary-Banff Highway and are providing correspondence courses for other projects where desired. This supervisor, after a general survey of the situation, arranged appropriate courses and selected capable instructors for the actual camp schools.

The training in the camp schools comprises not only elementary subjects but also courses of study in high school subjects such as physics, chemistry, mathematics, English, botany, etc. Special classes in English have also been instituted for the benefit of non-English speaking personnel.

In the correspondence courses instruction is given in steam engineering, coal mining, mechanical draughting, building construction, practical electricity, prospecting, auto mechanics, mathematics, etc.

At present the enrolments are approximately as follows:—Elementary classes, 120; Correspondence Courses, 155; Special English, 120.

*British Columbia.*—In continuation of the system instituted in the winter of 1933-34 correspondence courses are now established under the Provincial Department of Education in elementary, high school and technical subjects. The elementary subjects comprise English, arithmetic, geography and history, over 220 men being enrolled for this course. The high school course, with over 760 men enrolled, provides instruction in English, history, civics, mathematics, modern languages, biology, agriculture, geography, mechanical drawing, building construction, electricity, commercial subjects, commercial art, etc. Each of the subjects on the High School course is subdivided into 20 lessons and each

lesson averages 8 hours' work. Instruction in Technical subjects is under the direction of the Vancouver Technical School and over 400 men are enrolled in draughting, technical mathematics, automotive engineering, geology, diesel engineering, trigonometry, etc.

In addition to the operation of the correspondence courses, the Provincial Department of Education has provided several instructors at camps where school buildings have been erected by the Department of National Defence.

In addition to the educational classes above described, certain suitable personnel are taken into the relief project offices and trained in typewriting, accountancy, and clerical work generally. Further, where facilities exist at the projects, relief personnel are given the opportunity of securing training in various trades such as carpentry, plumbing, blacksmithing, tinsmithing, motor mechanics, boot repair, etc.

### Welfare and Recreational Activities

It should be added to the above article that provision is also made for recreational facilities through organized arrangement in supplying sports equipment. Canteens have been established in which supplies of tobacco, confectionery, etc., are purchased on the ticket system, charged against the man's allowances. Radio sets have been donated or loaned to a large number of camps, and circulating libraries have been organized, largely on donations from the public. Similarly, newspapers and magazines, in many cases supplied gratuitously by the publishers, are available in all camps.

The spiritual welfare of the men engaged on the various projects is considered a responsibility of the church organizations. Every facility and encouragement is afforded the clergy and church workers to hold services and make contact with the men on the projects. Owing to the fact that many of the projects are at a considerable distance from large settlements, visits of clergy to such camps have not been frequent. But where urban centres are adjacent, services of various denominations are held regularly. Attendance at church services is voluntary.

At the recent annual meeting of the Ontario Retail Lumber Dealers' Association, a resolution was adopted which recommended that the Workmen's Compensation Board extend the operation of the Accident Prevention Association in preventive and educational work. The resolution was prompted by the results in the planing mills and sash and door factories, etc. having proved so satisfactory.

## LEGISLATIVE PROPOSALS SUBMITTED BY LABOUR ORGANIZATIONS

### Recommendations of All-Canadian Congress of Labour and Federation of Catholic Workers of Canada

**I**N presenting its program of proposed legislation to members of the Dominion Cabinet on March 18, the All-Canadian Congress of Labour commended the government's action in instituting a scheme of compulsory unemployment insurance. The memorandum of legislative recommendations was submitted by the Congress executive, consisting of President A. R. Mosher, Vice-President Z. David, and Secretary-Treasurer W. T. Burford, who were accompanied by representatives of affiliated organizations.

While congratulating the government on sponsoring the Employment and Social Insurance Act—which was declared “the most important measure of social reform ever adopted in Canada”—it was considered that the present scheme “is not as comprehensive as the workers would desire.” It was realized, however, that the Government “contemplates the broadening of the Act's provisions as circumstances warrant.”

In particular, it was hoped that the government would “amplify Part IV of the Bill so as to provide more definite directions to the Employment and Social Insurance Commission to develop a national scheme of insurance against sickness and invalidity, or, if this field of legislation is not within the jurisdiction of the Dominion, that the Government will endeavour to secure the consent of the provinces for the centralization of authority to provide insurance against what are normally the two most important causes of unemployment.”

It was also submitted in connection with the measure: (1) that the rate of contributions as introduced “is beyond the means of workers receiving low wages and that graduation according to age and sex should be replaced by a scale of contributions according to earnings”; (2) that the qualifying period should be reduced from 40 to 26 weeks “at least at the inception of the scheme in order to make the benefits available without unreasonable delay.”

*Collective Labour Agreements.*—In a paragraph dealing with collective labour agreements, it was pointed out that “some of the provincial legislatures have shown a realization of the need to strengthen or supplement labour's bargaining power by enacting laws to make the terms of collective agreements between workers and employers generally applicable, with a view to the prevention of unfair industrial practices.” In view of the “worker's disadvantage in dealing with the employer” and also because of the small percentage of organized workers to the total population, laws to enforce collective labour agreements were regarded as necessary.

*Minimum Wages and Maximum Hours.*—The section dealing with the question of minimum wages and maximum hours was, in part, as follows:

“The All-Canadian Congress of Labour is wholly in favour of a national minimum wage, and ventures to commend the Government's decision to introduce this measure. The Congress hopes that the ratification of the 1919 convention for the 48-hour working week will lead to a limitation of working hours more consistent with recent developments in the productivity of industry, and universally applicable. The Congress, cannot, however, endorse any proposal for the reduction of working hours unless it is accompanied by a proviso that no such reduction shall operate to reduce the weekly earnings of the workers . . . . With respect to the minimum wage legislation, the Congress hopes that as few exceptions as possible will be made on account of either age or sex, in order to check the employment of child labour and to keep both women and children out of the firing line in the industrial struggle, and it recommends the establishment of a national Hours and Wages Board on which labour shall be adequately represented to administer the regulations governing both minimum wages and maximum working hours.”

*Right of Association.*—It was pointed out that there were many obstacles in the way of the “right of association for all lawful purposes,” among which were: the establishment of “Company towns”; the distance separating one industrial centre from another, necessitating hundreds of miles of travel for workers seeking new jobs; the alleged hostility of some employers towards unions in general; and the influx of immigrant labour prior to the depression. The memorandum affirmed that some legislative assistance (in securing collective bargaining and union recognition) had been obtained by the workers through the Trade Unions Act, the Conciliation and Labour Act, and the Industrial Disputes Investigation Act. With a view to securing further action in this direction, there was a reiteration of the request for an amendment to the Railway Act “to provide that any class, craft, or category of railway workers shall be able, without risk of intimidation, to name the union which they desire to represent them.”

*Housing and Slum Clearance.*—Satisfaction was expressed at indications that the Government contemplated a national housing and slum-clearance scheme, and on this matter the Congress declared itself, in part, as follows:—

"The Congress is convinced that building construction and slum clearance should be undertaken on a national scale both to relieve unemployment and to remedy a building deficit which has become a reproach to a progressive country. Pending the inauguration of the construction program and the reform of the capitalist system it is recommended that relief for the victims of the system's shortcomings shall be continued this year as heretofore and on a more adequate scale."

The Congress also commended the Government on the restoration of a portion of the Civil Service salary deduction, and requested that full salaries, together with former privileges with respect to promotions and statutory increases be restored with least possible delay.

In conclusion the memorandum called for the repeal of Clause 2 of Section 17 of the Industrial Disputes Investigation Act; the subjection of all foreign insurance companies to the requirements of the Foreign Insurance Companies Act; and the rescinding of what were termed "privileges" according to "foreign" labour unions under the Immigration Act, and the Customs Tariff, etc.

The members of the cabinet who received the delegation were: Right Hon. Sir George Perley, Acting Prime Minister; Hon. W. A. Gordon, Minister of Labour, and Hon. R. J. Manion, Minister of Railways and Canals.

### Federation of Catholic Workers

At the presentation of its program of legislative requests to members of the Dominion Cabinet on March 12, the Federation of Catholic Workers of Canada endorsed Federal legislation providing for unemployment insurance. In so doing, however, the Federation considered that certain classes now exempted—such as longshoremen—should be protected by a clause giving them the right to a proportional indemnity, and that the National Catholic Unions should have representation on any administrative commission to be appointed.

In another section of its memorandum, the Federation requested representation on the National Economic Council, and also recommended the appointment of the Canadian La-

bour delegates to Geneva by rotation each year from the Trades and Labour Congress of Canada, the All-Canadian Congress of Labour, and the Federation of Catholic Workers of Canada.

While commending the Government for the establishment of a central bank, the Federation urged that the employees of such an institution be permitted the "right of association," and also recommended that this should be extended to include employees of all chartered banks.

The memorandum referred to the enactment of the Collective Labour Agreements Extension Act in Quebec and it was recommended that Federal Government adopt similar legislation "to the advantage of labourers throughout the country."

The Federation requested that the Dominion "do all in its power" so that old people of the province of Quebec could take advantage of the old age pensions legislation.

Among the other recommendations contained in the memorandum were:—

Inauguration of a public works and highway construction program with contracts providing for fair wages.

Protective measures (against hasty action by creditors) for the unemployed on their return to work.

Counter-action against communist propaganda.

Increasing the tariff against imported gloves and shoes, and foreign advertising circulars, etc.

Penalties for infractions of laws regarding wages and hours.

Establishment of a permanent Inquiry Committee to report on conditions in various industries.

Unification of company legislation.

Prohibition of commercial publicity over the Canadian Radio Commission stations and other Canadian stations on Sunday.

Restoration of the half-cent postage rate on circulars.

The Hon. W. A. Gordon, Minister of Labour, received the delegation and assured the members that the Federal Government would rigidly enforce the penal sections of the Government's reform measures.

### Convention of New Brunswick Federation of Labour

The twenty-second annual convention of the New Brunswick Federation of Labour was held recently at Fredericton. In his report, President J. E. Tighe, referred to the Forest Operations Commission Act and while thanking the government for this legislation he believed some amendments were necessary.

The executive's report drew attention to representations made to the Dominion Department of Labour to have the office of Eastern representative re-opened and a fair

wage officer appointed for the Maritime provinces. In connection with relief, the executive recommended the provincial government to take under advisement a comprehensive slum clearance and housing scheme to be effective throughout the Province. The committee further advocated that the government be called upon to set an example to other employers by paying adequate wages and instituting the shorter work day and week on all their work both departmental and that

let out by contract. It was also recommended that the Provincial Government give its full support to the social legislation contemplated by the Federal Parliament, by agreeing to the amending of the British North America Act.

Further matters which the executive committee recommended were: Continued effort to secure the 6-hour day and 5-day week; a provincial fair wage act to apply to all Provincial Government work, and the proclamation of legislation instituting Mothers' Allowances, Old Age Pensions, Minimum Wage for Women, etc., and Childrens' Protection Acts.

The secretary-treasurer's financial statement showed total receipts of \$904.37 with expenditures totalling \$745.89, leaving a balance in the bank and on hand of \$158.48. A special report was made in connection with the issuance of the "History of the New Brunswick Federation of Labour," which resulted in a balance of \$286.38.

The convention was featured by addresses from Hon. L. P. D. Tilley, Premier of New Brunswick, and Hon. Dr. H. I. Taylor, Minister of Health and Labour. In his address, Hon. Dr. Taylor declared that the placing into effect of the social legislation depended upon the financial condition of the province.

Premier Tilley outlined the Forest Operations Commission Act and the benefits obtained therefrom by the workers in lumber camps during the past winter. He stated "the government had under consideration the amendment of Section 34 (which gives employers authority to employ inexperienced men at wages below the minimum) so that this privilege cannot be abused as it has been in some cases." The premier considered that the government would have to enact legislation whereby farmers and fishermen would receive a just return on their products. He further intimated that a bill would be introduced in the Legislature providing for a provincial housing scheme. In conclusion, Premier Tilley expressed himself as being in favour of Minimum Wage Act for Women and Girls and would be glad to discuss this subject with the Federation committee.

Hon. A. A. Dysart, Leader of the Opposition in the Legislature, expressed the opinion that, while the Forest Operations Commission Act was a step in the right direction, the minimum wage set by the Commission was likely to become the maximum. He thought the government should thoroughly investigate the whole operation of the Workmen's Compensation Act, and expressed the opinion that if any additional subsidy is received by the province it should be marked for social legislation.

The recommendations contained in the resolutions adopted were:

Removal of the \$4.00 tax on Canadian export lumber in event of a trade treaty between Canada and the United States.

Immediate establishment of a Provincial Department of Labour.

Enactment of legislation making it illegal for persons connected with the school commission to sell school books.

Fairer manner of relief distribution.

Enactment of legislation ensuring a decent living income to part time workers.

Medical attendance to persons on relief.

Application of the principles of collective bargaining.

Prohibition of unfair competition among the pulp and paper mills of New Brunswick.

Amendments to the Public Health Act governing the examination and licensing of plumbers.

Appointment by the Federal Government of a fair wage officer for the Maritime Provinces.

Reduction of interest rates on homes and farms.

Prohibition of foreclosures of mortgages on farms and dwellings.

Withholding of a licence to all trucks and busses where such transportation parallels a railway.

Opposition to the proposal to add a 5 per cent penalty to unpaid taxes.

Appointment of an examining board for the licensing of moving picture machine operators, such Board to consist of three licensed operators of more than five years actual operating experience.

Amending section 34 of the Forest Operations Commission Act so that employees may not be compelled to work for a lesser rate than that set by the Commission.

Condemning the bonus system of payment of employees.

Proclaiming Old Age Pensions; Mothers' Allowances and Women's Minimum Wage enactments in force.

Free school books to children.

Appointment of an officer to enforce the Compulsory School Attendance Act.

Federal Government assistance for Moncton Railway Shops to permit operation on a five-day week basis.

Amendments to the Workmen's Compensation Act.

The officers elected were: President, J. E. Tighe, Saint John; Vice-presidents, A. W. Jamieson, Moncton; J. B. Johnston, McAdam; J. H. Wallace, Reynolds; secretary-treasurer, George R. Melvin, Saint John; legislative representative, J. A. Whitebone, Saint John.

Fredricton was selected as the next place of meeting.

## ANNUAL REPORT OF THE CANADIAN NATIONAL RAILWAY SYSTEM FOR 1934

THE first annual report of the Canadian National Railway system under its new board of trustees shows that the total operating revenues for 1934 were \$164,902,501.66 an increase of \$16,382,759 or 11 per cent over the preceding year. For 1934, the cash deficit was \$10,547,488 less than for 1933, when the total deficit was \$58,955,388.41. The increase of 11 per cent in gross revenue on Canadian National Railways compares with an average increase of 5.7 per cent on United States Class I railroads. Freight revenue increased 12.3 per cent, while passenger revenue increased 8.6 per cent, this latter being accomplished with less passenger mileage than was operated in 1933. Operating expenses, compared with the preceding year, show an increase of \$9,123,519 or 6.39 per cent. It is explained that while the increased passenger traffic was taken care of with slightly less passenger train mileage, the increase of 12.12 per cent in revenue ton miles necessitated additional freight train service to the extent of 11.2 per cent.

One section of the report deals with the co-operative measures, and the estimated economies effected in railway operation, through a Joint Executive Committee, consisting of three Directors of the Canadian Pacific Railway and the three Trustees of the Canadian National Railway. Authority for the study of proposed co-operative measures proceeds from this Joint Executive Committee, and such co-operative measures as are agreed upon are subsequently ratified by their respective companies.

*Wage agreements.*—In dealing with wage agreements, the report referred to the arrangements under which rates of pay were established on a scale 15 per cent below the basic rates in pre-depression years. (LABOUR GAZETTE, November, 1933, page 1065). The report then outlines the negotiations which led to the agreement in November, 1934, providing that this 15 per cent deduction from basic rates would be reduced (effective January 1, 1935) to 12 per cent, with a further reduction on May 1, 1935, to 10 per cent. (LABOUR GAZETTE November, 1934, p. 991).

*Pension Plans.*—The pension plans, including the recent revision, are outlined as follows:—

During the year the Canadian National Pension Fund, which is generally applicable to Canadian National employees who are not members of the Grand Trunk Railway of Canada Superannuation and Provident Fund (closed to new members 1908) or the Inter-

colonial and Prince Edward Island Railways Employees' Provident Fund (closed to new members August 7, 1929), was revised and placed on a new basis which includes the principle of contribution by employees. The revised rules and regulations were made effective January 1, 1935, but pensions granted prior to that date are not affected.

Pension rights which had accrued to employees prior to January 1, 1935, are preserved in the form of a service pension, the amount of which is determined by the employee's allowable service up to January 1, 1935, and by the employee's best 10 consecutive years' compensation for any period prior to the same date. This service pension becomes payable upon retirement if the service requirements are fulfilled. Employees having less than 10 years' service at January 1, 1935, and future employees become entitled to a basic pension of \$300 per year if the service requirements are fulfilled. The service pension and the basic pension are payable entirely at the expense of the Company.

The new plan then makes provision, as an addition to the service or basic pension referred to, for supplemental annuities which the employee may obtain by voluntary contribution of any per cent of employee's compensation up to 10 per cent, the Company undertaking to credit the employee with an equal amount up to 5 per cent, and to accrue interest on both amounts compounded yearly. A limitation is placed upon the Company's portion of the supplemental annuity by a provision that the service or basic pension, together with a simple annuity purchaseable from the Company's contributions shall not exceed 40 per cent of the employee's best average compensation in any 10 consecutive years, but this restriction does not operate to reduce a service pension which may be in excess of 40 per cent arising out of employees having had more than 40 years' service at January 1, 1935.

Employees' funds and accrued interest thereon are kept by the Company in a trust fund and are invested in Dominion Government Securities. Upon retirement these funds and the amount credited to the employee by the Company are to be used for the purchase from the Company of an annuity calculated on an actuarial basis. In the event of the employee dying before pension age or leaving the service, all the contributions made by him are returned with the accruals of interest.

Retirement is compulsory at age 65 for all employees pensionable under the plan. The Trustees, however, may retain in the service beyond that age any executive officer of the standing of a Divisional Superintendent, or higher, or any technical or professional officer whose continuance in the service is deemed to be in the best interests of the Company, but all accruals of pension benefits by the Company cease at age 65. Provision is made for the retirement of employees having the requisite qualifications who may have attained the age of 60 years or more and have become physically or mentally incapacitated.

The plan provides that pensions may take the form of joint and survivor annuities in the name of the retired employee and an

approved dependent, and also in the form of annuities guaranteed for a stipulated number of years. Annuities in these forms are to be the equivalent on an actuarial basis of the individual pension.

The fund is administered by a pension board of 7 members 4 of whom are officers of the Company, and 3 are elected from time to time from the ranks of officers of the recognized labour organizations. The Vice-President of Finance of the Company is a member of the board and is its permanent chairman.

It was pointed out that the representatives of the employees were consulted during the revision of the plan (which will reduce the cost of pensions to the company) and have expressed their approval of it.

## COMBINES INVESTIGATION ACT

### Senate Bill to Amend the Combines Investigation Act

A BILL to amend the Combines Investigation Act and to repeal section 498 of the Criminal Code was introduced in the Senate by Hon. J. P. B. Casgrain on March 5. Senator Casgrain's motion on April 3 for the second reading of the Bill failed to receive support, and a motion by Hon. Raoul Dandurand seconded by Right Hon. George P. Graham to the effect that the Bill be not read a second time was carried.

The Bill if enacted would have amended two essential sections of the Combines Investigation Act, namely, the section defining unlawful combines and the section providing penalties for the formation or operation of such combines. Section 4 of the Act, which reads: "Nothing in this Act shall be construed to apply to combinations of workmen or employees for their own reasonable protection as such workmen or employees," would also have been amended by the addition to this section of a similar indication of exemption for combinations of employers.

Section 2, which defines the classes of commercial combinations which the Act indicates are unlawful combines, contains the provision that the Act shall apply only to "combinations which have operated or are likely to operate to the detriment or against the interest of the public, whether consumers, producers or others," and enumerates types of such combinations to which the Act may apply, including mergers, monopolies, and agreements to prevent competition, fix common prices, enhance prices or limit production. The proposed amendment to this section would have eliminated this enumeration

of types and would have limited the definition to "a combination of two or more persons" which was designed or operated "to restrain unreasonably trade or commerce, against the interest of the public, whether consumers, producers or others" or which was "a conspiracy in restraint of trade and commerce."

Senator Dandurand in opposing second reading of the Bill contended "that the proposed amendments would destroy both the letter and the spirit of the Combines Investigation Act and of this section of the Criminal Code" and that "it would open the door to the formation of all sorts of trusts and mergers."

### Pulp and Paper Industry

The pulp and paper industry is the most important manufacturing industry in Canada, heading the lists in 1933 for gross and net values of manufactured products, number of employees and distribution of wages and salaries according to a report recently issued by the Dominion Bureau of Statistics. In total capital invested it is exceeded only by electric light and power plants.

The total number of employees on salaries in the pulp and paper industry in 1933, was 2,920 as compared with 3,112 in 1932, while the number on wages was 21,117 in 1933 as compared with 21,449 in 1932. The average earning of those on salaries was \$2,191 in 1933 as compared with \$2,327 in 1932; while those on wages received an average of \$956 in 1933 as compared with \$984 in 1932.

## ACCIDENT PREVENTION IN INDUSTRY

### Employees' Recommendations Concerning Plant and Equipment

**S**UGGESTIONS for plant and equipment inspection by a committee of employees are contained in a bulletin recently published by the Industrial Accident Prevention Associations of Ontario.

The "suggestions" set forth are given as a guide to general hazards that might be looked for in connection with an inspection of any industrial plant. Following are the hazards designated and the safety and health recommendations made:

*Causes of falls of persons.*—Floors with protruding nails; uneven segments, holes or patches in floors; articles left in passageways; slippery floors or steps; lack of hand rails on stairways or platforms; unsafe ladders or scaffolding; tools lying on floors; shoes with worn out soles; high heels.

*Causes of abrasions and bruises.*—Protruding objects of all kinds from walls, posts, machines or trucks; nails on floor or in loose boards; loose or broken glass in windows, broken glass on floors, sharp protruding corners where passageways meet.

*Causes of injury by falling.*—Improper piling or overloading of merchandise, either on floors, platforms, shelves or trucks; loose articles on walls, ceilings, posts or outside window ledges; loose window frames, signs or awnings; tools left on platforms or ladders.

*Causes of burns and fires.*—Unprotected electric wires, switches, cutouts or fuses, exposed ends of wire, worn insulation on wires; crossed wires; gas leaks; greasy rags and papers outside of properly covered metal containers; oil on floors; accumulation of dust or sweepings; smoking inside of plant; handling of hot metals, oils or corrosive acids by persons who are not wearing proper protective clothing for such work.

*Causes of suffocation.*—Leaky gas tubes or connections; lack of ventilating flues or fans where fumes are created by hot metals, oils, acids or other substances.

*Machinery.*—All machinery should be properly lighted for safe operation and in good operating condition with safety set screws on moving parts; all belts, pulleys and gears properly guarded, with guards in place and in use; brakes, if any, in good order; motors, if any, protected; specially hazardous machinery such as saws, stamping presses, etc., equipped with guards. Elevators should be equipped with gates, interlocks and other approved safety devices.

*Clothing is a frequent cause of accident.*—Clothing worn around machinery should be

close fitting without flowing ends; sleeves should be rolled up; flapping ties or ribbons prohibited; long hair protected by caps or nets; caps with celluloid vizors prohibited; gloves are generally a hazard when operating machinery, but an asset in handling rough materials. Foundry workers should wear leggings and foundry boots. Handlers of heavy materials should wear safety type shoes to protect the feet.

*Eye protection.*—Safety goggles should be worn for all such operations as grinding, chipping and routing of metals; pouring of hot metals, oils and corrosive acids.

*First aid in prevention of blood poisoning.*—See that first aid equipment is complete and that rules are in force demanding that any abrasion of the outer skin be it even a scratch, broken blister or bruise, be immediately treated by first aid, and treatment continued regularly thereafter until healed.

*Industrial diseases.*—Enquire closely into materials and work processes to find out if there is health hazard to employees. Give particular attention to lead and lead compounds, benzol and dust, especially if there is inclusion of free silica. Most dusts are harmful. If substitutes free of lead and benzol cannot be used and benzol fumes and harmful dusts cannot be exhausted by ventilation without inhalation by workers, the wearing of effective respirators during time of exposure is the safe alternative. Medical examination at stated time intervals might also be considered.

*Good lighting.*—Good lighting of machinery, passageways and stairs at all times is essential. Make your inspection cover daylight and dark.

*Proper supervision.*—Safety devices and plant safety rules are of no use in the prevention of accidents unless the safety devices are always in place and in use, and the plant safety rules are strictly enforced—report all instances where safety devices are not in use or safety rules are not being enforced.

*Good housekeeping in fire and accident prevention.*—Good housekeeping is one of the prime essentials in the preventing of fires and accidents. See that halls and floors are clean and free from rubbish, stairways in good condition, stores piled safely, passageways and working spaces around machinery free of obstructions, fire extinguishers handy and in good condition, ladders strong and of the safety type where practical, safety devices on elevators in good order, and that toilets, drinking fountains, etc., are in clean condition.

## ADDITIONAL MALE MINIMUM WAGE REGULATIONS IN MANITOBA

THE *Manitoba Gazette* of March 2, 1935, contains Order No. 18, governing employment of men performing work generally done by boys. The text of this order is as follows:

ORDER No. 18.—*Governing Employment of "Men Performing Work Generally Done by Boys," "Part-time" and "Piece-work," "Employment and Apprentices."*

1. Rate for work generally performed by boys when done by adults.

The occupations listed hereunder are classified as work generally performed by boys of 18 years of age and under, and if performed by men over 18 years of age, they shall be paid not less than the established rate for adult workers, unless employee, over 18 years, was in employer's service in any such occupation on March 1, 1935, or after that date becomes over 18 years while in employer's service in any such occupation. In either of such cases he may be retained by the same employer until an opportunity for promotion occurs and paid not less than the established rate for boys, namely:—

Not less than at the rate per week of 48 hours as follows:—

- \$8 per week for first 6 months of employment.
- \$9 per week for second 6 months of employment.
- \$10 per week after 12 months of employment.

Occupations: Delivering telegrams or other messages, hand bills or advertising matter; delivering parcels on foot or on bicycle; office boys; shining shoes; delivering newspapers; setting up bowling alley pins; other work of similar nature when ruled as properly coming under this order by an Inspector of the Bureau of Labour and when employers hold a certificate in writing by said inspector.

2. Waiting time if on part-time or piece-work basis.

If employment is on a part-time, or piece-work basis, an amount equal to at least the minimum wage rate established for the work employee is engaged to do must be paid for all time during which the employee is required to be available for duty, including time spent waiting on the premises when required by the employer.

3. Four-hour minimum if part-time or piece-work basis.

Employees working on a part-time or piece-work basis shall be paid for not less than four (4) consecutive hours in any day such employees are required to report for duty.

4. Average over four weeks.

Wages paid on a piece-work basis may be averaged over any consecutive four-week period.

5. Payment of wages.

Wages shall be paid weekly in cash, and after each week's wages have been earned they shall be paid within three (3) days.

6. Rate for indentured apprentices.

If an indenture of apprenticeship has been entered into under the terms of which the employer, during a specified period of not less than one and not more than two years, undertakes to see that a male employee is taught a skilled trade or calling, and the employee undertakes to learn the skilled trade or calling, it is agreed that the wages stipulated in the indenture may supersede the rates set by the minimum wage regulation, provided a copy of such indenture is filed with, and approved of, by the Board, and also provided that the rate of wages paid shall not be less than the rates established for persons under the age of 18 years in the industry.

7. Applies to all orders.

This order shall apply in respect to all orders of the Minimum Wage Board made prior to this date.

Penalties are provided for violation of the order and the usual provisions for posting are included. The order became effective on March 1, 1935.

## WOMEN'S MINIMUM WAGES IN QUEBEC

### Order Governing Paper Industry and Allied Processes

THE Women's Minimum Wage Board of Quebec has issued Order No. 17a governing employment in the paper industry. This order which was gazetted on March 23, replaces previous regulations concerning the same industry (*LABOUR GAZETTE*, April, 1934, page 330). The following is the text of the Order:

Order No. 17a (provisory).—Replacing order No. 17, which was in force previously governing female employees and males when replacing females in any class of employment in the paper industry and allied processes including paper box and paper bag making, wooden boxes partially made or finished with paper or cardboard; all kinds of paper and all fibre, pulp and paper products.

1. MINIMUM: No wage shall be less than is set forth in the following table:

*City and Island of Montreal and a radius of ten miles around and beyond the Island of Montreal.*

	Per hour
50 per cent of the employees, at not less than .....	.15c
50 per cent of the employees, at not less than .....	.21c

*Province of Quebec, excepting the City and Island of Montreal and a radius of ten miles around and beyond the Island of Montreal.*

	Per hour
50 per cent of the employees, at not less than .....	.13c
50 per cent of the employees, at not less than .....	.19c

The employee's wages shall be paid to her wholly in cash; no deduction being permitted for any cause or purpose whatsoever. Said

wages shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money enclosed in the envelope; same must be initialed by the person who paid the employee.

2. All employees without any exception are governed by the above specified minimum wages.

3. HOURS OF WORK: The total of working hours cannot in any case exceed 55 hours per week unless a special permit has been obtained from the Industrial and Commercial Establishments Inspection Department. (Chap. 182, R.S.P.Q., 1925).

4. WAITING TIME: Any employee required to wait on the premises shall be paid for the time thus spent.

5. DISCHARGE OF EMPLOYEES: No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint

with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act.

6. UNIFORMS: If a special uniform is required it shall be furnished and laundered by the employer without cost to the employee.

7. PENALTIES: Any violation of this Order is punishable by fine or imprisonment. (See Section 12 of the Act).

8. POSTING: Each establishment shall keep a copy of this Order posted in a conspicuous place where the employees have access.

9. This Order shall come into force and be effective for a period of twelve months starting on June 1st, 1935, and is replacing Order No. 17 (which was in force and effective since June 1st, 1934) which said Order shall thereupon be rescinded.

Gus. Francey, *Chairman.*

Omer Brunet,

C. J. Griffin,

Eug. Richard.

Montreal, February 28th, 1935.

## Mothers' Allowances in Nova Scotia in 1934

The annual report of the director administering the Mothers' Allowances Act of Nova Scotia reviews the activities under this enactment during the fiscal year ending September 30, 1934. In a summary of the four years during which the Act has been in force, the director points out that during the first year \$310,602.04 were paid in allowances and the costs of operation were \$22,744.07; during the second year \$331,336.72 were disbursed in allowances and the costs of operation were \$16,824.56; for the third year the sum of \$341,929, was paid in allowances and the cost of operation was \$16,129.38; while during the fourth year \$356,074.70 was paid in allowances and the cost of operation was \$15,128.47.

In the first year of operation 1,030 families, comprising 3,179 children, were assisted; during the second year 1,108 families and 3,342 children; during the third year 1,158 families and 3,487 children; and for the year ending September 30, 1934, there were 1,168 families and 3,549 children.

The statistics indicate that the total number of applicants during the year under review was 265 of whom 110 were found ineligible while 155 were approved. These 155 new beneficiaries had 566 children, the average number of dependent children per family being 3.65. The number of children over 16 years of age in the new families was 251, and their total reported monthly earnings were \$1,395.56 of which amount \$434.15 was contributed to home support. In 55 of the 155 approved applicants the families were without any property or cash assets. Of the applications approved by the director, the

number of mothers with one dependent child was 12; with two children, 38; with three children, 41; with four children, 17; with five children, 21; with six children, 10; with seven children, 12; with eight children, 1; with nine children, 1; with ten children, 1; and with eleven children, 1.

There were 189 cancellations and 18 renewals during the year. The sum required for the payment of allowances in 1935 is estimated at \$418,180; the total required in connection with the operation of the act being estimated at \$434,100.00.

A marked increase in the fruit and vegetable preparations industry in Canada during 1933 is indicated in a report recently issued by the Dominion Bureau of Statistics. During the period 1923-33 the volume of fruit and vegetable preparations produced increased about 100 per cent. Although the number of plants in operation increased from 258 in 1932 to 273 in 1933, the capital investment decreased from \$40,586,892 to \$37,286,824. The average number of employees per annum increased from 5,954 to 6,530; salaries and wages, however, decreased from \$30,034,537 to \$29,982,400, the amount paid for materials increased from \$15,600,602 to \$16,461,755.

According to a preliminary statement of the Bureau of Mines (Quebec) mineral production in the province in 1934, attained a value of \$31,083,167—an advance of 10.4 per cent over 1933, and of 21 per cent compared with the low mark of 1932.

## NEW COAL MINING REGULATIONS IN SASKATCHEWAN

**R**EPEALING the Coal Mines Licensing and Regulations Act of 1934, the Saskatchewan Legislature has recently passed the Coal Mining Industry Act, 1935. The Act empowers the Lieutenant-Governor in Council to licence all operators and also to fix the conditions under which licences will be granted.

The Act provides that it will be the duty of the Minister of Natural Resources to encourage the betterment of conditions of the coal mining industry and for this purpose he is empowered:

(a) to inquire into any condition for the time being prevalent in the coal mining industry, which he deems to be detrimental to the interest of the industry, persons engaged therein and the public, or any of them;

(b) to make surveys from time to time of all or any natural resources of the province in relation to coal mines and the coal mining industry and to formulate plans for their useful, economical and orderly development;

(c) to promote and attend conferences of operators and persons engaged in carrying on or employed in the coal mining industry for the purpose of discussing any matter, circumstance or thing, which detrimentally affects the well-being thereof, or of any class of persons engaged therein, or which operates to the disadvantage of any other industry or trade, or of the public generally, and for the purpose of formulating such measures as are calculated to remedy the detrimental state of affairs;

(d) to promote the formation of associations of operators or employees, where no such associations exist, with the object among others of bettering the conditions of the industry, and the elimination or discontinuance of any system, practice or method of business which is detrimental to the industry, or to any class or classes of persons engaged therein.

(e) to collect, arrange and systematize such information as to the coal mining industry of the province and as to the natural resources of the province in relation to such industry as he may from time to time deem proper;

(f) to assist with information and advise any operator or person engaged in the coal mining industry or any association of such operators or persons in any manner calculated to lead to the betterment of the industry and the public;

(g) generally to do all acts and things necessary or incidental to any of the matters hereinbefore set forth.

Section 8 of the Act provides as follows:—

8. (1) the Lieutenant-Governor in Council may by regulation from time to time, and, if deemed necessary, after consultation from time to time with the operators and the employees:

(a) make orders, formulate codes and set up standards of ethics, methods, practices and systems applicable to the coal mining industry so far as they relate to the activities of operators and persons engaged in that industry within the province calculated to effect stability in the conditions thereof, with the object of prohibiting competitive practices which are in their nature detrimental either to the industry or to the operators or persons engaged therein,

or to the employees in the industry, or to the public;

(b) without derogating from the generality of the provisions contained in clause (a), make orders, formulate codes and set up standards of ethics, methods, practices and systems, applicable to the coal mining industry within the province, with the object of establishing standards of prices below which no product of the coal mining industry shall be sold, whether by wholesale or retail, and with the object of establishing standards as to hours of employment and wages of any persons or class or classes of persons employed in the industry;

(c) declare that any code or codes formulated shall be in force as from a specified date, and upon publication of notice thereof in *The Saskatchewan Gazette*;

(d) declare that from and after a specified date, and upon publication of notice in *The Saskatchewan Gazette*, any code or any specified part of any code shall cease to have any force or effect;

(e) suspend the operation of any code or any specified part or parts thereof, either for a fixed period, or until further order;

(f) alter, vary, modify or amend the provisions of any code;

(g) fix, from time to time, the price or prices at which coal may be sold within the province, having regard to conditions obtaining in the coal mining industry, and to the interests of the operators, their employees and the consumers;

(h) classify employees in the coal mining industry according to the nature of the employment, and provide for the fixing of a minimum wage to be payable to all classes of employees or any specified class or classes of employees in the province; and

(i) generally make such regulations and orders not inconsistent with this Act, as are necessary to carry out the provisions thereof according to their true spirit and intent.

This Act comes into force upon proclamation.

A recently published report of the Dominion Bureau of Statistics on the woollen textile industries in Canada in 1933 shows that these industries gave employment to 9,832 persons with a total for salaries and wages of \$7,774,386 in 1933, as compared with 8,586 employees who received \$7,121,340 in salaries and wages in 1932.

One of the chief features of the annual report of the Chief Medical Officer (New Brunswick Department of Health) is a review of work of the public health nursing service. During the year 1934, public health nurses visited 25,000 homes and attended 9,000 child welfare clinics. In order to extend public health nursing service the Department of Health is willing to assist local units in the establishment and maintenance of such a service both through guidance and supervision and, where such is necessary by contributing to its financial support.

## WORKMEN'S COMPENSATION IN NEW BRUNSWICK AND SASKATCHEWAN

### Annual Reports of Provincial Boards for 1934

#### New Brunswick

THE sixteenth annual report of the Workmen's Compensation Board of New Brunswick reviews the administration of the Act during the calendar year 1934. There is also presented a detailed analysis of accidents in 1933 based upon completed statistics.

During the year the Board found it necessary to write off as bad debts the sum of \$2,466.45, chiefly on account of debtors having left the province or made assignments and received their discharge in bankruptcy. At the end of 1933, after adjustments between actual and estimated income and expenditure, the Board concluded with an actual credit balance of \$68,241.39. The total income for the year 1934 is estimated at \$556,570.27 and the expenditures at \$676,446.19, leaving an estimated deficit of \$119,875.92, deducting from this the surplus of \$68,241.39 carried forward for 1933, there is left an estimated deficit of \$51,634.53. As explained in the report, these balances do not purport to be the actual amount of moneys to the debit or credit of classes, but show what has been collected from the provisional statements filed and what the Board think, after going over the data in their possession, is a fair income to be expected from the amount to be collected owing to the expected increase of the actual payrolls over the provisional. The expenditure shows the same condition. To the amount paid out is added a sufficient sum which the Board estimates will cover the cost of claims in assembly and claims which may be existing as of December 31, 1934, but not reported to the Board, and also the estimated amount of claims reported, partly paid, but not completed.

Complete accident statistics for 1934 were not available when the report was published, but a tabular analysis is made of accidents in 1933 with a comparison of accident frequency and accident compensation cost of previous years.

*Statistics for 1933.*—The cost declined steadily from the peak year of 1928 when it was \$641,132.93 to \$359,593.66 in 1932 but in 1933 it rose to \$580,879.44. Accident totals declined from a peak of 9,281 in 1929 to 6,707 in 1933. Of the 6,707 accidents in 1933, 26 were fatal, 348 involved permanent partial disability; 3,606 temporary total disability; while 2,700 involved medical aid only and 365 were non-compensable. In 1932 the total number of accidents was 4,386, classified as

follows: fatal, 18; permanent partial, 250; temporary total, 2,582; medical aid, 1,536.

During 1933, the average age of workmen involved in accidents was 32.73 years and their average weekly wage was \$9.75. In temporary total disability cases the time loss averaged 27.40 days, while in permanent partial disability cases the time loss averaged 97.26 days.

The causes of accidents in 1933 were classified as follows: prime movers, 146; working machines, 324; hoisting, 195; dangerous substances, 200; stepping on or striking against objects, 626; falling objects, 921; handling objects, 884; tools, 1,043; runaways and animals, 43; moving trains and vehicles, 222; fall of person, 1,047; all other causes, 1,056.

The net cost of administration during the year, including the cost of the factory department was \$56,737.01.

Included in the report is the annual statement of the factory inspector, covering the year's activities. During 1934, there were 1,272 mills, factories, hotels and industrial plants visited. In the matter of boiler inspection, this official found that a number of small plants have not as yet had their boilers insured. In dealing with accidents due to exposed machinery, this official expressed himself as being strongly opposed to the use of wooden pulleys in portable mills as they are exposed to climatic conditions which causes rapid deterioration. In all cases where wooden pulleys are used the inspector recommends that they be well guarded.

#### Saskatchewan

The fifth annual report of the Saskatchewan Workmen's Compensation Board contains a provisional summary of the activities under the Act during the calendar year 1934, with a detailed analysis of statistics for 1933. The Board has been in active operation from July 2, 1930 when it began to pay compensation and medical aid. A review of the provisions of the Act was given in the *LABOUR GAZETTE* for April, 1929, page 379.

There was collected from all employers in 1933 the sum of \$338,369.30 while the expenditures in compensation, medical aid, etc., was \$331,087.06, leaving a balance of \$7,281.60. For the year 1934 total receipts are predicated upon an estimate of \$335,639.54 with estimated disbursements of \$309,244.92, leaving an estimated surplus of \$26,394.62. The wage expenditure for all classes under the Act for

the year 1934 was estimated at \$23,029,745, while the provisional payroll of 1933 amounted to \$23,017,292.

The number of fatal accidents in 1934 totalled 8 as compared with 13 in 1933, 13 in 1932, 14 in 1931 and 17 in 1930; pensions being paid at the end of 1933 were 126 and the total number of employers making returns to the Board was 4,248 as compared with 4,602 in 1933.

Employers of the province are divided into 67 groups, each group bearing its own rate of assessment. These groups comprise the 21 classes under the Act.

**Accident Prevention.**—The Board continued its activities in connection with accident prevention as outlined in previous reports. Reports of accidents happening in certain districts were sent to accident prevention associations, as well as to the Inspection Branch of the Department. Every case is reviewed, and if there appears to have been negligence on the part of employer or employee, an explanation is requested with a view to having the defect remedied. During the year lumber operators of the Province organized with the object of giving greater attention to safety in the conduct of their industry.

The total number of accidents reported in 1934 was 3,104, of which 8 were fatal; 26 involved permanent disability, 1,568 temporary disability and 1,502 medical aid only.

A complete analysis of reported accidents in 1933 indicated a total of 2,390, of which 13 were fatal, 68 were permanent disability cases, 1,185 temporary disability, and 1,124 required medical aid only. The average age of all classes injured in 1933 was 37.62 and

their weekly average wage was \$16.87. In temporary disability cases, the average number of days lost was 32.68 and in permanent disability cases the average was 123.19 days, the total time loss during the year in all cases was 45,984.5 working days. Causes of accidents in 1933 were grouped as follows: Prime movers, 75; working machines, 179; hoisting apparatus, 21; dangerous substances, 110; stepping or striking against objects, 345; falling objects, 354; handling objects, 243; tools, 146; runaways and animals, 44; moving trains and vehicles, 134; falls of persons, 408; all other causes, 331.

The following table gives the estimate of wage expenditure by classes in Schedule 1 for 1934:—

Class	Wage Expenditure
	\$
Canadian Pacific Railway.....	1,877,760
Canadian National Railway.....	1,900,000
Province of Saskatchewan.....	No estimate required
Dominion of Canada.....	
Cities of Regina, Saskatoon and Moose Jaw, Municipalities, with the exception of Regina, Saskatoon and Moose Jaw.....	1,350,000
Lumbering.....	1,201,850
Planing mills, etc.....	422,100
Mining.....	908,100
Gravel pits, brick and glass works.....	1,184,600
Garages, machine shops, etc.....	59,450
Gasoline, chemicals, etc.....	2,095,170
Breweries, bottling works, etc.....	495,330
Milling and grain elevators.....	257,600
Abattoirs and packing houses.....	4,053,800
Creameries, and bakeries.....	572,200
Printing, power laundry, dyeing, etc.....	1,290,200
Road making and wholesale establishments	1,390,750
Construction—Steel, concrete, brick.....	2,255,880
Electrical power lines and railroad construc- tion.....	805,870
Anti-tuberculosis league.....	572,328
	337,257
	23,029,745

## ASSESSMENT RATES FOR WORKMEN'S COMPENSATION IN ONTARIO INDUSTRIES FOR 1935

**T**HE Ontario Workmen's Compensation Board has recently issued its table of provisional assessment rates for 1935 with adjusted rates for 1934. Prefacing its table of rates for 1935, the Board explains the methods followed in arriving at the rates under the collective liability system, which is modified to the extent of permitting rebates in favour of employers with good accident records:

"All industries in the same class do not necessarily nor usually, bear the same rate. The classes are subdivided into groups, and even within the group the rates are different where this is shown to be justified. The experience is kept for the group as well as for the class. In fixing the rates, however, regard must always be had to the fact that each

class is an insurance group and that all lines of industry in the class must share to some extent the good or ill fortune of the class as a whole. The rating for each separate line of industry cannot be made to depend upon the experience in that particular line alone. This is especially the case where the total amount of the payrolls in any line of industry is small. To charge that line of industry with its own cost might place a very excessive burden upon its employers for one year while perhaps relieving them almost wholly from assessment another year. This would destroy the underlying principle of collective liability or mutual insurance which is the basis of the system.

"Individual distinction between employers even in the same line of industry is made

according to their accident experience by a system of merit rating. Where the accident cost falls short of the amount of assessment by a stated percentage a merit rating refund within specified limits, is made accordingly."

For assessment and compensation purposes under the Act the industries covered are divided into 24 classes. Each class stands upon its own footing and carries its own burden except that a very small general fund, known as the Disaster Reserve, is set aside to assist in meeting any extraordinary call that may arise in any class. With the ex-

ception of this Disaster Reserve, the moneys collected are just what are considered necessary to take care of the accidents that have actually happened.

The table of rates per \$100 of payroll to be levied provisionally for 1935 upon employers coming under the provision of Part I of the Workmen's Compensation Act shows that for most groups these rates remain unchanged from the adjusted rates for 1934. Changes however are made in the rates for certain groups as follows:—

## CHANGES IN ASSESSMENT RATES FOR 1935

Occupation	1934	1935	Occupation	1934	1935
	Adjusted	Provisional		Adjusted	Provisional
	\$ cts.	\$ cts.		\$ cts.	\$ cts.

## CENSUS OF MANUFACTURING INDUSTRIES IN CANADA, 1933

## Statistics Respecting Employees, Wages, Etc.

THE Dominion Bureau of Statistics, under the Statistics Act of 1918, takes annually by mail an industrial census covering statistics of fisheries, mines, railways, etc., and general manufacturing in Canada. Preliminary figures for all manufacturing industries for the year 1933 have been issued, and the accompanying tables give the figures in some detail.

The first table contains summary figures for all manufacturing industries from 1929 to 1933, numbers of establishments, capital invested, employees on salaries and wages, and value of production. Except for numbers of establishments and capital invested, which showed increases for 1930, the figures show decreases each year except that the number of establishments and the cost of materials increased in 1933. It will be observed that the wages paid in 1933 were only one-half of those paid in 1929 while the number of wage-earners decreased by over 30 per cent and the average wages per annum decreased by 25 per cent. Part of the reduction in average wages would be due to short time operations, prevalent in nearly all of the industries.

The second table shows the numbers of employees on salaries and on wages with salaries and wages paid as well as the number of establishments, for 1933, by provinces and by groups of industries and for each of the important industries in each group.

Statistics for 1932 appeared in the issue of the Labour Gazette for September, 1934, pp. 889-893, and contained figures as to the numbers of wage-earners classified according to the regular hours of work per week, 40 or less, 44, etc., up to 60 and over 60. This information for 1933 will not be available for some time.

The third table gives the figures as to numbers of employees and salaries and wages paid in the other industries for which figures are collected annually.

Figures from the Decennial Census of 1931, Bulletin XXXI, showing numbers of gainfully employed persons in all industries were given in the LABOUR GAZETTE for August, 1933, pp. 819-821, also figures from Bulletin XXXIII, numbers of as to wage earners, weeks employed and average earnings, were given in the LABOUR GAZETTE for November, 1933, pp. 1094-1095.

TABLE I.—MANUFACTURING INDUSTRIES IN CANADA, PRINCIPAL STATISTICS, 1929 TO 1933

Items	1929	1930	1931	1932	1933	Change per cent in 1933 over 1932

(b) Including about half of the express employees which are also shown under Express, below.

(c) Not including commission operators.

(d) Full time employees only.

(e) Preliminary figures.

(f) Data incomplete.

## WAGES OF EMPLOYEES ON FARMS IN CANADA, 1929, 1933 & 1934

THE Dominion Bureau of Statistics secures each year from its agricultural correspondents throughout Canada information as to the wages of employees on farms in Canada during the year just ended. The figures so secured are published in the *Monthly Bulletin of Agricultural Statistics* for the February of the following year. Tables of these figures

have appeared in the reports on Wages and Hours of Labour in Canada issued as supplements to the LABOUR GAZETTE for January, 1925 to 1935, inclusive, the first of these giving figures back to 1914. The accompanying table includes figures taken from the issue of the *Bulletin* for February, 1935, and from previous issues.

### WAGES IN AGRICULTURE, 1929, 1933 AND 1934

### Employment and Wages on United States Railways

The Bureau of Railway Economics of the Association of American Railroads has recently published a "Review of Railway Operations in 1934." According to the report the total number of casualties to non-trespassers resulting from railway operation showed a slight increase for the first eleven months of 1934 over the corresponding period of 1933. The increase was 1.6 per cent in fatalities and 8.4 per cent in non-fatal injuries.

Total fatalities to non-trespassers at high-way grade crossings, first ten months of 1934,

increased 1.0 per cent over 1933, while non-fatal injuries increased by 21.4 per cent.

The number of men and women on railway payrolls during 1934 averaged 1,009,000 compared with 971,000 in 1933, an increase of 3.9 per cent. Aggregate compensation to employees increased from \$1,404,000,000 in 1933 to \$1,519,000,000 in 1934, or 8.2 per cent.

Average employee earnings in 1934 were affected by changes in force and working hours, and by the restoration on July 1 of one-fourth of the 10 per cent pay deduction. Annual earnings per employee averaged \$1,506 in 1934, compared with \$1,445 in 1933. Hourly compensation per employee averaged 63.5 cents in 1934, against 62.9 cents in 1933.

## RECENT DEVELOPMENTS AFFECTING LABOUR IN UNITED STATES RECOVERY PROGRAM

### Summary of Various Measures Introduced in Congress During Present Session

#### Work Relief Bill

Final approval was given by the Senate and the House of Representatives to the Administration's work relief measure, providing for appropriations totalling \$4,880,000,000. The measure was originally introduced in the form of a joint resolution by the Senate and House of Representatives "to protect and promote general welfare by (1) providing relief from the hardships attributable to widespread unemployment and conditions resulting therefrom, (2) relieving economic maladjustments, (3) alleviating distress, and/or (4) improving living and working conditions."

The essential features of the enactment as it passed the Senate provided for an appropriation of \$4,000,000,000 "out of any money in the Treasury not otherwise appropriated," and appropriations of \$880,000,000 in existing balances of the Reconstruction Finance Corporation, etc., "to provide relief and work relief." This total is allocated among a wide diversity of projects, ranging from direct relief, various types of public works programs, rural relief, reforestation, flood control, prevention of soil erosion, etc., to advances to states and municipalities for aid to schools.

It gives the President, through the operation of a board, wide powers in the administration of the fund for a period of two years. The measure is expected to give work to 3,500,000 employables now on relief rolls.

#### Equal Labour Representation on Boards

A Bill introduced in the House of Representatives "to accord labour proper opportunity for protection of rights granted by the Congress and for other purposes" has been reported favourably, without amendment, by the Committee on Labour.

The Bill provides that on all boards, commissions, etc., administering laws enacted for the betterment of workers under the National Industrial Recovery Administration, or "having to do with relations between employers and employees," the President is authorized to provide for the participation upon all such boards of "representatives of national trade unions equal to the number of employers upon such boards."

#### The Thirty-Hour Week and Interstate Commerce

The Committee on the Judiciary to which was referred Senate Bill 87 (the purpose of which is to prevent the shipment in interstate

commerce of certain articles and commodities in connection with which persons are employed more than 5 days a week or 6 hours a day, and prescribing certain conditions with respect to purchases and loans by the United States, and codes, agreements, and licences under the National Industrial Recovery Act), has recommended that it be passed. (A minority report of the committee favours its non-adoption.)

This measure requires the adoption of a thirty-hour week and six-hour day in various industries in the United States. If adopted, it would be applicable to employees in the following enterprises: (1) Industries borrowing money from governmental agencies; (2) industries and their subcontractors making contracts for services to be performed with the United States Government; (3) industries actively engaged in interstate commerce; (4) industries operating under codes approved by a governmental agency.

In addition to providing a shorter workweek and workday, this bill would prohibit any reduction in the hourly, daily, weekly, or monthly wages of employees affected by it, pending a reasonable opportunity for discussion and agreement between employers and the duly selected representatives of a majority of their employees.

In the concluding part of the preamble, the objectives are stated as follows: "to provide a fairer and more nearly balanced income; to put idle machines and people to work; to increase the purchasing power of the people and thereby stimulate production to capacity; to revive languishing commerce and trade and to promote the happiness and comfort of the people."

#### Interstate Compacts Promoting Uniformity of Labour Legislation

The Committee on the Judiciary has passed favourably on a resolution introduced in the House of Representatives "to authorize the several States to negotiate compacts or agreements to promote greater uniformity in the laws of such States affecting labour and industries." The purpose of the resolution is to lend the sanction of Congress to States entering into compacts with each other and in groups for the purpose of agreeing upon and securing uniform legislation in each affecting the relation of employers and employees. An identical resolution was passed in the House of Representatives last year but no action was taken in the Senate. Reference was made in the LABOUR GAZETTE of September, 1934, page

338, to negotiations leading to an interstate compact respecting uniform minimum wage legislation entered into by several states.

### New National Labour Relations Bill

Recent trends in arbitration measures in the United States under the National Industrial Recovery Act, leading up to the establishment of the National Labour Board (out of which emerged the National Labour Relations Board) were outlined in the *LABOUR GAZETTE* for August 1934, page 722; and July, 1934, page 653; and in previous issues.

Both these bodies were created to deal with controversies arising under Section 7a of the National Industrial Recovery Act (*LABOUR GAZETTE*, October, 1933, page 991). Briefly this section vouchsafed to labour unions, the right to organize and bargain collectively through representatives of their own choosing, and "free from the interference, restraint or coercion of employers," etc.

As explained by Senator Wagner in introducing recently a Bill providing for a new and independent agency, the old Board was handicapped and was "losing its effectiveness because of the practical inability to enforce its decisions." He referred to the "break-down of Section 7a bringing results equally disastrous to industry and labour," and leading to "a procession of bloody and costly strikes which in some cases swelled almost to the magnitude of national emergencies."

With regard to the new national labour relations Bill, Senator Wagner declared that it "merely provides that employees shall be free to organize for their mutual protection or benefit;" that it "does not encourage National unionism;" that it "does not display any preference toward craft or industrial organizations;" and that it "does not force or counsel any employee to join any union if he prefers to deal directly or individually with his employers."

As stated in its preamble, the Bill is "to promote equality of bargaining power between employers and employees, to diminish the causes of labour disputes, to create a National Labour Industrial Relations Board, and for other purposes."

It provides for the creation of "an independent agency in the executive branch of the Government" to be known as the National Labor Relations Board, composed of three members appointed by the President with the approval of the Senate. This Board has authority "to make, amend and rescind such rules and regulations as may be necessary to carry out the provisions of the Act." This authority extends to providing the machinery

of arbitration, examination, issuance of subpoenas (with penalties for "contumacy or refusal to obey") make awards, etc.

The rights of employees are set forth in Section 7 of the Bill as follows:

"Employees shall have the right of self-organization, to form, join, or assist labour organizations, to bargain collectively through representatives of their own choosing, and to engage in concerted activities, for the purpose of collective bargaining or other mutual aid or protection."

It is declared as "unfair labour practice," for an employer to interfere with, restrain, or coerce employees in the exercise of the above-mentioned "rights."

Other sections of the Bill deal with employees representatives and elections, prevention of unfair labour practices, arbitration, and investigatory powers.

Under the title, "Limitations," it is declared that "Nothing in this Act shall be construed so as to interfere with or impede or diminish in any way the right to strike."

The Bill has received its second reading and has been referred to the Committee on Education and Labour.

### Economic Security Bill

Another measure before Congress is a Bill "to alleviate the hazards of old age unemployment, illness and dependency, and to establish a Social Insurance Board in the Department of Labour." An outline of this proposed legislation was given in President Roosevelt's program of social security (*LABOUR GAZETTE*, February, 1935, page 100).

### Other Measures

Other measures which have already been referred to in the previous issue of the *LABOUR GAZETTE* at pages 225 and 226 are the Thirty Hour Week Bill, and the Bill providing for dismissal compensation.

### Effect of Codes on Hours and Earnings

The results of the application of the industrial codes under the National Industrial Recovery Act and related policies are summarized in the bulletin of March 15, issued by the *National Bureau of Economic Research*. This review indicates the trend of employment, hours and earning in the United States under the N.R.A., during the year 1934.

Wage and hour regulations now apply to all manufacturing industries, to the extractive industries, to a large proportion of employment in wholesale and retail trade, to the public utilities, to transportation other than rail, and in lesser degree, to a variety of service occupations in many diverse fields of employment

The method of wage and hour regulation commonly used in the codes is to establish minimum rates of wages for unskilled and common labour, or for employees receiving the lowest rates of pay, and schedules of maximum hours for various classes of employees in each industry or category of employment. In a very few instances, scales of wages are fixed for all classes of employees in a given industry; and in rather more instances, minimum rates within an industry are fixed, not only for the lowest paid, but for groups of employees higher in the wage scale as well. The great majority of the codes, however, include only a single minimum, and that for the poorest paid. Whether specified in the code or not, it is the general understanding that prevailing wage differentials will be protected and that the relative position of more highly paid employees will not be impaired by the adoption of a minimum wage for common labour. In the regulation of hours of labour, likewise, there is a wide diversity of provision, but the net effect is to establish maximum weekly, and in some instances daily, hours beyond which no employer is allowed to work his employees. It is pointed out that the data essential to the study of wage movements during the period of business recovery exist now in much greater abundance than previously, and therefore the opportunities of comparing wage rates with earnings are greater for the period since 1932 than for the first years of the depression.

The report indicates that the periods of lowest weekly earnings in various industries were as follows: manufacturing, March, 1933; coal mining, May, 1933; metalliferous mining, July, 1932, non-metallic and quarrying, February, 1933; telephone and telegraph, April, 1933; electric light and power and gas, September,

1933; and electric railroads and motor busses, July, 1933; wholesale trade, June, 1933; retail, December, 1933; and Class I railroads, August, 1932.

The average hourly earnings in manufacturing was 49 cents in 1933 and 58 cents in 1934; in class I railroads it was 61 cents in 1933 and 62 cents in 1934; in common labour and road building it was 35 cents in 1933 and 41 cents in 1934.

The hours of labour fixed in the Codes of Fair Competition are the full-time hours per week, or the maximum work-week. Such regulation of hours is effective, therefore, only when labour is fully employed and when the reduction in the maximum work-week spreads the available employment over a larger number than would otherwise have been employed. The most satisfactory record of changes in the full-time hours of work is to be had for the manufacturing industries. The available data show that the maximum work-week declined from 57.3 hours in 1909 to 51.2 hours in 1919; remained at practically that level from 1920 to 1929; and during the depression increased again to probably as much as an average of 55 hours for all manufacturing. The great majority of the codes provide a maximum work-week of 40 hours; a lesser number of 36 hours; and only a few of more than 40 hours. It is estimated that the average full-time week in manufacturing is now between 40 and 44 hours.

"This represents," it is stated, "a radical decline in the hours of labour and means that, under prevailing business conditions, there is considerable work-spreading and sharing of work with a consequent reduction in the average weekly earnings and annual earnings of those who are employed."

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Publications of the Office

*Unemployment among young persons.*—In view of the fact that the problem of unemployment among young persons had been placed on the agenda of the 1935 Conference (LABOUR GAZETTE, January, 1934, p. 40) the International Labour Office was instructed to prepare a report on the subject. Accordingly the study presents the various factors entering into the problem with a statistical analysis of the situation in different countries.

It was explained, however, that it would be unwise to draw any very definite conclusions from an international comparison of figures. The age groups covered vary from country to country, and the methods of compiling the statistics differ in ways which may affect the

ratio of young unemployed persons to the total number of unemployed workers. All that can safely be drawn from the statistics presented are some very general conclusions relating to the approximate rate of unemployment among young persons. "It may be concluded," states the report, "that the number of unemployed persons under the age of 25 is generally about one-quarter of the total number of unemployed persons of all ages. If, then, there are about 25 million unemployed in the world to-day, the number of these persons who are under the age of 25 is probably about 6 or 7 millions—a figure that clearly shows the great quantitative importance of the problem here dealt with."

*Holidays with Pay.*—Since the subject of holidays with pay is on the agenda of the

nineteenth conference (1935) of the International Labour Organization, the International Labour Office has recently published the results of a survey of present law and practice in the different countries with regard to annual holidays with pay for workers other than those engaged in agriculture and shipping.

The report is divided into four chapters. The first is an historical review of the question, while the second is devoted solely to legislation and the third to other forms of regulation (collective agreements, arbitration awards, collective regulations, individual contracts, or custom). The fourth chapter surveys the general trends revealed by this analysis and the problems involved in the framing of international regulations on the subject. The various points connected with such regulations on which Governments might be consulted are given in a separate list.

*Employment of Women Underground.*—The International Labour Organization has recently published a report on "Employment of Women on Underground Work in Mines of all Kinds." This report is intended to supply information covering the second item on the agenda of the nineteenth Conference, which is to be held in June of this year (LABOUR GAZETTE, July, 1934, page 660). After giving a history of the subject, the survey analyses the replies of the various Governments and there are sections dealing with the desirability of international regulations; the form of such regulations and their scope as regards mines and persons; the application of the regulations to colonies; and conclusions and commentary upon the proposed draft convention.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF MARCH, 1935

### Reports of the Superintendents of the Employment Service

THE employment situation at the end of March, 1935, was reported by the superintendents of the Employment Service of Canada to be as follows:—

There was little activity in farming in the Maritime Provinces other than ordinary farm chores. Fishing was only fair, but preparations were being made for the lobster season soon to open. Logging was quiet and lumber operators were awaiting the spring break-up for river driving. At Saint John, a considerable quantity of sawn lumber was being brought down the Bay by scows and transhipped to British markets. Most of the coal mines in the New Glasgow area operated some two to five days per week, although one mine was reported idle, while those in Cape Breton and vicinity worked from one and three-quarters to four days. No important developments were recorded in manufacturing and some idleness was shown in the iron and steel group. Building construction generally was quiet, but civic, street and sewer work continued to provide employment for relief workers. Transportation was heavy, largely due to low fare excursions. Longshoring also registered improvement. Trade, both wholesale and retail, was somewhat brighter and preparations were being made for Easter business. The demand for women workers in the domestic section was fair.

Farming in the Province of Quebec was quiet. Hull recorded some improvement in logging, although camps in other districts

were gradually closing and little further activity was looked for until the spring drive. Mining showed slight change, Rouyn and Three Rivers reporting some placements made in that industry in their localities. Manufacturing in all centres showed no marked progress, except in Quebec City, where improvement was noted in shoe factories. There was little building construction in evidence, but a number of men were still employed by the larger cities in snow removal and miscellaneous works. Transportation was slack, also trade. The demand for women workers was steady, with plenty of applicants registering to meet all needs.

The call for farm help in Ontario was increasing with the approach of spring work and wages were somewhat higher for experienced help. Winter logging operations were about completed and a short period of slackness was expected before the spring drives started. There were few calls from the mines, with quite a number of applicants available. Deep snow still hampered surface work, but with warmer weather increased activity was probable. On the whole, the manufacturing situation for the past month remained fairly steady. Manufacturers of farm implements reported an increase in payroll over that of last year, and iron and steel industries recorded more hours of labour. Textiles, however, not including knitting mills, showed some slackening. Planing mills were busy, also breweries, while food canning factories were preparing

for a busy summer. Not much change was shown in building, although alteration, repair and renovation work in a few cities showed some improvement. Highway construction and various other projects continued as relief measures. In the Women's Domestic Section the call for experienced workers, generally, was excellent, but difficulty was sometimes found in obtaining suitable applicants. More requests were also received for char workers as spring cleaning was in progress, but clerical and factory work for women remained very quiet.

Although a slight increase was noted in the number of farm orders listed throughout the Prairie Provinces, the demand was not quite up to the average for the time of year, due to colder weather. A number of vacancies also remained unfilled as the men had insufficient funds to pay transportation. Logging, except at Edmonton, and mining, except in the small pick mines at Drumheller, were both quiet, with no requests for men. Manufacturing showed a slight upward trend at Winnipeg and Edmonton; elsewhere, little change was recorded. Building construction remained slack, but prospects were beginning to look brighter, building permits at Winnipeg having increased considerably from those reported a year ago, and while the number of undertakings at Edmonton seemed smaller than usual, those released were of a more

substantial nature than others of recent years. Relief camps continued to operate, and a number of men found employment there and on other Federal projects. An increased demand was registered for workers in the Women's Domestic Section, with some difficulty experienced in securing suitable applicants for country positions.

Farming was quiet in British Columbia, the severe frost and snow holding back spring operations on the land. Some work, however, was being done in the orchards, but little help was hired. The lumber industry showed slight change. Queen Charlotte camps were active, with no outstanding demand for loggers. Sawmills were mostly operating on full time, but some shingle mills were inactive through lack of orders. There were few calls for additional men at the mines, although work was brisk at Nelson, with prospects of more properties soon opening up. No change was noted in manufacturing. Building construction was quiet and relief work continued in the various districts. Shipping and longshore work was quieter at New Westminster and Prince Rupert, but fairly busy at Vancouver and Victoria, while shipyards were moderately active at Prince Rupert, but quiet at Victoria. Some positions in domestic service were available for women workers, but openings for female help in other lines were lacking.

### Industrial and Commercial Establishments Act (Quebec)

Special regulations under the authority of the Industrial and Commercial Establishments Act (Quebec) have been issued for the protection of persons working in compressed air (The provisions of the Act were given in the LABOUR GAZETTE, May, 1934, page 438).

By these regulations every employer, before commencing work entailing the use of compressed air, must notify the chief inspector of industrial and commercial establishments, and forward plans and specifications of the proposed construction.

The inspector is empowered to visit any such work at any hour of the day or night to ascertain if the regulations are being complied with by both employers and employees.

It is further stipulated that any equipment affecting persons employed in compressed air must be to the satisfaction of the inspector, who is authorized to have any necessary alterations or renewals made.

The maximum number of hours of each shift, the maximum duration of continuous

work and the minimum duration of rest in the open air are set forth in a schedule under varying pressures. While foremen and workmen whose presence under air pressure is required for brief intervals may enter the open air without the usual decompression, "no person shall remain under compressed air (a) at pressures ranging from 15 pounds to 27 pounds for a longer period than 30 minutes; (b) or for a greater length of time than 15 minutes at pressures of 31 pounds and over, without being decompressed."

Additional hours of work required on any shift in cases of emergency, both as to the amount of extra time under pressure and the rate of decompression thereafter, are at the discretion of the inspector.

The rate of decompression is given in a schedule which is to be posted in each manlock. The regulations detail the provisions respecting manlocks and working chambers, gauges, lighting, wash and rest rooms and medical attendance.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN FEBRUARY, 1935

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on March 1 was 9,062, the employees on their payrolls numbering 902,301 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for February was 1,721 having an aggregate membership of 160,929 persons, 18.2 per

cent of whom were without employment on March 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 65 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of March, 1935, as Reported by Employers

Reports of employment tabulated by the Dominion Bureau of Statistics show a further improvement in the industrial situation at the beginning of March; 9,062 leading employers throughout Canada enlarged their payrolls from 885,961 on February 1, to 902,301 on March 1, or by 16,340 persons. The experience of the last fourteen years shows that the average change in employment between February 1 and March 1 is a small increase, gains in eight of the the years since 1920 rather more than offsetting losses in the remaining six; the advance on the date under review was considerably above the average, also exceeding that noted on March 1 in any earlier year of the record except 1922. In consequence of this more-than-average gain, there was an increase in the seasonally corrected index that raised it to a higher level than in any other month since the late summer of 1931. The unadjusted index, (based on the 1926 average as 100) rose from 94.6 on February 1, 1935, to 96.4 at the beginning of March. On the same date in the preceding fourteen years, the index was as follows:—1934, 92.7; 1933, 76.9; 1932, 88.7; 1931, 100.2; 1930, 110.2; 1929, 111.4; 1928, 102.6; 1927, 97.5; 1926, 92.6; 1925, 88.1; 1924, 91.8; 1923, 91.0; 1922, 82.9 and 1921, 89.1.

The greatest gains at the beginning March occurred in manufacturing, in which 12,903 additional persons were employed by the co-operating employers. The increases in textiles and iron and steel were most noteworthy,

those in the former being the largest recorded on March 1 in any of the years for which statistics have been compiled, while the gains in iron and steel considerably exceeded the average. Among the non-manufacturing industries, there were advances in metallic-ore mining, wholesale trade, shipping and stevedoring and highway and railway construction; the gains in the highway group, (amounting to nearly 8,200 persons), were partly due to an increase in the numbers at the unemployment relief camps, while snow-clearing operations were also a factor in adding to the employment on the streets and roads. On the other hand, logging reported considerable declines, owing to the completion of the season's operations in many camps. Coal-mining and railway operation also released employees, but the losses were on a moderate scale.

### Employment by Economic Areas

The trend of employment was upward in Quebec, Ontario and British Columbia, while activity in the Maritime and Prairie Provinces was seasonally curtailed. Firms in Ontario reported the greatest improvement.

*Maritime Provinces.*—There was a decline in employment in the Maritime Provinces, where the 626 reporting employers reduced their staffs from 71,256 persons on February 1, to 70,280 at the beginning of March. Considerable gains were registered in manufacturing and coal-mining, those in the former occurring mainly in lumber, textile and iron and

steel factories. On the other hand, logging was seasonally quieter and there were decreases in railway and highway construction. Employment on March 1, 1934, had shown a decided advance; the index then was between four and five points higher than on the date under review, when it stood at 98.6.

*Quebec*.—Employment at the beginning of March showed a considerable increase, greatly exceeding the small gain which the experience of the last fourteen years shows is customary on March 1. Substantial improvement occurred in manufacturing and construction,

The trend of employment at that date in the years for which data are available has not been invariably upward, although the average change in the years since 1920 has been a moderate increase. The gain at the beginning of March, 1935, was considerably greater than that indicated on March 1 in any other year of the record; it substantially exceeded the increase noted on the same date in 1934, when the index, at 97.8, was nearly six points lower. In fact, the March 1, 1935, index, at 103.5, was higher than at the same date in any other year since 1930.

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

while advances were also made in trade, mining, services and transportation. Within the group of factory employment, leather, textile, tobacco and beverage and iron and steel plants were decidedly more active, but pulp and paper and clay, glass and stone works reported curtailment. Logging also recorded losses as the active season drew to a close. Statements were tabulated from 2,157 firms, whose payrolls aggregated 250,572 employees, as against 245,558 at the beginning of February. The index, at 91.3, was moderately higher than on March 1, 1934, when it stood at 89.1.

*Ontario*.—Further and greater expansion was noted in Ontario, where the 4,010 co-operating establishments added 12,589 persons to their forces, bringing them to 394,882 on March 1.

Much of the advance at the beginning of March was in factory employment, manufacturers adding nearly 8,150 workers to their staffs. The iron and steel group showed the greatest recovery, but leather, lumber, rubber, textile, non-ferrous metal and non-metallic mineral product works were also decidedly more active. Among the non-manufacturing classes, highway construction also recorded substantial improvement. The increase in this group took place chiefly in unemployment relief projects and camps; some 5,500 additional workers were reported in the highway construction group. On the other hand, logging showed a slight slowing-up as the season's operations neared completion, and shipping, building and railway construction and services also released employees.

*Prairie Provinces.*—As is customary in the late winter, there was a contraction in the Prairie Provinces on March 1; this involved a larger number of workers than the reduction recorded on the same date in 1934, being also rather greater than the average loss indicated in the last fourteen years. The index number, at 87.2, compared favourably with that of 83.8 on March 1, 1934. Statistics for the date under review were tabulated from 1,331 firms with 109,938 employees, compared with 112,360 in their last report. Within the manufacturing industry, there were decreases in vegetable food and pulp and paper factories, resulting in a decline in the group as a whole. Coal-mining, railway operation and highway and railway construction were also slacker, while the extraction of metallic ores and building construction employed a larger number of workers.

*British Columbia.*—The manufacture of lumber products showed substantial improvement, and logging, railway transportation and highway construction also afforded more employment. On the other hand, coal-mining, shipping and stevedoring and railway construction and maintenance experienced curtailment. The working forces of the 937 co-operating em-

ployers aggregated 76,629 persons, as compared with 74,494 in the preceding month. The index, at 91.9, was higher than on March 1, 1934, when it had stood at 85.6; a much smaller gain had then been recorded. The advance on the date under review was substantially greater than the average increase indicated on March 1 in the years 1921-1934.

Index numbers of employment by economic areas are given in Table 1.

### Employment by Cities

Employment increased in each of eight cities for which separate statistics are tabulated, Montreal, Quebec City, Toronto, Ottawa, Hamilton, Windsor and the adjoining Border Cities, Winnipeg and Vancouver all showing an upward movement. The gains in Montreal, Windsor and Toronto were most pronounced. In each of these cities, the index of employment was higher than on March 1 of last year or of 1933.

*Montreal.*—Large additions to staffs were reported in Montreal; there were gains in manufacturing, (chiefly in leather, textile and tobacco and iron and steel factories), and in trade, services, transportation and construction. Statements were tabulated from 1,268

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS  
(AVERAGE CALENDAR YEAR 1926=100)

Relative Weight of Employment by Economic Areas as at Mar. 1, 1935.....	100.0	7.8	27.8	43.7	12.2	8.5

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

firms employing 128,783 workers, as compared with 121,769 in the preceding month. The tendency at the beginning of March in 1934 had also been upward, but the gains were decidedly smaller, and the index then was lower by nearly four points than on the date under review, when it stood at 86.3. With only one exception, the increase on March 1, 1935, was greater than on the same date in any of the last thirteen years for which statistics have been segregated for Montreal.

*Quebec.*—Manufacturing afforded more employment, mainly in the leather group and construction and services were also brisker, while other industries, on the whole, recorded only slight changes. The working forces of the 165 co-operating employers totalled 12,326 persons, compared with 11,790 on February 1, 1935. The index was fractionally higher than on the same date in 1934, when a rather smaller gain had been indicated.

*Toronto.*—Activity increased in the textile, leather, iron and steel and mineral product groups, but there was a decline in food, printing and paper and electrical apparatus establishments; among the non-manufacturing industries, transportation showed moderate improvement, while the other divisions reported

curtailment on a small scale. Returns were received from 1,335 firms, employing 113,754 workers at the beginning of March, as compared with 112,628 on February 1. The index standing at 94.0, was higher than on March 1, 1934, when a rather larger gain had occurred.

*Ottawa.*—Employment in Ottawa showed little general change; manufacturing and a few other groups were rather more active, while construction released some workers. The 173 co-operating employers reported a total payroll of 12,724 on the date under review, as compared with 12,632 on February 1. The index was a few points higher than at the beginning of March, 1934, when a decrease had been noted.

*Hamilton.*—A further gain, on the whole, occurred in Hamilton, mainly in manufacturing, while other industries showed only small changes. An aggregate payroll of 27,439 persons was reported by the 267 firms whose returns were tabulated, and who employed 27,070 in their last report. A slight improvement had been recorded on the same date of last year, when the level of employment was lower.

*Windsor and the adjacent Border Cities.*—A large increase was indicated in the Border Cities, almost entirely in manufacturing,

Relative Weight of Employment by Cities as at Mar. 1, 1935	14.3	1.4	12.6	1.4	3.0	1.9	3.9	3.2

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

within which a marked advance took place in the automobile and related industries. There were only slight changes in the other groups. Data were received from 164 employers with 17,192 workers, or 2,442 more than on February 1. Employment was much brisker than at the beginning of March, 1934, when smaller gains had been recorded; the increase at the latest date is the largest shown on March 1 in the years for which statistics are available, while the index, at 127.0, is higher than in any other month since the summer of 1930.

*Winnipeg.*—Heightened activity was noted in Winnipeg, where 439 firms reported 35,504 employees, as against 35,215 in the preceding month. There was an increase in trade, transportation and construction, while the fluctuations in the remaining divisions were slight. Employment was in greater volume than on March 1 of last year, when little general change had been registered.

*Vancouver.*—Manufacturing, as a whole, recorded improvement in Vancouver, and construction was also more active. On the other hand, transportation showed curtailment. On the whole, there was an increase of 679 persons in the payrolls of the 392 co-operating

firms, who had 28,437 employees. A minor advance had been indicated on the same date of a year ago, when the index was several points lower.

Index numbers of employment by cities are given in Table II.

### Employment by Manufacturing Industries

The trend of employment in this group continued favourable, according to statistics furnished by 5,355 manufacturers employing 464,265 operatives, as compared with 451,362 at the beginning of February. The most pronounced recovery took place in textile and iron and steel plants, but the leather, lumber, rubber and non-ferrous metal industries also showed important gains. On the other hand, animal and vegetable food, pulp and paper, tobacco and clay, glass and stone factories were slacker. The general improvement in manufacturing was rather greater than that noted on March 1, 1934, or, in fact, than in eleven of the fourteen preceding years for which statistics are available, considerably exceeding the average increase reported at the beginning of March in the years since 1920. Reflecting this advance, the index rose from

Mar. 1.....	96.4	92.7	166.9	118.8	77.5	76.5	94.2	111.7	116.7
Relative Weight of Employment by Industries as at Mar. 1, 1935.....	100.0	51.4	5.2	6.0	2.3	10.0	12.2	2.7	10.2

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

90.1 on February 1, 1935, to 92.7 on the date under review, as compared with 86.5 on March 1, 1934, and 75.8 on the same date in 1933. After adjustment for seasonal influences, the index also showed an increase which raised it to a level higher than in any month of 1932, 1933 or 1934.

*Animal Products—Edible.*—Employment in this industry showed a further moderate decrease, mainly in fish and meat-packing plants. The index number stood at 101.7, as compared with 96.0 on March 1, 1934, when improvement had been noted. The working forces of the 248 reporting establishments aggregated 19,110 persons, as compared with 19,324 on February 1, 1935.

*Leather and Products.*—There was a considerable advance in employment in this industry at the beginning of March, according to statistics from 276 manufacturers, whose

staffs aggregated 21,110 persons, compared with 20,020 in the preceding month. The gains reported were mainly in footwear factories in Quebec, but also to some extent in Ontario. A larger increase had been made on the corresponding date a year ago, when the index number was seven points lower than on the date under review.

*Lumber and Products.*—Improvement was indicated in sawmilling, furniture, vehicle, wood-turning and carving and other wood-using factories. Statements were tabulated from 799 employers, whose staffs totalled 33,105 workers, compared with 30,574 in the preceding month. The tendency was favourable in all five economic areas, but the greatest gains were in Ontario and British Columbia. The index number was higher than on March 1, 1934, when a much smaller advance had been reported.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	Mar. 1, 1935	Feb. 1, 1935	Mar. 1, 1934	Mar. 1, 1933	Mar. 1, 1932	Mar. 1, 1931	Mar. 1, 1930

<sup>1</sup> The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

*Plant Products, Edible.*—A decrease was recorded in the edible plant product group, chiefly in confectionery, sugar and syrup and fruit and vegetable canning factories, while the starch and glucose division was busier. The firms making returns to the Dominion Bureau of Statistics, 419 in number, had 25,948 workers in their employ, or 871 fewer than at the beginning of February. Ontario, the Maritime and Prairie Provinces reported losses, while the tendency was upward in Quebec. A smaller decline had been indicated at the beginning of March last year, when the index number stood at 88.0, compared with 90.9 on the date under review.

*Pulp and Paper Products.*—Employment in this division showed a contraction, chiefly in pulp and paper mills and printing and publishing houses, while the paper products division reported a small gain. A combined working force of 55,075 persons was recorded by 579 co-operating manufacturers, who had 55,826 employees on February 1. The situation was more favourable than in the late winter of 1934, when general improvement had occurred. The largest decrease on the date under review took place in Quebec, Ontario and the Prairie Provinces.

*Rubber Products.*—A decided increase in employment was recorded in rubber factories, 55 of which employed 11,997 workers, as compared with 11,575 in their last report. The index number, at 94.1, was over three points higher than on March 1, 1934, when a larger advance had been indicated.

*Textile Products.*—Important increases were registered in this group, chiefly in garment and personal furnishings, headwear, hosiery and knitting, cotton and woollen, and miscellaneous textile factories; the level of employment was higher than that reported on March 1, 1934, when considerably less extensive gains were noted. In fact, the additions to staffs on the date under review were greater than at the beginning of March in any other year for which statistics are available. The payrolls of the 929 co-operating establishments aggregated 93,603 persons, as compared with 89,278 on February 1, 1935. All provinces showed improvement, that in Quebec and Ontario being most pronounced.

*Tobacco, Distilled and Malt Liquors.*—Losses in employment were noted on March 1 in tobacco factories, while other divisions showed only slight changes. The index number in the tobacco and beverage group, standing at 120.2, was the same as on the same date of a year ago. Data were received from 165 firms employing 15,679 workers, or 290 fewer than in their last report.

*Clay, Glass and Stone Products.*—There was a decline in activity in building material plants, in which employment was at the same level as at the corresponding date in 1934. Statements were compiled from 189 manufacturers with 6,108 employees, as against 6,549 in the preceding month.

*Electric Current.*—Employment in plants producing electric power showed a slight reduction, according to the 97 co-operating firms who employed 13,319 workers, compared with 13,361 on February 1. Moderate improvement in Quebec was offset by similar curtailment in Ontario. The index number, at 105.8, was about one point higher than on March 1, 1934, when little general change had been noted.

*Electrical Apparatus.*—Employment in electrical appliance was somewhat brisker than in the preceding month; 107 factories reported 11,492 persons on their payrolls, or 63 more than on February 1. Only a slight change in the general situation had been indicated at the beginning of March of last year, when the index number was nearly eight points lower.

*Iron and Steel Products.*—Continued advances were made in the iron and steel industry, in which employment was in much larger volume than in the early spring of 1934, 1933, or 1932. Automobile factories registered the greatest increases, but there was also an upward movement in heating appliance, iron pipe, machinery, agricultural implement, ship-building, structural iron and steel, tool, foundry and machine shops and other plants. Returns were tabulated from 830 establishments having 109,172 persons in their employ, or 6,537 more than in the preceding month. The most noteworthy expansion was in Ontario; improvement was also noted in Quebec and the Maritime and Prairie Provinces, while the tendency was downward in British Columbia.

*Non-Ferrous Metal Products.*—Smelters and refineries and other non-ferrous metal industries showed heightened activity; 151 firms had 18,101 workers on their payrolls, as against 17,637 at the beginning of February. The additions to staffs were made chiefly in Ontario. The level of employment was considerably higher than on March 1, 1934, when a rather smaller gain had been indicated.

*Mineral Products, n.e.s.*—Statistics tabulated from 124 employers showed a slight increase in their forces, which were enlarged from 12,722 on February 1 to 12,783 at the beginning of March. Moderate improvement had also been recorded on the corresponding date a year ago, when the index number was between one and two points higher.

### Logging

There were marked seasonal contractions in logging camps, in many of which the season's operations were approaching completion; 320 firms had 46,696 men in their employ, or 4,472 fewer than in their last report. The decline involved a smaller number of workers than that recorded at the beginning of March a year ago, when the index was many points lower, standing at 153.3, compared with 166.9 on the date under review.

### Mining

*Coal.*—On the whole, employment in the mining of coal showed a reduction; improvement in the Maritime Provinces was more than offset by a seasonal falling-off in the Western coal-fields. One hundred and one operators decreased their labour forces from 25,616 persons on February 1, to 24,757 at the beginning of March 1935. A loss in personnel had also been indicated on March 1, 1934, but the index number was then a few points higher.

*Metallic Ores.*—There was an upward trend in employment in this group on the date under review. Data were received from 149 mines employing 24,301 workers, as against 24,195 at the beginning of February. The index stood at 204.6, as compared with 163.7 on March 1, 1934, when a larger gain had occurred.

*Non-Metallic Minerals (Other than Coal).*—Practically no general change was registered in these industries, according to statistics from 74 employers having 5,207 persons on their payrolls. Employment on the whole had also remained almost stationary on March 1 of a year ago, when the index was lower.

### Communications

Small reductions in personnel were indicated on telephones and telegraphs; returns were received from 85 companies and branches with 20,524 employees, compared with 20,605 in the preceding month. A slight decline had also been registered on March 1, 1934, when the index was fractionally lower.

### Transportation

*Street Railways and Cartage.*—Statistics were tabulated from 197 employers in this division, whose staffs included 23,793 persons, as compared with 23,763 at the beginning of February. Improvement had been noted on the same date in 1934, when the volume of employment was slightly higher.

*Steam Railways.*—Declines were registered in steam railway operation, in which 192

fewer workers were reported by the 100 co-operating companies and divisional superintendents, on whose payrolls were 55,537 persons. An increase had been indicated on March 1 of last year, when the index number was one point higher. Improvement occurred on the date under review in Quebec and British Columbia, but there were losses in the Prairie Provinces.

*Shipping and Stevedoring.*—There was a considerable increase in the shipping and stevedoring group, in which employment was not quite so brisk as on March 1, 1934; on the date under review, 96 employers reported a staff of 10,959 persons, or 464 more than in the preceding month. Gains were indicated at the Eastern ports, but those in British Columbia were slacker.

### Construction and Maintenance

*Building.*—No general change over February 1 was reported in building activities at the beginning of March, there being losses in Ontario, with advances in the Maritime Provinces, Quebec, and the Prairies. The 648 contractors furnishing data throughout the Dominion had 17,431 employees, as against 17,440 on February 1. The level of employment was higher than in the late winter of 1934, when an increase had taken place.

*Highway.*—Highway construction registered improvement on March 1, 1935, when 312 employers reported 67,755 workers, as compared with 59,593 on February 1. Gains were indicated in Quebec, Ontario, and British Columbia, while there were contractions in the Maritime and Prairie Provinces. Employment in this group was in smaller volume than on March 1, 1934, when with that date in the present year, it was more active than at the beginning of March in any other year on record. This was due mainly to the important unemployment relief projects under way during 1934 and in the present year, although work on streets and highways was also seasonally brisk at the date under review.

*Railways.*—Employment on steam railway construction and maintenance showed a minor increase on the whole, according to data received from 35 companies and divisional superintendents employing 25,101 persons, or 105 more than at the beginning of February. There were declines in all provinces except Quebec. A larger gain had been noted at the beginning of March last winter, when the index was over nine points lower. The exceptionally heavy snowfalls during 1934 had provided employment for many men in maintenance work on the tracks.

### Services

A slightly smaller number of employees was indicated in the service group, in which 445 establishments reported a staff of 24,059 as compared with 24,094 on February 1. Activity was greater than in the same month of 1934, when moderate improvement in the staffs had been reported.

### Trade

Retail trade reported no general change, while wholesale establishments were brisker, the improvement being contra-seasonal. On the whole, there was an increase of 174 in the personnel of the 1,145 firms furnishing data in

the trade group, who had 91,916 employees. The index stood at 116.7 on March 1, 1935, compared with 112.5 at the beginning of March, 1934, when a larger advance had been recorded.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on the date under review.

## (2) Unemployment in Trade Unions at the Close of February, 1935

Unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was a slight tendency toward retarded activity among local trade union members at the close of February, though the change from the previous month was almost negligible. This was apparent from the reports forwarded to the Department of Labour by 1,721 organizations embracing a total of 160,929 members, 29,227 of whom or 18.2 per cent were idle at the close of the month, in contrast with a percentage of 18.1 in January. Improved conditions were noted, however, over February, 1934, when 20.0 per cent of the members reported were unemployed. The variation in the different provinces from January was slight, Alberta unions with a drop in employment of nearly 3 per cent showing the greatest change. Responsibility for this adverse movement in Alberta was increased idleness in the coal mines of the province due to orders slackening off, which is rather usual at this time of the year. In New Brunswick also, there were slight employment recessions. On the other hand, Nova Scotia, Quebec, Ontario, Manitoba and Saskatchewan unions all reported fractional percentage advances, and British Columbia gains in activity of slightly greater magnitude, which combined effected a largely counteracting influence on the recessions reported in the other provinces.

Compared with the situation in February a year ago Quebec unions indicated a nominal drop in activity during the month reviewed, while in all other provinces employment expansion was noted, Manitoba and Saskatchewan showing the most pronounced gains. In Nova Scotia, Alberta and Ontario the improvement recorded was of more moderate proportions and the employment trend in New Brunswick and British Columbia was but slightly upward.

Each month a separate compilation is made of the returns on unemployment for the largest city in each province, with the exception of Prince Edward Island. Of these, Edmonton unions were the only ones to report a falling off in activity during February from the previous month, which was, however, slight. Increases in employment of around 3 per cent were reflected from Vancouver, Halifax and Saint John, gains on a somewhat smaller scale being reported by Toronto and Regina unions, and fractional improvement only in Montreal and Winnipeg. Contrasting with the returns for February, 1934, Saint John members were afforded considerably more employment during the period under survey and conditions for Winnipeg members were decidedly better. Heightened activity, on a somewhat smaller scale, was indicated by Halifax, Toronto, Regina and Edmonton unions. In Montreal the same level of employment was maintained as in February a year ago. Vancouver unions, however, reported some slight curtailment in the volume of work available.

The accompanying chart shows the trend of unemployment by months from January, 1929, to date. There was very little variation in the level of the curve during February from the previous month, though the tendency was upward, toward lessened activity. At the close of the month, however, the point

attained by the curve was below that of February last year, when conditions were somewhat quieter than during the month reviewed.

The manufacturing industries as a whole, employed larger working forces during February than in the previous month, the 466 organizations making returns, with 52,921 members, reporting an unemployment percentage of 16.0, in comparison with 17.1 per cent in January. Improvement of greater proportions was reflected from February last year, when 19.7 per cent of the members reported were idle. Garment, and hat and cap workers, cigar makers and metal polishers all re-

more substantial than in the iron and steel trades their combined membership was rather small and did not tend to influence the group percentage to any great extent. Employment was also on a higher level among brewery workers, printing tradesmen and papermakers. The situation for wood workers and general labourers, however, was decidedly less active than in February a year ago and heavy losses occurred among jewellery and glass workers. In the garment and textile trades, and among bakers and confectioners there was a moderate slowing up in work afforded. Unemployment for fur workers, however, remained at the same level as in February, 1934.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

flected decided betterment of conditions from January, while among iron and steel workers very slight gains were shown. On the other hand, glass, jewellery and fur workers, and bakers and confectioners reported a considerable increase in slackness from January, and moderate curtailment was evident among wood and textile workers, and general labourers. The losses in employment noted by brewery and leather workers, papermakers and printing tradesmen, however, were but fractional. The iron and steel trades reported recovery affecting the greatest number of members when contrasted with the returns for February a year ago. Although the percentage increases in activity registered by cigar makers, metal polishers, and hat and cap workers were much

The coal mining industry, with 48 unions covering a membership of 15,265 persons, showed a further though moderate drop in activity at the close of February, unemployment standing at 9.4, as compared with 6.9 per cent in January. Losses in employment in the Alberta mines through gradual completion of orders at hand was the chief factor in this less favourable movement from January, though in British Columbia also some curtailment was evident. Nova Scotia unions, however, reported a small increase in available work. Operations in coal mining were also slightly restricted from February last year when 8.2 per cent of unemployed members was registered, British Columbia unions showing the greatest increase in slackness. In

Alberta minor contractions in activity were evident, while in Nova Scotia the tendency was less favourable, though the change was but nominal. In addition to the total idleness recorded among these workers a number were reported as being but partially engaged.

Unemployment in the building and construction trades was in evidence to a greater extent at the close of February than in the preceding month according to the reports compiled from 196 associations with an aggregate of 16,951

TABLE I.—PERCENTAGES OF UNEMPLOYMENT  
IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

members. Of these, 11,043 were without work on the last day of the month, a percentage of 65.1, compared with 61.6 per cent in January. Some improvement was noted over February a year ago when 69.2 per cent of idleness was recorded. Inactivity for carpenters and joiners was mainly responsible for the less favourable movement noted from January, though moderate recessions occurred among painters, decorators and paper-hangers, and the situation for bricklayers, masons and plasterers, steam shovelmen and plumbers and steamfitters also declined. Heightened employment, on a rather small scale, however, was reflected by tile layers, lathers and roofers, bridge and structural iron workers, granite and stone cutters and electrical workers. The percentage of idleness for hod carriers and building labourers remained identical with that of January. Pronounced employment expansion from February, 1934, was apparent among painters, decorators and paperhangers, granite and stonecutters, tile layers, lathers and roofers, and hod carriers and building labourers. Among plumbers and steamfitters, also the improvement recorded was noteworthy. Increases in activity of much lesser magnitude were shown by carpenters and joiners, and steam shovelmen. Electrical workers, however, suffered important employment losses during the month reviewed, while moderate curtailment was reflected by bridge and structural iron workers. The employment balance for bricklayers, masons and plasterers was also unfavourable, though the change from February a year ago was less than one per cent.

In the transportation industries during February activity tended slightly upward from the previous month, as manifest by the reports tabulated from 776 organizations with a combined membership of 52,802 persons. Of these 5,219, or 9.9 per cent, were idle at the end of the month, in contrast with a percentage of 10.6 in January. Employment gains on a slightly larger scale were registered from February, 1934, when unemployment stood at 12.5 per cent. Navigation workers were considerably better engaged than in January, while the situation for steam railway employees, whose returns constituted about 80 per cent of the entire group membership reported, improved very slightly. The trend for street and electric railway employees, and teamsters and chauffeurs, however, was toward a reduction in the volume of employment afforded, though the change from January was quite small. Moderate employment recovery was indicated by navigation workers from February a year ago and advances of lesser degree, were reflected by steam and street and electric railway employees. Teamsters and

chauffeurs, however, reported a small increase in unemployment from February, 1934.

Retail shop clerks were afforded a slightly better volume of work during February than in either the previous month or February last year, according to the reports compiled from 5 associations with 1,717 members. Of these, 3.8 per cent were idle at the close of the month, in contrast with percentages of 4.4 in January and 5.1 at the close of February a year ago.

Among civic employees during February the tendency was less favourable than in the preceding month, but some slight improvement was noted over February, 1934. For the month reviewed 73 organizations made returns involving 7,457 members, 157 of whom were idle on the last day of the month, a percentage of 2.1, as compared with 1.6 per cent in January and 4.2 per cent in February last year.

From unions in the miscellaneous group of trades during February 112 reports were received, covering a membership of 3,784 persons, 605 or 16.0 per cent of whom were unemployed at the end of the month, compared with 15.6 per cent in January. Barbers were slightly better employed than in January and among unclassified workers there was a fractional gain. This improvement was slightly more than offset, however, by the moderate curtailment evident among theatre and stage employees, and retarded activity on a smaller scale shown by hotel and restaurant employees. Stationary engineers and firemen indicated an unchanged situation from January. Compared

with the returns in the miscellaneous group of trades for February, 1934, when 18.5 per cent of idleness was registered, hotel and restaurant employees and stationary engineers and firemen reported employment expansion on a noteworthy scale during the month reviewed, and gains of lesser degree were recorded by theatre and stage employees, barber and unclassified workers.

Unemployment among fishermen eased off slightly during February from the previous month, though conditions were much slacker than in February, 1934. This was apparent from the reports received from 3 unions of these workers with 758 members, 88.5 per cent of whom were idle at the end of the month, in contrast with percentages of 91.8 in January and 2.1 in February last year.

Lumber workers and loggers, with 3 unions reporting a combined membership of 1,383 persons, showed that 640 were out of work on the last day of the month, a percentage of 46.3, in comparison with 47.6 per cent in January. Much greater depression, however, was evident than in February a year ago, unemployment at that time standing at 19.8 per cent.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1934, inclusive, and also the percentage of unemployment by provinces for February of each year from 1919 to 1932, inclusive, and for each month from January, 1933, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for February, 1935

The volume of business transacted by the offices of the Employment Service of Canada during the month of February, 1935, as indicated by the average daily placements effected, showed declines of 16 and 7 per cent, respectively, from that of the preceding month, and from February a year ago. All industrial divisions except manufacturing and transportation, showed decreased placements in comparison with January, the highest losses being in construction and maintenance, farming, services and logging, and the gains mentioned only large enough to counteract the losses in mining and trade. When comparison was made with February last year, services, logging, manufacturing and mining showed increases, but these gains were insufficient to influence in any marked degree the declines recorded in all other sections, the loss in construction and maintenance being particularly heavy.

The accompanying chart shows the trend of employment from January, 1933, as repre-

sented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be noted that the curve, both of vacancies and of placements in relation to applications, showed a decidedly upward trend during the month of February, and at the close of the period the level of vacancies was 9 points and that of placements over 7 points higher than those attained at the close of February a year ago. The ratio of vacancies to each 100 applications was 59.5 during the first half and 63.4 during the second half of February, 1935, in comparison with the ratios of 59.0 and 54.4 during the corresponding periods of 1934. The ratios of placements to each 100 applications during the periods under review were 56.4 and 60.0 as compared with 56.3 and 52.7 during the corresponding month of 1934.

The average number of vacancies reported daily by employers to the offices of the Service

throughout Canada during February, 1935 was 1,061, as compared with 1,134 during the preceding month and with 1,249 in February a year ago.

The average number of applications for employment received daily by the offices during the month under review was 1,729, compared with 2,085 in January, 1935, and with 2,207 during February last year.

able, 54,190 applications made, and 28,131 placements effected, while in February, 1934, there were recorded 29,972 vacancies, 52,945 applications for work, and 28,818 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1925, to date:—

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o-o

The average number of placements made daily by the offices of the Service during February, 1935, was 1,006, of which 618 were in regular employment and 388 in work of one week's duration or less as compared with a total daily average of 1,082 during the preceding month. Placements for February a year ago averaged, 1,201 daily, consisting of 549 placements in regular and 652 in casual employment.

During the month of February, 1935, the offices of the Service referred 25,791 persons to vacancies and effected a total of 24,138 placements. Of these, the placements in regular employment were 14,839, of which 11,167 were of men and 3,672 of women, while placements in casual work totalled 9,299. The number of vacancies reported by employers was 18,311 for men and 7,142 for women, a total of 25,453, while applications for work numbered 41,487, of which 29,857 were from men and 11,630 from women. Reports for January, 1935, showed 29,467 positions avail-

Year	Placements		
	Regular	Casual	Totals
1925 .....	306,804	106,021	412,825
1926 .....	300,226	109,929	410,155

1935 (2 months) .....	30,556	21,713	52,269

#### NOVA SCOTIA

There was a decrease of over 10 per cent in the number of positions offered through Employment Offices in Nova Scotia during February when compared with the present month, but an increase of nearly 2 per cent in comparison with the corresponding month of last year. Placements also were over 4 per cent less than in January but nearly 2

per cent above February, 1934. All industrial divisions showed placements in excess of February a year ago, except services and manufacturing. The losses in these two groups, however, were more than offset by gains in construction and maintenance and logging, respectively. The increases in other groups were quite small. Of the 950 placements made during the month 654 were in construction and maintenance and 216 in services. Of the latter, 169 were of household workers. Placements in regular employment numbered 135 of men and 60 of women.

#### NEW BRUNSWICK

During February orders received at Employment Offices in New Brunswick called for nearly 9 per cent less workers than in the preceding month and nearly 44 per cent less than during the corresponding month of last year. There was a decline also in placements of over 7 per cent when compared with January and of nearly 44 per cent in comparison with February a year ago. The decline in placements from February, 1934, was due to fewer workers being provided with relief employment, as a small gain in services was offset by minor declines in transportation and manufacturing. Placements in construction and maintenance numbered 223 and in services 473. Of the latter, 377 were of household workers. There were 99 men and 85 women placed in regular employment during the month.

#### QUEBEC

Orders received at Employment Offices in the Province of Quebec during February called for over 12 per cent more workers than in the preceding month and over 66 more than during the corresponding month of last year. There was a gain also in placements of over 17 per cent when compared with January and of over 67 per cent in comparison with February, 1934. All industrial divisions participated in the increase in placements over February of last year. The largest gain was in construction and maintenance, chiefly due to employment provided on highway construction. Services, manufacturing, logging and trade followed next in order of importance. Industrial divisions in which most of the placements were effected during the month were: manufacturing, 272; logging, 247; construction and maintenance, 1,327; trade, 120; and services, 1,809, of which 1,599 were of household workers. During the month 1,901 men and 1,208 women were placed in regular employment.

#### ONTARIO

Opportunities for employment, as indicated by orders received at Employment Offices in Ontario during February, were over 17 per cent less favourable than in the preceding month and nearly 30 per cent lower than during the corresponding month of last year. There was a decline of nearly 18 per cent in placements when compared with January and of nearly 30 per cent in comparison with February a year ago. A substantial decline in the number of workers placed on highway construction relief work accounted for the reduction in placements from February, 1934. This decrease was partly offset by gains in services, manufacturing and logging. Placements by industrial divisions included: manufacturing, 798; logging, 884; farming, 325; construction and maintenance, 4,033; trade, 241; and services, 2,952, of which 1,784 were of household workers. There were 3,577 men and 1,210 women placed in regular employment during the month.

#### MANITOBA

There was a decline of over 34 per cent in the number of positions offered through Employment Offices in Manitoba during February when compared with the preceding month and of nearly 23 per cent in comparison with the corresponding month of last year. Placements also were over 33 per cent less than in January and nearly 29 per cent below February, 1934. Fewer placements under construction and maintenance and farming, mainly due to a reduction in relief placements, accounted for the decline from February of last year. None of the changes in other groups were important, the largest being a gain in services. Placements by industrial divisions included: logging, 214; farming, 640; construction and maintenance, 712; and services, 497, of which 425 were of household workers. Placements in regular employment numbered 1,469 of men and 311 of women.

#### SASKATCHEWAN

The demand for workers, as indicated by orders received at Employment Offices in Saskatchewan during February, was nearly 31 per cent less favourable than in the preceding month and 7 per cent below the corresponding month of last year. Placements also declined nearly 35 per cent when compared with January and nearly 12 per cent in comparison with February, 1934. A reduction in farm placements was mainly responsible for the decline from February of last year, although manufacturing, services and trade

\*141 Placements effected by offices since closed.

also showed losses. A small gain was reported in logging. Industrial divisions in which most of the placements were effected during the month were: farming, 281; construction and maintenance, 483; and services, 571, of which 379 were of household workers. There were 539 men and 313 women placed in regular employment during the month.

#### ALBERTA

Employment opportunities, as indicated by orders received at Employment Offices in Alberta during February, were nearly 2 per cent less favourable than in the preceding month, but showed a nominal gain when compared with the corresponding month of last year. There was a decline of nearly 7 per cent in placements when compared with January and of over 4 per cent in comparison with February, 1934. The only decline in placements of importance from February of last year was in construction and maintenance. This loss was partly offset by gains in farming and logging. Placements by industrial divisions included: logging, 242; farming, 567; construction and maintenance, 882; and services, 347, of which 286 were of household workers. During the month 1,475 men and 230 women were placed in regular employment.

#### BRITISH COLUMBIA

There was a decline of nearly 11 per cent in the number of positions offered through Employment Offices in British Columbia when compared with the preceding month and of over 14 per cent in comparison with the corresponding month of last year. Placements also were over 11 per cent less than in January and over 14 per cent below February, 1934. The decline from February of last year was mainly due to a reduction in relief placements on road construction, although small losses were also reported in all other groups, except farming and mining. With the exception of construction and maintenance, however, all the changes were small. Industrial divisions in which most of the placements were effected during the month were: farming, 95; construction and maintenance, 3,019; and services, 471, of which 303 were of household workers. There were 1,972 men and 155 women placed in regular employment during the month.

#### Movement of Labour

During the month of February, 1935, the offices of the Employment Service of Canada made 14,839 placements in regular employment, 6,759 of which were of persons for whom the employment located was outside

the immediate vicinity of the office at which they were registered. Of the latter, 562 were granted the Employment Service reduced transportation rate, 508 proceeding to centres within the same province as the despatching office and 54 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Taking advantage of the reduced rate in Quebec during February 8 bushmen secured certificates at the Hull office for transportation to Pembroke. Offices in Ontario granted 359 certificates for reduced transportation during February, all to provincial points. Of these, 214 were issued at Port Arthur to 185 bushworkers, 26 mine workers, 2 labourers and one hotel laundress going to employment at centres within its own zone. At Sudbury 111 bushmen were granted certificates for points within the district covered by that city office. Fort William sent 12 bushworkers, 2 mine cooks, 2 teamsters and one hotel waitress, and North Bay 16 bushmen within their respective zones. In addition, from Toronto one machine operator went to Windsor. The movement of labour in Manitoba during February originated at Winnipeg and comprised the transfer of 68 persons. Of these, 24 were bound for provincial situations and 44 for centres in other provinces. Provincially, one hotel kitchen worker was conveyed to Brandon and 8 surveyors, 3 tractor drivers, 5 farm labourers, 3 loggers, one miner, one mine cook, one building labourer, and one plumber to various points within the Winnipeg zone. Travelling outside the province 36 bushworkers, 2 farm hands, one café cook and one fisherman were destined to the Port Arthur zone, 2 farm labourers to Prince Albert, one farm domestic to Moose Jaw, and one caretaker to Estevan. Saskatchewan offices granted 37 certificates for reduced transportation during February, 35 provincial and 2 interprovincial. The latter were issued at Yorkton to bushmen bound for the Winnipeg zone. Within the province, the Regina office shipped 16 teachers and one farm hand to employment within its own zone and 5 bushmen to Yorkton, one farm hand to Moose Jaw, one teacher each to Swift Current and Weyburn and one bushworker to Prince Albert. From Saskatoon one farm hand and one teacher went to points within the territory covered by that city office and one teacher to Swift Current. Proceeding to positions within their respective zones 5 bushmen travelled from Yorkton and one bushman

from Prince Albert. Business transacted by Alberta offices involved the issue of 79 reduced rate certificates during February, all provincial. Securing certificates at Edmonton one engineer journeyed to Calgary and 46 bushmen, 4 camp cooks, 5 farm hands, 2 farm housekeepers, 2 sawyers, one logging engineer, one lumber piler, one teamster, one miner, one mine carpenter, one book-keeper and one blacksmith to various centres within the Edmonton zone. The Calgary office was responsible for the despatch of 4 bushmen, 5 labourers, and 2 mill hands to Edmonton, and of one farm hand within its own zone. The Vancouver office effected all transfers in

British Columbia during February, which were 11 in number. Destined to the Kamloops zone were one sawmill engineer, one mine cook, one millwright, and one mine blacksmith, to Penticton one farm hand, to Prince Rupert one mine tractor driver, and to points in the Vancouver zone 2 miners, one mine blacksmith, one mine book-keeper and one cook.

Of the 562 persons who were carried at the Employment Service reduced transportation rate during February 425 journeyed over the Canadian National Railways, 132 over the Canadian Pacific Railway and 5 over the Pacific Great Eastern Railway.

#### (4) Building Permits Issued in Canada in February, 1935

The value of the building represented by the permits issued by 61 cities during February, as compiled by the Dominion Bureau of Statistics, showed a decided increase, being higher by \$2,811,905, or 357.5 p.c., than in the preceding month and by \$2,704,347, or 302.5 p.c., than in February of last year; the total stood at \$3,598,449 during February, 1935, as compared with \$786,544 in January, 1935, and \$894,102 in February, 1934. The authorizations reported in February were greater in value than in the same month of any other year since 1931; they also exceeded those indicated in any month of 1934. One large permit in Ottawa contributed materially to the increase, but the general trend shown in this report is strongly upward.

Some 50 cities furnished detailed statistics, showing that they had granted 95 permits for dwellings valued at over \$300,000 and more than 500 permits for other buildings, estimated to cost in excess of \$2,808,365. In January, authority was given for the erection of some 75 dwellings and 375 other buildings, estimated at approximately \$310,000 and \$330,000, respectively.

Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Alberta, and British Columbia reported increases in the value of the permits issued as compared with January, 1935; the largest gain, of \$1,940,126 or 423.1 per cent, took place in Ontario. Saskatchewan showed a decline of \$10,460, or 55.4 per cent, in this comparison.

As compared with February, 1934, Prince Edward Island, Nova Scotia, Quebec, Ontario, Manitoba, Alberta and British Columbia recorded increases, that of \$1,932,899, or 414.9 per cent, in Ontario being most marked. New Brunswick and Saskatchewan reported reductions of \$4,355, or 29.4 per cent, and \$12,925, or 60.5 per cent, respectively, in this comparison.

Each of the larger cities—Montreal, Toronto, Winnipeg, and Vancouver—recorded in-

creases in the value of the permits issued as compared with January, 1935, and also as compared with February, 1934. Of the other centres, Charlottetown, New Glasgow, Moncton, Shawinigan Falls, Sherbrooke, Three Rivers, Westmount, Chatham, Hamilton, London, Niagara Falls, Ottawa, Sarnia, York and East York townships, Riverside, Brandon, St. Boniface, Calgary, Kamloops, Nanaimo, New Westminster, Prince Rupert, North Vancouver and Victoria reported improvement in each of these comparisons.

*Cumulative Record for First Two Months, 1935.*—The following table gives the value of the building authorized by 61 cities during February, and in the first two months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in January and February of the same years are also given (1926 = 100).

Year	Value of permits issued in February	Value of permits issued in first two months	Indexes of value of permits issued in first two months (1926=100)	Average indexes of wholesale prices of building materials in first two months (1926=100)
	\$	\$		
1935.....	3,598,449	4,384,933	37.0	81.7
1934.....	894,102	1,601,914	13.5	82.2
1933.....	925,894	2,111,856	17.8	75.2
1932.....	2,845,271	6,056,283	51.1	79.4
1931.....	6,395,659	14,797,115	124.8	83.8
1930.....	8,919,078	16,136,475	136.1	96.8
1929.....	10,465,330	18,882,210	159.2	99.6
1928.....	10,318,338	18,034,925	152.1	96.4
1927.....	7,638,177	13,314,713	112.3	97.1
1926.....	7,139,549	11,859,083	100.0	102.4
1925.....	5,902,118	11,349,388	95.7	103.2
1924.....	4,093,800	8,554,379	72.1	112.3
1923.....	5,679,671	9,819,169	82.8	110.1
1922.....	4,738,105	8,064,642	68.0	108.3
1921.....	3,683,359	6,278,923	52.9	140.5
1920.....	6,156,287	10,173,311	85.8	137.5

The aggregate for the first two months of 1935 was substantially higher than in the same months of 1934 and 1933, though it was lower than in earlier years of the record. The index of wholesale prices of building materials was

fractionally lower than in 1934, but it was higher than in 1933 and 1932; this index was, however, considerably lower in the first two months of the present year than in the months January-February of any other year since 1920.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND UNITED STATES

### Great Britain

**E**MPLOYMENT at February 25, 1935, showed an improvement as compared with January 28, 1935. There was a considerable improvement in employment in the building, tailoring, and boot and shoe industries. Some improvement was also recorded in most of the other clothing trades, in public works contracting, tinplate manufacture, the woollen and worsted and pottery industries, cocoa, chocolate, etc. making, and in shipping service. On the other hand, there was a marked decline in employment in the coal mining industry, mainly owing to increases in the numbers temporarily suspended in Yorkshire and South Wales. Slight reductions in employment occurred also in the cotton industry, dock and harbour service and the distributive trades.

Among those workpeople of ages 16-64 who were insured against unemployment in Great Britain and Northern Ireland the percentage unemployed at February 25, 1935 (including those temporarily stopped as well as those wholly unemployed), was 17·5 as compared with 17·7 at January 28, 1935, and with 18·1 at February 19, 1934. The percentage wholly unemployed at February 25, 1935, was 14·8, as compared with 14·9 at January 28, 1935; while the percentage temporarily stopped was 2·7, as compared with 2·8. For males alone the percentage at February 25, 1935, was 19·8 and for females, 11·4; at January 28, 1935, the corresponding percentages were 20·0 and 11·7.

At February 25, 1935, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,840,136 wholly unemployed, 353,548 temporarily stopped, and 91,779 normally in casual employment, making a total of 2,285,463. This was 39,910 less than a month before, and 32,446 less than a year before. The total included 1,802,247 men, 71,980 boys, 346,730 women, and 64,506 girls.

The numbers recorded as unemployed at February 25 included a number of persons, estimated at between 10,000 and 20,000 who would not have registered but for the introduction in January, of the Unemployment Assistance Scheme; at January 28 the corre-

sponding total was between 5,000 and 10,000.

The persons on the Registers included 1,102,535 persons with claims for insurance benefit; 779,722 insured persons with applications for unemployment allowances; 250,631 other insured persons (including 26,588 insured juveniles under 16 years of age), not in receipt of insurance benefits or unemployment allowances, and 152,575 uninsured persons. In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at February 25, 1935, was 2,357,745.

### United States

*Manufacturing Industries.*—Factory employment and pay rolls continued to show gains in February. The increases were fairly widespread, 72 of the 90 manufacturing industries surveyed reporting increases in employment over the month interval and 76 industries reporting increases in pay rolls. The pay-roll increases, in practically all instances, were more pronounced than the gains in employment.

The increases from January to February were 3·2 per cent in employment and 7·8 per cent in pay rolls. While gains in factory employment and pay rolls are usually reported in February, the net increases this year were greater than any reported for February in any of the preceding 16 years, with the exception of 1934.

The Bureau of Labor Statistics' index of factory employment for February 1935 is 81·2 (preliminary) and the February index of factory pay rolls is 69·1 (preliminary). The level of employment in February 1935 was 4·5 per cent above the level of February 1934, (77·7), and pay rolls were 14·0 per cent above the level of the index for the corresponding month of a year ago, (60·6). The base used in computing these indexes is the average for the 3-year period, 1923-1925, which is taken as 100.

A comparison of employment and pay rolls in the separate industries in February 1935 with February 1934 shows increases in employment over the year interval in 60 industries and larger pay rolls in 76 of the 90 industries surveyed.

The indexes of factory employment and pay rolls are computed from returns supplied by representative establishments in 90 important manufacturing industries of the country. Reports were received in February from 23,659 establishments employing 3,737,389 workers whose weekly earnings were \$78,241,493 during the pay period ending nearest February 15. The employment reports received from these co-operating establishments cover more than 50 per cent of the total wage earners in all manufacturing industries of the country.

*Nonmanufacturing Industries.*—Increases in employment from January to February were shown in 9 of the 17 nonmanufacturing industries surveyed monthly by the U.S. Bureau of Labor Statistics and increases in pay rolls were reported in 10 industries.

The most pronounced gains in both employment and pay rolls were shown in the anthracite mining industry, in which employment increased 2.5 per cent and pay rolls 11.9 per cent. The bituminous mining industry also reported increases of 1.4 per cent in number of workers and 10.0 per cent in pay rolls. Employment in the hotel industry increased 1.6 per cent, commercial hotels showing a gain of 0.9 per cent and winter resort hotels 22.8 per cent.

Among the 8 nonmanufacturing industries in which decreased employment was reported,

the building construction industry reported the largest percentage decrease in employment from January to February, 4.0 per cent. This decline is far less pronounced than the decrease shown in February of the past few years and indicates that a favourable amount of construction and repair work was under way in February to partially counteract seasonal recessions. Reports were received in February from 10,236 contractors, engaged in private building construction, employing 64,240 workers during the pay period ending nearest February 15th.

Employment in the dyeing and cleaning industry decreased 1 per cent and the crude petroleum producing industry reported a decrease of 0.9 per cent. Smaller declines were reported in each of the three utility industries surveyed: telephone and telegraph, 0.7 per cent; power and light, 0.6 per cent; and electric railroad and motor bus operation and maintenance, 0.3 per cent.

Data received in February 1935 from 52,701 retail establishments employing 776,753 workers showed a decrease of 0.6 per cent in employment. The group composed of department, variety, general merchandising, and mail order establishments, showed a decline in employment of 1.9 per cent. In the remaining 49,895 retail establishments, the decrease was 0.2 per cent.

### Street Railway Operation in Canada

Reduced traffic was reported in street railway operation in Canada during 1933, according to information recently published by the Dominion Bureau of Statistics. This decline has continued steadily since 1929 when 833,496,866 passengers were carried until in 1933 only 585,385,094 passengers, or approximately two-thirds of the peak, were carried. The rate of decrease, however, was getting smaller. In 1931 the reduction from 1930 traffic was 72,233,132 passengers, or 9.1 per cent, in 1932 a reduction from 1931 traffic of 77,637,359 passengers, or 10.8 per cent, was recorded and in 1933 the decrease was 57,445,908 passengers, or 8.9 per cent.

Gross revenues of all railways also decreased from \$43,339,381 in 1932 to \$39,583,965, or by \$3,955,416, or 9 per cent, and operating expenses were reduced from \$31,516,943 to \$27,917,265, or by \$3,599,678. Of the 41 railways operated, 13 failed to earn operating expenses and only 4 companies paid dividends, 2 of which paid them largely out of revenues earned by other departments.

For the second time since 1901, when accident statistics were first compiled for electric railways, no passengers were killed and only

one employee was killed. There were 32 other persons killed including 16 pedestrians and 13 motorists. The total of 33 persons killed during the year was the lowest record since 1902 when 32 persons were killed. Persons injured numbered 2,902 which was the smallest number for the past twelve years and was a decrease of 640 from 1932. The total injured included 1,385 passengers, 443 pedestrians, 351 motorists and 23 electric railway bus drivers, 131 conductors and motormen, 179 other employees, 76 persons riding in other vehicles and 314 other persons. The total of 333 employees injured was the smallest number injured since 1916.

The total number of persons employed in street railway operations in Canada, in 1933, was 14,883 including 9,651 in the transportation group which consists of electric car superintendents, motormen, conductors; powerhouse employees; and motor bus coach and truck drivers and conductors. The salaries paid to all employees in street railway operations, in 1933, was \$18,692,236.43.

The total number employed in street railway operations in 1932 was 15,961 and they received remuneration of \$21,534,419.50.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. On December 31, 1934, however, an Order in Council was passed rescinding what are known as the "B" Conditions of this Policy and substituting other conditions therefor, the full text of which appeared in the *LABOUR GAZETTE* for January, 1935, pp. 24-25. These "B" Conditions are applicable to all contracts for the manufacture and supply to the various departments of the Government of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers and other Government officers and employees; mail bags, letter boxes and other postal stores.

The original provision for the payment of not less than current wages rates, or fair and reasonable rates if there are no current rates, is retained in the new "B" Conditions, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30c. an hour, and for female workers 18 years of age and over, be less than 20c. an hour. It is also provided that in any cases where the Provincial Minimum Wage laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wage scales of the respective provinces.

The Fair Wages Policy of the Dominion Government, from its inception in 1900 has applied also to contracts for building and construction work. In the Fair Wages Orders in Council of 1922 and 1924 above referred to, the provisions applicable to building and construction contracts were designated as "A" Conditions. An Act of Parliament, entitled "The Fair Wages and Eight Hour Day Act" (chapter 20-21, Geo. V), was adopted on May 30, 1930, with respect to contracts "for con-

struction, remodelling or demolition of any work," and provides as follows:—

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions known as the "A" conditions, for the protection of the workmen employed, which are sanctioned by the original Orders in Council.

Both in the case of contracts for building and construction work, and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wage officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

The Department of Labour is furnished from month to month with information regarding the contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed. During the past month, statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:

#### DEPARTMENT OF THE INTERIOR

##### *Contract in Group "B" (Interior Fittings, Supplies etc.)*

For the manufacture and supply of tents and tarpaulins. Contractors, Grant-Holden-Graham, Ltd., Ottawa, Ontario. The revised "B" Labour Conditions above referred to were inserted in this contract.

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contract in Group "A" (Construction, Remodelling etc.)*

Supply and installation of a Sprinkler System in the Workshop Hangar, R.C.A.F. Station, Trenton, Ont. Name of Contractors,

Automatic Sprinkler Co. of Canada, Ltd., Montreal, P.Q. Date of contract, March 8, 1935. Amount of contract, \$4,995. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Sprinkler fitters.....	\$0 75	8
Labourers.....	0 35	8

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of March, 1935, for various classes of manufactured goods, which include in all cases the "B" labour conditions above referred to:—

Goods contracted for	Contractor
Tap soles and top lifts.....	Anglo Canadian Leather Co., Toronto, Ont.
Braces.....	National Suspender Co., Toronto, Ont.
Blankets.....	Slingsby Mfg. Co., Ltd., Brantford, Ont.
Mackinaw coats.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Cloth trousers.....	Houde-Laroche & Cie, St. Croix, P.Q.
Service shirts.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Socks.....	Royal Knitting Co., Guelph, Ont.
Socks.....	Burritts Rapids Woollen Mills, Burritts Rapids, Ont.
Table oilcloth.....	Dominion Oilcloth & Linoleum Co., Ltd., Montreal, P.Q.
Night shirts.....	Canadian Converters Co., Ltd., Montreal, P.Q.
Enamelware.....	General Steel Wares Ltd., Montreal, P.Q.
Flatware.....	McGlashan Clarke Co., Ltd., Niagara Falls, Ont.
Kit-bags.....	Woods Mfg. Co., Ottawa, Ont.
Dish cloths.....	Dominion Textile Co., Montreal, P.Q.
Sheets.....	Dominion Textile Co., Montreal, P.Q.
Earthenware cups.....	Sovereign Potters Ltd., Hamilton, Ont.
Mop cloths.....	Tarbox Bros., Toronto, Ont.
Peak caps.....	Ottawa Imperial Cap Co., Ottawa, Ont.
Trouser drill.....	Dominion Textile Co., Ltd., Montreal, P.Q.
Linoleum.....	Dominion Oilcloth & Linoleum Co., Montreal, P.Q.
Castile soap.....	Guelph Soaps, Guelph, Ont.
Cordage.....	Cordage Distributors Ltd., Toronto, Ont.
Leather gloves.....	Huck Glove Co., Ltd., Kitchener, Ont.
Latrine buckets, etc.....	General Steel Wares, Ltd., Montreal, P.Q.
Drill trousers.....	Woods Mfg. Co., Ottawa, Ont.
Sweater jackets.....	Mercury Mills Ltd., Hamilton, Ont.
Brooms.....	American Broom Co., St. Basile, P.Q.
Casement sash.....	Geo. W. Reed & Co., Montreal, P.Q.
Towels.....	Stauffer Dobbie Co., Ltd., Galt, Ont.

## DEPARTMENT OF PUBLIC WORKS

*Contracts in Group "A" (Construction, remodelling, etc.)*

Construction of a public building at Hamilton, Ont. Name of contractors, W. H. Yates Construction Co., Ltd., Hamilton, Ontario. Date of contract, March 2, 1935. Amount of contract, \$1,663,000 and unit prices for additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Asbestos insulation worker.....	\$0 75	8
Blacksmiths.....	0 65	8
Boilermaker.....	0 70	8
Brick and hollow tile layers and masons.....	0 90	8
Carpenters and joiners.....	0 75	8
Cement finishers.....	0 58½	8
Compressor operators.....	0 67½	8
Concrete mixer operator (gas).....	0 55	8
Concrete mixer operator (steam).....	0 67½	8
Derrick and hoist engineers (steam).....	0 67½	8
Derrick and hoist engineers (gas or electric).....	0 65	8
Drill runners (machine).....	0 55	8
Electricians.....	0 75	8
Elevator constructors.....	0 83	8
Firemen—Stationary.....	0 59½	8
Hollow metal workers (erectors).....	0 50	8
Kalamein iron workers (erectors).....	0 65	8
Labourers.....	0 65	8
Lathers, metal.....	0 87½	8
Linoleum layers, waxers and polishers.....	0 60	8
Machinists.....	0 65	8
Marble setters.....	0 80	8
Mastic floor layers:		
Kettlemen.....	0 75	8
Finishers, rubbers and spreaders.....	0 75	8
Motor truck drivers.....	0 49½	8
Ornamental iron and bronze erectors.....	0 65	8
Painters and glaziers.....	0 60	8
Plasterers.....	0 90	8
Plasterers' helpers.....	0 54	8
Plumbers and steamfitters.....	0 80	8
Powdermen.....	0 60	8
Riggers.....	0 60	8
Roofers, slate and tile.....	0 65	8
Roofers, composite.....	0 75	8
Roofers, felt and gravel.....	0 60	8
Sheet metal workers.....	0 75	8
Steam shovel engineers.....	0 90	8
Steam shovel cranemen.....	0 65	8
Steam shovel firemen.....	0 55	8
Stonecutters, granite.....	0 87½	8
Stonecutters, sandstone and limestone.....	0 87½	8
Stonemasons.....	0 90	8
Structural steel workers.....	0 80	8
Teamster, team and wagon.....	0 90	8
Teamster.....	0 45	8
Terrazzo layers.....	0 75	8
Tile setters.....	0 80	8

☐ N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

unit prices. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator, gas or electric.....	\$0 50	8
Concrete mixer operator, steam.....	0 60	8
Cement finishers.....	0 60	8
Stonemasons.....	1 00	8
Stonecutters.....	0 80	8
Brick and hollow tile layers.....	1 00	8
Structural steel workers.....	0 80	8
Ornamental iron workers.....	0 60	8
Hollow metal workers.....	0 60	8
Carpenters and joiners.....	0 70	8
Sheet metal workers.....	0 75	8
Man in charge roofers, felt and gravel.....	0 65	8
Terrazzo layers.....	0 70	8
Marble and tile setters.....	1 00	8
Lathers, metal.....	0 70	8
Plasterers.....	0 80	8
Painters and glaziers.....	0 80	8
Plumbers and steamfitters.....	0 75	8
Plumbers' and steamfitters' helpers.....	0 45	8
Electricians.....	0 70	8
Labourers.....	0 40	8
Driver, team and wagon.....	0 80	8
Teamster.....	0 40	8
Motor truck driver.....	0 45	8
Asbestos insulation workers.....	0 75	8
Asbestos insulation helpers.....	0 45	8
Blacksmiths.....	0 65	8
Compressor operators, gas or electric.....	0 50	8
Derrick and hoist operators (other than on steel erection).....	0 70	8
Drill runners.....	0 50	8
Firemen—stationary.....	0 45	8
Kalamein iron workers.....	0 60	8
Linoleum layers, waxers and polishers.....	0 55	8
Machinists.....	0 70	8
Mastic floor layers, finishers, rubbers and spreaders.....	0 75	8
Kettlemen.....	0 60	8
Powdermen.....	0 55	8
Steam shovel engineers.....	0 90	8
Steam shovel cranemen.....	0 70	8
Steam shovel firemen.....	0 55	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

## COMPRESSED AIR WORKERS

Pressure	Max. total working hours	Min. rest interval in open air	Rate
Normal to 22 lb.....	8 hrs.	½ hr.	\$4 50 per shift
22 to 29 lb.....	6 "	1 "	5 00 "
29 to 34 ".....	4 "	2 "	5 50 "
34 to 40 ".....	3 "	3 "	6 00 "
40 to 45 ".....	2 "	4 "	6 50 "
45 to 50 ".....	1½ "	5 "	7 00 "
Shift foreman.....	Same hours		0 50 "
Look tenders.....	\$4 50 per day		8 hrs. per day
Look tender helpers.....	0 40 per hr.		8 "

Construction of an addition to the Royal Canadian Mint, Ottawa, Ont. Name of contractors, H. Dagenais, Ltd., Ottawa, Ont. Date of contract, March 13, 1935. Amount of contract \$412,310.45 and unit prices. A fair wages

schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Asbestos insulation workers.....	\$0 75	8
Asbestos insulation helpers.....	0 45	8
Blacksmiths.....	0 65	8
Brick and hollow tile layers.....	1 00	8
Compressor operator—gas or electric.....	0 50	8
Concrete mixer—gas or electric.....	0 50	8
Concrete mixer operator—steam.....	0 60	8
Cement finishers.....	0 60	8
Carpenters and joiners.....	0 70	8
Drill runners.....	0 50	8
Derrick and hoist operators— (other than on steel erection).....	0 70	8
Electricians.....	0 70	8
Fireman—stationary.....	0 45	8
Hollow metal workers—erectors.....	0 60	8
Kalamein iron workers—erectors.....	0 60	8
Lathers—metal.....	0 70	8
Labourers.....	0 40	8
Linoleum layers, waxers, polishers.....	0 55	8
Machinists.....	0 70	8
Mastic floor spreaders, rubbers and finishers.....	0 75	8
Kettlemen.....	0 60	8
Marble and tile setters.....	1 00	8
Motor truck driver.....	0 45	8
Ornamental iron and bronze erect- ors.....	0 60	8
Painters and glaziers.....	0 60	8
Plumbers and steamfitters.....	0 75	8
Plumbers' and steamfitters' help- ers.....	0 45	8
Plasterers.....	0 80	8
Powdermen.....	0 55	8
Man in charge felt and gravel roof- ers.....	0 65	8
Roofers, composite, slate and tile.....	0 70	8
Sheet metal workers.....	0 75	8
Sheet metal workers' helpers.....	0 45	8
Steam shovel engineers.....	0 90	8
Steam shovel cranemen.....	0 70	8
Steam shovel firemen.....	0 55	8
Terrazzo layers.....	0 70	8
Teamster, team and wagon.....	0 80	8
Teamster.....	0 40	8
Stonemasons.....	1 00	8
Stonecutters.....	0 80	8

N.B.—Where by agreement or current practice the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Construction of a public building at Berthier-ville, P.Q. Name of contractors, Emilien Tellier & Alfred Mousseau, fils, Berthierville, P.Q. Date of contract, February 25, 1935. Amount of contract, \$42,430 and unit prices for additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 40	8
Cement finishers.....	0 50	8
Stonemasons.....	0 60	8
Stonecutters.....	0 60	8
Brick and hollow tile layers.....	0 60	8

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Structural steel workers.....	0 65	8
Ornamental iron workers.....	0 50	8
Hollow metal workers.....	0 50	8
Kalamein iron workers.....	0 50	8
Carpenters and joiners.....	0 50	8
Sheet metal workers.....	0 55	8
Man in charge roofing, felt and gravel.....	0 45	8
Terrazzo layers.....	0 55	8
Marble and tile setters.....	0 60	8
Lathers, metal.....	0 50	8
Plasterers.....	0 60	8
Painters and glaziers.....	0 50	8

Electricians.....	0 55	8
Labourers.....	0 30	8
Driver, horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Teamster.....	0 30	8
Motor truck driver.....	0 35	8

Construction of a public building at Cannington, Ontario. Name of contractor, Thomas A. Wilson, Cannington, Ont. Date of contract, March 21, 1935. Amount of contract \$15,489, plus unit prices for additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 45	8
Cement finishers.....	0 55	8
Stonemasons.....	0 80	8
Bricklayers.....	0 80	8
Ornamental iron workers.....	0 55	8
Carpenters and joiners.....	0 60	8
Sheet metal workers.....	0 65	8
Lathers, metal.....	0 60	8
Plasterers.....	0 80	8
Painters and glaziers.....	0 55	8
Plumbers and steamfitters.....	0 65	8
Electricians.....	0 65	8
Labourers.....	0 35	8
Driver, horse and cart.....	0 50	8
Driver, team and wagon.....	0 65	8
Drivers.....	0 35	8
Motor truck driver.....	0 40	8

Construction of a new dock at the Marginal Way, at easterly end of Toronto Harbour, Ont. Name of contractors, Dominion Construction Corporation Ltd. Toronto, Ont. Date of contract, January 4, 1935. Amount of contract, approximately \$487,201.82. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmiths.....	\$0 60	8
Boatmen.....	0 50	8
Carpenters and joiners.....	0 80	8
Cement finishers.....	0 70	8
Compressor operators.....	0 65	8
Concrete mixer operators.....	0 60	8
Divers.....	1 25	8
Electricians.....	1 00	8
Fireman.....	0 50	8
Hoist operators—gasoline.....	0 80	8
Hoist operators—steam.....	0 80	8
Labourers.....	0 50	8
Machinists.....	0 65	8
Motor truck drivers.....	0 50	8
Pile driver runners.....	0 80	8
Timbermen or cribmen (using such tools as: broad-axe, X-cut saw, hammer, auger, adze).....	0 60	8

N.B.—Where by agreement or current practice the working hours of any class of workers are less than 48 hours per week, such lesser hours shall not be exceeded on this work.

Repairs to Hull, Housing, Spud Casings, Crane, etc. of Dredge P.W.D. No. 110, at Lauzon, P.Q. Name of contractors, the Davie Shipbuilding & Repairing Co., Ltd., Lauzon, P.Q. Date of contract, March 16, 1935. Amount of contract, \$5,580. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Ship joiners.....	\$0 50	8
Ship carpenters.....	0 50	8
Wood caulkers.....	0 50	8
Platers.....	0 50	8
Riveters.....	0 50	8
Rivet holders.....	0 40	8
Iron caulkers.....	0 50	8
Electric welders.....	0 65	8
Blacksmiths.....	0 50	8
Machinists.....	0 50	8
Machinists' helpers.....	0 35	8
Iron moulders.....	0 50	8
Patternmakers.....	0 55	8
Painters.....	0 45	8
Labourers.....	0 30	8
Riggers.....	0 45	8
Motor truck drivers.....	0 35	8

Repairs, renewals etc. to Hull, Housing, Spud Casings, Booms etc. of Dredge P.W.D. No. 116, at Champlain Dry Dock, Lauzon, P.Q. Name of contractors, the Davie Shipbuilding & Repairing Co., Ltd., Lauzon, P.Q. Date of contract, March 16, 1935. Amount of contract, \$5,990. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Ship joiners.....	\$0 50	8
Ship carpenters.....	0 50	8
Wood caulkers.....	0 50	8
Platers.....	0 50	8
Riveters.....	0 50	8
Rivet holders.....	0 40	8
Iron caulkers.....	0 50	8
Electric welders.....	0 65	8
Blacksmiths.....	0 50	8
Machinists.....	0 50	8
Machinists' helpers.....	0 35	8
Iron moulders.....	0 50	8
Patternmakers.....	0 55	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Supply and installation of electric elevators, entrances, etc., in the Postal Terminal Building, Montreal, P.Q. Name of contractors, Otis-Fensom Elevator Co., Ltd., Montreal, P.Q. Date of contract, February 15, 1935. Amount of contract, \$10,379.00. The above-mentioned fair wages schedule also governs this contract.

*Contracts in Group "B" (Interior Fittings, Supplies, etc.)*

Construction and installation of interior fittings in the public building at Kerrobert, Sask. Name of contractors, Regina Sash & Door Co., Ltd., Regina, Sask. Date of contract, March 12, 1935. Amount of contract, \$715.00. The "B" Labour Conditions above referred to were inserted in this contract.

Construction and installation of interior fittings in the public building at Kinistino, Sask. Name of contractors, Regina Sash & Door Co., Ltd., Regina, Sask. Date of contract, March 8, 1935. Amount of contract, \$617.00. The "B" Labour Conditions above referred to were inserted in this contract.

In accordance with a recommendation of the Royal Commission (Provincial Economic Inquiry), appointed by the Lieutenant-Governor of Nova Scotia on July 27, 1934 (LABOUR GAZETTE, January 1935, page 25) the Premier of the Province has introduced a bill to create a permanent civil service. The measure would place the executive service of the Provincial Government under a Civil Service Commission, and would apply also to provincial boards and commissions brought under its terms by Order in Council. Occupations exempted include court officials, magistrates, justices of the peace, and part-time employees.

Supply and installation of interior fittings in the public building at Swan River, Man. Name of contractors, Regina Sash & Door Co., Ltd., Regina, Sask. Date of contract, March 28, 1935. Amount of contract, \$649.00. The "B" Labour Conditions above referred to were inserted in this contract.

POST OFFICE DEPARTMENT

Following is a statement of payments made in March, 1935, for supplies ordered by the Post Office Department under contracts which were subject to regulations for the suppression of the sweating system, the securing of payment to the workers of fair wages, and the performance of the work under proper sanitary conditions:—

A maximum of 57,352 unemployed was reached in New Zealand during 1933 according to information contained in the recently received *Statistical Report* (1933) of that country. A relatively high level of unemployment continued throughout 1931, 1932 and 1933, but a decrease was evident in 1934. The report also indicates decreases in the wage rate index numbers. For males, the decrease is 18 per cent, and for females, 13.2 per cent, as compared with 1930. This is partly accounted for by an order of the Arbitration Court in May, 1931, which reduced by 10 per cent all minimum rates specified in Court awards.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Textiles and Clothing

TORONTO, ONTARIO.—TORONTO CLOAK MANUFACTURERS' ASSOCIATION AND OTHER MANUFACTURERS AND THE INTERNATIONAL LADIES GARMENT WORKERS' UNION AND THE TORONTO JOINT BOARD OF CLOAK, SUIT AND DRESSMAKERS' UNION, COMPOSED OF THE CLOAK OPERATORS LOCAL UNION NO. 14, CUTTERS' LOCAL NO. 83, LOCAL 68 AND PRESSERS LOCAL NO. 92.

Agreement (signed following strike which was reported in the LABOUR GAZETTE, February, page 103, and March, page 229) to be in effect from January, 1935 to January 1, 1937, and thereafter from year to year until notice.

The agreement covers the entire province of Ontario.

Only union members to be employed. In each shop, a shop chairman and a price committee is to be elected by the union members. Union representative to have access to each employer to discuss and adjust grievances.

The union will not enter into an agreement with any other group or association of inside manufacturers or jobbers, and any agreement made with contractors is to be on the same terms as this agreement.

Hours: 44 per week until July 1, 1935; thereafter 40 per week with a five day week, providing the union does not agree to work a longer week in the Montreal market.

Wages: piece rates for operators to be adjusted so that 80 per cent in each shop will receive not less than \$1 per hour. Prices to overpressers to be based on \$1 per hour, underpressers on 75 cents per hour. Piece rates to be settled between the employer and the price committee. "These increases shall not imply a general increase in cases where the scale is now being adhered to."

The standard wage for cutter to be \$37.50 per week and for trimmers \$23.50. For those now being paid less than these amounts, adjustments to be made having regard to the experience and present wage of the worker.

The standard for wages of a qualified finisher or fur sewer to be on a basis which will yield for each hour of operation 50 cents for finishers and 65 cents for fur sewers. A general increase of 10 per cent in wages of finishers and fur sewers to be given, but in those shops now paying below

the above standards of 50 and 65 cents, increases to be given at least to reach the above standard rate.

Sample makers to be paid for operating, if on a piece work basis, on the basis of \$1 per hour, and for pressing, underpressing, finishing and fur sewing a 50 per cent increase over prevailing prices for such operations.

The section system of work is to be eliminated by July 1, 1935.

In shops where employers are now working at the bench, this system is to be gradually eliminated until no employers are to be working at any operation after January 1, 1936.

No overtime until overtime season has been declared by the joint commission, and then only providing all unemployed have been absorbed.

No material to be sent out to be made up in garments at any outside shops, except that if sufficient cause is given, the joint commission may give leave to have skirts so manufactured, but then only in shops under union jurisdiction and at the same price as paid in inside shops. No work to be done at home.

No work to be given out to or accepted from a contractor or manufacturer or jobber against whom the union is conducting a strike.

When there is not sufficient work for all employees, all the available work in the shop is to be divided as equally as possible among all the employees engaged in the work who are competent to do the work.

It is agreed that as soon as the unionization of the industry and the enforcement of uniform labour standards have reached a point at which the provisions for the payment of unemployment insurance contributions can be enforced, that an unemployment insurance fund will be established, the details to be agreed upon between the parties, or if necessary through the joint commission.

A joint commission composed of two representatives of each party and a chairman mutually agreed on to be formed for the purpose of enforcing the terms of the agreement.

Disputes which cannot be settled directly between the parties are to be referred to this commission. No strike or lockout pending negotiations of any dispute.

### Construction: Shipbuilding

SAINT JOHN, N.B.—ST. JOHN DRYDOCK COMPANY AND CERTAIN OF THEIR EMPLOYEES.

Agreement reached following strike reported on page 316 of this issue and conciliation by the Chief Conciliation Officer of the Department of Labour.

Agreement to be in effect from March 7, 1935 to March 7, 1936, and thereafter from year to year until notice.

No discrimination to be shown against members of the shop committee.

Hours: 9 per day, 4½ on Saturdays, a 49½ hour week.

Overtime: Time and one-half until midnight, thereafter double time; Sundays and holidays and work after noon on Christmas eve and New Year's eve, double time. If less than three consecutive nights worked on night shift, time and one-half to be paid. Overtime after night shift, time and one-half until starting time of regular day shift. "Any employee asked to work after completion of regular night shift shall be paid at the rate of double time."

**Wages:** Acetylene welders, electric welders, burners, anglesmiths, angle and frame setters, operators of bending rolls, boilermakers, caulkers and chippers, (steel) ship fitters, riveters, platers, punch and shear operators and loftsmen, 57½ cents per hour; when these trades are employed at other work 42½ cents per hour; gang foremen 5 cents per hour additional; liner fitters 45 and 50 cents per hour, with 37½ cents if employed at other work; drillers, reamers, countersinkers, shop crane runners 40 cents, with 37½ cents if employed at other work, helpers to these trades 35 cents; bolters up 37½ cents, helpers 35 cents.

Extra pay for work under certain difficult conditions.

Shop committee to be allowed to interview head officials of the Company. Disputes to be dealt with by the shop committee and the Company, and if necessary, arbitrated; no strike or lockout to occur while the case is pending.

**SAINT JOHN, N.B.—ST. JOHN DRYDOCK AND SHIPBUILDING COMPANY LIMITED AND THE MACHINISTS AND MACHINISTS' APPRENTICES EMPLOYED BY THEM.**

Agreement to be in effect from March 7, 1935, to March 7, 1936, and thereafter from year to year until notice.

The conditions governing hours, overtime, working conditions, shop committee, etc. are the same as in the agreement with other employees of the Company summarized above.

Minimum wage rates for machinists and fitters, 57½ cents per hour, helpers 35 and 40 cents; apprentices, 15 cents per hour during first year, 20 cents during second year, 25 cents during third year and 30 cents during fourth year, and in addition apprentices to receive 5 cents per hour on June 1 of each year if the apprentice fulfils the requirements of the Company's rules governing apprentices. On completion of four years apprenticeship, an apprentice may be retained on probation for one year at 10 cents per hour in excess of the fourth year rate (minimum rate plus accrued bonuses). Apprentices must be 16 years and not over 18 years of age.

#### **Transportation and Public Utilities: Street and Electric Railways**

**VANCOUVER, VICTORIA AND OTHER CENTRES IN BRITISH COLUMBIA.—THE BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY LIMITED AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA.**

Agreement to be in effect from January 15, 1935, to January 15, 1937, and thereafter subject to 60 days' notice.

This agreement is similar to the one which came into effect September 30, 1927, which was summarized in the *LABOUR GAZETTE*, August, 1928, page 905, which agreement continued in effect with the exception of a 5 per cent wage reduction from December 1, 1932, and other changes noted in the *LABOUR GAZETTE*, February, 1934, page 194. The present agreement differs from the previous agreement in some clauses, among which are the following:

The Company recognizes the union and all employees are to be union members.

Motormen and conductors on regular runs to be allowed every sixth day off, except on holidays and Exhibition week.

As noted above, the wage scale which came into effect September 30, 1927, was reduced

by 5 per cent from December 1, 1932. The new agreement provides for a reduction of only 2½ per cent from this 1927 scale and this deduction to cease January 15, 1936, when the full scale of September 30, 1927, is to be restored.

The Advisory Committee on the Welfare of the Blind (British Ministry of Health), has recently published the "Report of the Subcommittee on Marketing and other matters affecting the Employment and Vocational Training of Blind Persons." The report contains chapters dealing with the history of the marketing problem, existing methods of disposing of blind-made goods, evidence of need of improved marketing, examination of marketing schemes, workshops for the blind, home workers schemes, and training of blind workers, etc.

The United States Department of Labour (Women's Bureau) has recently issued the result of a survey on "Variations in Wage Rates under Corresponding Conditions." The statistics which form the basis of the survey show the wide variations that exist in the standards of payment of women's wages for similar work under similar conditions in the United States. The figures are for sample plants in eight important woman-employing industries in 1932 and 1933. This material was brought together for the purpose of setting forth examples to indicate whether the wages paid under similar conditions showed conformity to some standard relative to the character of the work or were largely in a chaotic and unstandardized state. The conclusions reached indicate "the great need of continuing the development of more adequate wage standards, at least to the extent of establishing a minimum wage or of maintaining such a minimum where established."

"The Longevity of Industrial Policyholders During the Depression" is the title of an article in the *Statistical Bulletin* for February, 1934, issued by the Metropolitan Life Insurance Company. This article shows that throughout the years of the depression (1929 to 1933) the expectation of life of the industrial policyholders of the Metropolitan Life Insurance Company has shown continued improvement. This improvement, however, has proceeded at a reducing rate i.e. in 1929 the expectation of life at birth of the industrial policyholders, taken as a group, was 55.78 years; in 1930 it had increased by 1.53 years; 1931 saw a further gain of 0.54 of a year; 1932 a gain of 0.90 of a year; and 1933 finally showed a gain of only 0.39 of a year over 1932. For the year 1934 complete data are not yet available but provisional compilations indicate that the expectation of life will be better than for 1933.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, MARCH, 1935

### Cost of Living, Prices of Staple Articles and Index Numbers

**T**HE movement in prices during the month was slight, both the weekly family budget in terms of retail prices and the Dominion Bureau of Statistics index number of wholesale prices being however somewhat higher.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.63 at the beginning of March as compared with \$7.59 for February; \$8.04 for March, 1934; \$6.67 for March, 1933; \$11.67 for March, 1930; \$11.46 for March, 1926; \$16.92 for June, 1920 (the post war peak); and \$7.68 for March, 1914. Prices changes during the month were small, the greatest increases occurring in the prices of butter, lard and beef, while the prices of eggs, granulated sugar, flour and evaporated apples were lower. Including the cost of fuel and rent with that of foods the total budget averaged \$16.10 at the beginning of March as compared with \$16.06 for February; \$16.51 for March, 1934; \$15.59 for March, 1933; \$21.96 for March, 1930; \$21.77 for March, 1926; \$26.92 for July, 1920 (the post war peak); and \$14.35 for March, 1914. Fuel was practically unchanged. No changes were reported in rent.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1926 as 100, was fractionally higher at 72 for March as compared with 71.9 for February. This index has shown little movement during recent months. Comparative figures for certain earlier dates are 72.1 for March, 1934; 64.3 for March, 1933; 91.8 for March, 1930; 101.3 for March, 1926; 98.3 for March, 1922; 164.3 for May, 1920 (the post war peak); and 64.7 for March, 1914.

In the grouping according to chief component materials the Vegetable Products group, the Animals and their Products group and the Non-Ferrous Metals group advanced, while the Textile Products group and the Non-Metallic Minerals group were lower. Other groups showed little change. In the grouping according to purpose consumers' goods were lower chiefly because of lower prices for clothing and household equipment and supplies. Producers' goods were unchanged.

#### EXPLANATORY NOTE AS TO RETAIL PRICES

The tables of retail prices and rentals shows the prices at the beginning of March of seventy-one staple foodstuffs, groceries, coal,

wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

(Continued on page 384)

# COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city

#### CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1935\* (Average prices in 1913=100)

Mar. 1935....	104	143	129	113	155	124

\* The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18%; Clothing 18%; Sundries, 20%.

from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Beef prices again averaged higher, sirloin steak being up from 20·9 cents per pound in February to 21·2 cents in March and shoulder roast from 11·3 cents per pound to 11·7 cents. Breakfast bacon was slightly lower at an average price of 31·6 cents per pound as compared with 31·9 cents the previous month. Eggs were down from an average price of 32·9 cents per dozen in February to 31·4 cents in March. Decreases occurred in most localities except in the Province of Ontario, where there were some advances. Butter prices were generally higher, dairy averaging 25·5 cents per pound in March as compared with 24·3 cents in February and creamery 29·6 cents per pound in March and 28 cents in February. Cheese was fractionally higher at an average price of 19·9 cents per pound. Potatoes were slightly higher averaging 78 cents per ninety pounds as compared with 75 cents the previous month. Anthracite coal was practically unchanged at an average price of \$15.15 per ton. Other fuels also showed little change. No changes were reported in rent.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16; Windsor, \$16.50; Moncton, \$16; Saint John, \$14; Quebec, \$14.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$15.50; Montreal, \$15.75; Ottawa, \$16.75; Kingston, \$16; Belleville, \$15.50; Peterborough, \$16.50; Oshawa, \$14.75; Toronto, \$15; St. Catharines, \$14.75; Hamilton, \$15; Brantford, \$16.75; Galt, \$16.50; Windsor, \$12.50; Sudbury, \$17.50; Cobalt, \$19; Timmins, \$19.50; Port Arthur, \$16; Fort William, \$16; Winnipeg, \$19.50.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

In grain prices wheat advanced while coarse grains for the most part were lower. No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, averaged 81·9 cents per bushel in March as compared with 79·5 cents in February and 66·4 cents in March,

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

1934. Oats averaged 41.1 cents per bushel in March as compared with 42.7 cents the previous month, rye 49 cents per bushel as compared with 50.7 cents and barley 44.8 cents per bushel as compared with 46.9 cents. Flour at Montreal was 10 cents per barrel higher at \$5.40. Ceylon rubber at New York was down from 12.9 cents per pound to 11.6 cents. Granulated sugar at Montreal was unchanged at \$4.90 per hundred pounds, while raw sugar was 5 cents per hundred pounds higher at \$1.90. In live stock choice steers at Toronto advanced from an average price of \$5.95 per hundred pounds to \$6.80 and at Winnipeg from \$5.08 per hundred pounds to \$5.88. Bacon hogs at Toronto declined from \$8.60 per hundred pounds to \$8.17, while the price at Winnipeg was higher at \$7.51 as compared with \$7.39 the previous month. Creamery butter at Montreal declined from 26.8 cents per

pound to 25.9 cents and at Toronto from 27.5 cents per pound to 26.7 cents. Cold storage holdings at the beginning of March were reported to be much greater than at the same date last year but less than at the beginning of the previous month. Fresh eggs at Montreal were substantially lower at an average price of 23.9 cents per dozen as compared with 30.8 cents in February. At Toronto the price was 21.5 cents per dozen in March and 29 cents in February. Storage holdings were said to be about 68 per cent less at the beginning of March than at the beginning of February. Raw cotton at New York declined from 12.6 cents per pound to 11.7 cents. White pine lumber was \$3 per thousand board feet lower at \$29. Electrolytic copper at Montreal advanced from \$7.24 per hundred pounds to \$7.47, while tin at Toronto was down from 54.3 cents per pound to 52.5 cents.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly, give the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices according to groups of commodities in several of these countries.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1930=100, was 88·8 for February, a decrease of 0·3 per cent for the month. The decline, although small, was general, extending to most of the groups and equally affecting foods and industrial materials.

The *Statist* index number, on the base 1867-1877=100, was 83·4, at the end of February, a decrease of 0·2 per cent for the month. All food groups were lower, especially the sugar, coffee and tea group, while industrial materials showed a slight advance on the average.

**COST OF LIVING.**—The Ministry of Labour index number, on the base July, 1914=100, was 141 at March 1, a decline of one point for the month, due to lower food prices including a seasonal decline in the price of eggs, and there was also a slight decline in the sundries group.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914=100 (gold index), was 71 for February, showing no change from the January level. A slight increase in national products was offset by a small decline in imported products. There were no marked changes in any of the groups.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913=100, was 100·9 for February, a fall of 0·2 per cent for the month. The changes in all groups were small, and both agricultural products and industrial materials were slightly lower than the January level.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 122·5 for February, an increase of 0·1 per cent over the January level, due to small advances in food and clothing prices.

### Italy

**WHOLESALE PRICES.**—The index number of the Milan Provincial Council of Corporate Economy, on the base 1913=100, was 276·52 for December, a slight advance over the previous month due chiefly to increases in food prices.

### New Zealand

**WHOLESALE PRICES.**—The index number of the Census and Statistics Office, on the base 1909-1913=1000, was 1338 for December, a slight decrease from the previous month, due to decreases in foodstuffs of vegetable origin and animal products, which were partly counteracted by slight advances in wood and wood products and textile manufactures.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 79·5 for February, an advance of nearly one per cent from the January level, due to higher prices for farm products and foods, and to very slight advances in building materials and chemicals and drugs. Other groups were either very slightly lower or unchanged from the previous month.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is the sum total of the prices per pound of 96 commodities of common consumption was \$9·7954 at March 1, an increase of 0·16 per cent over the previous month. From the low point reached March 1, two years ago, this index number has advanced 54·2 per cent.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is the cost *per capita* of a year's supply of commodities, was \$176·806 at March 1, an advance of 0·02 per cent for the month. Increases were shown in breadstuffs, meat, "other food" and metals, partly offset by decreases in dairy and garden produce, clothing and miscellaneous commodities.

**COST OF LIVING.**—The index number of the National Industrial Conference Board, on the base 1923=100, was 82·4 for February, an advance of 1 per cent for the month. Foods were 3 per cent higher, rents 0·7 per cent higher, while clothing was 0·8 per cent lower than in January. Fuel and light and sundries were unchanged.

TABLE I.—INDEX NUMBERS OF RETAIL PRICES AND COST OF LIVING IN CANADA AND CERTAIN OTHER COUNTRIES  
(Base figure 100 except where noted)

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Breach of Contract of Employment

This action is in damages for breach of contract of employment instituted by the chief of factory planning division of the respondent's biscuit manufacturing plant at Moncton, N.B. Before the Trial Court, the appellant secured a general verdict for the sum of \$7,261.40, for which judgment was given with costs. On appeal to the appeal division of the Supreme Court of New Brunswick, this verdict was set aside and a new trial directed with costs of appeal against the appellant. On further appeal to the Supreme Court of Canada the appellant contended that the original verdict, should not have been set aside and that the judgment of the trial court should be restored with all costs against the respondent.

The appellant had been, since 1915, in the permanent employment of a company operating a cake and biscuit manufacturing plant in the city of Moncton in which he eventually became superintendent. His salary for 1926 was \$5,500. In that year, financial interests in Montreal absorbed this plant by merger.

The appellant continued under the new management, but in the spring of 1927 his title was changed from "plant superintendent" to "chief of factory planning division." On account of sickness he was compelled to leave his work from June or July, 1927 until February or March, 1928. On his recovery, he was informed that his services were no longer required.

The appellant then, with some others, thought of organizing a company to compete with the respondent. The vice-president of the Moncton division of the respondent's company, having learned of the proposed plan, re-engaged the appellant.

He then re-entered the service and was given an assistant, and the foremen who had formerly been under the appellant's direct supervision were given more responsibility.

The appellant, although he disliked the situation, did not formally object to what he acknowledges the respondents had a perfect right to do, if they wished to pay him the same salary for less work. When, however, in the month of August, 1929, the appellant having been told by the manager, not to interfere in supervising repairs to broken down machinery, he complained that he was treated like a boy. He accepted the manager's invitation to go into his office to discuss the matter. After this interview, the appellant left for his holidays and never returned. After

two months, the respondent ceased to pay his salary.

In the course of his direction to the jury, the trial judge emphasized that if it was found that the plaintiff had been "crowded out" of his duties under the agreement, then plaintiff is entitled to recover; but if it was found that the plaintiff was bound to discharge the duties which the manager wanted him to discharge then he is not entitled to recover.

The grounds on which the case proceeded before the Supreme Court were: first, that the trial judge misdirected the jury; second, that the verdict was against the weight of evidence; and third, that there was a mistrial because of the failure of the trial judge to put specific questions to the jury.

In reviewing the case in the Supreme Court of Canada the Chief Justice stated:

"Having reached the conclusion that there was no substantial misdirection, that the issue for their decision was adequately put before the jury, and that there was evidence upon which they might reasonably determine that issue as they did (and the learned trial judge having exercised the discretion with which the law invests him as to the form in which the jury was to be asked to express this finding), the appellant could not properly be deprived of the verdict he has obtained, because I might think that, if I had been in his place, I might have considered it convenient to submit specific questions; unless, at all events, it plainly appeared that, because of the course taken by the trial Judge, the respondents had suffered some substantial wrong or prejudice.

"The appeal should be allowed and the judgment of the trial Judge restored with costs throughout."

*Brown versus Canada Biscuit Co. Ltd.* (New Brunswick), 1935. *Dominion Law Reports*, vol. 2, page 81.

### Action by Farm Hand for Wages

In this case the plaintiff, a farm hand in Alberta, sought to recover the sum of \$2,135 for services rendered on the defendant's farm during the years 1927 to 1932 together with the sum of \$170, the amount of a loan, making a total claim of \$2,305, after allowing for wages received on account.

These services were to have been paid for upon a monthly basis for the portion of the year during which spring and summer work usually lasted, and upon a rate per day basis during the harvesting and threshing operations. However there was a direct conflict of testi-

mony on the part of the plaintiff and defendant as to the date upon which the monthly rate of wages was to apply in each year; also as to the rate per month payable, with the exception of the years 1927 and 1928, during which the monthly rate was agreed upon by both parties at \$75. They were in agreement that the monthly rate should cease to apply in each year upon the respective dates when the harvesting operations commenced, but they again disagreed as to the amount of the daily rate payable covering each of the years in question.

The plaintiff's accounts were considered as being unacceptable as evidence, while the defendant's records were lost.

In view of the contradictory nature of the evidence, and the absence of any specific contract (with the exception of the years 1927 and 1928) Hon Justice Mitchell of the Supreme Court of Alberta, before whom the action was heard, based his finding upon the principle of *quantum meruit*.

In so doing, he stated that "the evidence of a witness from the Labour Bureau was largely relied on as to what were reasonable rates and as to the date for the commencement of

farm operations each year; and because of the plaintiff's length of service (six years) and the satisfactory nature thereof and his capacity for handling farm machinery a high average rate was allowed. The plaintiff was awarded the following daily rates: \$10 for 1927 and 1928; \$7 for 1929; \$6 for 1930; \$3.50 for 1931; \$3.00 for 1932. The monthly rate was fixed at \$75 for 1927 and 1928; \$50 for 1929; \$40 for 1930; \$30 for 1931 and 1932. The date of the commencement of farming operations on the land was fixed at April 1 in each year.

On this basis the plaintiff's total wage claim was worked out at \$2,966.50, plus the unpaid loan of \$170, making a grand total of \$3,136.50. From this total was subtracted the amount of \$2,892.50 which amount represented the payments made on account by the defendant in various years, and which sum was not in dispute.

Judgment was given against the defendant in the sum of \$244 together with costs; the sum of \$225 paid into court was to be paid out to the plaintiff to the credit of the action.

*Adams versus Jennings*, (Supreme Court of Alberta). *Western Weekly Reports*, 1935, vol. 1, page 425.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

ACCORDING to data tabulated in the Dominion Bureau of Statistics from 9,066 establishments, employment at the beginning of April showed a seasonal falling-off, the reported staffs aggregating 874,556 persons, compared with 902,138 in the preceding month. The statistics furnished by leading firms since 1920 show that in fourteen of these fifteen years, employment on April 1 has experienced a between-seasons' contraction, ordinarily resulting from the completion of the winter's work in logging camps, before any considerable numbers of persons have been absorbed into the outdoor industries opening up in the spring and summer. The general loss at the beginning of April, 1935, rather exceeded the average decline on that date in the years for which statistics are available, being in fact, larger than in any other year of the record except 1921. Logging during the past winter was exceptionally active, entailing a correspondingly marked reaction when the camps closed for the season, while the resultant situation has this year been aggravated by the release of unusually large numbers of men from railway and highway construction and maintenance work. These factors are chiefly responsible for a decrease in the index (based on the 1926 average as 100) from 96.4 on March 1 to 93.4 at the beginning of April. On the same date in preceding years of the record, the index was as follows:—1934, 91.3; 1933, 76.0; 1932, 87.5; 1931, 99.7; 1930, 107.8; 1929, 110.4; 1928, 102.3; 1927, 97.4; 1926, 92.5; 1925, 88.3; 1924, 90.4; 1923, 88.7; 1922, 81.8 and 1921, 85.1. The index on April 1, 1935, was higher than on that date in any of the last three years, and was also higher than in any of the years from 1921 to 1926.

There was an increase on April 1 in manufacturing, especially of leather, pulp and paper, textile and iron and steel products. Metallic ore mining, building construction and trade also showed improvement. On the other hand, logging camps reported very large seasonal reductions, as already stated, follow-

ing an exceptionally active season in bush work, and there were important declines in railway and highway construction and maintenance. Curtailment of a seasonal nature also occurred in coal mining, and transportation was rather slack.

At the beginning of April, 1935, the percentage of idleness reported to the Department of Labour by local trade unions was 16.7 as compared with percentages of 18.2 at the beginning of March, 1935, and 19.5 at the beginning of April, 1934. The percentage for April was based on the reports received from 1,735 labour organizations, with an aggregate of 160,062 members.

The reports of the Department of Labour from the offices of the Employment Service of Canada showed that the volume of business transacted during March, 1935, as indicated by the average daily placements, was 11 per cent below that of the preceding month and over 25 per cent lower than that recorded during March, 1934, construction and maintenance being the group showing the greatest loss under each comparison. Vacancies in March, 1935, numbered 24,788, applications 46,014 and placements in regular and casual employment 23,231.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was somewhat lower at the beginning of April at \$15.97 as compared with \$16.10 at the beginning of March because of the lower cost of foods, chiefly eggs and butter. Comparative figures for certain earlier dates are \$16.28 for April, 1934; \$15.74 for April 1933; \$21.53 for April, 1930; \$21.64 for April, 1926; \$26.92 for July, 1920 (the post war peak); and \$14.32 for April, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1926 as 100, was 72.5 for April as compared with 72 for March; 71.3 for April, 1934; 65.3 for April, 1933; 91.2 for April, 1930; 101.2 for April, 1926; 164.3 for May, 1920 (the post war peak); and 64.0 for April, 1914.

The table on page 392 gives the most recent statistics available reflecting industrial condi-

(6) Sugar production given in periods of four weeks ending April 20, March 23, and February 23, 1935, April 21, March 24, and February 24, 1934.

(7) MacLean's Building Review.

tions in Canada. The index of the physical volume of business was lower in March than in the preceding month but somewhat higher than in March, 1934. Of the principal factors in the index, that used to indicate electric power output was higher in March than in February, while the other factors, including mineral production, manufacturing and construction, were lower. Comparing March, 1935, with March, 1934, mineral production, construction and electric power output showed gain, while the index of manufacturing was at a slightly lower level. Information available for April, 1935, shows advance in the index of wholesale prices as well as in the figures for contracts awarded, gross earnings of the Canadian National Railways and in sugar manufactured as compared with March, while employment and car loadings declined.

During April there were on record eleven strikes and lockouts involving 2,952 workers and causing a time loss of 14,900 man working days as compared with 13 disputes involving 3,276 workers with a time loss of 12,043 days during March. None of the disputes during April involved large numbers of workers for prolonged periods, the more important being the strike of 200 coal miners at Corbin, B.C., commencing in January, and strikes of millinery workers in Toronto and Montreal lasting only a few days, also a strike of 120 boom log workers at Vancouver, B.C., lasting three weeks. For April last year there were recorded 22 disputes involving 5,368 workers with a time loss of 72,146 days, the principal disputes involving loggers in Vancouver Island, coal miners at Stellarton, N.S., and coal miners at Minto, N.B. Of the eleven disputes in April, nine were recorded as terminated, five resulting in favour of the workers involved while compromise settlements were reached in four cases. The disputes terminated at the end of the month numbered two and involved some 230 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off or definitely declared terminated by the unions involved.

Reprinted in this issue is one of the appendices to the report of the Dominion Commissioner of Unemployment Relief which

#### **Review of Federal**

**relief activities.** Commissioner of Unemployment Relief which details the entire scope of Federal activities in unemployment relief since 1930. The wide diversity and extent of Federal participation in relieving distress and promoting public works and undertakings to stimulate employment is comprehensively surveyed. A noteworthy feature of this report is the indication

of an improvement in the situation as indicated in the reduction of the numbers of those on relief when compared with the corresponding period of 1934.

#### **Supplementary program of Federal public works.**

Supplementing legislation enacted last year authorizing the construction of public works "for the purpose of accelerating recovery," there has been introduced in Parliament another measure—The Supplementary Public Works Construction Act, 1935—with similar objectives.

Specifically, this bill, which has received its second reading in the House of Commons, is designed "to create employment by public works and undertakings throughout Canada and to authorize the guarantee of certain railway equipment securities."

Its schedule provides for an expenditure totalling \$18,000,000, this appropriation being "exclusive of obligations arising out of the construction and betterment of railway equipment." This feature of the bill empowers the government to guarantee the equipment securities, both as to principal and interest, to a total amount of \$15,000,000—\$8,000,000 for the Canadian National Railways and \$7,000,000 for the Canadian Pacific Railway—over a period of two years.

A new phase of development activity, for which an appropriation of one million dollars is provided in the bill, is a proposed program of geological surveys and investigations, looking toward the further exploration of mineral possibilities throughout Canada. As explained by the Hon. W. A. Gordon, Minister of Mines and Minister of Labour, it is proposed to organize 180 geological investigating parties at an estimated cost of \$4,000 each, and employing approximately a total of 900 men. Besides geologists, students and graduates, these parties will comprise a number of labourers, linemen, cooks, etc. While the work of the parties will take in the whole range of economically valuable minerals, their activities would be directed particularly "to those places in Canada where the geological occurrence is favourable to the deposition of gold."

#### **Proposed commission on national health.**

Public health programs and public health insurance have been advocated prominently in Canada in recent months. Federally, the question of national health was envisaged in the provisions of the Employment and Social Insurance Act (LABOUR GAZETTE, February, 1935, page 138). It was also raised in the House of Commons

on motion of Mr. H. E. Spencer (Battle River) urging the adoption of a health policy in co-operation with provincial governments. Expressing sympathy with the purpose of this motion, Hon. D. M. Sutherland, Minister of Pensions and National Health, announced that he was convening shortly a conference of provincial health ministers to discuss health problems and the furtherance of co-operation between Dominion and provincial bodies (LABOUR GAZETTE, February, 1935, page 97). In making this announcement, the Minister also referred to the plan of health insurance then under consideration by the provincial organizations of the Canadian Medical Association (LABOUR GAZETTE, December, 1934, page 1098).

Further action in this direction was advocated by the Senate Standing Committee on Public Health, which, among other recommendations, urged the calling of a Dominion-provincial conference to ascertain general conditions of health throughout Canada and to promote the co-ordination of the most effective measures to maintain and improve conditions (LABOUR GAZETTE, April, 1935, page 311).

On April 25 and 26, under the auspices of the Dominion Department of Pensions and National Health, the conference of health ministers of the various provinces was held in Ottawa. During the sessions, the health situation in Canada and its relation to the question of state medicine was thoroughly explored. Various phases of public health insurance were also discussed. This conference approved a proposal by Hon. D. M. Sutherland, favouring the appointment of a Royal Commission to study health conditions throughout Canada with the object of devising ways of bringing medical advantages to all persons. It was further proposed that comprising such a commission should be representatives of medical, insurance, industrial, labour, finance and other organizations.

#### Provincial health insurance programs.

In the provincial sphere, health insurance has progressed to the stage of the introduction of legislation in British Columbia and Alberta, while in Saskatchewan, where it is referred to as "state medicine," a plan is reported as having been announced by Hon. Dr. J. M. Uhrich, Minister of Health.

The draft bill on health insurance, introduced in the British Columbia Legislature, is intended to form a basis of discussion for all interested parties, and from the proposals resulting, a measure will be formulated for enactment at the next session. Broadly the

proposal as introduced will affect all persons earning less than \$200 per month. These employees will pay three per cent of their earnings; employers will pay two per cent of their payrolls, while the government will pay the cost of medical care for indigent insured persons and their dependents and half the cost of administration not to exceed \$1,200,000 a year.

For Saskatchewan, it is understood that the announced plan would probably cost \$8,000,000, the suggestion being made that this amount "be provided by a one cent per bushel tax on grain, and a small impost on bonds or some kindred tax in urban districts." Under it "every man, woman and child will receive adequate medical attention, and every doctor and institution adequate compensation."

In Manitoba, the Department of Health is making a practical test of health insurance in a community of 2,000 population. An outline of this scheme was given in the LABOUR GAZETTE for January, 1935, page 5.

However, in all the prairie provinces, particularly in the rural districts, "municipal doctors" and "municipal hospitals" have been a part of community life for some time.

County health units, established in 1926 with the assistance of the Rockefeller Foundation, are an integral part of public health service in Quebec (LABOUR GAZETTE, January 1935, page 5).

#### Amendments to Quebec Workmen's Compensation Act.

According to recent amendments to the Quebec Workmen's Compensation Act, the weekly minimum has been raised from \$10 to \$12.50 and payments commence seven days after an accident instead of three weeks as formerly. The age limit of dependent children has been raised from sixteen to eighteen years, and the Workmen's Compensation Commission is to pay the cost of medical aid in addition to compensation.

#### Carnegie Endowment for Peace—recommendations of international conference.

At an international conference held in London recently, under the auspices of the Carnegie Endowment for International Peace, discussion centered on the "steps to be taken to restore confidence by promotion of trade and reduction of unemployment, stabilization of national monetary systems, and better organization of the family of nations to give security and to strengthen the foundations on which international peace must rest."

The countries represented at the conference included Belgium, France, Germany, Holland, Italy, Norway, Sweden, Great Britain, Canada and the United States. W. A. Mackintosh,

Professor of Economics, Queen's University, Kingston, was the Canadian representative.

The conference emphasized the "instability of currencies and the chaotic condition of exchanges" as being among the chief causes of:—

1. The difficulties which trade experiences every day in concluding international transactions;
- (2) many of the barriers farther restricting that trade, such as exchange restrictions, compensations and clearing treaties, quotas, and many of the increases of tariffs;
- (3) the accumulation of gold at a few centres and the hoarding of gold on an extensive scale;
- (4) the discouragement of long-term lending, the resumption of which would mean increased movement of goods and a reduction in the abnormal volume of floating balances;
- (5) a narrowing of the world's market and a decline of world prices.

In its major recommendations, the conference considered "that the leading governments, especially in the first instance those of France, Great Britain and the United States, should consult one another without delay for the purpose of coming to a provisional stabilization of exchange on the basis of gold—allowing for the possibility of readjustment in case of need—with a view to the establishment of a stable world gold standard.

Further policies recommended included:—

1. Strengthening the League of Nations and increasing its influence and authority as an impartial instrument of all the nations.

2. Steadily building the habit of the judicial settlement of international disputes by use of the Permanent Court of International Justice, of the Permanent Court of Arbitration and of commissions of inquiry and conciliation.

3. Checking the constant growth of armaments which may so easily be used for violating the pledge given in the Pact of Paris and which are so heavy a burden upon the tax-payer.

4. Steps to increase the effectiveness of the Pact of Paris by providing a regular method of consultation and by affording an adequate interpretation of the Pact and of the obligations implicit in it.

5. Recognition by peoples as well as by Governments of the fact that continuous consultation is the best safeguard against war and that should restraints ever be necessary, economic measures could or would be effective if virtually universal and that, if effective, military measures would be unnecessary.

6. Co-operation of the nations to raise the standard of living of their several peoples and to assist in solving their pressing social problems as has already been undertaken through the International Labour Organization.

### **Machinery of negotiation for railway staffs in Great Britain.**

A memorandum of agreement concerning the machinery of negotiation for railway staffs in Great Britain has recently been published. The agreement is between the Great Western, London Midland and Scottish, London and North Eastern, and Southern Railway Companies of the one part, and the National Union of Railwaymen, the Associated Society of Locomotive Engineers and Firemen, and the Railway Clerks' Association, of the other part.

The machinery of negotiation applies to practically all grades coming within the National Agreements with the exception of salaried employees who are in a special class. The channels provided for negotiation are through local representatives, local departmental committees, national councils, a railway staff national council and a railway staff national tribunal.

Subjects for discussion or negotiation through this machinery include standard salaries, wages, hours of duty and other standard conditions of service within the scope of the National Agreements or subsequently listed by consent of the parties to this Agreement, or any proposal to vary a National Agreement, together with such other matters as fall within the functions of a Local Departmental Committee or a Sectional Council.

Questions of discipline and management are generally excluded except such matters as holiday arrangements, staff accommodation, etc., and suggestions as regards operating, working, and kindred subjects. Before any question can be dealt with under the machinery of negotiation, it must first be referred to the railway company concerned through the appropriate channels.

Included in the report of the British Ministry of Labour for 1934 is a review of the arrangements made for advising boys and girls as to choice of employment, and for placing them in employment. It also summarizes the Joint Report of the National Advisory Councils for Juvenile Employment on the organization and development of the vocational guidance service. A new body, the London Regional Council for Juvenile Employment was set up during the year, which covers a wider area than the former London Juvenile Advisory Council.

### **Courses for unemployed juveniles in Great Britain.**

The London Central Schools Employment Committee was also reconstituted during the year.

The Report describes the changes made in the law governing the provision of courses of instruction for unemployed juveniles by the 110 centres and 14 classes opened in 94 towns, as compared with 120 centres and 18 classes in 93 towns in 1933. The aggregate number of individuals who attended centres and classes during 1934 was 113,500, as compared with 101,600 in 1933. In addition, about 5,500 boys and girls attended existing educational institutions, in places where there were no junior instruction centres or classes.

#### **Amendment to National Industrial Recovery Act.**

A bill to amend Title I of the National Industrial Recovery Act has been introduced recently in the Senate of the United States.

The bill provides for the delegation of authority by Congress to the President and by him to the code authorities. Article 7a is restated to refer to the collective bargaining clauses as a statement of rights of employees rather than as "conditions" to a code, as originally phrased. The bill also contains a provision that an employee may sue for damages from his employer for wage and hour violations, with the employer paying the costs of the suit. There are other labour provisions, especially applicable to the "Limited" (mostly labour) codes which may be imposed if an industry does not submit a satisfactory code or cannot agree upon one among its members.

#### **Housing conditions in United States cities.**

Substandard housing conditions—overcrowding, houses in bad repair, and deficiencies in plumbing, lighting and heating facilities—are widespread in

United States cities according to an inventory made by the United States Bureau of Foreign and Domestic Commerce and published in the Monthly Labour Review of the United States Department of Labour. The study covered 2,633,135 dwelling units, in 64 cities. Nearly 40 per cent were occupied by their owners. More than 90 per cent were equipped with electricity for lighting and 69 per cent with gas for cooking. One outstanding feature of the study was the surprisingly large proportion of houses which were without sanitary plumbing, 23 per cent of the homes had no bath, and 17 per cent had no indoor toilet facilities. Nearly 59,000 houses were found to be unfit for habitation and yet over 70 per cent of these were occupied at the time of the survey.

#### **Progress of Child Labour Amendment in U.S.A.**

The history of the Child Labour Amendment to the United States constitution and the course of its ratification by State Legislatures has been outlined in previous issues of the LABOUR GAZETTE (June, 1934, page 497, and September, 1934, page 888). Before the Amendment can become effective it must be ratified by three-fourths of the States. The measure, which is merely an enabling Act, was considered necessary because two previous Federal Child Labour laws were declared unconstitutional by the Supreme Court of the United States. The present proposed Amendment was passed by Congress in 1924 and is as follows:—

Section 1. The Congress shall have power to limit, regulate, and prohibit the labour of persons under 18 years of age.

Section 2. The power of the several States is unimpaired by this article, except that the operation of State laws shall be suspended to the extent necessary to give effect to legislation enacted by the Congress.

According to recent information, the Amendment has now been ratified by 22 of the 48 states, Wyoming and Utah having given approval to it during the present year. It has also been sanctioned by one House in each of the Legislatures of Indiana and Nevada.

Child Labour has been temporarily abolished in the major industries of the United States under the NRA Codes but President Roosevelt has urged ratification of the Child Labour Amendment as the obvious method for making permanent the child labour provisions of the codes.

The death rate among unskilled workers is almost twice as high as that among other occupational groups in the United States, according to an analysis of a recent report of the United States Public Health Service which shows that the number of deaths for every 1,000 male workers varied from 7 in the professional group to 13 for unskilled workers. The death rate for unskilled workers was 50 per cent higher than the death rate for all other workers combined. As compared with every 100 deaths among unskilled workers in 1930, there were 53 among the professions, 56 among business managers, officials, and owners, 56 among clerks and other office workers, and 63 among skilled industrial workers.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**T**HREE applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

1. From employees of various coal mining companies in the Drumheller, Rosedale and Wayne Districts in Alberta. The dispute concerns the request of the employees for wage increases, 1,350 men, members of District 18, United Mine Workers of America, being directly affected. The question of recognition of the Union by two of the companies named in the application is also involved.

2. From employees of the Track Department of the Winnipeg Electric Company being members of the Winnipeg Electric Trackmen's Unit, One Big Union. It is stated that 75 employees are directly affected by the dispute, and 850 indirectly. The applicants claim that in laying off a certain employee, one H. Wroblosky, the Company violated the seniority clause of the existing agreement.

3. From employees of various coal operators in the Edmonton District in Alberta. Seven

hundred employees, members of District 18, United Mine Workers of America, are stated to be directly concerned in the dispute which grew out of the employees' request for wage increases and the adjustment of certain inequalities.

It was reported in the *LABOUR GAZETTE* for June, 1934, page 499, that two applications had been received in the Department from locomotive engineers and locomotive firemen, respectively, employed on Territory "C" District No. 1 of the Atlantic Region of the Canadian National Railways. Shortly after receipt of these applications a departmental officer visited New Glasgow and discussed the matter with the employees. Subsequently conferences were held in the offices of the Department of Labour at Ottawa with the leading officials in Canada of the two unions concerned. These officers agreed to visit Stellanor as early as convenient and to take up the points at issue with their local committees. As a result of their enquiry a new arrangement, covered by an agreement between each union and the Canadian National Railways, has been made effective.

### Final Report of Board in Dispute between Western Stevedore Company and Canadian National Railways and their Waterfront Freight Handlers at Fort William and Port Arthur

The Minister of Labour, on April 27, received the final report from the Board of Conciliation and Investigation established under the provisions of the Industrial Disputes Investigation Act to deal with two disputes as follows: (1) between the Western Stevedore Company, Limited, and certain of its employees at Fort William, Ontario, being truckers, stowers, loaders, sealers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; and (2) between the Canadian National Railways and the same class of employees at Port Arthur, Ontario, members also of the Brotherhood of Railway and Steamship Clerks. The dispute in each case related to the employees' demand for an agreement embodying increased wages, shorter hours, and improved working conditions, as well as their request that an officer of the Union be permitted to conduct negotiations on behalf of the employees. Three hundred and twenty men at Port Arthur, and 400 at Fort William were stated to be directly

affected. The Board was composed of the Honourable Mr. Justice R. M. Dennistoun of Winnipeg, chairman, appointed on the joint recommendation of the other Board members. Mr. Hamnett P. Hill, K.C., of Ottawa, appointed by the Minister in the absence of a recommendation from the employing companies, and Mr. Marcus Hyman, of Winnipeg, appointed on the recommendation of the employees concerned. On December 31 the Board presented a unanimous Interim Report (*LABOUR GAZETTE* January, 1935, page 8) stating that it had been agreed that the companies would negotiate with their own employees, who might have the advice and assistance of such men of wider experience than themselves as they might choose for the purpose. The Board then adjourned to allow these negotiations to proceed. The Final Report of the Board is signed by the chairman and Mr. Hyman, Mr. Hill submitting a Minority Report. The text of these reports is given below.

### Report of Board

IN THE MATTER of the *Industrial Disputes Investigation Act*, and of a dispute between *The Western Stevedore Company and The Canadian National Railways, (Employers); and certain of their employees, being truckers, stowers, loaders, sealers, etc., members of the International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, (Employees).*

Hon. Wesley A. Gordon, K.C., M.P.,

Minister of Labour,

Ottawa, Ont.

SIR,—We have the honour to submit final Report and Recommendations in respect of the above matter.

Pursuant to the Interim Report of the Board dated at Ottawa, January 3, 1935, there were further proceedings between the parties to the dispute, both at Fort William and Port Arthur, following which, we were advised on behalf of the employees, that there had been failure to agree upon some of the questions involved, although progress had been made on others. Proposals were submitted to the employees by the Canadian National Railways and the Western Stevedore Company, and on the basis of these and of the original proposals submitted on behalf of the employees, negotiations were conducted. Although there has been failure to agree, the inquiries of the Board have been narrowed to consideration of five questions. We are glad we were able to get the parties together in some measure, and trust that final consideration and action on this Report will bring about settlement of the entire controversy.

*Point 1.—Right to contract.* With regard to the question injected into the early proceedings by two organizations claiming the right to represent the employees, the Board is of the opinion that the right of these employees to select their organization should not be questioned. As a local group, the employees should have the right to a local agreement, until such time as they choose to associate themselves with employees elsewhere, under a wider contract.

The majority of organized employees should have the right to enter into contractual relations with their employers with the assistance of, and in the presence of, representatives of a *bona fide* labour organization of their choice, who may represent them in negotiations leading up to a contract, and afterwards in the carrying out of the details of that contract.

*Point 2.—Minimum Rate.* This involves the proposed payment of a fixed minimum to men who start work; secondly, payment of

a punitive rate after ten hours work. A review of the evidence and argument presented to the Board at its hearings shows that the payment of a minimum is general in connection with employees covered by agreements. The companies contend that local conditions as to arrival and departure of vessels are such as to make the adoption of such a clause difficult at these points. The Board's opinion is, that while conditions at the lakehead are somewhat different from those elsewhere, some regulation could be adopted to control the situation so as to prevent men from being worked the shorter periods of fifteen minutes to one hour, as has been the practice. It is recommended that the agreement provide a two-hour minimum payment to men who start work. With regard to the proposed payment of punitive overtime after ten hours work, this seems to be in accord with current practice, and its adoption is recommended. The Board recommend Day rates shall apply between the hours of 7:00 a.m. and 7:00 p.m.; Night rates between 7:00 p.m. and 7:00 a.m. Men started to work within these hours shall be paid the prevailing rate with a minimum of two hours. Men worked beyond ten hours shall be paid therefor at the rate of time and one-half time the prevailing rate until relieved. The ten-hour period may be part day work and part night work, the one being added to the other.

*Point 3.—Holidays.* On the question of punitive rates for holidays, the Board think that Remembrance Day and Civic Holiday should be recognized, as they are definitely determined to be legal holidays by Dominion legislation and City by-law; but this recommendation should not come into effect until these holidays are generally recognized in labour contracts.

*Point 4.—Rates of Pay.* The evidence shows that prior to the contracting of the work at Fort William and Port Arthur by the Canadian Pacific and Canadian National, in 1921, rates of pay were in line with, and in some instances exceeded, rates for similar work elsewhere. With the passing of control to contractors, rates of pay were reduced. There was no essential change in the character of the work. For several years, during which period they were unorganized, these employees received a much lower rate than that in effect at other points using waterfront facilities, where employees were organized and working under agreements with their employers. The proposals submitted by the employees seek to re-establish the "standard" rates of pay. Present rates are approximately 10 cents per hour less than standard, or, in

other words, less than the rates in effect at almost all points on the C.P.R. and C.N.R., including Vancouver, Montreal Wharf, West Saint John, N.B., and Halifax, N.S.

The Board recommend the following:—

	Rates of Pay	Per Hour
Checkers.. . . . .		52c.
Truckers—		
Day work.. . . . .		45c.
Night work.. . . . .		48c.
Assistant foremen.. . . . .		65c.
Stowers, coopers and loaders.. . . . .		48c.
Crane operators—		
Day.. . . . .		66c.
Night.. . . . .		68c.

All of these rates will be subject to the ten per cent cut operative from the 1st of May, 1935, in accordance with the agreement now in force—Exhibit 21.

It is recommended, further, that these changes be made effective April 15, 1935, this date being the approximate opening of navigation.

Point 5.—On the question of the application of the Industrial Disputes Act to the Western Stevedore Company, the Board report that the Act does apply to this company, for it operates an agency of transportation within the meaning of Sec. 2 (f) of the statute, as amplified by the Ontario Act, R.S.O. 1932, chapter 20, sec. 2.

Mr. Hyman is of opinion that full standard rates of pay should be inserted in this report, and that a day should be eight hours, but concurs in the above recommendations in order that this report may be effective.

It is not considered necessary to make separate reports for the Canadian National Railways and The Western Stevedore Company. The cases were heard together and this report will apply to both companies.

Dated the 24th day of April, 1935.

(Sgd.) R. M. Dennistoun,  
Chairman.

(Sgd.) Marcus Hyman.

Minority Report

OTTAWA, ONT., April 26, 1935.

Hon. WESLEY A. GORDON, K.C.,  
Minister of Labour,  
Ottawa, Canada.

SIR,—It is with regret that I find myself unable to agree with my colleagues on the Board to the extent that would enable us to make a unanimous report. In the following particulars my views are at variance with theirs.

1. Wages.

The evidence given before the Board establishes clearly that the employees at Fort William and Port Arthur are better paid than similar classes of labour are in the ports

of Toronto, Hamilton, Sarnia and Port McNicoll. A great deal of stress has been laid on the fact that dock labourers at sea ports are paid a higher scale than are the dock labourers at the lake ports. If the dock labourers are not paid a proper rate and an adjustment should be made, I am of the opinion that the entire scale covering all the lake ports should be dealt with at the same time. Either the labourers on the docks at Canadian sea ports are being paid too much or similar classes of labourers on the lake ports are being paid too little. This is a question which is not before the Board and for that reason I do not think that the scale of wages paid to dock labourers at the sea ports is a factor which should be considered in fixing wages to be paid to dock labourers at Fort William and Port Arthur.

I am also of the opinion that the wages paid to labour in railway freight sheds throughout the west is not a proper guide for this purpose either. Freight handlers in the sheds are experienced men who are required to have a greater knowledge of local shipping and shippers than the men working on the docks who for the most part are foreigners and many of whom are unable to read and write and whose work does not require any particular experience. They come within the category of unskilled labour.

The rates paid freight handlers at Toronto, Hamilton and Sarnia are as follows:—

Head stevedores.. . . .	\$135.00	per month
Shed foremen.. . . .	125.00	per month
Checkers.. . . .	95.00	per month
Porters.. . . .	.32½	per hour
Longshoremen.. . . .	.35	per hour

The above rates are the same for both day and night work and no overtime is paid for Sunday or holidays.

The rates paid for freight handlers at Port McNicoll are as follows:—

	Per hour
	cents
Shed checkers.. . . .	42
Shed porters.. . . .	37

The above rates are the same for both day and night work and no overtime is paid for Sundays or holidays. All the above figures are as shown on Exhibit 22 filed with the Board.

On the other hand as a result of the discussions before the Board the basic rates of pay now offered to the men by the employing companies at Fort William and Port Arthur are as follows:—

	DAY	NIGHT
	per hour	per hour
	cents	cents
Stevedores.. . . .	52	52
Checkers and Asst. Stevedores.. . . .	47	49
Sealers and coopers.. . . .	42	44
Porters.. . . .	40	42
Crane operators.. . . .	65	67

The above rates are to be subject to a deduction from May 1, 1935, amounting to 10 per cent. The companies also offered to pay the men time and a half if required to work on Sundays, New Year's Day, Good Friday, Victoria Day, Dominion Day, Christmas Day and Labour Day. There are very few men employed other than porters.

A perusal of the above figures will show that the men at Fort William and Port Arthur if the above offer be accepted will on the whole receive better pay than the labourers at any port on the Great Lakes. I, therefore, find myself unable to agree with the rates recommended by my colleagues, and recommend the acceptance of the companies' offer.

### 2. Minimum Wage.

My colleagues recommend that men who work for less than a two-hour period should be paid for two hours' work, in other words that two hours should be considered the minimum time for any man be paid. While I sympathize with the motive which prompts them to recommend this, yet to me it is an impractical suggestion. Passenger boats which are travelling on a schedule frequently do not remain in either Fort William or Port Arthur for more than twenty minutes. The desire of the Captain of the boat is to get away at the earliest possible moment. It is, therefore, necessary for the employing companies to put as many men to work as possible to remove the freight. If it would be feasible to utilize less men and to take a longer time to take the freight off the boat, the proposal of my colleagues would be a reasonable one, but under the circum-

stances it is one which would be impossible to put into practice. The companies themselves are only employed in a temporary capacity by the shipping companies and they in turn must employ men in a temporary manner.

### 3. Punitive Overtime.

My colleagues have also recommended that the men should be paid at the rate of time and a half after ten hours' work. This practice is not in effect anywhere else on the Great Lakes, and, inasmuch as the companies contract with the shipping companies at the opening of the season to unload the boats on a tonnage basis, it would be impossible for them to enter into such contracts if men were to be paid time and a half after they have worked ten hours, as the cost would be unknown. Boats arrive at all hours of the day and night with different load capacities and the companies could not contract to remove or load the freight if their employees were being paid different wages dependent on the number of hours they work. I fully concur with my colleagues that men should not be required to work more than ten hours but if the men desire to do so then they should be entitled to do so but at the same scale of wages. Refusal to work after ten hours should not be a cause of dismissal. Where men are employed intermittently as they are at Port Arthur and Fort William, I consider that if they wish to work longer hours in order to increase their earnings, they should be permitted, but not forced, to do so.

I beg to remain,

Very faithfully yours,

(Sgd.) H. P. HILL.

## STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1935

THE following table shows the number of disputes, workers involved and time loss for April, 1935, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*Apr. 1935.....	11	2,952	14,900
*Mar. 1935.....	13	3,276	12,043 †
Apr. 1934.....	22	5,368	72,146

\* Preliminary figures. † Revised

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Dis-

putes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time is frequently not received until some time after its commencement.

The number of strikes and lockouts as well as the number of employees involved during April was slightly less than during March but the time loss in man working days was slightly greater than the corrected figure for March, 12,043 instead of 21,043. The numbers of disputes and workers involved were approximately half those for April last year, but the

time loss was much less. The strike of loggers in Vancouver Island accounted for two-thirds of the time loss for April, 1934. None of the disputes during April, 1935, involved large numbers of workers for prolonged periods.

Four disputes, involving 1,830 workers, were carried over from March and seven disputes commenced during April. Of these eleven disputes, nine terminated during the month, five resulting in favour of the workers involved, while compromise settlements were reached in four cases. At the end of April, therefore, there were two disputes in progress recorded as strikes or lockouts, namely: coal miners, Corbin, B.C., and compositors, Calgary, Alta.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to four such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; moulders, Peterborough, Ont., February 27, 1934, one employer; and hat factory workers, Montreal, P.Q., March 5, 1935, one employer.

The strike of compositors in two newspaper establishments at London, Ont., which commenced on March 1, 1934, to secure the renewal of union agreements (carried in the paragraph above since February, 1935), was declared terminated by the union on April 27. The negotiations mentioned in the April issue of the LABOUR GAZETTE resulted in a settlement under which the employers agreed to re-employ some of the strikers immediately and the others as soon as room could be made for them, wages, hours, etc., to be as before the strike, but without a signed agreement with the union.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A minor dispute involving the crew of one steamship for a short time at Vancouver, B.C., on March 30 has been reported, an agreement providing for increases in wages similar to those on other ships being signed.

A minor dispute involving the deck crew of one steamship for a few hours occurred on April 10 at Vancouver B.C. The owner engaged a non-union crew which the former crew induced to leave, being themselves re-employed.

A minor dispute involving carpenters, bricklayers and labourers engaged in the construc-

tion of houses in Forest Hill Village near Toronto, Ont., in the first week of April has been reported, wages for mechanics being raised from 25 cents per hour to 50 cents.

A strike of workers on sugar beet farms at Iron Springs, Alta., in the last week in April has been reported in the press but particulars have not been received. It is stated that the workers demanded an increase in wages from \$17 per acre to \$22.

Longshoremen at Vancouver, 627 in number, ceased work for one hour on April 29 as a demonstration of sympathy with relief camp workers who left the camps in British Columbia, demanding changes in conditions. Other classes of labour refused to join in the demonstration but it was reported that a number of members of ships' crews and a few bakers also left work for an hour.

A strike of halibut fishermen at Prince Rupert, B.C., from April 28 to May 2 has been reported in the press but particulars have not been received. The dispute was as to shares in the proceeds from the sale of halibut livers, as from the sale of the fish, and a satisfactory arrangement is reported to have been reached.

A strike of salmon fishermen on the west coast of Vancouver Island about April 20 has been reported in the press but particulars have not been received. It appears that only fishermen for the Seattle market were involved, United States fishermen for this market being also on strike for higher rates for fish.

Minor disputes involving waitresses in three restaurants in Winnipeg, Man., on April 15 and April 18 have been reported. The waitresses demanded payment of wages in accordance with the provincial minimum wage regulations. Their demands were conceded in two restaurants almost immediately. In the third the employer was prosecuted by the provincial authorities and fined, being also ordered by the court to pay the difference due to the waitresses. The restaurant is reported to have been closed.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement:—

**COAL MINERS, CORBIN, B.C.**—This strike which commenced January 21, 1935, the miners demanding reinstatement of one worker, and certain changes in conditions including repairs to houses, was not settled by the end of April. On April 17, when the company attempted to begin work at an open mine not operated in winter, a clash between pickets and police occurred, a number of each being injured and taken to hospitals. Fourteen of the pickets were arrested on charges of disturbing the peace and obstructing police officers and remanded for trial, one

## STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1935.\*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
(a) Strikes and Lockouts in progress prior to April, 1935.			
MINING, ETC.— Coal miners, Corbin, B.C.....	200	5,000 <sup>§</sup>	Commenced Jan. 2, 1935; against dismissal of worker and for certain changes in conditions; un-terminated.
MANUFACTURING— <i>Textiles, Clothing, etc.</i> — Millinery workers, Montreal, P.Q.....	1,400	1,400	Commenced Mar. 29, 1935; for renewal of agreement with increased wages, 40 hr. week and "closed shop"; terminated Apr. 1, 1935; in favour of workers.
<i>Other Wood Products</i> — Furniture factory workers, Chesley, Ont.....	200	700	Commenced Mar. 25, 1935; for reinstatement of union employees; terminated Apr. 4, 1935; in favour of workers.
<i>Printing and Publishing</i> — Compositors (printing), Cal- gary, Alta.....	30	750	Commenced Jan. 10, 1935; against decrease in wages; un-terminated.
(b) Strikes and Lockouts commencing during April, 1935.			
MANUFACTURING— <i>Textiles, Clothing, etc.</i> — Millinery workers, Toronto, Ont.....	600	2,400	Commenced Apr. 4, 1935; for union agreement; terminated Apr. 8, 1935; in favour of workers.
<i>Metal Products</i> — Foundry workers (moulders, etc.), Guelph, Ont.....	124	868 <sup>§</sup>	Commenced Apr. 10, 1935; for increased wages and union recognition; terminated Apr. 17, 1935; compromise.
Automobile factory workers, Tilbury, Ont.....	150	450	Commenced Apr. 12, 1935; for increased wages; terminated Apr. 16, 1935; compromise.
CONSTRUCTION— <i>Buildings and Structures</i> — Carpenters and labourers, Charlottetown, P.E.I.....	11	100	Commenced Apr. 6, 1935; for union recognition; terminated Apr. 22, 1935; compromise.
Motor truck drivers, Winnipeg, Man.....	40	80	Commenced Apr. 16, 1935; for increased wages; terminated Apr. 17, 1935; compromise.
TRANSPORTATION— <i>Water</i> — Boom log workers, Vancouver, B.C.....	120	1,920	Commenced Apr. 5, 1935; for increased wages and recognition of union; terminated Apr. 24, 1935; in favour of workers.
Longshoremen, Vancouver, B.C.....	77	1,232	Commenced Apr. 5, 1935; in sympathy with boom log workers; terminated Apr. 24, 1935; in favour of workers.

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which working time was lost to an appreciable extent.

§Erroneously shown in April *Labour Gazette* as 14,000 instead of 5,000 for the month of March.

being released on bail. Following the failure of negotiations in February, carried on with the assistance of the western representative of the Department of Labour, the company had stated that the union would no longer be recognized as the miners had ceased work in violation of the agreement, terminating on March 31, and then had refused a settlement conceding their demands, seeking further concessions.

A delegation from the Union, introduced by the member of the provincial legislature for the locality, on April 23 requested the provincial government to appoint a commission to investigate the conduct of the police during the disturbance. This was refused and they were advised to apply for a Board under the federal Industrial Disputes Investigation Act. In this connection, the assistance of the western representative of the federal Department of Labour was requested. This not being possible on account of a dispute in Vancouver, the provincial Deputy Minister of Labour was assigned to consult both parties to the dispute. It was proposed that both parties should apply for a Board and mining should be resumed. The company offered to be bound by the recommendations of a Board if the miners would also agree to this. The union refused to agree to such an inquiry or to resume work pending the completion of an investigation. Early in May the company announced that the mines were being abandoned.

**MILLINERY WORKERS, MONTREAL, P.Q.**—As stated in the April issue of the *LABOUR GAZETTE*, a settlement with nearly all of the 35 employers involved had been reached by the union at the end of March, agreements to be signed providing for the forty hour week, "closed shop," and certain wage increases. On April 2 work was resumed, the strike being declared terminated.

**FURNITURE FACTORY WORKERS, CHESLEY, ONT.**—This dispute, involving employees in two establishments, the reinstatement of members of the United Brotherhood of Carpenters and Joiners being demanded, was terminated on April 5, as a result of mediation by the members of the town council. The employers agreed to take back all employees without discrimination and to adjust hours so as to give employment to as many as possible.

**MILLINERY WORKERS, TORONTO, ONT.**—Employees in about thirty establishments ceased work on April 4, negotiations for an agreement between the employers and the Hatters, Cap and Millinery Workers International Union not having been successful on

all points in dispute. The union demanded the forty hour week and increases in wages. In a clash between strikers and "open shop" workers on April 6, two men were charged with assault, obstruction, etc., being released on bail. As a result of the mediation of officials of the provincial Department of Labour an agreement was reached on April 9, with all except two employers, the union demands being substantially conceded. The agreement is summarized elsewhere in this issue.

**MOULDERS, ETC., GUELPH, ONT.**—Employees in one establishment ceased work at closing time on April 9 demanding increases in wages from 20 cents to 30 cents per hour to 35 to 45 cents per hour and recognition of the Steel and Metal Workers' Industrial Union. As a result of the mediation of an official of the provincial Department of Labour a settlement was reached and work resumed on April 18, wages being increased 25 per cent to 35 per cent, the minimum for labourers being 29 cents per hour and for moulders \$3.75 per day of nine hours. The employer agreed to recognize a shop committee but not the union. The agreement terminating the dispute is summarized elsewhere in this issue.

**AUTOMOBILE FACTORY WORKERS, TILBURY, ONT.**—Employees in one establishment ceased work on April 12 demanding an increase in wages of ten cents per hour. Work was resumed on April 16, the employer having undertaken to investigate as to wages and cost of living in other automobile manufacturing localities and ascertain what increases in wages would be justified.

**CARPENTERS AND LABOURERS, CHARLOTTETOWN, P.E.I.**—Carpenters employed by one contractor ceased work on April 6, their demand for recognition of the union, and also the union scale of wages on completion of the current job, being refused. Labourers put at carpenters' work were called out by the labourers' union. The work on one job was finished on April 11 by other employees and the dispute was settled and work resumed by union men on another job by April 22.

**MOTOR TRUCK DRIVERS, WINNIPEG, MAN.**—Drivers operating their own trucks on one construction job ceased work on April 16, demanding an increase in the rate per load from 55 cents to 75 cents. On the following day a compromise was reached at 65 cents and work was resumed.

**BOOM LOG WORKERS AND LONGSHOREMEN, VANCOUVER, B.C.**—Employees of five companies exporting logs ceased work on April 5,

1935, demanding recognition of the union and increases in wages. A rate of 55 cents per hour had been verbally agreed upon for the month of April, a scale to be negotiated later. A brief cessation of work on April 1 apparently occurred. Union recognition was refused by most of the employers. Following the alleged discharge of certain men for union activity the workers demanded union recognition, no discrimination, a minimum rate of 65 cents per hour for boom-men, filers, barkers and mechanics, and 75 cents for sawyers, graders and boatmen, time and one-half for overtime, double time on Sundays and legal holidays and the elimination of contracts, a strike being declared. Longshore-

men refused to load on boats the logs of the employers affected. A number of ships left port without full cargoes and others remained in port. The western representative of the Department, being then in Calgary, at the request of the employers returned to Vancouver to mediate. Finally a settlement was reached, work being resumed on April 25. The agreement between the union and four of the employers, substantially conceding the demands of the strikers is summarized elsewhere in this issue. It was reported that the remaining employer, not a member of the employers' association, had no work in progress. The sympathetic strike of longshoremen was also terminated.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, in the review of Strikes and Lockouts in Canada and Other Countries, 1934. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in March was 54 and 14 were still in effect from the previous month, making a total of 68 disputes in progress during the month, involving 27,100 workers, with a time loss of 177,000 working days for the month. Of the 54 disputes beginning in March, 7 were over demands for advances in wages, 5 over proposed wage reductions, 16 over other wage questions, 2 over questions respecting working hours, 12 over questions respecting the employment of particular classes or persons, 2 over other questions respecting working arrangements, 6 over questions of trade union recognition and one over other questions; 3 disputes were due to sympathetic action. Settlements were reached during the month in 42 disputes, of which 14

were settled in favour of workers, 12 in favour of employers, 16 resulted in compromises; in 6 other disputes, work was resumed pending negotiations.

A dispute involving 1,600 coal miners at Treherbert, Rhondda, began March 22 over a demand for extra pay for certain workers working in water; work was resumed April 13. Another coal mining dispute at Blaenavon, Monmouthshire, began March 25, against the dismissal of certain older workers and no settlement had been made at the beginning of April. Two thousand miners were involved in this dispute.

At Edinburgh, 2,700 workers in the rubber industry were involved in a dispute which began March 7, against a change in the system of payment. On April 11, it was agreed to resume work and refer the question to arbitration.

### Australia

The number of disputes in existence in the year 1934 was 154, involving 1,060 establishments and directly involving 46,899 workers. The total time loss for the year was 370,386 working days and the estimated loss in wages £317,859.

### Czechoslovakia

The number of disputes reported for the year 1933 was 209, involving 507 establishments and 32,793 workers, with a time loss of 265,136 working days.

### United States

Preliminary figures for the year 1934 show 1,607 disputes beginning in the year and 30 carried over from the previous year, making a total of 1,637 disputes in progress during the

year, involving 1,337,000 workers, with a time loss of 18,666,000 working days.

The number of disputes beginning in January, 1935, was 125 and 111 were still in progress from the previous month, making a total of 236 disputes in progress during the month, involving 99,000 workers with a time loss of 748,000 working days.

The strike of several thousand biscuit manufacturers' employees at New York City and Philadelphia, which began January 8, and was noted in the *LABOUR GAZETTE*, February, terminated April 28 when it was agreed to resume work at the same wage rates as paid prior to the strike.

A strike of 600 automobile factory workers at Toledo, Ohio, which began April 23, to se-

cure a closed shop and other demands, was followed by the closing of this factory which employed 2,300 workers, and later by a strike of 2,000 workers at Cincinnati, Ohio, also demanding an agreement between the company and the union. These strikes resulted in the closing down of automobile body manufacturing plants at Cleveland, Ohio, and at Janesville, Wisconsin, throwing an additional 9,000 workers out of employment on April 30 at Cleveland, and 2,600 at Janesville on May 1. By that date a total of 16,500 workers had thus become directly or indirectly involved.

About 7,000 workers in cleaning and dyeing establishments in New York City went out on strike April 23 to secure higher wage rates, closed shop and other demands.

### Employment, Hours and Earnings Under the N.R.A.

Employment, hours, earnings and production under the National Industrial Recovery Act are reviewed in a recent issue of the *Monthly Labour Review*, official publication of the United States Department of Labour. According to this review, it is stated that the most notable changes in the status of labour as indicated by the information collected and compiled by the Bureau of Labour Statistics are probably those connected with hours of labour and hourly earnings. In manufacturing industries average weekly hours declined about one-sixth (16.1 per cent) from June, 1933, to June, 1934, and in manufacturing industries and 13 non-manufacturing industries combined, about one-seventh (13.9 per cent). Average hourly earnings increased during the same period, in manufacturing industries, almost one-third (31.1 per cent); and in manufacturing industries and 13 non-manufacturing industries combined, almost one-fourth (23.7 per cent). Changes after June, 1934, were slight. On the basis of average weekly hours and average hourly earnings in manufacturing and 13 non-manufacturing industries combined, per capita weekly earnings show an increase from June, 1933, to June, 1934, of 6.5 per cent. On the basis of reports of employment and payrolls in manufacturing industries (these reports covering a larger proportion of establishments than in the case of average weekly hours and average hourly earnings) per capita weekly earnings during the same period show an increase in manufacturing industries of 13.4 per cent.

In manufacturing industries, employment in terms of number of workers increased from June, 1933, to June, 1934, more than one-fifth (21.1 per cent) and in terms of total man-hours, less than 2 per cent. Payrolls increased 37.3 per cent, although it should be noted that

earlier there had been a much more serious decline in weekly wage payments than in employment. The volume of output in terms of the Federal Reserve Board's index of production in manufactures declined 10 per cent, although, as pointed out, it is probable that the index for June, 1933, shows an unavoidable upward bias.

### Mothers' Allowances in Alberta

According to a recent press despatch the Alberta Legislature may consider the extension of the basis of payments of mothers' allowances to make provision for unemployed members of families coming under the Act.

During the discussion of the estimates for mothers' allowances it was stated that in 1934 there were 1,557 persons in the province receiving mothers' allowances. Of these, 226 were in Edmonton, 176 in Calgary, 38 in Lethbridge, 27 in Medicine Hat, 251 in improvement districts, 29 in towns, 131 in villages, 611 in municipal districts and 25 in unorganized districts. The average monthly cost last year was \$38,135.

During the year, there were 240 struck off the list for various reasons, such as marriage, leaving the province or other causes. The average amount per family paid last year was \$25.40, compared with \$26.35 in 1933, \$27.91 in 1932 and \$31.72 in 1931.

The appropriation passed for mothers' allowances was \$455,000, an increase of \$13,500 over the previous year. As the province is reimbursed to the extent of \$200,000 by the municipalities, the net cost to the province is estimated at \$255,000 for the 1935-36 fiscal year.

## CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

### Summary of Recent Decisions

**R**EPORTS have been received of two cases recently settled by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the *LABOUR GAZETTE*, March, 1935, page 230, and in previous issues.

The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925 (the date of the inception of the Board), to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "Clerks and other Classes of Employees as herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to re-appointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made, in the agreement constituting the Board, for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award.

#### Case No. 154—Dining Car Employees, Toronto.

This case centered about the claim of certain Dining Car employees, for additional layover at home terminal on account of being forced to perform extra service, such extra service being occasioned by an emergency situation resulting from the damaging of a Pullman club car, and the attendant delay in making repairs.

The case was heard on September 18, 1934, at which time both parties submitted oral evidence in support of their respective contentions. It was the opinion of the Board that in view of the long continued emergency some consideration should be given to allowing compensation to the employees for the extra work performed between Toronto and London, i.e.,

serving meals instead of deadheading and additional work at London in cleaning cars, which additional work shortened their usual rest period, and the case was referred back to the parties with a recommendation that an endeavour be made to reach a settlement on that basis. On it being reported that the Railway had made an offer to settle the matter on a straight time basis, the Board decided that payment as offered by the Department should, under the circumstances, be accepted and the claim settled accordingly.

#### Case No. 169—Operating Department, Western Region.

This case resulted from the claim of a swing yard clerk and relief weighmaster for pay at day yardmaster's rate.

The employees contended that up to June 1, 1934, a day yardmaster was employed at Edson, but effective that date the position was abolished per the Assistant Superintendent's bulletin dated May 29, 1934, and the weighmaster and the relief weighmaster were required to perform the duties of the day yardmaster. The bulletin stated specifically that the yard foremen would be governed by instructions issued by the weighmaster and the relief weighmaster.

Claim was made by a swing yard clerk and relief weighmaster for pay at the day yardmaster's rate for each day he was assigned to perform the day yardmaster's duties and assume those responsibilities, but same was declined.

The employees further contended that under Article 11, Rule (b) of the schedule for "Clerks and Other Classes of Employees," the claimant was entitled to pay at the day yardmaster's rate for the time he was assigned to perform day yardmaster's duties and assume such responsibility each week.

The railway's contention was that the claimant is employed as a swing yard clerk at Edson, Alta., and relieves weighmaster one day per week. He was not assigned to position of day yardmaster, nor has he at any time been instructed to assume such responsibilities. His duties consist only of those regularly performed by yard clerks at Edson, and he has at all times been properly compensated for his services.

The railway had no representative at the hearing, while Mr. McGregor appeared for the employees and submitted oral evidence.

The claim of the employees was denied.

## REPORT OF ROYAL COMMISSION ON PRICE SPREADS

### Recommendations Concerning Labour and Wages and Combines Investigation Act

THE Royal Commission on Price Spreads submitted its report to Parliament on April 12. This body was originally appointed on February 21, 1934, as a Special Select Committee of the House of Commons to inquire into.

"the causes of the large spread between the prices received for commodities by the producer thereof, and the price paid by the consumers thereof; and the system of distribution in Canada of farm and other natural products, as well as manufactured products. . ."

When the Committee was unable to complete its inquiry before the prorogation of Parliament, the members were constituted a commission under the Inquiries Act by Order in Council of July 7, 1934. Then, on November 19, a second Order in Council clarified the scope of the inquiry and authorized the Commission to continue the investigation, and report on all matters referred to the Committee by the resolution of the House of Commons.

The nature and extent of the inquiry is indicated by the following chapter headings of its report, viz. The Economic Background; Concentration and the Corporate System of Business; Industry; Labour and Wages; The Primary Producer; Distribution; The Consumer; The Problem of State Control. The entire report, with detailed review of evidence, recommendations, and summaries, together with a minority report covers over 500 pages. Only the sections relating to Labour and Wages and the Combines Investigation Act are outlined here.

#### Labour and Wages

The chapter on "Labour and Wages" points out "that the problems of labour and wages are simply one aspect of the more general problem of economic organization and policy. It stresses the social and economic significance of labour's welfare, mentions the theoretical considerations that explain some of the abuses revealed by the evidence, summarizes very briefly the present status of the wage-earner in the industries investigated, and proposes certain remedial measures." Underlying these detailed proposals is the recognition of two general considerations that we should like here to emphasize:

a. the need for greater uniformity in Canadian labour conditions, labour legislation, and labour law administration;

b. the need for continuous study of the problems involved. These cannot be solved by any single act of legislation. Their treat-

ment calls for flexibility both in the determination of minor matters of policy and in continuous day-to-day administration.

The terms of reference of the Commission specifically commanded the investigation of—  
 "... the labour conditions prevailing in industries supplying the requirements of such chain and department store organizations, and the extent, if any, to which existing conditions have been brought about by the purchasing practices of such organizations, and the effect thereof upon the standard of living of those employed in such industries and organizations."

"Labour conditions and standards of living in particular employments and places, however, are relative matters. They are relative not only to prevailing conditions and standards in other occupations and localities, but also to currently accepted notions or ideals of social decency or justice. They should be considered, also, in relation to the general problem of economic organization."

Outlining the social significance and theoretical position of the wage earner, it is pointed out that two-thirds (2,565,000) of the total working population of Canada (3,923,000) are wage earners; that if agriculture, in which over a million are engaged chiefly as proprietors, were eliminated, the proportion would be raised to nearly five-sixths; and that these figures emphasize the predominant part played by the wage earner in Canada's total production, and the extent to which the welfare of the country as a whole is associated with that of the wage-earning population.

Referring to the influence of labour legislation, particularly in the establishment of minimum standards the report makes the following observation:

"For the protection of the worker and of the fair employer against unfair competition, and for the protection of the state and society generally, most governments have found it necessary to set by law minimum standards of employment terms and conditions. These may not be able, without limit, to improve the conditions of all labour but, if wisely drafted, they are demonstrably able to set a bottom level below which unrestrained economic and other forces may not push labour."

Evidence was heard on labour conditions in the following industries: clothing, boots and shoes, furniture, baking and flour milling, meat packing, fruit and vegetable canning, tobacco, farm implements, rubber and textiles, and in retail distribution through department and chain stores.

On the basis of the Commission's findings as to conditions in these and other industries, certain recommendations were made. Some of these would involve legislative action by the Dominion Parliament and the provincial Legislatures; others merely affect the enforcement of existing statutes and the further development of the Dominion and Provincial Departments of Labour.

#### SUMMARY OF RECOMMENDATIONS

The Commission's summary of its major recommendations on labour and wages was as follows:

1. More complete organization of industry into employers' and trade associations. More adequate general statistical work and more intensive research into personnel problems. Collective bargaining by trade unions and associations.

2. More complete organization of workers into trade unions. More adequate recognition of trade unions by governments and employers.

3. More adequate appropriations, larger and better staffs for labour law administration, both Dominion and provincial.

4. Improved provincial minimum wage laws with—

1. enforcement and inspection.
2. increased penalties for violation.
3. minimum wage boards, having the power to order restitution of any deficiency in wage payment.
4. no general exemptions to firms for any reason.
5. no "80 per cent clause."
6. no "averaging."
7. rigorous definition of "inexperienced workers," and definite restriction of the proportion of them to the total force in any factory.
8. a careful reconsideration of regional differentials, if any, in the legal minimum wage set.
9. minimum wage laws for men, and
10. non-partisan administrative personnel.

5. Hours of Labour laws.

1. Administered by the minimum wage or other appropriate authority, which should determine both the hours for which the minimum wage is payable and the maximum hours which may legally be worked.
2. Maximum hours of labour for men.
3. Reduction in the standard hours of labour which should certainly not exceed 44 hours per week as a maximum.
4. Flexibility in the administration of such laws permitting long hours when necessary, with time-and-a-half and double-time for overtime.

6. Employment Records.

Legal requirement that every employer keep, in either French or English, a complete set of employment records.

7. The extension of collective labour agreements by law, provided:

1. that there must be no impairment of the right to strike.
2. that the agreement is genuinely representative of the recognized interests of a majority of the workers in the industry.
3. that the law be not used as a method of crystallizing low wage rates, and
4. that the law must protect the public interest against the possible danger of monopolistic combination of employers and workers.

8. Amendment to the Criminal Code to make certain undesirable industrial relations practices indictable offences.

9. Amendment of the Fair Wages and Eight Hour Day Act, 1930.

1. to cover all Dominion contracts, direct or indirect.
2. to authorize the Department of Labour to determine and define "fair wages and conditions" in the occupations and industries affected, and
3. to restrict the bidding on public contracts to a "white list" of eligible bidders.

10. Industrial disputes investigation.

The I.D.A. or the Inquiries Act should be amended, if necessary, and utilized to bring within the scope of the public investigation a wider range of industries, but without restriction of the right to strike.

11. More and better labour statistics.

12. Division of Research, Standards and Services.

The creation in the federal Department of Labour of an entirely new division under thoroughly competent supervision, adequately staffed and financed, for the following purposes:

1. General research into industrial relations.
2. The provision of information, advice, and service to provincial departments of labour, employers and workers.
3. The drafting of model labour statutes with explanatory memoranda for legislative committees, etc.
4. The planning and management of Dominion-Provincial Conferences on matters such as International Labour Conventions, or uniform provincial labour laws.

13. National regulations of employment conditions preferably by Dominion legislation, if feasible, or, alternatively by interprovincial co-operation.

1. Thorough exploration of the constitutional possibility of the enactment of Dominion labour legislation.
2. If such legislation is now precluded by insuperable constitutional obstacles, the necessary amendment of the B.N.A. Act.
3. The creation of an unpaid, permanent, representative, rotating and non-partisan, Advisory Council to the Dominion Minister of Labour, for the following purposes:
  - a. To work out the general principles and procedure of effecting the necessary readjustments after the Dominion legislation is enacted.
  - b. To plan for decentralized but uniformly efficient administration, through provincial Departments of Labour if possible.

- c. Regardless of the enactment of Dominion labour legislation generally to encourage and promote public understanding of the problems of labour relations, legislation and administration.
  - d. And for such other purposes as the Governor in Council or minister may determine.
4. Pending the settlement of the constitutional question of Dominion or provincial competence, annual convocation of a Dominion-Provincial Labour Conference to consider:
- a. Methods of harmonizing provincial labour legislation.
  - b. The implementing of International Labour Draft Conventions.

The agenda for such Dominion-Provincial Labour Conferences and all memoranda should be drafted and circulated by the proposed Division of Service and Standards of the Dominion Department of Labour.

### The Combines Investigation Act

The Commission recommended the rigorous enforcement of the Combines Investigation Act and submitted proposals designed to extend the scope of and strengthen the Act. It advocated the formation of a Federal Trade and Industry Commission which would be charged with the general administration of the Combines Investigation Act and which would be given further and distinct powers for the comprehensive regulation of trade and industry, including the regulation of new security issues. One member wrote a dissenting report, and three others signed the majority report but with certain reservations. The Commission's review of the present Act and its administration included the following:

"Federal control of monopolies and monopolistic combinations in Canada is provided for by the Combines Investigation Act of 1923 and Section 498 of the Criminal Code. The latter condemns the undue lessening of competition, and action under it has been taken against monopolistic associations rather than against monopolies. The Combines Investigation Act can be used against single company monopolies as well as against combinations if they have operated or are likely to operate against the public interest. It authorizes investigation, publicity and, if necessary, punishment. The penalties include fine or imprisonment, reduction or removal of duties and revocation of patents. The effect of the statute in restraining detrimental monopolies and combines cannot, however, be measured by the number of investigations, published reports or prosecutions.

"Most of the investigations under the Combines Investigation Act are made as the result of complaints from the public—usually from primary producers, competitors, or consumers. Complaints against single firm monopolies have been few. Public concern has been voiced chiefly against agreements of competitors to fix and enhance prices, and investigations made under the Act have related more frequently to this type of combination than to monopoly. Some of the methods of joint control of price

which have been reported against and which the courts have subsequently condemned have been indicated above. The only finding which was reversed by the courts related to a monopoly, the Famous Players Corporation, in the motion picture industry. Findings supporting the charge of monopolistic practices or agreements were reported also in other cases, including Western fruit, radio tubes, and British anthracite coal, though, in the latter, agreements to lessen competition of other products figured largely in the result. No special measures however have been taken under the Combines Investigation Act for the supervision and control of corporations which have become effective monopolies. While removal of monopoly powers may be the appropriate remedy in most cases there may be instances where regulative measures would be a desirable addition to the present method of investigation, publicity and penalty. . . .

"Many proposals for additional changes to the Combines Act are based on a complete misunderstanding of the intent, purpose, and language of the Act, which does not at present prohibit any combination which is likely to operate in the interests of the public. Some of these proposals are based on a belief in the desirability of combinations to maintain prices and restrict output. Others seem to imply a desire on the part of manufacturers and distributors to make the consumer pay the cost of their efforts to cure what they regard as competitive wastes in their lines of business. The adoption of such proposals as these would, however, accentuate one of the major evils for the investigation of which this Commission was appointed, namely, that of the spread in prices between what the consumer pays and what the producer receives.

"If repeal or modification of the Combines Act had the effect of legalizing attempts to restrain price-cutting by schemes of price-fixing or resale price maintenance, the tendency would be to set prices assuring 'fair' margins of profit to all distributors. These margins might be sufficiently large to permit a 'fair' profit for the high cost or inefficient operator. This would increase price spreads and the costs of production and manufacture. Even if we admit all the alleged wastes and inefficiencies of competition, any general substitution therefor of private monopoly, without some effective regulation based on experience and slow growth, would further unbalance our economic structure."

### *Recommendations relating to the Combines Investigation Act*

On the duties of the proposed new administrative body, the Commission's recommendations included the following:

"We therefore make, in this particular connection, the following specific recommendations:

- (a) Rigorous administration of the Combines Act;
- (b) Sanction and regulation of monopoly where it is agreed by the government that competition cannot or should not be restored;
- (c) Sanction and supervision of agreements within a trade or industry where it is agreed by the government that competition has become wasteful and demoralizing.

"We regard the first, a rigorous enforcement of the Combines Act, as most important. We

feel that, for this purpose, the Act should be administered by the proposed Commission. The Act does not by its terms, or by the manner of its present enforcement, hamper any combination that would operate in the public interest, and, in the light of our previous discussion, we consider it should be an integral and important part of any new mechanism of control, though some amendments may be necessary to the present provisions of the Act, and some change of emphasis in its administration. We feel that its administration has been concerned primarily with combinations and agreements and not sufficiently with single company monopolies which may not involve these elements. This defect might be remedied by the Commission developing the use of the Combines Act against monopolistic domination as well as monopolistic combination. For this purpose, the Combines Act should be amended to include a more comprehensive definition of monopolies or monopolistic practices. These situations and practices arise when the number of competitors is so small that the decisions of individual firms are able significantly to affect the total output of the industry or the market price of the product.

"In any such monopolistic situation the Commission should first exercise the full force of the Combines Act to restore competition. It should explore thoroughly the possible effectiveness of sections 23 and 24 of the Combines Act, which authorize, respectively, the reduction of tariff duties and the revocation of patents, when it appears that these have facilitated the development of monopolies inimical to the public interest."

The minority group of three members expressed general agreement with the recommendations relating to the establishment of a Federal Trade and Industry Commission, but dissented from recommendation (c) above, on the ground that it would permit a formerly competitive trade or industry to secure control of prices and would encourage by law the "very conditions of monopoly which have led to so much difficulty." This group made reservations also with respect to recommendation (b) and urged that

"no industry should be declared a monopoly unless all attempts to restore competition and make it a competitive industry have failed and unless it is clear that all such attempts are likely to fail. It is only in these instances, which we hope will be very rare, that the Commission should recommend that the industry be declared a monopoly and subject to regulation as such. It should be realized that to declare an industry to be monopolistic in character, and therefore subject to Commission regulation, is to make an exception to the rules that competition alone should be the regulating factor. As our whole competitive economy is based upon the desirability and reality of competition between the industries responsible for the bulk of the production and business of the country, no industry should be enabled by application to the Commission to change its status and thereby qualify itself for exceptional treatment, which in some instances might possibly be of advantage to it, without solemn sanction by some governing body or institution. The majority report recommends that this governing body or institution should be the Governor in Council; we think it should be Parliament itself."

The Price Spreads Commission included in the annexes to its report a summary of legislation of principal industrial nations relating to trade combinations; also a report of a Committee of the Canadian Manufacturers Association recommending certain amendments to the Combines Investigation Act, and a memorandum commenting on these proposals.

The complete report, priced at one dollar, may be obtained from the King's Printer, Ottawa.

### Accident Prevention in Quebec

Featuring the annual conference of the Quebec Association for the Prevention of Industrial Accidents was the safety exhibit of the latest methods and devices put into practice for the prevention of accidents in industry. The safety exhibit was officially opened by Hon. E. L. Patenaude, Lieutenant-Governor who paid tribute to the work of the association. It was estimated that over 2,000 were in attendance at the various technical sessions.

Mr. Arthur Gaboury, general manager of the association, reported that 10,000 plants throughout the province had been visited by representatives of the association and 5,000 industrial accidents had been investigated. He reported that some 770 employers failed to report their operations to the Workmen's Compensation Commission, and that the total payroll of such non-reporting employers was over \$4,500,000. During the year, almost 800 safety committees had been organized throughout the province and the educational department had conducted weekly radio talks, safety rallies and moving picture demonstrations. Some 350,000 posters had been distributed in the past year, 80,000 copies of the official organ had been sent out, while 175,000 circulars and 43,000 leaflets had been printed and distributed.

Mr. Tom Moore, president of the Trades and Labour Congress of Canada who was a guest speaker, emphasized that accidents had increased recently by workers returning to industry after long periods of unemployment. He pointed out that such men, who had been skilled workers, had "lost their dexterity and safety sense."

Passage of the Byrne-Killigrew bill to establish a system of unemployment insurance in New York State brings the number of States having such laws to four. Wisconsin enacted an unemployment reserve system in 1932 (LABOUR GAZETTE, March, 1932, page 323) and Utah and Wyoming passed such measures earlier this year.

## ECONOMIC COUNCIL OF CANADA ACT, 1935

### Text of Legislation Providing for Establishment of Advisory Body

IN pursuance of the Government's program, legislation providing for the establishment of an Economic Council for Canada was adopted by Parliament, and given Royal Assent on April 17. An outline of the intent and purposes of this enactment was given in the House of Commons by the Rt. Hon. Sir George H. Perley, acting for the Prime Minister (LABOUR GAZETTE, April, 1935, page 309).

The following is the text of the Act:

25-26 GEORGE V

#### CHAPTER 19

An Act to establish an Economic Council

His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:—

1. This Act may be cited as *The Economic Council of Canada Act, 1935*.

2. Unless the context otherwise requires,—

(a) "Chairman" means the Chairman of the Economic Council of Canada;

(b) "Council" means the Economic Council established under this Act;

(c) "Minister" means the member of the King's Privy Council for Canada holding the recognized position of first minister.

3. There shall be an Honorary Advisory Council on social and economic questions which shall be known as The Economic Council of Canada.

4. (1) The Council shall consist of the Minister, who shall be the Chairman, and fifteen members who shall be appointed by the Governor in Council.

(2) The members of the Council shall be selected from,—

(a) officers of the public service of Canada, not exceeding seven in number, whose administrative duties require consideration of social or economic problems;

(b) representatives of organized bodies of a social or economic character, not exceeding five in number;

(c) other persons having special experience or knowledge in connection with social or economic problems, not exceeding three in number.

(3) No fees or emoluments of any kind shall be payable to or received by any member of the Council in connection with services rendered as such member, but members shall be paid actual travelling and living expenses necessarily incurred in connection with the business of the Council.

5. (1) The Dominion Statistician shall be the Secretary of the Council.

(2) The Governor in Council may authorize the appointment, pursuant to the *Civil Service Act*, of such officers and clerks as may be deemed necessary.

(3) The Council may, notwithstanding the provisions of the *Civil Service Act* but subject to the approval of the Governor in Council, temporarily employ such assistants as are necessary in connection with any special work or investigation, and the remuneration or ex-

penses of such assistants may, on the certificate of the Secretary, be paid out of moneys appropriated by Parliament for the work of the Council.

6. The duties of the Council shall be to discharge such duties of an advisory character as the Chairman may request them to undertake and particularly, without limiting the generality of the foregoing,

(a) to study, investigate, report and advise upon questions relating to the general trend of social or economic conditions or to any social or economic problem of Canada, and to authorize the investigations in that behalf as hereinafter provided;

(b) to make recommendations to promote and co-ordinate social and economic research within Canada;

(c) to make recommendations to co-ordinate the activities of a social or economic character of the several departments of the Government of Canada;

(d) to make recommendations as to the organization of statistics as the basic data required for social and economic investigations;

(e) to publish such reports and findings as may be considered to be in the public interest.

7. The Council shall meet at least twice a year or oftener as may be decided by the Chairman.

8. The Dominion Statistician shall undertake any special statistical investigation under the *Statistics Act* which the Council requires, and the provisions of the *Statistics Act* shall apply in any such case as if the investigations were had under that Act.

9. The Council may set up committees in connection with any questions referred to it and may add to any such committees persons who are not members of the Council, and persons so added to a committee shall be regarded as associate members of the Council for the purpose of the reference in question.

10. The Governor in Council may make regulations governing the procedure of the Council and other matters connected with the proper administration of this Act.

11. The Secretary shall prepare an annual report to the Minister with regard to the work and findings of the Council during the preceding year, which report shall be tabled in the House of Commons.

12. Moneys appropriated by Parliament for the purposes of the Council shall be expended under the direction of the Minister and all such expenditure shall be subject to audit by the Auditor General.

The recent movement to apply the provisions of the Dominion Old Age Pensions Act to blind people over 40 years of age (LABOUR GAZETTE, February, 1935, page 100; March, 1935, page 304; and April, 1935, page 312) gained support in the Ontario Legislature which passed a resolution urging such action.

## RECOMMENDATIONS OF FEDERAL COMMITTEE ON HOUSING

**T**HE Special Parliamentary Committee on Housing, which was appointed on February 18 on motion of the Prime Minister to consider and report upon the inauguration of a national policy of house building (LABOUR GAZETTE, March, 1935, page 223), has made its third and final report, presenting its recommendations.

As a result of the data adduced from a mass of evidence upon the sociological and economic principles involved, the Committee has arrived at certain basic conclusions regarding adequate housing. At the outset, it defines the scope of the problem as follows:

"Comprehensive housing and town planning rests upon a biological basis. The problem of town planning, which includes housing, is to create a condition of environment in which human life can thrive. Anything short of that gives deterioration and degradation of the human element and all the social and political ills that generally follow and accompany these processes. It is a problem having to do with the maintenance of human life and its enhancement, by providing proper physical environment."

Dealing with existing conditions and basic requirements, the report states the situation thus:—

"The 'white-collar' wage earners, with incomes at about \$1,250 can, in general, afford one-third of their incomes for rental, but the semi-skilled factory worker and the unskilled labourer with incomes from \$550 to \$750 cannot, as a matter of social economics, afford to pay more than one-fifth of their incomes for rent.

"Many people own houses for renting but do not wish to rent them at such figures, and, as a result, there is difficulty in finding proper accommodation. The trouble is that there never was accommodation designed objectively for the low wage earner.

"The prevailing opinion would seem to be that the community as a whole has some responsibility for the housing of its people.

"There will always be a large number of people who cannot afford to purchase a home, and it becomes the business of some agency, municipal, provincial or federal, to see to it that a sufficient number of suitable and sanitary dwellings are available for rent."

According to the evidence, the basic housing shortage "lies in the needs of the low wage earner for whom the minimum of health and amenity should be provided on a basis of rental within his capacity to pay."

It was pointed out that to "meet this requirement, such housing must provide pro-

tection from the weather, adequate lighting and ventilation, be capable of being properly heated; be equipped with sanitary conveniences and drainage and be furnished with such facilities as make the amenities of family life sufficient, convenient and hygienic."

The normal family requirements were predicated upon dwelling units having three bedrooms, living-room, kitchen and bathroom with lesser accommodation where the family unit does not involve children.

Mass production in order to obtain low unit cost, was regarded as essential to economical construction, the houses to be built in accordance with "established sound town planning theories," governing accessibility, zoning, number to the acre and other factors. Strict control in construction and maintenance was also regarded as of first importance.

The evidence submitted emphasized a number of major considerations, which were enumerated as follows:

The term "housing" should be considered to include construction, reconstruction, repairs (rehabilitation), demolition of houses and slum clearance.

2. Housing is primarily the direct responsibility of the individual co-operating with the local authority.

3. A national emergency will soon develop unless the building of dwellings be greatly increased.

4. The formulation, institution and pursuit of a policy of adequate housing should be accepted as a social responsibility.

5. There is no apparent prospect of the low rental housing need being met through unaided private enterprise, building for profit.

6. The magnitude of the task involved in any program designed to eliminate in its entirety the housing problem in Canada is fully realized and appreciated; that such a program would involve intensive, continuous application and effort over a period of years is manifest; but that the initiation of such is imperative is obvious from even the necessarily limited inquiry into prevailing housing conditions in which it has been your Committee's privilege to engage.

7. The accurate determination of the number of houses required to meet the needs of the people, annual and accumulative, and to overtake existing shortage, must necessarily be the subject of intensive direct and statistical investigation. At least the provision of dwelling units to the number of 25,000 should be initiated immediately throughout Canada.

8. Selective tenancy of Government aided housing should be based on total family income and ability to pay economic rent.

9. The acuteness of the housing problem lessens to the degree that the wage scales of low wage earners is improved.

10. Provision should be made for long term mortgages, in view of the long term amortization generally associated with housing.

11. A major item in the financing of housing is interest charges. There is, therefore, a close

and vital relationship between interest charges and economic rents.

12. That the principle and institution of mortgage banks, as established in other countries, be investigated with a view to their effect upon the lowering of housing costs.

13. That slum areas have been shown to cast very heavy expenses on many branches of public administration such as health, welfare, fire prevention, administration of justice, etc., may justify public assistance, which is likely to prove as sound financially as it is certainly desirable socially.

14. Against public liabilities may be set certain very real, if in some cases, immeasurable, assets. Good housing means less expenditure on prevention of disease, less crime, greater benefits for education, less unemployment as opposed to unemployment. The elimination of bad conditions has a cash value as well as a moral value to the nation. Further, there are wider economic aspects to consider. Bold and constructive housing projects will increase employment both directly and indirectly through the activity generated. To mitigate any liabilities on the national finances the cost of unemployment would be directly reduced, tangible and needed assets will be created, the yield of sales and income taxes will be increased by the profits of those in building and industry as well as those who benefit from the increased spending power of wage earners employed through the undertaking.

15. Reference made in this report to the low monthly rental possible of payment by low wage earners should not be accepted in any way as indicative of the setting of any wage scale. Government assisted housing should not be

taken advantage of to reduce the standard of living.

16. That the initiation of a policy of new construction and particularly of repairs (rehabilitation) will appreciably stimulate private owners to do likewise, will also proportionately release for demolition slum buildings presently retained for want of other accommodation.

17. The construction industry lends itself most effectively to the alleviation of unemployment and consequently to a reduction of those relief charges now being borne by federal, provincial and municipal taxpayers.

*Recommendations.*—In conclusion, the report made the following recommendations:—

1. That a Housing Authority be established with power to initiate, direct, approve and control projects and policies, and to allocate such moneys, as in the opinion of Parliament, may be necessary for the purpose of assisting a program of urban and rural housing.

2. That said Authority be authorized to negotiate agreements with any province, municipality, society, corporation or individual with a view to promoting construction, reconstruction and repair of such dwellings as may be necessary, and the extension of financial assistance at such favourable rates of interest, periods of amortization and other terms, as shall encourage housing.

3. That as its first consideration the said Authority be urged to take action in respect to repairs (rehabilitation), presently needed.

4. That such national housing policy be so framed, with respect to provision for employment, as to endeavour to co-relate and co-ordinate the efforts of provincial, municipal and other public authorities, and private agencies in relation thereto.

## REPORT ON HOUSING AND SLUM CLEARANCE FOR MONTREAL

A REPORT on housing and slum clearance for Montreal was recently prepared by a Joint Committee of the Montreal Board of Trade and the City Improvement League Incorporated. (A report along somewhat similar lines respecting housing conditions in Toronto was published in the *LABOUR GAZETTE*, November, 1934, page 1008.)

The Montreal report is "intended to be informative for the general public, and of use to Federal, Provincial and Municipal Authorities, when dealing with Housing and Slum Clearance as parts of the National economic problem." The Committee has found that the slums of Montreal are relatively small even when taken as a whole, but they are scattered throughout a dozen wards where their presence does harm to adjoining real estate values. The area of potential deterioration is regarded as extensive. "There has for long been a marked shortage in low rent dwellings" states the report, which adds that "the prevailing type of dwellings under the present system of ownership and management fails to provide accommodation for the lower wage earners, at rents they can afford

to pay. An acute actual shortage of dwellings is now in sight."

For purposes of investigation the Committee has divided the wage earners of the City into four groups.

(1) "White collar" and highly skilled manual workers.

(2) Artisans and skilled manual workers.

(3) Semi-skilled and other low wage earners.

(4) Unskilled wage earners.

The ratios which these several groups in Montreal bear to the total population of the City and the numbers of their dependents have been carefully studied. It has been found that they constitute a major portion of the whole population.

The Committee has accepted the view, borne out by recent studies, "that the cost to the community at large of leaving the lower wage groups to find accommodation in deteriorated structures is not economically sound—that it is cheaper for the community at large to bear a substantial part of the cost of providing adequate accommodation for these wage groups."

An annual construction program of 4,000 dwellings at rentals within the means of the lower wage groups is estimated as being the housing requirement for Montreal.

Under sections dealing with Federal, Provincial and Municipal action, the report states, in part:—

"The Committee, having taken cognizance of the difficulties which have arisen in financing public projects, on the principle of equal, or unequal shares, derived from Federal, Provincial and Municipal Governmental sources; and recognizing that any system of financial guarantees involving all, or more than one, of these governmental bodies, applies in practice only to the greater governmental body concerned, recommends unhesitatingly that financial aid, whether in the form of guarantees, or loans, or subsidies, be derived from Federal sources.

"Should the Federal Government extend financial facilities to housing and slum clearance operations within municipalities, this can best be done directly through properly constituted corporations, on British or United States models, rather than by distributing credit to the provinces, to be redistributed in turn by the provinces to the municipalities, as was done in the post war housing effort.

"The procedure recommended demands, as a first step, that the Federal Government should set up a National Housing Board, whose prime function would be to pass upon the merits of schemes submitted by Housing Corporations when requesting state aid in any form. A National Housing Board would be a far more efficient and economical instrument for dealing with the assisted housing needs of a population of only 10,000,000, than any system of Provincial Boards could be.

"A chief function of the Housing Board would be the approval of schemes, on their merits, and the recommendation of the appropriate financial structures relative to the rentals involved. Supervision of operation would also come within its purview. This might be facilitated by a local Advisory Board, the members of which might also be members of the National Housing Board.

"With Federal participation in housing finance as outlined, the Provincial Legislature would be called upon only to make certain enactments for the better stability of the investments in housing.

"This would include the matter of town planning and zoning legislation on the lines of the proposals put forward by the City Improvement League of Montreal in 1929. This scheme of legislation covers all the necessary points with two exceptions. The original proposals need strengthening, to

facilitate the acquisition of land, both within and without the boundaries of a municipality; they also require an addition for the control of development in certain areas contiguous to housing operations, but outside the confines of municipalities, as is now provided for in British town planning legislation.

"Municipal action, related to assisted housing, should first be directed to securing from Quebec, town planning and zoning enabling legislation of the nature referred to and to the constitution of permanent Town and Regional Planning Commissions to operate under this legislation"

In conclusion, the report declares:

"Low rent housing on adequate standards is only economically possible to-day under corporate ownership and management, with public credit engaged in the undertaking. It is only so possible when every economy in cost, and the protection which a strict zoning control can supply, are exercisable. The choice must lie between tolerating such slums as we have, while watching new ones develop, and putting our provincial and municipal controls in order, so that corporate enterprise and public credit may safely engage together in housing and slum clearance operations."

#### Prosecutions under the Ontario Minimum Wage Act

In reply to a question asked in the Ontario legislature respecting prosecutions and convictions under the Minimum Wage Act, the Minister of Labour, Hon. A. W. Roebuck, K.C., gave out the following information:—

The number of prosecutions instituted by the Board from November 1, 1933, until July 15, 1934, was forty-eight; from July 15 to September 15, 1934, thirteen; and from September 15, 1934, to March 20, 1935, eighteen. The number of convictions secured from November 1, 1933, to September 15, 1934, was twenty-four, and the number settled in court without convictions being registered was thirty-six. Of the eighteen prosecutions from September 15, 1934, to March 20, 1935, convictions were secured in two cases while twelve cases were settled in court without convictions being registered.

Wage adjustments made by the Board from November 1, 1933, until July 15, 1934, numbered 707; from July 15 to September 15, 1934, there were 200; and from September 15, 1934, to March 20, 1935, there were 556 adjustments.

The amount of money collected in arrears of wages from employers as the result of efforts of the Board was \$37,832.18 from November 1, 1933, to July 16, 1934; \$5,974.06 from July 17 to September 15, 1934; and \$15,168.50 from September 15, 1934, to March 20, 1935.

## CANADIAN NATIONAL SAFETY LEAGUE

## Report for 1934, With Reports of Provincial Safety Leagues

THE sixteenth annual report of the Canadian National Safety League reviews the activities of the various affiliated associations engaged in safety work during the year 1934. In its promotion of accident prevention and safety, the Canadian National Safety League is the co-ordinating agency of the following provincial leagues: Ontario Safety League, British Columbia Safety League, Manitoba Safety League, Province of Quebec Safety League, and the Saskatchewan Safety League. In addition, membership is maintained in various national and foreign organizations.

In addressing the meeting of the Canadian National Safety League recently held in Toronto, His Worship the Mayor summarized its objects and the increased necessity for its continuance as follows:—

"It has always been the aim of the Safety League to educate men, women and children to the necessity of preaching safety, of practising safety and of always endeavouring to reduce to the very minimum accidents occurring because of an indifference to the safety laws and to the safety practices which should be followed by every citizen at the present time. We are living in a day when hazards are almost at their peak. I venture to say that there never was a time in the history of the world when transportation had reached such a stage of rapidity as it has at the present time, and it therefore requires that there should be almost a new sense developed within human beings, that they might have almost intuitions of approaching dangers. If they have not something of that character there is bound to be a greater increase in accidents, fatal and otherwise, throughout not only the City of Toronto but through the Province of Ontario and the entire Dominion of Canada."

The general manager's report indicated that the regular bulletin service and distribution of literature was continued during the past year. Approximately 18,000 pieces of safety literature was supplied to the schools, etc., while 15,000 safety calendars were also prepared and distributed.

*Ontario Safety League.*—The 21st annual report of the Ontario Association shows that during 1934 there was an increase of 196 fatal accidents. In the general manager's summary of 1934 safety work, reference was made to the chief features of the year's program—school work and industrial and public safety. The former consisted of illustrated lectures and safety talks supplemented by lecture

work in summer camps and play grounds during the vacation period. In 1934, 454 safety talks were given in 292 schools to 139,250 pupils. There was the usual bulletin service, emphasizing traffic and aquatic hazards. The police department in Toronto and other cities and towns supply school safety patrols, and in some places the older boys are organized to look after the safety of the smaller pupils. One hundred school traffic signs, warning motorists of their approach to a school, were provided rural communities. The annual essay contest on ways in which children may prevent motor vehicle accidents, resulted in over seven thousand entries, four hundred dollars in cash prizes being awarded.

The work of the League in public safety consisted of the distribution of special and traffic bulletins distributed to industrial plants, to the press, and to the chiefs of police in cities, towns and villages in the province.

Special bulletins were distributed to summer hotels, amusement parks, boat livers, aquatic clubs, camps and railway stations. During the year 1934 fifty-three safety talks were broadcast by the general manager. In October, 1934, the Safe Drivers' Club was organized. All drivers employed by member companies were made members of this club and were supplied with Safe Drivers' emblems for their trucks. They have the privilege of reporting any case of careless or reckless driving which may come to their notice.

There was a total of 220,000 pieces of literature covering every phase of safety work, distributed during the year. The accident statistics for the province showed that there was a total of 15,864 non-fatal and 1,611 fatal accidents in 1934 as compared with 14,113 non-fatal and 1,415 fatal in 1933. As in previous years the six factors causing the largest number of fatalities were: automotive vehicles, 512; aquatic hazards, 285; falls, 179; railroads, 91; burns and scalds, 66; and fires, 61.

At the annual meeting of the Ontario body addresses were given by Hon. Thos. B. McQuesten, Minister of Health, and Mr. Tom Moore, President, Trades and Labour Congress of Canada, the former addressing particularly the commercial drivers in his audience. The League awards medals annually to drivers of commercial motor vehicles who had a year free from accidents. In 1934 over 1,200 such medals were awarded.

Reports of a less detailed nature, but indicating the same general line of safety activity, were presented from the provincial leagues of Quebec, Manitoba, Saskatchewan and British Columbia.

## LABOUR LEGISLATION IN SASKATCHEWAN AND MANITOBA IN 1935

### Saskatchewan

**D**URING the session of the Legislature of Saskatchewan from November 15, 1934, to February 22, 1935, several labour laws were amended and new statutes were enacted regarding the coal mining industry, the relief of distress and unemployment and the control of electrical wiring and apparatus. An Act respecting the Bureau of Labour and Public Welfare establishes a bureau under that name in the new Department of Municipal Affairs which is to take over some of the duties formerly carried on by the Department of Railways, Labour and Industries. The latter Department is abolished.

The Coal Mining Industry Act, which will come into force on proclamation, repeals the Coal Mines Licensing and Regulation Act enacted in 1934. On October 29, 1934, the Saskatchewan Government appointed Mr. Justice W. F. A. Turgeon a commissioner under the Inquiries Act to inquire "into all factors entering into wage level and coal prices having to do with the coal mining industry in Saskatchewan, including market conditions, alleged unfair business practices, wage and working conditions and, generally, to inquire into the whole of the operation of the said industry with the object of recommending to the Government of the Province what action, if any, by legislation or otherwise, should be taken by the Government in connection with the operation of the said industry in the interests of the public, the workers and the industry itself." Mr. Justice Turgeon's report was made after the Coal Mining Industry Act had been introduced and passed. The Bill, however, appears to have been drafted with the problems presented to the Commissioner in mind. Matters in dispute between the operators of the large deep-seam mines, the stripping mines and the small mines as to unfair methods of competition, including price-cutting, wage-rates, etc., are dealt with in the report. Other points taken up relate to working conditions, workmen's compensation, hours of labour and collective bargaining. As to the Coal Mining Industry Act, the Commissioner observes that it

"confers upon the Minister of Natural Resources, and upon the Lieutenant-Governor in Council, powers which, in their exercise, will no doubt conduce to an adjustment of those relations between mine operators and their employees, in the consideration of which questions pertaining to collective bargaining are included. . . . To come now to the questions which are a cause of disturbance in the mining industry and which still must be disposed of, I am confident that the recently enacted Coal Mining Industry

Act, 1935, provides the means of disposing of them. I refer to such questions as prices, wages, weights, business practices, etc., and I have no doubt that those charged with the administration of the Act, as well as those coming under its provisions, will work out a system for the conduct of the industry which will prove of benefit to all concerned: operators properly entitled to carry on their business, their employees and the consumers. The licensing system will, of course, enable the Government to prescribe conditions of general application which will guard against the occurrence of some things which are now subjects of complaint."

In addition to giving the Lieutenant-Governor in Council power to license all operators of coal mines and to restrict operations to licensed persons, the new statute charges the Minister of Natural Resources with the duty of encouraging improvement in the conditions of coal mining and the development of the natural resources of Saskatchewan in relation to coal mining. For these purposes, the Minister is empowered to make any inquiries he deems desirable, to promote and attend conferences of operators or employees, to promote the formation of associations of operators or employees with the object of improving conditions and to assist them with information and advice in any manner likely to lead to the betterment of the industry and the public interest. The new Coal Mining Industry Act makes somewhat similar provision for the setting up of codes and standards of ethics applicable to the coal mining industry within the province to those provided for in the Alberta Department of Trade and Industry Act of 1934. The Lieutenant-Governor in Council is empowered to formulate codes and set up standards with a view to stabilizing the industry and prohibiting competitive practices detrimental to the industry as a whole or to the operators or employees or to the public. Such standards may be arrived at after consultation with the operators and workpeople. In particular, the Lieutenant-Governor is authorized to establish minimum prices for the sale of products of the coal mining industry at wholesale or retail, and standard hours of labour and wages for persons employed. The retail price of coal and minimum wages for any classes of mine workers may be fixed. No codes or orders may be put in force if they affect or interfere with the importing or exporting of coal or any interprovincial business. For contravening the statute or any code made binding under the provisions, a maximum penalty of \$100 and costs or, in default of payment, imprisonment for not more than two months, may be imposed on any

individual. In the case of a corporation, the maximum penalty is \$500 and costs.

The Relief Act, 1935, repealing the provisional statute of 1933 as amended in 1934, continues for another year the powers given under the earlier statutes to the Lieutenant-Governor in Council to enter into agreements with the Dominion Government and with the municipalities for the purpose of providing relief within the province. Another statute provides for the winding up of the Saskatchewan Relief Commission, which was established in 1932, and confers on the Provincial Treasurer power to act in matters respecting the Commission.

Under the Electrical Inspection and Licensing Act, which repeals the Electrical Licensing Act of 1928-29, the Saskatchewan Power Commission is authorized to issue licences to journeymen and electricians certified to be qualified by the examining board. More stringent regulations are laid down in the new Act as to inspection, returns by employers, defective work by contractors and electricians, and the sale of electrical apparatus by supply houses.

Some changes were made in the Minimum Wage Act, several of them being made through amendments to the Bill as introduced in the Legislative Assembly. Under a 1934 amendment to the Act, the Minimum Wage Board was given power, with the approval of the Lieutenant-Governor in Council, to declare the Act to apply to male workers. No action was taken under this section during the year but the 1935 Bill was amended by the Legislature to extend the definition of the word "employee" to include any male worker to whom the Act may be made applicable. Other amendments made during its passage through the Legislature restrict the application of the Act to hotels, including boarding houses, and to restaurants which give accommodation to more than five persons. For violation of the Act or any orders under it, the minimum fine is raised from \$10 to \$25. Another section added in the Legislature empowers the Minimum Wage Board, with the approval of the Lieutenant-Governor in Council, to make an order extending the Act to any portion of the province other than a city or town and to any class of employees not mentioned in the Act. Previously, the Board had power to extend the Act to places with a population of 1,500 or more but no authority was given to extend it to other workers than those employed in shops and factories as these places were defined in the Act. A "shop" included a mail-order house, hotel, restaurant, barber

shop, beauty parlour and place of business of a tobacconist or news agent. An amendment also made in the Legislative Assembly stipulates that all parts of a building or place used in connection with the sale of goods by retail are within the scope of the Act and not only the part where goods are exposed for sale. Another change made was in the section empowering the Board to fix the proportion of "apprentices" that might be employed. The section was amended to include "learners or inexperienced employees." The Bill, as presented to the Legislature and assented to, provided for the future administration of the Act by the Minister of the new Department of Municipal Affairs and stipulated that, notwithstanding the restriction to six months of the period during which prosecutions might be brought and wages recovered, magistrates or justices might order payment to be made to any employee paid less than the minimum fixed by the orders of the Board even if six months had elapsed since the payments were made. The amendments to the Minimum Wage Act came into effect on May 1, 1935.

Under an amendment to the Workmen's Compensation (Accident Fund) Act, the commissioners, or members of the Workmen's Compensation Board, are to hold office during the pleasure of the Lieutenant-Governor in Council, and the chairman during good behaviour for ten years. The latter may only be removed for cause during that period on address of the Legislative Assembly. Formerly all the commissioners, including the chairman, held office for ten years but could be removed for cause.

An amendment, making clearer the intent of the Act as to procedure in the case of actions brought to recover compensation, was made to the Workmen's Compensation Act, 1911, under which certain workpeople not covered by the Workmen's Compensation (Accident Fund) Act, 1929, are compensated for industrial accidents.

The One Day's Rest in Seven Act was altered to strike out the stipulation that "no employee shall work" from the section declaring employees entitled to a weekly rest-day with such exceptions as are provided in the Act, and prohibiting employers requiring employees to work in any industry without such period of rest.

An amendment to the Steam Boilers Act makes provision for a permanent certificate, on the recommendation of an inspector and payment of a fee of \$3, to any person to whom a fireman's certificate has been issued for five or more years.

The Public Service Vehicles Act, 1933, which relates to motor vehicles carrying passengers or goods on public highways for compensation, was amended to define more particularly the powers of the Public Utility Board to make regulations governing drivers of public service vehicles and to extend their authority to drivers of commercial vehicles, that is, trucks. The Board now has power to regulate the hours of employment and wages of drivers of public service and commercial vehicles.

The Milk Control Act, 1935, provides for a Milk Control Board to take over powers given in 1933 to the Local Government Board to regulate the distribution of milk by licensing distributors and fixing prices of milk.

A resolution of the Legislative Assembly on February 19 expressed satisfaction with the resolution of the House of Commons of February 18 in favour of unemployment insurance and the co-operation of the Provincial Government with the Dominion in establishing unemployment insurance throughout Canada "which will tend to maintain men in employment through compelling industry to make the major contribution toward the maintenance of their employees while unemployed." An amendment added that "it is hoped that the Dominion Parliament will be ever ready to make such changes in the Canadian unemployment insurance scheme as modern conditions may make necessary from time to time." The original motion declared in favour of a system of non-contributory unemployment insurance but was amended in the Assembly.

#### Manitoba

The Legislature of Manitoba during its session from February 12 to April 6, 1935, dealt with several matters of labour interest. The Unemployment Relief Loan Act, 1933, empowering the Provincial Government and municipalities to borrow money to relieve distress from unemployment, was continued to be in force until April 30, 1936. An amendment to the Child Welfare Act enables a mother's allowance to be paid in respect of a child who has lived in Manitoba for less than the two years prior to the death of the father required under the amendment of 1934, if the father had resided in the province for at least two years prior to his death and if the child is not eligible for an allowance or maintenance in any other jurisdiction and the case is one recommended by the Child Welfare Board.

The Fair Wage Act, 1916, applying to public works, was extended in 1934 to cover private works of over \$100 value in towns of popula-

tion exceeding 2,000 or to any portion of the province to which it was made to apply by the Lieutenant-Governor in Council. Work under the direction of an owner or tenant without a view to the sale or rental of the property was excluded from the Act. At the 1935 legislative session, this provision was amended to restrict the exemption as to work done by an owner or tenant to work where no more than three men are employed in addition to the regular maintenance staff, if any. Work done by maintenance men paid by the month is not included. A change was made in the section requiring publication of the regulations made under the Act in two successive issues of the Manitoba Gazette in order to validate an order governing private work issued on July 7, 1934, and published only once. As amended, orders need be gazetted only once and those already published are declared valid.

In 1934, the Minimum Wage Act was amended to empower the Lieutenant-Governor in Council to make an order extending the Act to any portion of the province not in a city or to extend the Act or regulations under it to employees in an industry not specifically provided for in the Act. The original statute applied only to employees in mail-order houses, offices, places of amusement, shops and factories in any city in Manitoba. At the 1935 session of the Legislature, the powers of the Lieutenant-Governor were stated more definitely and the amendments were made retroactive to April 7, 1934, the date on which the 1934 statute went into effect. It is now provided that the Lieutenant-Governor in Council may declare that any order of the Minimum Wage Board applicable to a city or any proposed order of the Board shall apply to any portion of the province and that any order shall apply to employees in any or all offices, vocations, pursuits, trades, industries, businesses or callings. He may declare, further, that the provisions of the Act shall extend to any portion of the province or to any or all employees in all offices, vocations, etc. These powers of the Lieutenant-Governor in Council may be exercised on the recommendation of the Minimum Wage Board which is authorized to recommend the extension of minimum wage orders to any part of the province and to any class of employees. Various sections of the Act are amended to bring them into line with the above changes. The Act is to be administered by "the Minister of Labour or such other member of the Executive Council as is appointed to administer" it.

By an amendment to the Shops Regulation Act, the restrictions imposed by the Act on the employment of children, the working hours of young persons and women and the provisions of the Act to ensure health and safety now apply to beauty parlours or any places where the business of hairdressing is carried on or any place where clothes are cleaned, repaired or pressed for profit.

Changes made in the Highway Traffic Act include the provision that the Municipal and Public Utility Board may now require persons proposing to become drivers of public service vehicles and commercial trucks to furnish a medical certificate of fitness for the work and to submit to such driving or other tests as the Board may order.

Regulation of taxicabs in Greater Winnipeg was provided for in the Taxicab Act. A board made up of the members of the Municipal and Public Utility Board of the province together with the chief constable of Winnipeg and the chairman of the traffic committee of the city council, or the nominees of the two latter, is authorized to issue licences to taxicab operators and to drivers and to regulate livery and "drive-yourself" motor vehicles. A certificate of good character is required for a driver's licence as well as proof of medical fitness and a chauffeur's licence under the Highway Traffic Act. No driver may be permitted to be on duty more than 12 hours in any one day or more than 6 days in any week. A minimum wage of \$15 must be paid any driver who is employed by the week and \$1.40 a day to any driver employed otherwise than by the week. If the latter is on duty more than 4 hours in any one day, he must be paid at least \$1.40 for such day and not less than 30 cents an hour for each additional hour he is on duty on that day. The Board may vary the terms of this section under changed conditions, provided the minimum wage is not less than at the above rate. The Board may also require wages to be paid in cash or by cheque and prescribe conditions governing the receipting and accounting of wages to taxicab drivers. Other powers are given the Board with a view to providing for the safety and comfort of passengers and to appoint inspectors to enforce the Act.

The Municipal Act, 1933, was amended to enable municipal corporations to make by-laws for licensing and regulating persons operating wood-sawing or wood-cutting machines and for requiring the use of such safety devices and practices as may be recommended by the Manitoba Bureau of Labour.

The Trade Practices Inquiry Act which is to come into force on proclamation, provides

for inquiry by the Minister charged with the administration of the statute into complaints made by any four residents of Manitoba, over 21 years of age, that any person or persons carrying on any trade in the province are offering for sale, by misleading advertising, goods of inferior quality or are manufacturing or selling adulterated products, or making unfair charges for storing, repairing, packing, etc., any articles, or for selling or disposing of any article, or are making use of unfair advertising or statements, or are offering to provide educational services or facilities to students which are inadequate for the purpose or are making improper or misleading appeals to the public for financial support or donations of any kind or are following or using unfair, detrimental or improper practices of any kind. Complaints may also be made as to conditions in any trade which are detrimental to persons carrying on the trade or to persons employed in it or the public. When the Minister decides that the complaint is not merely frivolous or vexatious, he shall recommend to the Lieutenant-Governor in Council that an inquiry be made. One or more persons may be appointed by the Lieutenant-Governor in Council as a board of inquiry in such case. Proceedings of a board may be conducted in public or in private and all powers necessary for requiring witnesses, documents, etc., are to be conferred on a board. Regulations may be made by the Lieutenant-Governor in Council for the payment of the costs of inquiries, prescribing the form in which complaints shall be made and other forms for use in investigations and appointing persons to boards. Reports made by boards of inquiry may be made public by the Minister at his discretion but the Minister must, within fifteen days of its opening, make a report to the Legislative Assembly covering all inquiries made under the Act. The latter stipulation was inserted in the Bill after its introduction in the Legislature.

An Act to provide for the payment of pensions to blind persons was enacted by the Legislature in expectation that the Dominion Parliament would enact legislation to aid the provinces in making such provision. The Manitoba statute, which will come into force on proclamation, empowers the Lieutenant-Governor in Council to authorize the payment of pensions to blind persons between 40 and 70 years of age in accordance with the conditions laid down in any Dominion statute, to enter into an agreement with the Dominion Government pursuant to any Dominion Act for such purpose and to make the necessary regulations for the proper administration of

the Act. The provincial board administering old age pensions is to be charged with carrying out the provisions of the statute regarding pensions for the blind.

A motion in favour of an amendment to the Dominion Old Age Pensions Act was brought in and debated but did not reach a vote. The resolution pointed out that the present Act requires an applicant for a pension to have resided in Canada for 20 years and in the province in which he makes application for a pension for the 5 years immediately preceding the date of application. Regulations under the Act stipulate that an applicant must not have been absent from Canada for more than 731 consecutive days and must have lived in the province for at least 1,095 days in the five years preceding his application. The effect of these requirements, according to the resolution, is that it is possible for Canadian citizens over 70 years of age to have lived all their

lives in Canada and in one or other of the provinces which have enacted old age pension legislation and yet be ineligible to receive a pension. An amendment to the Act was advocated to permit a person to be eligible if he had resided in one or more provinces which have old age pension laws for five years and to repeal the clause regarding absence from Canada during the 20 years preceding application.

On motion of the Attorney-General, a resolution was adopted for the appointment by the Government of a special committee of 15 members to investigate during the recess and report on the question of workmen's compensation in Manitoba. Five members of the committee are to represent the employers, employees and the Legislature respectively. The Premier suggested that the application of the Act to agricultural workers should be considered by the special committee.

### Group Insurance for Bush Workers

A plan of group insurance and sickness benefits has been put into effect for its employees by the Spruce Falls Power and Paper Company according to a recent press report. It is understood that the company has introduced this system in an effort to retain a permanent staff of known and trained bush workers who will form the nucleus for all camps.

It was stated that these men will be retained on the pay roll during the entire year and will be granted twelve days holidays, annually, with pay, so that "instead of employing 1,500 men just during the winter months we will keep between 300 or 400 men employed steadily throughout the year without any large employment turnover."

Approximately 325 Spruce Falls bush employees will benefit by the new scheme. Each employee pays 25 cents per month for a coverage of \$1,000, the company paying the balance, while for another 25 cents per month each man is entitled to sickness benefits amounting to \$7 per week in case of sickness. A man will be entitled to two months' leave of absence each year and still enjoy the benefits of his group insurance and sickness coverage.

In a further effort to establish better living conditions for bush workers, it is reported that the company has installed a radio in each camp, provided a reading room with literature in various foreign languages as well as English, and improved the quality of the food.

### Farm Wages in 1934

According to the Monthly Bulletin of Agricultural Statistics issued by the Dominion Bureau of Statistics, the average monthly wages of farm help for all Canada during the summer season of 1934 were for men \$18 as against \$17 in 1933, and for women \$10, the same as in 1933. The value of board is estimated at \$15 per month for men in both 1934 and 1933 and at \$12 per month for women in both years. Thus the combined value of wages and board amounted to \$33 for men as compared with \$32 in 1933, and to \$22 for women for both years. By provinces, the average monthly wages plus the value of board in the summer season for men and women respectively were in 1934 as follows, with the figures for 1933 within brackets: Prince Edward Island \$30, \$21 (\$30, \$21); Nova Scotia \$35, \$22 (\$34, \$23); New Brunswick \$35, \$21 (\$31, \$20); Quebec \$30, \$19 (\$28, \$18); Ontario \$33, \$25 (\$32, \$25); Manitoba \$31, \$21 (\$29, \$20); Saskatchewan \$31, \$20 (\$31, \$20); Alberta \$35, \$25 (\$34, \$23); British Columbia \$43, \$30 (\$42, \$29).

The yearly wages in Canada were reported for men as \$171 compared with \$161 in 1933 and for women as \$115 against \$112 in the previous year. The yearly value of board is given for men as \$167 (\$161 in 1933) and for women as \$138 (\$134 in 1933). The combined value of wages and board thus amounted to \$338 as against \$322 for men and to \$253 as against \$246 for women.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include: the extension to all employees and employers in the industry and district by Orders in Council of agreements affecting employees of glove manufacturers throughout the province, building trades at Three Rivers, at Joliette and at Montreal; changes to Orders in Council already passed affecting building trades at Montreal, building trades at Quebec, men's and boys' clothing workers throughout the province, and bakers at Three Rivers; applications for modifications to Orders in Council affecting bakers at Quebec and building trades at Montreal; corrections to applications previously made for the extension of agreements affecting painters at Quebec and building trades at Victoriaville; and application for the extension of an agreement affecting bread delivery men at Quebec.

Under the Collective Labour Agreements Extension Act, Quebec, the text of which was printed in the *LABOUR GAZETTE*, May, 1934, page 417, applications may be made to the provincial Minister of Labour by any association of employees or employers which is a party to a collective agreement, to have those terms of such agreement which concern rates of wages and hours of labour made obligatory on all employees and employers in the same trade or industry within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade or industry in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* and for the duration of the agreement. The provisions of an agreement thus made obligatory are to govern all individual labour contracts in the specified trades and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders

in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934.

**GLOVE MAKERS, PROVINCE OF QUEBEC.**—An Order in Council, approved April 8, and published in the *Quebec Official Gazette*, April 13, makes obligatory throughout the province the terms of an agreement between certain glove manufacturers and the National Catholic Unions of Glove Makers of Montreal and of Three Rivers. (The application for the extension of this agreement was noted in the *LABOUR GAZETTE*, March, page 241.)

The first article in the agreement, No. 1 (a), deals with wages. The rates provided are in all cases on a piece work basis and are omitted here. The other terms of the agreement made obligatory are:—

1. (b) Notwithstanding paragraph (a) of this article, the cities and towns of which the population was less than 15,000 souls at the last census of the Dominion of Canada, and situate in the territorial jurisdiction situate in article 3 of this request, shall benefit by a reduction of 10 per cent in connection with the rate of wages adopted in said paragraph (a) of these regulations.

2. The hours of labour shall not exceed 49 per week; there will be nine (9) hours of labour per day with the exception of Saturday when there will be four (4) hours of labour. The workmen shall not begin work before 7 o'clock a.m., and shall not leave the workshop later than 6 o'clock p.m. The employers shall allow one (1) hour to their employees for the noon-day meal.

If an employer be compelled, during a certain lapse of time, to keep his employees at work for a longer time, he shall submit his case to the Joint Committee, that will decide what attitude shall be taken. In such cases, the regular salary shall be paid for any extra work.

3. The territorial jurisdiction determined by the present agreement comprises all the Province of Quebec.

4. The present agreement shall be in force during one year on and from the publication in the *Quebec Official Gazette*, of the Order in Council approving the present request and it shall remain in force until the 15th of April, 1936. It shall renew itself automatically for another year unless one of the parties notifies the other party of his intention of repealing the same, at least 30 days before the expiration thereof.

**BUILDING TRADES, THREE RIVERS.**—An Order in Council, approved April 18, and published in the *Quebec Official Gazette*, April 20, makes obligatory the terms of an agreement between certain general contractors of the city and district of Three Rivers and National Catholic Unions of certain building trades. The application for the extension of this agreement was noted in the *LABOUR GAZETTE*, March, page 241. Follow-

ing publication of this application, certain objections were made and the Order in Council modifies in some respects the terms presented in the application. These modifications include: the elimination of three counties from the district included; the inclusion of all contracts under \$10,000 in municipalities of less than 8,000 population under the lower of the two wage schedules, rather than only contracts under \$5,000 in municipalities of less than 5,000; a wage rate for carpenters and joiners 5 cents lower and for hoisting engineers 10 cents lower in the lower of the two wage schedules than in the original application; the addition of clause 3 (c), 4A and 8A; and provision for wage payment other than weekly under certain circumstances (clause 7). These modifications were approved by the contracting parties and terms of the Order in Council as approved are as follows:—

1. Definitions: (a) the word "journeyman" signifies a workman in carpentry and joining, an expert terrazzo layer, a tile or mosaic layer, a structural steel worker, a joint finisher or a cement finisher who holds a certificate of competence from the Board of Examiners formed by the syndicate of which he is a member or from the Board of Examiners formed by the Joint Committee established under paragraph two of article 7 of the Act 24 Geo. V, chapter 56, or a stationary engineman who holds a certificate issued by the Board of Examiners of Stationary Enginemen of the Province;

(b) The word "apprentice" signifies any junior workman or any person who has obtained from the Board of Examiners formed by the syndicate of which he is a member or from the Board of Examiners formed by the Joint Committee, a certificate stating that he is learning one of the trades mentioned in the present agreement;

2. The territorial jurisdiction determined by the present agreement comprises the counties of Maskinongé, Saint Maurice, Lavolette, Champlain, and Trois Rivières.

3. (a) The rate of wages to be the following for each of the following trades.

Trades	Wages per hour cents
Carpenters and joiners.. . . .	55
Labourers (common).. . . .	35
Structural steel workers.. . . .	50
Stationary enginemen.. . . .	50
Stationary enginemen (hoist enginemen).. . . .	65
Plaster pourers.. . . .	40
Hod carriers.. . . .	40
Experts in terrazzo work, tile and mosaic layers.. . . .	60
Mortar makers.. . . .	40
Celanite mixers.. . . .	40
Lathers—wood.. . . .	45
Lathers—metal.. . . .	45
Joint finishers, cement finishers.. . .	50
Carters with two-horse vehicle.. . .	55
Carters with one-horse vehicle.. . .	45

Apprentices for the hereinabove mentioned trades exacting an Apprenticeship:—

	cents
First year.. . . .	15
Second year.. . . .	25
Third year.. . . .	35

(b) Notwithstanding the provisions of the preceding paragraph, it is stipulated and agreed that, in all the municipalities within the territorial jurisdiction determined in article 2 of the present agreement and whereof the population was less than 8,000 souls at the last census of the Dominion of Canada, the general building contracts whereof the total cost, salaries and material included, is less than \$10,000, shall be subject to the following rate of wages:—

Trades	Wages per hour cents
Carpenters and joiners.. . . .	35
Labourers (common).. . . .	25
Structural steel workers.. . . .	40
Stationary enginemen.. . . .	35
Stationary enginemen (hoist enginemen).. . . .	40
Plaster pourers.. . . .	30
Hod carriers.. . . .	30
Experts in terrazzo work, tile and mosaic layers.. . . .	40
Mortar workers, celanite mixers.. . .	30
Lathers, wood.. . . .	35
Lathers, metal.. . . .	35
Joint finishers, cement finishers.. . .	40
Carters with two-horse vehicle.. . .	45
Carters with one-horse vehicle.. . .	35

Apprentices for the hereinabove mentioned trades exacting an apprenticeship:

	cents
First year.. . . .	10
Second year.. . . .	15
Third year.. . . .	25

It is however clearly understood and agreed upon that all contracts for general construction whereof the total cost, salaries and materials included is \$10,000 or more, and which are carried on within the said territorial jurisdiction, will be subject to the rate of wages mentioned in paragraph (a) of this article.

(c) Maintenance men employed in churches, chapels, or buildings used as churches or chapels, seminaries, universities, colleges, convents, monasteries, public or private hospitals, orphan asylums, refuges, charity work-rooms (ouvroirs), shall be entitled to the following conditions of labour:

i. Wages of skilled workmen: minimum \$18 per week; wages of unskilled workmen (labourers): minimum of \$12 per week.

ii. Hours of labour: 48 hours per week, without any daily limitation of the duration of work.

iii. The employer may charge a maximum of \$3 per month and per room rent where such employees live within the establishment. A maximum reduction of 25 cents is allowed for each meal if the employee is boarded in the establishment.

4. The hours of labour shall be in conformity with the provisions of the Order in Council No. 1496 of July 12, 1933, for the carrying out of the Act respecting the limiting of working

hours (23 Geo. V, chapter 40)\*. There shall be no work on Sundays, holidays of obligation, the Feast of Saint Jean Baptiste, Good Friday and Labour Day.

4A. It is expressly stipulated that building contracts awarded and signed before the adoption of the Order in Council approving the present request, shall not be subject to the provisions of the present agreement.

5. In the case of non-application or derogation granted by the competent authority respecting the limiting of working hours, time and a half will be paid to journeymen and apprentices for all overtime.

6. The travelling expenses, the time spent travelling by workmen sent outside the town will be at the expense of the contractors only; time and a half will not be paid during the time of the trip.

7. Workmen and apprentices mentioned in this agreement shall be paid each week; however, companies doing their own construction work and whose accounting system does not permit the paying of employees but every fifteen days, for at least a year, shall not be subject to this obligation, provided that the joint committee to which each case must be submitted, finds the given reasons sufficient.

8. All the sub-contractors shall be bound to the same obligations as the general contractors themselves and the latter shall take the necessary proceedings to bind them by contract.

8A. The present agreement does not apply to farming industry.

9. The present agreement shall be in force during one year on and from the publication in the *Quebec Official Gazette* of the Order in Council which shall render it obligatory; it shall renew itself automatically each year unless one of the contracting parties hereto notifies the other party hereto, thirty days before the expiration of the said delay, of his intention of modifying or amending the same.

**BUILDING TRADES, JOLIETTE.**—An Order in Council approved April 18, and published in the *Quebec Official Gazette*, April 20, makes obligatory the terms of an agreement between the Montreal Builders' Exchange and the Association of Workers of Joliette. The application for the extension of this agreement was noted in the LABOUR GAZETTE, April, page 323. The Order in Council includes modifications made by the contracting parties to the original request, by the additions of clauses 5-A, 5-B and 5-C and of the second paragraph of clause 8. The terms of the Order in Council are:—

1. (a) The word "guide" in this agreement means an employee who can perform any current painting work, wall papering, imitation, decorating and glazing works, and is in charge of workmen doing painting work or a workman doing and conducting alone painting work and having obtained a certificate from the joint committee provided by the law.

(b) The words "journeyman painter" in this agreement signify a workman doing any current painting work, wall papering, imitation, decorating and glazing works, and having

obtained his certificate from the joint committee provided by the law.

(c) The word "apprentice" in this agreement means a junior workman or any other person having obtained from the joint committee provided by the law, a certificate attesting that he is learning the trade.

2. The rate of wages shall be the following for each of the trades mentioned below:

Trades	Wages per hour cents
Bricklayers . . . . .	60
Masons . . . . .	60
Plasterers . . . . .	50
Carpenter-joiners . . . . .	50
Apprentices, 1st year . . . . .	20
Apprentices, 2nd year . . . . .	25
Apprentices, 3rd year . . . . .	30
Apprentices, 4th year . . . . .	40
Painters (guide) . . . . .	40
Journeyman painters . . . . .	35
Apprentices, 1st year . . . . .	15
Apprentices, 2nd year . . . . .	20
Apprentices, 3rd year . . . . .	25
Apprentices, 4th year . . . . .	30
Cement finishers . . . . .	40
Electricians . . . . .	45
Electricians (helpers) . . . . .	30
Hod carriers . . . . .	30
Labourers, common . . . . .	30
Lathers, metal . . . . .	40
Lathers, wood . . . . .	35
Marble setters . . . . .	50
Tile setters . . . . .	40
Terrazo layers . . . . .	40
Ornamental iron workers:	
Erectors, 1st class . . . . .	50
Erectors, 2nd class . . . . .	40
Asbestos coverers . . . . .	45
Roofers, slate and tile . . . . .	45
Roofers, composition . . . . .	45
Sheet metal workers . . . . .	45
Plumbers and steamfitters . . . . .	45
Apprentice plumbers, steamfitters and sheet metal workers:	
1st year . . . . .	15
2nd year . . . . .	25
3rd year . . . . .	35
Enginemen, steam shovel . . . . .	60
Enginemen, hoisting . . . . .	40
Enginemen, gas mixer . . . . .	35
Enginemen, compressor . . . . .	35
Firemen, construction . . . . .	40
Window adjusters, screen, weather stripping and steel partition erect- ors, window caulkers . . . . .	35

3. The hours of labour will be in conformity with the provisions of the Order in Council No. 1253 of June 14, 1933, modified by Order No. 160, of the 17th of January, 1935, for the putting into force of the Act respecting the limiting of working hours (23 Geo. V, ch. 40).†

4. The territorial jurisdiction determined by the present agreement shall comprise the counties of Joliette and Montcalm.

5. Notwithstanding article 2 of the present request, it is stipulated and agreed that, in all the municipalities of the jurisdiction determined in the preceding paragraph (4) and

\*Maximum of 8 hours per day, 40 per week, except on public works, etc., for which maximum is 6 hours per day, 36 per week (LABOUR GAZETTE, August, 1933, page 776.)

†Maximum of 8 hours per day, 40 per week, except on public works, etc., for which maximum is 6 hours per day, 36 per week (LABOUR GAZETTE, July, 1933, page 701).

whereof the population is less than 4,000 persons at the last census of the Dominion of Canada, the general building contracts whereof the total cost, salaries and material included, is less than \$2,000 shall be subject to the following rate of wages:

Trades	Wages per hour cents
Bricklayers.. . . .	50
Masons.. . . .	50
Plasterers.. . . .	50
Carpenters-joiners . . . . .	40
Apprentices, 1st year.. . . .	15
Apprentices, 2nd year.. . . .	20
Apprentices, 3rd year.. . . .	25
Apprentices, 4th year.. . . .	30
Painters (guide).. . . .	35
Journeyman painters.. . . .	30
Apprentices, 1st year.. . . .	10
Apprentices, 2nd year.. . . .	15
Apprentices, 3rd year.. . . .	20
Apprentices, 4th year.. . . .	25
Cement finishers.. . . .	35
Electricians.. . . .	40
Electricians (helpers).. . . .	25
Hod carriers.. . . .	25
Labourers, common.. . . .	25
Lathers, metal.. . . .	30
Lathers, wood.. . . .	30
Marble setters.. . . .	40
Tile setters.. . . .	35
Terrazzo layers.. . . .	35
Ornamental iron workers:	
Erectors, 1st class.. . . .	40
Erectors, 2nd class.. . . .	30
Asbestos coverers.. . . .	45
Roofers, composition.. . . .	45
Roofers, slate and tile.. . . .	45
Sheet metal workers.. . . .	45
Plumbers and steamfitters.. . . .	45
Apprentice plumbers, steamfitters and sheet metal workers:	
1st year.. . . .	15
2nd year.. . . .	25
3rd year.. . . .	35
Enginemen, steam-shovel.. . . .	50
Enginemen, hoisting.. . . .	35
Enginemen, gas mixer.. . . .	30
Enginemen, compressor.. . . .	30
Firemen, construction.. . . .	30
Window adjusters, screen, weather stripping and steel partitions erect- ors.. . . .	40
Window caulkers.. . . .	30

5A. Maintenance men employed in churches, chapels or buildings used as churches or chapels, seminaries, universities, colleges, convents, monasteries, public or private hospitals, orphan asylums, asylums, refugees, charity workrooms (ouvroirs), shall be entitled to the following conditions of labour:

i. Wage of journeymen or skilled workmen: minimum \$18 per week; wage of unskilled workmen (labourers), \$12 per week.

ii. Hours of labour: 48 hours per week, without any daily limitation of the duration of work.

iii. The employer may charge a maximum of \$3 per month and per room rent where such employee lives within the establishment. A maximum reduction of 25 cents is allowed for each meal if the employee is boarded in the establishment.

5B. It is hereby expressly stipulated that all contracts entered into by an employer and one

or more employees on a piece work basis are invalid unless it can be established that the amount of such contract, excluding the price of building material, is equal to the amount of the legal wage rate per hour of the respective trades engaged and calculated on the basis of the actual number of hours worked and workmen engaged.

5C. The present agreement does not apply to persons engaged in agricultural pursuits and deriving their living by such means.

6. It is expressly stipulated that building contracts granted and signed before the adoption of the Order in Council approving this petition, are not governed by the provisions of the present agreement.

7. The workmen will be paid each week. The travelling expenses of workmen sent or employed outside the town in which they reside will be at the cost of the contractors.

8. The present agreement shall be in force from the date of the publication in the *Quebec Official Gazette* of the Order in Council approving the present petition and shall remain in force until the 31st of March, 1936.

It is however agreed upon that the provisions of the present agreement are retroactive to the 1st of April, 1935, and that they will continue to be in force after the date of expiration hereinabove mentioned, for a period of not more than 30 days pending the adoption of the Order in Council approving the agreement replacing same.

BUILDING TRADES, MONTREAL.—An Order in Council approved April 12 and published in the *Quebec Official Gazette*, April 13, and a further Order in Council approved April 18 and published in the *Quebec Official Gazette* April 20, correcting the first, makes obligatory the terms of an agreement between the Montreal Builders' Exchange, Inc., and the Building Trades Council of Montreal and the Building Trades Council of Montreal, Inc. (the latter composed of National Catholic Unions). The application for the extension of this agreement was noted in the LABOUR GAZETTE, March, page 242. The Order in Council includes modifications approved by the contracting parties following certain objections made to the original request. These modifications include: in article 4 the original agreement provided that this lower wage schedule should apply to work on general building contracts of less than \$10,000 in all municipalities of a population of less than 5,000 except municipalities on the Island of Montreal and those of Saint Lambert and Longueuil, which provision has been changed to article 4 below; articles 4A, 4B and 4C and the second paragraph of article 6 were not in the original request, but have been added in the Order in Council. The terms of the Order in Council are as follows:

1.—The rate of wages shall be the following for each of the trades mentioned below:

Trades	Wage rate per hour	Trades	Wage rate per hour
Building caulkers.. . . .	\$0 45	Carpenters, joiners, floorlayers and erectors of windows, sash, screens (wood and metal) and steel partitions, also weather strippers.. . .	45
Asbestos coverers.. . . .	60	Cement finishers.. . . .	40
Bricklayers.. . . .	70	Electricians.. . . .	45
Carpenters, joiners, floorlayers and erectors of windows, sash, screens (wood or metal) and steel partitions also weather strippers.. . .	60	Enginemen, shovel (steam, gas and electric).. . . .	65
Cement finishers.. . . .	50	Enginemen, hoisting.. . . .	40
Electricians.. . . .	65	Enginemen, gas mixer.. . . .	40
Enginemen, shovel (steam, gas and electric).. . . .	75	Enginemen, compressor.. . . .	40
Enginemen, hoisting.. . . .	55	Firemen, construction.. . . .	40
Enginemen, gas mixer.. . . .	45	Hod carriers.. . . .	30
Enginemen, compressor.. . . .	45	Labourers, common.. . . .	25
Firemen, construction.. . . .	45	Lathers—metal.. . . .	40
Hod carriers.. . . .	40	Lathers—wood.. . . .	35
Labourers, common.. . . .	35	Marble setters.. . . .	50
Lathers—metal.. . . .	65	Masons, stone.. . . .	50
Lathers—wood.. . . .	55	Ornamental Iron Workers:	
Marble setters.. . . .	70	Erectors.. . . .	40
Masons, stone.. . . .	70	Helpers.. . . .	35
Ornamental Iron Workers:		Painters, spray men, floor finishers, glaziers, decorators, paper hangers.. . .	40
Erectors.. . . .	60	Plasterers.. . . .	40
Helpers.. . . .	50	Plumbers and steamfitters.. . . .	45
Painters, spray men, floor finishers, glaziers, decorators, paper hangers.. . .	60	Roofers—slate and tile.. . . .	40
Plasterers.. . . .	70	Roofers—composition.. . . .	35
Plumbers and steamfitters.. . . .	65	Sheet metal workers.. . . .	45
Carpenters, concrete forms, shop or job.. . . .	60	Terrazzo layers.. . . .	40
Roofers—slate and tile.. . . .	60	Tile setters.. . . .	40
Roofers—composition.. . . .	45	Carpenters, concrete forms, shop or job.. . . .	45
Sheet metal workers.. . . .	60		
Terrazzo layers.. . . .	55		
Tile setters.. . . .	65		

2.—The hours of labour will be in conformity with the provisions of the Order in Council No. 1253 of June 14, 1933, modified by Order No. 160 of the 17th of January, 1935, for the putting into force of the Act respecting the limiting of working hours (23, Geo. V, ch. 40).†

3.—The territorial jurisdiction determined by the present agreement shall comprise and include in addition to the Island of Montreal, and the Ile Bizard, the following counties: l'Assomption, Terrebonne, Laval, Two Mountains, Argenteuil, Vaudreuil, Soulanges, Beauharnois, Chateauguay, Laprairie, Chambly and Vercheres.

4.—Notwithstanding paragraph one (1) of the present conditions, it is stipulated and agreed that, in all the municipalities of the jurisdiction determined in the preceding paragraph (3) with the exception of the municipalities situated in the Island of Montreal and of the city of Valleyfield, the general building contracts whereof the total cost, salaries and material included, is less than \$15,000 shall be subject to the following rate of wages:

Trades	Wage rate per hour
Building caulkers.. . . .	\$0 35
Asbestos coverers.. . . .	50
Bricklayers.. . . .	50

† Maximum of 8 hours per day, 40 per week, except on public works, etc., for which maximum is 6 hours per day, 36 per week (LABOUR GAZETTE, July, 1933, page 701).

4A.—Maintenance men employed in churches, chapels or buildings used as churches or chapels, seminaries, universities, colleges, convents, monasteries, public or private hospitals, orphan asylums, asylums, refuges, charity workrooms (ouvroirs) shall be entitled to the following conditions of labour:

i. (a) Within the Montreal Island: Wage of journeyman or skilled workers: minimum of \$20 per week; wage of labourers (unqualified workers): minimum of \$14 per week;

(b) Beyond the Island of Montreal: Wage of journeyman or skilled workers: minimum of \$18 per week; wage of labourers or unqualified workers: minimum of \$12 per week.

ii. Hours of labour: 48 hours per week, without any daily limitation of the duration of work.

iii. The employer may charge a maximum of \$3 per month and per room rent where such employees live within the establishment. A maximum reduction of 25 cents is allowed for each meal if the employee is boarded in the establishment.

4B. It is hereby expressly stipulated that all contracts entered into by an employer and one or more employees on a piece-work basis are invalid unless it can be established that the amount of such contract, excluding the price of building material, is equal to the amount of the legal wage rate per hour of the respective trades engaged and calculated on the basis of the actual number of hours worked, and workmen engaged.

4C. The present agreement does not apply to persons engaged in agricultural pursuits and deriving their living by such means.

5. It is expressly stipulated that building contracts granted and signed before the adoption of the Order in Council approving this petition are not governed by the provisions of the present agreement.

6. The present agreement shall be in force from the date of the publication in the *Quebec Official Gazette* of the Order in Council approving the present petition and shall remain in force until the 31st of March, 1936.

It is however agreed upon that the provisions of the present agreement are retroactive to the 1st of April, 1935, and that they will continue to be in force after the date of expiration hereinabove mentioned, for a period of not more than 30 days pending the adoption of the Order in Council approving the agreement replacing same.

A request for certain changes in this Order in Council have since been made and are noted below on this page.

**MEN'S AND BOYS' CLOTHING WORKERS, PROVINCE OF QUEBEC.**—The terms of the Order in Council governing conditions in this industry were published in the *LABOUR GAZETTE*, March, page 238, and a correction to it in the *LABOUR GAZETTE*, April, page 323. A further Order in Council approved March 30, and printed in the *Quebec Official Gazette*, April 6, amends the original order as follows:—

The wage of (16) sixteen cents per hour is substituted to that of (13½) thirteen and one-half cents for apprentices of Class H, in the course of their first six months' work, in article 4 of the request, as modified by the present Order in Council.

**BUILDING TRADES, QUEBEC.**—The Order in Council, the terms of which were published in the *LABOUR GAZETTE*, September, 1934, page 823, and to which changes have already been made by further Orders in Council noted in the *LABOUR GAZETTE*, February, page 149, and March, page 241, has again been amended by an Order in Council approved April 8, and printed in the *Quebec Official Gazette*, April 13. The requests for the further changes were noted in the *LABOUR GAZETTE*, March, page 241. The terms of the new Order in Council are as follows:—

I. The following article shall replace article 2 of the Order in Council:

"2. The territorial jurisdiction determined by the present agreement comprises the counties of Quebec, Levis, Montmorency, Portneuf, Beauce, Dorchester, Megantic and Charlevoix."

II. The following paragraph is added immediately after article 5A of the said Order in Council:

"However, the calls for tenders upon which no decision has been given or which have remained in abeyance up to this date, shall not benefit by the exception indicated in the preceding paragraph."

III. The following paragraph is substituted for paragraph (c) of article 1 of the said Order in Council:

"(c) By 'Carpenter-joiner,' it is meant any workman who assembles pieces of wood, does carpentry work, repairs wooden objects and executes any woodwork with carpenters' tools."

**BAKERS AND BREAD DISTRIBUTORS, THREE RIVERS.**—The Order in Council for this industry was published in the *LABOUR GAZETTE*, Feb-

ruary, page 148. Following the request for a change noted in the *LABOUR GAZETTE*, April, page 323, a further Order in Council approved April 18 and published in the *Quebec Official Gazette*, April 20, amends the original by substituting the following paragraph for paragraph (d) of article 1:—

"(d) The wages of apprentice bakers shall be as follows:

First year.. . . .	\$ 5 per week
Second year.. . . .	7 per week
Third year.. . . .	10 per week"

**BAKERS, QUEBEC.**—A request for the modification of the Order in Council for this industry (*LABOUR GAZETTE*, February, page 148) has been published in the *Quebec Official Gazette*, April 6, page 1683, and includes: provision for wage rates being fixed in some cases according to amount of flour baked, etc.; special provisions for work in the counties of Portneuf and Lotbinière, wage rates for bakers of doughnuts and rolls of \$20 per week for first man, \$18 for second man, \$15 for third man, and \$8 for fourth man; also provision for wages being paid weekly.

**BUILDING TRADES, MONTREAL.**—The terms of the Order in Council governing building trades in Montreal are published above. A request for changes in its terms has since been made and printed in the *Quebec Official Gazette*, April 20, page 1941, and the request corrected as noted in the *Quebec Official Gazette*, April 27, page 2052. The changes requested are for the addition of wage rates for elevator mechanics at 75 cents per hour and their helpers at 52½ cents, for all work throughout the district, with double time for work after 5 p.m. and on Saturday afternoons, Sundays and holidays; the change in wage rates given in article 4 of the Order in Council from 40 to 50 cents per hour for plasterers and from 40 to 45 cents for roofers (slate and tile); provision for payment of time and one-half for overtime and work on New Year's Day, Labour Day and Christmas.

**PAINTERS, QUEBEC.**—A correction was published in the *Quebec Official Gazette*, April 6, to the request for the extension of this agreement (*LABOUR GAZETTE*, April, page 323), which correction provides that the agreement does not apply to building contracts signed before the publication in the *Quebec Official Gazette* of the Order in Council approving the request.

**BUILDING TRADES, VICTORIAVILLE.**—A correction to the application for the extension of this agreement (*LABOUR GAZETTE*, April, page 323) was printed in the *Quebec Official Gazette*, April 20, by changes in the list of contractors, parties to the agreement.

**BREAD DELIVERY MEN, QUEBEC.**—Application has been made and printed in the *Quebec Official Gazette* April 20, for the extension of an agreement between certain bakery proprietors and the National Catholic Union of Bakers of Quebec, Distributors of Bread, Cake and Pastry Section. The minimum wage provided is \$15 per week for delivery man in charge of one delivery and \$6 for second employee on a delivery, but employees employed exclusively with the de-

livery of orders which they have not solicited or with any other general delivery work shall not be considered as deliverers of bread, cake and pastry or vendors, but as employed deliverers only at a minimum wage of \$10 per week. Outside the city of Quebec and the town of Levis and outside a radius of 15 miles of their limits in the district of Quebec, the minimum wage scale may be reduced by 10 per cent. Hours: 72 per week.

## BRITISH COLUMBIA BOARD OF INDUSTRIAL RELATIONS

### Recent Orders Under Minimum Wage Acts and Hours of Work Act

**THE** Board of Industrial Relations of British Columbia which administers three major statutes of that province—the Female Minimum Wage Act, the Male Minimum Wage Act and the Hours of Work Act (LABOUR GAZETTE, June, 1934, pages 510-513)—has recently issued new Orders under all three enactments.

These orders are as follows:

#### Female Minimum Wage Act

##### ORDER (No. 5B) *relating to Janitresses in the Public Housekeeping occupation.*

Pursuant to the provisions of the "Female Minimum Wage Act," being chapter 48 of the Statutes of British Columbia, 1934, and the "Female Minimum Wage Act Amendment Act, 1935," the Board of Industrial Relations hereby orders:—

1. That Order No. 5A of the said Board relating to janitresses in the Public Housekeeping Occupation, dated the 9th day of November, 1934, is hereby rescinded.

2. This Order shall become effective on the 18th day of April, 1935.

##### ORDER (No. 21) *establishing a Minimum Wage in the Fruit and Vegetable Industry.*

Pursuant to the provisions of the "Female Minimum Wage Act," being chapter 48 of the Statutes of British Columbia, 1934, and the "Female Minimum Wage Act Amendment Act, 1935," the Board of Industrial Relations hereby orders:—

1. That where used in this Order the following expressions shall have the following meanings respectively:—

- (a) "Fruit and vegetable industry" includes the work of females engaged in canning, preserving, drying, packing, or otherwise adapting for sale or use any kind of fruit or vegetable.
- (b) "Experienced female employee" means a female employee who has worked in the fruit and vegetable industry for a period of two months;
- (c) "Inexperienced female employee" means a female employee who has worked in the fruit and vegetable industry for a period of less than two months.

2. That the minimum wage for every experienced female employee in the fruit and vegetable industry (except women to whom special licences are issued under sections 5 and 6 of chapter 48 of the said Statutes of British Columbia, 1934) shall be:—

- (a) The sum of twenty-seven cents (27c.) per hour for every hour up to ten (10) hours in any one day.
- (b) The sum of forty cents (40c.) per hour for every hour in excess of ten (10) hours and up to twelve (12) hours in any one day.
- (c) The sum of fifty-four cents (54c.) per hour for every hour in excess of twelve (12) hours in any one day.

3. That the minimum wage for every inexperienced female employee in the fruit and vegetable industry (except women to whom special licences are issued under sections 5 and 6 of chapter 48 of the said Statutes of British Columbia, 1934) shall be:—

- (a) The sum of twenty-five cents (25c.) per hour for every hour up to ten (10) hours in any one day.
- (b) The sum of thirty-seven and one-half cents (37½c.) per hour for every hour in excess of ten (10) hours and up to twelve (12) hours in any one day.
- (c) The sum of fifty cents (50c.) per hour for every hour in excess of twelve (12) hours in any one day.

4. This Order shall become effective on the 18th day of April, 1935, and shall supersede Order No. 3 of the said Board relating to the Fruit and Vegetable Industry, dated the 2nd day of May, 1934, and Order No. 3A (Emergency) of the said Board relating to the Fruit and Vegetable Industry, dated the 12th day of June, 1934, which said Orders are hereby rescinded.

#### Male Minimum Wage Act

##### ORDER (No. 18A)—

This order exempts stationary steam engines of apartment buildings from the provision of Order No. 18 (LABOUR GAZETTE, March, 1935, page 243). Instead, for minimum wage purposes, it places such employees in the same category as janitors, viz.:—

"That the minimum wage for every stationary steam engineer employed in any

apartment building shall be not less than the rates fixed for janitors by Order No. 23 of the said Board, dated the 17th day of April, 1935."

This order is effective April 18, 1935.

**ORDER (No. 22) establishing a Minimum Wage in the Fruit and Vegetable Industry.**

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, and the "Male Minimum Wage Act Amendment Act, 1935," the Board of Industrial Relations hereby orders:—

1. That where used in this Order the expression "fruit and vegetable industry" includes all operations in or incidental to the canning, preserving, drying, packing, or otherwise adapting for sale or use any kind of fruit or vegetable.

2. That the minimum wage for every employee employed in the fruit and vegetable industry shall be:—

(a) The sum of thirty-five cents (35c.) per hour for every hour up to ten (10) hours in any one day.

(b) The sum of fifty-two and one-half cents (52½c.) per hour for every hour in excess of ten (10) hours and up to twelve (12) hours in any one day.

(c) The sum of seventy cents (70c.) per hour for every hour in excess of twelve (12) hours in any one day.

3. That the minimum wage for every male person under the age of twenty-one (21) years employed in the fruit and vegetable industry shall be:—

(a) The sum of twenty-five cents (25c.) per hour for every hour up to ten (10) hours in any one day.

(b) The sum of thirty-seven and one-half cents (37½c.) per hour for every hour in excess of ten (10) and up to twelve (12) hours in any one day.

(c) The sum of fifty cents (50c.) per hour for every hour in excess of twelve (12) hours in any one day.

4. The aggregate number of male persons under the age of twenty-one (21) years employed in any plant or establishment in the fruit and vegetable industry at the rates specified in paragraph 3 hereof shall not exceed fifteen per centum (15%) of the whole number of male employees and male persons under the age of twenty-one (21) years in that plant or establishment.

5. This Order shall become effective on the 18th day of April, 1935.

**ORDER (No. 23) establishing a Minimum Wage in the Occupation of Janitor.**

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, and the "Male Minimum Wage Act Amendment Act, 1935," the Board of Industrial Relations hereby orders:—

1. That where used in this Order the expression "janitor" means and includes every employee and every male person under the age of twenty-one (21) years employed as janitor, janitor-cleaner, or janitor-fireman.

2. That the minimum wage for every janitor shall be thirty-five cents (35c.) per hour, ex-

cept for janitors referred to in sections 3, 4, 5, and 6 of this Order.

3. That the minimum wage for every janitor of any apartment building containing over fifty (50) residential suites, where the janitor resides on the premises, shall be one hundred and twenty-five dollars (\$125) per month.

4. That the minimum wage for every janitor of any apartment building containing not more than fifty (50) and not less than twenty-five (25) residential suites, where the janitor resides on the premises, shall be one hundred dollars (\$100) per month.

5. That the minimum wage for every janitor of any apartment building containing not more than twenty-four (24) and not less than thirteen (13) residential suites, where the janitor resides on the premises, shall be seventy-five dollars (\$75) per month.

6. That the minimum wage for every janitor of any apartment building containing less than thirteen (13) residential suites shall be thirty-five cents (35c.) per hour for each hour of work actually performed according to an agreement in writing between employer and janitor, copies of which agreement shall be in possession of employer and janitor.

The Board reserves the right to disallow any agreement entered into under this section if, in the opinion of the Board, such agreement does not comply with this Order.

7. When a janitor works in two or more apartment buildings the minimum wage shall be based upon the rates fixed in sections 3, 4, 5 or 6 of this Order, according to the combined number of residential suites in the two or more apartment buildings in which the janitor works.

8. When a janitor resides in any apartment building to which this Order applies, there may be deducted from his wages a sum equivalent to a fair rental value for such provided accommodation in proportion to the rental value of the other suites in the said apartment building.

Provided, however, that not more than twenty dollars (\$20) a month may be deducted from his wages for a suite of two (2) rooms and bathroom, and not more than five dollars (\$5) per month may be deducted from his wages for each room in excess of two (2) in the said suite.

In cases where the janitor is furnished with electricity and (or) gas, and the janitor uses the same, not more than the sum of four (\$4) per month may be deducted from his wages for the said electricity and (or) gas, or, in the alternative, meters shall be installed and the janitor shall thereupon pay for the consumption of the said electricity and (or) gas according to the said meters.

9. This Order shall become effective on the 18th day of April, 1935.

**Hours of Work Act**

**REGULATION No. 21—fruit and vegetable industry**—provides for the following exemption:—

The fruit and vegetable industry, which includes all operations in or incidental to the canning, preserving, drying, packing, or otherwise adapting for sale or use any kind of fruit or vegetable, is hereby exempt from the operation of the said Acts up to and including the 31st day of March, 1936.

## WORKMEN'S COMPENSATION IN NOVA SCOTIA IN 1934

THE Workmen's Compensation Board of Nova Scotia, in its annual report for the calendar year 1934, records an increase in accidents as compared with 1933, the total number of accidents reported being 8,357 as against 5,483 for the previous year. The total cost of all accidents for 1934 under Part I of the Act is estimated at \$1,086,455, which amount is exclusive of administration expenses and cost of safety associations.

According to the provisional statement of income and expenditure for 1934 the amount paid for medical aid in all classes was \$76,623.78 with \$8,327.49 expended on safety associations. The administration cost was \$85,764.81, the ratio of administration expenses to the compensation cost of accidents for the past eighteen years being 7.96 per cent.

For industries under Part I of the Act the total income for the year 1934, actual and estimated, amounted to \$1,038,064.49 and the estimated expenditure for the same period was \$1,180,547.46 showing a deficit for the year's operations of \$142,482.97. The surplus forwarded from prior years was \$528,139.42, leaving a surplus at December 31, 1934, of \$385,656.45; less \$20,000 for doubtful accounts, or a net surplus of \$365,656.45.

The 8,357 accidents reported to the Board in 1934 are classified as follows: fatal accidents (dependency established), 34; fatal accidents (no dependents), 15; fatal accidents (adjustment pending), 2; fatal accidents (claim non-compensable or disallowed), 6; permanent partial disability, 212; total disability (seven days or over), 5,717; accidents involving medical aid only, 1,755; accidents pending adjustment, 192; non-compensable accidents (other than fatal), 424.

At the end of the year, persons receiving compensation for 1934 and prior years in the form of a monthly pension were as follows: widows, 551; children under sixteen, 807; dependent mothers, 66; dependent fathers, 19; other dependents, 13; workmen disabled for life (partially or wholly), 920.

Of the industries under the Act—mining, lumbering, and woodworking, iron and steel, manufacturing, building and construction, public utilities and transportation—the provisional statistics of income and expenditure show that the first named was leading in revenue accrued from assessments and also in disbursements. The revenue derived from assessments on the mining industry in 1934 was estimated at \$614,985.71 while the expenditure was placed at \$673,581.77. Of this amount \$111,716.61 was for compensation paid other than pensions, \$95,386.51 was trans-

ferred to reserve for pensions, \$392,767.94 was for compensation estimated outstanding, the balance being for this industry's proportion for medical aid, safety associations and administration.

*Summary of Eighteen Years' Administration.*—During the eighteen years from the beginning of 1917 to the end of 1934, accidents in the industries within the jurisdiction of the Board to the number of 128,202 were reported. During that time 1,532 workmen were fatally injured. The amount actually paid to workmen or their dependents and for medical aid during the eighteen years from the beginning of 1917 to the end of 1934 was \$12,937,345.85, and the amount required at the end of 1934 for the purpose of paying life and other pensions and compensation to disabled workmen, and for medical aid, was \$7,000,756.14.

The total compensation paid or payable to workmen and their dependents and for medical aid for the eighteen years amounts to \$19,938,101.99. That amount does not, however, represent the entire cost of the accidents for the eighteen-year period, as the administration expense and cost of safety associations are not included.

There were 823 widows to whom pensions for life or until remarriage were awarded; 1,916 children under sixteen years of age were awarded monthly pensions while under that age; dependent mothers and fathers to the number of 433 were awarded compensation, 34 members of the family other than widows, children and parents, but who were wholly or partly dependent upon the earnings of the deceased workmen at the time of their respective deaths, received benefits, and life pensions were awarded to 4,556 workmen who were disabled, either wholly or partially.

Prior to January 1, 1920, medical aid was not furnished to injured workmen except in special cases. Since that date injured workmen have been entitled to free medical aid for thirty days from date of disability, and during the fifteen years that have elapsed the cost of medical aid was \$1,222,681.72. In the mining and iron and steel classes the greater portion of medical aid in connection with those classes is furnished under medical aid schemes and consequently is not furnished by the Board.

The report also gives completed statistics for 1933 dealing with accidents, completed by classes, months of occurrence of compensated accidents, time loss, average wage and age, nature of industries, causes of accidents, etc.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Reduction of Working Hours

ONE of the decisions of the 1934 Conference of the International Labour Organization was that the question of the reduction of working hours should be placed on the agenda of this year's Conference (LABOUR GAZETTE, July, 1934, page 659). In the interval, further information was to be obtained on this subject. Accordingly the Governing Body selected a number of industries in which the application of reduced working hours might be immediately considered, and the subject will therefore come before the Conference on the following basis: (a) public works undertaken or subsidized by Governments; (b) iron and steel; (c) building and contracting; (d) glass bottle manufacture; and (e) coal mines.

Dealing specifically with the above five industries the Monthly Summary of the International Labour Organization outlines the situation in various countries. It points out that hours of work have already been reduced to a greater or less extent by various countries, including Australia, Belgium, Canada, Czechoslovakia, Germany, Italy, Luxemburg and the United States of America. Others, such as Denmark and France, are contemplating such a reduction.

It indicates that with reference to the building industry the hours of work fixed by law or collective agreement are already less than forty-eight per week, particularly in Canada, Great Britain, Spain (Madrid), the Union of Soviet Socialist Republics and the United States of America. In Italy, the hours are forty per week, owing to the suppression of the necessity to make up for time lost on account of bad weather. Hours of work have generally been reduced with a view to remedying unemployment.

Reporting on the iron and steel industry the Summary states that "more than one and a half million persons are employed in these industries in the five countries where they are mainly carried on, namely: France, Germany, Great Britain, the Union of Soviet Socialist Republics and the United States of America. Unemployment in the industry is undoubtedly high. Mechanization and rationalization have resulted in much progress of all kinds."

The situation with respect to the coal mining industry is stated as follows:—

The coal mining industry is of first-rate economic importance. It supplies a large number of other industries with power or raw materials. It employs millions of workers (five and a half million persons employed in

twenty-one countries for the whole mining and quarrying industry—in which the coal mining industry has by far the most important part). Unemployment in the industry is very serious. To ameliorate it, short time is often resorted to—the number of shifts worked per week or month being reduced. Hours of work are everywhere strictly regulated and the application of national legislation does not appear to give rise to special difficulties. The International Labour Conference has already adopted, for underground work in coal mines, a Convention limiting the maximum working day to seven and three-quarter hours.

### Unemployment Among Young Persons

In the last issue of the LABOUR GAZETTE there was given a brief summary of a recent report prepared by the International Labour Office on unemployment among young persons, which subject has been placed upon the agenda of the 1935 conference. Further information since received from the Monthly Summary of the International Labour Organization estimates that of the approximately 25 million unemployed throughout the world, about one-fourth or 6 or 7 million, are young persons under 25 years of age.

The situation in regard to the unemployment of young persons in various countries, on the most recent dates for which information was available is summarized as follows:—

In Czechoslovakia, in February, 1933, 22·8 per cent of the unemployed were aged from 14 to 24 years.

In Denmark, in May, 1933, 28·1 per cent of the unemployed were between the ages of 18 and 25 years.

In Finland, in October, 1933, 33·3 per cent of the unemployed were between 16 and 25 years of age.

In Germany, in June, 1933, 26·1 per cent of the unemployed were under 24 years of age; in June, 1934, this percentage was 18·8.

In Great Britain, in 1931, 30·2 per cent of the unemployed were between 14 and 24 years of age.

In Hungary, in 1930, 42 per cent of the unemployed were under 24 years of age.

In Italy, in 1932, 41·5 per cent of the unemployed were between 15 and 25 years of age.

In the Netherlands, in October, 1933, 27·8 per cent of the unemployed were under 25 years of age.

In Norway, in 1933, 27 per cent of the unemployed were between 18 and 24 years of age.

In Sweden, in November, 1933, 33·7 per cent of the unemployed were between 16 and 25 years of age.

In Switzerland, in July, 1934, 15 per cent of the unemployed were under the age of 24 years.

In the United States, in April, 1930, 27·6 per cent of the unemployed were between 15 and 24 years of age.

Emphasizing the importance of the problem, it is pointed out that its special seriousness "is to be found in the particularly unfortunate consequences of continued idleness for young people, more than for older persons. If adults, after long years of work, are unable to face the difficulties of life, how can young people on their own resources successfully resist the demoralizing effects of prolonged unemployment?"

In an endeavour to remedy this grave situation, a large number of countries have taken various steps, which the International Labour Office analyses in the report prepared to serve as the basis of the discussions of the Conference.

It was considered that the question can be more suitably dealt with by a Recommendation than by a Draft Convention. Most of the measures to be taken to ameliorate unemployment among young persons do not appear to require that countries should undertake the mutual liabilities involved by an international convention, but rather call for the pooling of experience gained with a view to determining the most effective methods of dealing with the problem.

Among these measures, the report pays particular attention to the following: that the minimum age for leaving school and being admitted to employment should be fixed now at not less than fifteen years; the creation of an increased number of technical schools; the organization of vocational training centres in public employment agencies or in connection with them; the establishment of recreational centres, physical training centres, reading rooms, etc., where young unemployed persons could pass their enforced leisure time.

#### **70th Session of Governing Body of International Labour Office**

The Governing Body of the International Labour Office held its 70th session at Geneva from April 11 to 13. The Chairman announced in opening the sitting that as the result of decisions taken at the last session, the composition of the Government Group of the Governing Body was now as follows: Germany, United States of America, Argentina, Brazil, China, Czechoslovakia, Finland, France, Great Britain, India, Italy, Japan, Mexico,

Poland, Spain and the Union of Soviet Socialist Republics.

The Chairman extended a welcome to several new members who were present for the first time. The Government of the United States of America and the Government of the Union of Soviet Socialist Republic are each entitled now to occupy one of the seats on the Governing Body allotted to the eight states of chief industrial importance. The Government of the United States, he said, had exercised this right by appointing as its representative Mr. Richardson Saunders, Assistant to the Secretary of Labour. The Government of the Soviet Union had appointed as its representative Professor Boris Marcus, Chief of the Labour Section of the State Planning Commission. The Chairman expressed the satisfaction that he felt at the presence of both these gentlemen and his hope that collaboration between the Soviet Union and the International Labour Organization might develop under the best possible conditions. The Chairman further announced that, with a view to associating the United States of America with the work of the Organization, the employers' group and the workers' group had respectively appointed representatives of the United States employers' and workers' organizations to sit on the Governing Body. The employers representative was Mr. Henry Dennison of the U.S. Chamber of Commerce, and the workers' representative was Mr. Dubinsky, Vice-President of the American Federation of Labor.

The Chairman extended a welcome also to new representatives of the Governments of Mexico and China, and to Mr. Bishop, of the Employers' Federation of New Zealand, who at this session took the place of Mr. Gemmill, the South African Employers' representative.

Mr. Richardson Saunders, the U.S. Government representative, expressed his gratitude for the kind reception which had been given him and went on to say that for the past two years all their efforts had been devoted towards improving the welfare of the people and securing for the wage-earners those rights which are essential towards raising the standard of life. Legislation now in the making would, he felt, be of great aid to wage-earners in the future. It would set up a certain definite security for men, women and children by providing unemployment insurance, old-age pensions, aid to crippled and dependent children, and public health service. It would mean the development of a more stable income, which should restrict any future depression. All this was in keeping with Presi-

dent Roosevelt's program. "It is our hope," he said, "that the United States, in close association with the other Member nations of this great Organization, may wield an influence that shall benefit not only its own citizens but working men and women throughout the world."

Professor Marcus, the Russian representative, also thanked the Chairman for his kind words of welcome and expressed the hope that he would be able to follow the work of the Governing Body with profit, and that the recognized achievements of the social legislation of his country and its successful

application may prove of the greatest use of the work of the Organization.

The 71st Session of the Governing Body will open at Geneva on May 31.

### New Assistant Director of I.L.O.

The Director of the International Labour Office has appointed Mr. John G. Winant, a citizen of the United States of America, and former Governor of the State of New Hampshire, to be an Assistant Director of the Office. Mr. Winant has had a distinguished career in the United States and has always taken a keen interest in social and economic questions.

### Milk Prices Fixed in Lethbridge

The Board of Public Utility Commissioners established in Alberta under the Public Utilities Act, 1923, published recently a new order respecting the milk and cream supply in Lethbridge. Earlier orders fixing the prices to be charged for milk and cream in Edmonton and Calgary were noted in the LABOUR GAZETTE, July, 1934, page 584, and October, 1934, page 900.

Under the new order, the minimum price to be paid to producers by distributors of milk and others purchasing milk in bulk for distribution as fluid milk in Lethbridge is \$1.80 per 100 pounds (based on 3.6 per cent butter fat test).

The minimum prices to be charged to consumers by distributors are 6 cents, 7 cents and 12 cents per pint according to the butter fat content, and 10 cents, 11 cents, 12 cents and 20 cents per quart according to the butter fat content. For milk sold by distributors to stores, the price is one cent per bottle less than retail prices, and the milk sold by stores must not be less than the retail prices as above. Wholesale prices to hotels, restaurants, cafes, bakeries, factories, and public institutions purchasing milk for use or consumption on the premises are 32 cents, 35 cents and 70 cents per gallon according to the butter fat content and 9 cents, 11 cents and 18 cents per quart. The price to hospitals to be 28 cents per gallon. Other sections of the order fix the prices for cream and buttermilk. The prices set out in this order are applicable from March 31, 1935.

With the hope of reducing accidents to workers and of bringing industry and the medical profession closer together, a new

association of physicians and surgeons, many of whom are directors of New York corporations, is being formed in the United States. The new group will be known as the Association for the Advancement of Industrial Medicine and Surgery. The headquarters of the Association will be at 370 Lexington Ave., New York City

Canadian coal production in March amounted to 1,030,159 tons; in the preceding month 1,009,538 tons were produced and in March, 1934, the output was 1,030,366 tons. The average production for March during the past five years was 1,019,015 tons. During March, 1935, a bituminous coal production totalled 714,532 tons, sub-bituminous coal, 51,102 tons, and lignite coal, 264,525 tons.

The annual report of the Director of Child Welfare of Nova Scotia for the year ending September 30, 1934, shows that during this period 159 children were under the care of provincial Children's Aid Societies; 180 children were placed in foster homes; 43 children were returned to the care of parents or guardians; 155 children were removed from foster homes; 638 were in temporary homes; and 33 were placed in wage homes. The total number of children in the care of various societies throughout the Province from the time of their organization to September, 1934, was 2,437.

Reference was made in the last issue of the LABOUR GAZETTE (page 343) to the Economic Security Bill then before the United States Congress. This measure has since been adopted by the House of Representatives and embodies practically everything outlined in the President's message of January 17 (LABOUR GAZETTE, February, 1935, page 100).

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JANUARY TO MARCH, 1935

**B**USINESS transacted by the offices of the Employment Service of Canada during the quarter January to March, 1935, showed a marked decline from that recorded during the corresponding quarter of 1934, as there was a decrease of 26 per cent in vacancies offered and of over 27 per cent in placements effected. All groups, except manufacturing, mining and services, recorded reductions in both instances, the loss in construction and maintenance, under which are listed relief placements on highways, streets and sewers and other projects sponsored by the Dominion and Provincial Governments, being especially heavy. The only marked gains were in services and manufacturing and these were insufficient to affect to any great extent the total loss reported. Logging showed a decline in vacancies, but a slight increase in placements. Provincially, all except Quebec registered reduced vacancies and placements, the gain in this province being chiefly due to more placements effected in the highway division of the construction and maintenance group. Ontario registered the greatest loss, which also took place in the construction group.

From the chart on page 450, which accompanies the article on the work of the Employment Offices for the month of March, it will be seen that the curve of vacancies and of placements in relation to applications showed a downward trend during the first half of January and the entire month of March, but followed an upward course during the latter part of January and throughout February. At the close of the quarter, however, the level of the curve of vacancies was over 7 points and that of placements nearly 9 points below that recorded at the close of the corresponding quarter a year ago. During the period January to March, 1935, there was a ratio of

56.3 vacancies and of 53.3 placements for each 100 applications for employment, as compared with 56.0 vacancies and 53.7 placements during the corresponding quarter a year ago.

The average number of positions offered daily during the quarter under review was 1,049, of applications registered 1,865, and of placements effected 994, in contrast with a daily average of 1,322 vacancies, 2,359 applications and 1,266 placements in regular and casual employment during the first quarter of 1934.

During the three months January to March, 1935, the offices of the Employment Service reported that they had made 80,770 references of persons to positions and had effected a total of 75,500 placements, of which 44,949 were in regular employment and 30,551 in casual work. Of the placements in regular employment, 33,248 were of men and 11,701 of women, while casual work was found for 22,979 men and 7,572 women. A comparison with the same period of 1934 showed that 96,195 placements were then made, of which 45,794 were in regular employment and 50,401 in casual work. Applications for employment during the period under review were received from 103,486 men and 33,205 women, a total of 141,691 persons, in contrast with the registration of 179,215 during the same period of 1934. Employers notified the Service during the first quarter of 1935 of 79,708 positions, of which 56,638 were for men and 23,070 for women, as compared with 100,435 opportunities for work offered during the corresponding quarter in 1934.

In another section of this issue will be found a report in detail of the transactions of the Employment Offices for the month of March, 1935.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF APRIL, 1935

### Reports of Superintendents of the Employment Service

THE employment situation at the end of April, 1935, was reported by the superintendents of the Employment Service of Canada to be as follows:—

Farm work in the Maritime Provinces was somewhat retarded, due to the late spring, but farmers were preparing their land for spring ploughing. There was not much off-shore fishing, owing to drift ice and some shore fishermen had had only a short period of work. The lobster season, however, was open, and canneries were supplying employment to a large number of persons. Preparations were being made by the logging companies for the spring drives, which would start very shortly. Mines in the New Glasgow area operated from one to four days per week, while those in Cape Breton and vicinity worked from two to four days. Manufacturing was only fair. Iron and steel companies, however, reported increased payrolls and little idleness. Not much new construction work was in evidence, but shipyards were busy with repairs to damaged vessels and relief work continued on government projects. Transportation, both passenger and freight, except at Halifax, was good. Trade was fair, although retail stores reported some slackening after the Easter rush. Spring cleaning caused an extra demand for day workers in the Women's Department, fewer requests being made for regular household service.

Farming in the Province of Quebec showed some improvement, and in the logging industry there was considerable activity on the spring drives in Chicoutimi and Hull districts, but dullness was reported from Quebec. Mining was very quiet. Little change was reported in manufacturing. More construction workers were in demand in the building trades, particularly at Three Rivers and Montreal. In the latter city a number of men also found employment cleaning streets and sidewalks. Transportation was inactive. Trade was better throughout the province. More opportunities were listed for women workers, although the number of applicants in Montreal showed a decline. Day work was also available for more women, due to spring cleaning.

While the call for farm help in Ontario was fairly well maintained, it was not quite so large as that of the past few weeks. Logging and mining were quiet, but preparations were being made for the spring drives in the former industry, and in the latter, several properties in the Ramore district had commenced operations. Sufficient men were available locally for either class of labour

required. Slight improvement was noted in manufacturing in several centres, with factories working steadily and staffs being increased by the recall of former employees, while in other localities, some slackness prevailed. Although alteration, renovation and repair work had lately increased, the volume was insufficient to take care of all skilled artisans. A number of fair-sized projects throughout the province were pending, however, and this, with relief schemes already underway, would help to absorb some of the unemployed. In the Women's Department the demand continued steady for day workers, domestics and hotel and restaurant employees, with the usual difficulty in obtaining experienced cooks and cooks-general.

Noted improvements were recorded in the demand for farm labour in the Prairie Provinces. Seeding had started in some localities and conditions appeared promising. Logging at Edmonton was active, elsewhere, quiet. Coal mining was slack. Manufacturers at Winnipeg and Edmonton were busier. Building construction showed slight change, and in most centres was quiet, scarcely any work being offered other than that on government projects. Railroad operating was fair. Business firms reported that there was a greater volume of trade than during the corresponding season a year ago, particularly in grocery, hardware and produce lines. Orders for domestics and housekeepers in the Women's Division showed an increase, but a decrease was reported in applicants, with vacancies for domestic help in rural districts difficult to fill.

The demand for farm help in British Columbia showed an increase, but wages were low. Prospects were favourable for the fruit crop, but practically no extra help had been hired as yet. The logging industry was slowly picking up, but plenty of men were available for all work offered. Coal mining was slack; considerable work, however, was going on in metallic mining districts. Factories at Nelson were working as usual. Little building construction was in progress and tradesmen were mostly limited to short jobs and small contracts. Road work was also quiet, with only relief men employed on this and other government schemes. Dry dock and shipyards were slack at Prince Rupert and Victoria, but longshore men were fairly busy at all ports. Trade showed scarcely any change. Experienced help was scarce in the Women's Division, many of the applicants ranging in age from sixteen to nineteen years, and these lacked the necessary training to fill the positions offered.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN MARCH, 1935

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on April 1 was 9,066, the employees on their payrolls numbering 874,556 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for March was 1,735 having an aggregate membership of 160,062 persons, 16·7 per

cent of whom were without employment on April 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 65 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of April, 1935, as Reported by Employers

Employment at the beginning of April showed a seasonal curtailment, according to data tabulated in the Dominion Bureau of Statistics from 9,066 establishments whose staffs aggregated 874,556 persons, compared with 902,138 on March 1, 1935. Statistics furnished by leading employers show that industrial activity at the beginning of April has suffered a between-seasons' contraction in fourteen of the fifteen years since 1920. Ordinarily, this mainly results from the release of bushmen following the completion of the season's logging program, before any considerable numbers of workers have been absorbed into the outdoor industries opening up in the spring and early summer. The general loss at the beginning of April, 1935, exceeded the average decline on April 1 in the years for which statistics are available, being, in fact, larger than in any other year of the record except 1921. Logging during the past winter was exceptionally active, entailing a correspondingly marked reaction when the camps closed for the season, while the resultant situation has this year been aggravated by the release of unusually large numbers of men from railway and highway construction and maintenance work. These factors are chiefly responsible for a decrease in the crude index (based on the 1926 average as 100) from 96·4 on March 1 to 93·4 at the beginning of April, accompanied by a decline of over two points in the seasonally corrected index, as illustrated in the chart opposite. On April 1 in preceding years of

the record, the unadjusted index was as follows: 1934, 91·3; 1933, 76·0; 1932, 87·5; 1931, 99·7; 1930, 107·8; 1929, 110·4; 1928, 102·3; 1927, 97·4; 1926, 92·5; 1925, 88·3; 1924, 90·4; 1923, 88·7; 1922, 81·8, and 1921, 85·1. Despite the marked falling-off in employment on April 1, 1935, the index was higher than on the same date in any of the last three years, and was also higher than in any of the years from 1921 to 1926.

There was an increase on April 1 in manufacturing, especially of leather, pulp and paper, textile and iron and steel products. Metallic ore mining, building construction and trade also showed improvement. On the other hand, logging camps, as already mentioned, reported very large seasonal reductions following an unusually busy season in bush work, and there were important declines in highway and railway construction and maintenance; the persons released by the employers furnishing data in these industries numbered approximately 17,500 from logging and 17,200 from road and railway construction and maintenance. Curtailment of a seasonal nature also occurred in coal-mining, and transportation was rather slack.

### Employment by Economic Areas

The tendency was unfavourable in all five economic areas; the losses in Quebec and Ontario were particularly large, those in the Maritime Provinces were also considerable, while elsewhere only small reductions were noted.

*Maritime Provinces.*—There was on April 1 a further decrease in employment in the Maritime Provinces; the 626 co-operating employers reduced their payrolls from 70,241 persons on March 1 to 68,184 at the beginning of April. Logging showed a pronounced seasonal falling-off, and activity declined in shipping, railway operation, highway construction and iron and steel plants. In some cases, these decreases were also seasonal in character. On the other hand, food factories, railway construction and retail trade showed improvement. Employment was in much the same volume as at the beginning of April, 1934, when substantially larger reductions had

maintenance and transportation were also slacker. Statements were received from 2,170 firms, with 235,855 employees, as against 250,650 on March 1. The index, at 85.9 on April 1, 1935, was fractionally higher than on the same date of last year, when the curtailment indicated was on a smaller scale. The trend on this date has almost invariably been retrogressive, but the losses at the beginning of April, 1935, were only once exceeded in the years since 1920, viz., by those in 1921. As on the same date of last year, the exceptionally large decline at the latest date mainly reflects seasonal reaction from the intense activity in bush operations which characterized

#### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

been indicated; the index stood at 95.8 on the latest date, while on April 1 of last year, it was 95.1.

*Quebec.*—Manufacturing, shipping and building afforded more employment in Quebec; within the manufacturing group, textile, leather, pulp and paper and iron and steel factories recorded considerably greater activity, while there were smaller gains in tobacco and beverage, clay, glass and stone and other plants. On the other hand, logging reported very large seasonal contractions; there were pronounced losses in the construction departments of the railways as track-clearing workers were released, and highway construction and

the past winter, together with the release of men temporarily employed on highway and railway construction and maintenance work following heavy snow-falls; some 10,600 workers were displaced from logging camps, while those laid off from highway and railway construction and maintenance numbered nearly 6,700.

*Ontario.*—Employment showed curtailment in Ontario, where 4,007 employers had reduced their forces by 10,260 workers since the preceding month, bringing them to 384,396 on April 1. An increase had been registered by the firms making returns for the same date in 1934, but employment then was at a rather

lower level, the index standing at 98·7, compared with 100·7 on April 1 of the present year. The experience of the years since 1920 shows that activity customarily declines in Ontario at the beginning of April, there having been contractions in eleven of the fourteen previous years; the decrease on the date under review, however, was greater than in any of these eleven years, with the exception of 1930, when the contraction involved practically the same number of workers.

Manufacturing showed further recovery at the first of April, notably in textile and iron and steel products, while improvement also took place in the leather, pulp and paper, chemical, clay, glass and stone, non-ferrous metal and miscellaneous manufacturing industries. In the non-manufacturing groups, mining, transportation, building construction and trade reported increased activity. Logging, however, released large numbers of workers owing to the completion of seasonal operations, and highway and railway construction were also slacker, the losses on the roads and highways being especially pronounced.

*Prairie Provinces.*—As is customary in the early spring, employment in the Prairie Prov-

inces declined on April 1; the reduction, however, was much smaller than the average indicated at that date in the last fourteen years, being, in fact, less than in any other of the twelve years in which curtailment was reported; in 1928 and 1929, the tendency had been upward. The index, at 86·9 on the date under review, was 3·6 points higher than on April 1, 1934. Most of the falling-off at the beginning of April in the present year took place in coal mining and logging. On the other hand, manufacturing, transportation and trade reported improvement. The working forces of the 1,329 co-operating employers aggregated 109,593 persons, compared with 109,984 on March 1.

*British Columbia.*—Very little general change was indicated in British Columbia, according to returns tabulated by the Bureau from 934 firms with 76,528 employees, or 79 fewer than in the preceding month. An increase had been noted on April 1 of a year ago, but employment was then in smaller volume. There were gains on the date under review in manufacturing (especially of lumber products), and in logging, railway construction and trade, while highway construction and coal mining companies released help.

Relative Weight of Employment by Economic Areas as at Apr. 1, 1935.....	100·0	7·8	27·0	43·9	12·5	8·8

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

Table 1 gives index numbers by economic areas.

### Employment by Cities

Employment increased in Toronto, Hamilton, Windsor and the adjacent Border Cities and Winnipeg, while losses were indicated in Quebec City, Montreal and Vancouver, and there was no general change in Ottawa.

*Montreal.*—A contraction in industrial activity occurred in Montreal, according to 1,276 employers, who reported 125,177 persons on their payrolls, as compared with 128,778 on March 1. A smaller decline had been noted on the same date of last year, but employment then was in slightly less volume. Manufacturing showed improvement on April 1, 1935, over the preceding month, textiles, leather and iron and steel reporting considerable increases in this comparison. On the other hand, there were decided losses in work on the streets and roads, owing to the release of snow-clearing staffs, and transportation was also quieter.

*Quebec.*—Manufacturing and construction registered moderate gains in Quebec City, while transportation and services were slacker;

the result was a decrease of 75 in the working forces of the 162 firms making returns, who had 12,241 employees on April 1. General improvement had been noted at the beginning of April in 1934, when the index, at 95.4, was two points higher than on the latest date.

*Toronto.*—Toronto employers reported a further substantial increase, mainly due to a betterment in manufacturing and building construction; within the former group, the textile and iron and steel divisions reported the greatest gains. On the other hand, work on the streets and roads, in hotels and restaurants and in trade was rather quieter. The working forces of the 1,347 cooperating firms totalled 115,143 persons, compared with 113,976 in the preceding month. Employment was more active than on the same date last year, when a larger advance had been indicated; the index then stood at 92.7, or just over two points lower than on April 1 of the present year.

*Ottawa.*—Very little general change occurred in Ottawa, moderate gains in manufacturing being nearly offset by small losses in transportation and some other divisions; an aggregate payroll of 12,720 workers was reported by the 168 employers whose statistics

Relative Weight of Employment by Ci- ties as at Apr. 1, 1935	14.3	1.4	13.2	1.5	3.2	2.1	4.1	3.2

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

were tabulated, and who had 12,704 in their last report. The index, at 99·3, was slightly higher than in the early spring of 1934, when an advance had been recorded.

*Hamilton.*—Manufacturing and construction afforded greater employment in Hamilton, while other industries showed little general change. Returns were compiled from 269 firms employing 28,026 persons, or 592 more than on March 1. The level of employment was higher than on the same date in the last three years.

*Windsor and the adjacent Border Cities.*—There was a further increase in employment in the Border Cities on April 1. Data were received from 162 firms employing 17,948 workers, as against 17,187 in the preceding month. Automobile plants reported an important share of the additions made to the staffs of the co-operating employers, while those in other industries showed only slight changes. Activity was decidedly greater than in any other month in the years since 1930; the improvement noted on the same date of 1934 had been on a smaller scale.

*Winnipeg.*—Employment again advanced in Winnipeg, where the payrolls of the 439 em-

ployers furnishing statistics aggregated 35,640 workers, as compared with 35,487 in the preceding month. Construction and manufacturing were brisker, while transportation reported moderate curtailment, and the fluctuations in the other divisions were slight. On April 1, 1934, a decline had been noted and the index then was lower, standing at 79·7, compared with 83·5 on the date under review.

*Vancouver.*—A decrease in the employment occurred in Vancouver, according to 397 firms with 28,404 employees, as compared with 28,583 in the preceding month. The loss was principally in construction, while other industries showed little general change. An increase had been reported at the beginning of April last year, but employment generally was then at a rather lower level; the index, at 89·7 on the latest date, was 4·9 points higher than on April 1, 1934.

Index numbers by cities are given in Table 2.

### Employment by Manufacturing Industries

Further moderate improvement was recorded in manufacturing; the most pronounced gains occurred in iron and steel and textiles, in both of which they were above the average for the last fourteen years. Non-ferrous

Relative Weight of Em- ployment by Industries as at Apr. 1, 1935.....	100·0	53·8	3·3	6·1	2·4	10·3	10·7	2·8	10·6

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

metal, leather, pulp and paper, chemical, clay, glass and stone and some other groups also reported increased activity. On the other hand, small declines were indicated in vegetable food, rubber and tobacco and beverage plants, that in tobacco factories being seasonal in character. Statements were received from 5,394 manufacturers, employing 470,475 operatives, as compared with 464,238 in the preceding month. The general increase was considerably greater than the average for the years since 1920, and brought the seasonally corrected index to a level higher than in any month in the last three years. The unadjusted index rose from 92·7 on March 1 to 93·9 at the beginning of April, while on April 1 in previous years of the record it was as follows: 1934, 88·1; 1933, 76·0; 1932, 87·3; 1931, 99·7; 1930, 111·3; 1929, 116·5; 1928, 106·6; 1927, 101·5; 1926, 96·6; 1925, 91·2; 1924, 93·6; 1923, 92·6; 1922, 84·4; and 1921, 87·3.

*Animal Products, Edible.*—Moderate improvement was noted in dairies, fish canneries

and meat-packing establishments. Statements were tabulated from 248 firms employing 19,247 workers, as against 19,102 at the beginning of March. A slight decrease had been recorded on April 1, 1934, when activity was at a lower level.

*Leather and Products.*—Boot and shoe factories reported substantial increases in personnel, while other branches of the leather group showed little general change. The 278 co-operating employers enlarged their payrolls from 21,123 persons in the preceding month, to 21,797 at the beginning of April. A rather smaller advance had been indicated on April 1 a year ago, when the index of employment was nearly eight points lower.

*Lumber and Products.*—Small gains were noted in container, vehicle and other wood-using factories, but rough and dressed lumber mills showed curtailment. The result was a decline of 63 in the lumber group as a whole, this being contrary to the usual seasonal movement at the beginning of April in the

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	April 1, 1935	March 1, 1935	April 1, 1934	April 1, 1933	April 1, 1932	April 1, 1931	April 1, 1930

\*The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

experience of the years since 1920. Statistics were compiled from 796 manufacturers, with 32,958 employees, as compared with 33,021 at the beginning of March, 1935. The index, at 63.0 on April 1, 1935, was 2.7 points higher than on the same date of last year.

*Plant Products, Edible.*—There was a falling-off in employment in vegetable foods in the period under review, improvement in sugar and syrup refineries being more than offset by losses in other divisions of this group. Returns were tabulated from 420 firms whose payrolls aggregated 25,858 persons, as compared with 25,989 on March 1. The index was slightly higher than at the beginning of April, 1934, when an advance had been noted as compared with the preceding month.

*Pulp and Paper Products.*—The movement in pulp and paper products was upward, especially in the production of pulp and paper. According to data received from 586 firms in the industry as a whole, they employed 56,112 workers, as compared with 55,253 in their last report. Employment was in greater volume than on April 1, 1934; a minor increase had then been indicated.

*Rubber Products.*—Activity in 54 rubber works declined, 186 persons being released from their staffs, which totalled 11,812. Improvement had been shown on the same date last year, and the index then was fractionally higher.

*Textile Products.*—There was a further increase in employment in textiles at the beginning of April, chiefly in garment and personal furnishing, knitting and headwear factories, while cotton and woollen mills were slacker. More extensive improvement had been noted on April 1, 1934, but the increase on the date under review considerably exceeded the average noted on April 1 in the fourteen preceding years for which data are available. Statements were compiled from 957 manufacturers with 95,107 employees, or 1,686 more than on March 1, 1935. Most of the gain occurred in Quebec and Ontario. The index was slightly higher than on the corresponding date of last year.

*Tobacco, Distilled and Malt Liquors.*—Seasonal reductions in employment were recorded in this group, 163 persons being released from the working forces of the 164 co-operating establishments, which employed 15,486 workers on the date under review. Most of the decline occurred in Ontario, where tobacco factories were slacker. The index was higher than in the spring of last year, when greater curtailment had been indicated.

*Chemicals and Allied Products.*—One hundred and eighty-five plants turning out chemicals and allied products reported 9,970

employees, as compared with 9,598 in their last return. All provinces showed gains, those in Ontario being most extensive. The general advance exceeded that indicated on the corresponding date in 1934; the index was then nearly ten points lower.

*Clay, Glass and Stone Products.*—There was an increase in the personnel of building material works, 190 of which employed 6,574 persons as against 6,110 in their last report. A less pronounced advance had been indicated on April 1, 1934, when the index was rather lower.

*Electric Current.*—Moderate improvement was shown in this group, in which 98 plants reported 13,470 employees, or 137 more than at the beginning of March. There were gains in Ontario, with only minor changes elsewhere. The index of employment was slightly higher than on April 1, 1934; small increase had then been reported.

*Electrical Apparatus.*—Activity in electrical appliance factories increased to some extent, according to the 108 co-operating firms, who reported 11,587 persons on their payrolls, as against 11,453 in their last report. A smaller gain had been noted on April 1, 1934, when the index was many points lower.

*Iron and Steel Products.*—Statistics were received from 830 manufacturers in this group, whose staffs were enlarged by 1,889 workers to 111,056 at the beginning of April. There were considerable gains in the automobile, agricultural implement, machinery, iron and steel fabrication, iron pipe, sheet metal and other groups, while rolling mills released employees. Improvement was shown in all except the Maritime Provinces, that in Ontario being most noteworthy. Larger additions to the personnel had been recorded in the same period of last year, and the index number was then nearly eleven points lower than on April 1, 1935, when it reached its highest point since the summer of 1931.

*Non-ferrous Metal Products.*—Returns tabulated from 154 manufacturers in this group showed that they employed 18,402 persons, as against 18,118 on March 1. Most of the increase took place in the lead, tin, zinc and copper division. The improvement was chiefly in Ontario. The level of employment was much higher than at the beginning of April in 1934, although a larger advance had then been indicated.

*Mineral Products.*—Practically no change occurred in the number of workers in these industries at the beginning of April, according to data received from the 124 co-operating establishments, in which 12,827 persons were employed. The index of employment in this

group was the same as in the corresponding period of last year, when a reduction had been reported.

### Logging

Continued and larger seasonal losses were shown in logging camps, 315 of which reduced their payrolls from 46,690 men on March 1 to 29,196 on the date under review; while this decline has been exceeded in the spring of some other years of the record, it was nevertheless very large, being substantially above the average for the years since 1920. The contraction represents reaction from an exceptionally active logging season. The most extensive decreases at the beginning of April were in Quebec, although all provinces except British Columbia indicated reductions. Smaller contractions had been reported on April 1, 1934, and the index number then was fractionally higher than at the latest date, when it stood at 104.3; employment in the early spring of this year and last was higher than in the same period of other years since 1920, except 1923, when the April 1 index was the same as on the date under review.

### Mining

*Coal.*—As is customary at the beginning of April, there was, on the whole, a falling-off in employment in coal mines during the period being reviewed; this occurred chiefly in the Western coal fields. Data were received from 101 operators, whose staffs included 23,879 employees, as against 24,757 in their last report. The index was four points higher than in the spring of last year, when much greater declines had been reported.

*Metallic Ores.*—Returns were received from 139 firms in this group, employing 24,552 workers, or 380 more than at the beginning of March. An increase had also been indicated on the same date in 1934, when the index stood at 165.4, compared with 207.2 at the beginning of April of the present year.

*Non-metallic Minerals, other than Coal.*—A slight gain occurred in this group; 75 firms employed 5,300 persons, as compared with 5,214 in the preceding month. A small advance had also been recorded by the employers furnishing statistics on April 1 of last year, when activity was at a lower level.

### Communications

According to information received from 85 communication companies and branches, their staffs were practically unchanged in number from the preceding month, there being an increase of only 46 persons in the reported

payrolls, which aggregated 20,570. Little general change had been indicated on April 1, 1934; the index then was fractionally lower.

### Transportation

Declines were noted in steam railway operation; shipping was rather more active, while there was no general change in local transportation. Statistics were compiled from 392 employers of 90,079 workers, as compared with 90,300 on March 1. Of the former number, 23,788 persons belonged in the local transportation, 55,238 in the steam railway and 11,053 in the water transportation division. The present late season has retarded spring-time activity in this group, which ordinarily shows an advance on April 1. Employment in transportation was in practically the same volume as on the corresponding date last year, when a much greater decrease had been recorded.

### Construction and Maintenance

*Building.*—Statements were compiled from 640 building contractors, with 18,195 persons in their employ, or 809 more than in their last report. A rather smaller gain had been indicated on April 1, 1934, and the index then was several points lower.

*Highway.*—Pronounced curtailment in staffs was noted on highway construction and maintenance; 305 contractors employed 52,903 men, as compared with 67,681 in the preceding month. All provinces reported decreased activity, the losses in Ontario being particularly large. Comparatively small reductions had been shown on April 1 last year, when the number employed in this work was decidedly greater than in the period under review. Unemployment relief projects continue to employ a considerable proportion of those reported in this industry at the latest date.

*Railway.*—There was a pronounced curtailment in employment in the construction departments of the railways in Quebec, and a smaller loss in Ontario, while increases were indicated in the Maritime Provinces and British Columbia. Most of the general decline was due to the completion of track-clearing operations necessitated by the winter's severe storms. The working forces of the 34 co-operating contractors and divisional superintendents aggregated 22,665 men, whereas in the preceding month they had 25,101 employees. The index number was fractionally higher than in the spring of 1934, when a much greater decline had been recorded.

### Services

This group showed further slight curtailment, according to 444 firms with 24,012 workers, compared with 24,088 in the preceding month. Laundries and dry-cleaning establishments were rather busier, but hotels and restaurants released some employees. A general increase had been reported at the beginning of April, 1934; employment was then in practically the same volume as on the date under review.

### Trade

There was an increase in the aggregate forces of the 1,142 co-operating wholesale and retail establishments, which employed 92,730 workers on April 1, as compared with 91,987 at the beginning of March. This increase was slightly below the average reported on April 1 in the years since 1920, activity in the group

probably having been affected by the late Easter and the unseasonable weather generally prevailing at the beginning of April. The advance indicated on the same date a year ago was decidedly larger; the fact that Easter in 1934 fell on April 1, no doubt considerably stimulated retail trading about that time. The index of employment then stood at 116.1, compared with 117.4 at the beginning of April, 1935.

### TABLES

Index numbers of employment by economic areas, leading cities and industries, respectively, are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns on the date under review.

## (2) Unemployment in Trade Unions at the Close of March, 1935

The term unemployment as used in the following report has reference to involuntary idleness, due to economic causes. Persons who are engaged at work outside their own trades or who are idle because of illness are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Improvement in the local trade union situation was apparent at the close of March from the previous month, according to the returns furnished by 1,735 labour organizations with an aggregate of 160,062 members. Of these, 26,724 or 16.7 per cent were unemployed on the last day of the month compared with a percentage of 18.2 in February. A more favourable employment volume was indicated also, than in March a year ago, when the percentage of idleness stood at 19.5. Quebec and Ontario unions reported gains in activity of over 2 per cent from February, attributable in the former province to the better conditions obtaining in the manufacturing industries, particularly the garment trades, and in building and construction operations, while in the latter province the lumbering and manufacturing industries, and the building trades all shared in the total gain. Conditions in Manitoba and British Columbia also tended favourably, though the variation from February was but fractional. On the contrary, activity in Alberta was somewhat

retarded, mainly owing to lessened employment in the coal mines, and in Saskatchewan and Nova Scotia nominal recessions occurred. The percentage of idleness reported from New Brunswick, however, remained identical with that of February. The Prairie Provinces reported the most noteworthy employment advancement from March a year ago, due largely to increased activity in railway operation throughout these provinces, together with gains in the manufacturing industries in Manitoba. Expansion, on a smaller scale, was also noted by Nova Scotia, New Brunswick, Quebec and Ontario unions. British Columbia unions were the only ones to register a falling off in work afforded from March last year, which was, however, quite slight.

Returns on unemployment affecting trade union members in the largest city in each province with the exception of Prince Edward Island are tabulated separately each month. Montreal unions with a gain in activity of 3.5 per cent showed the greatest change in conditions from February, followed by improvement of nearly 3 per cent in Toronto. In Vancouver, Halifax and Winnipeg the employment tendency was very slightly upward. Minor contractions in available work, however, were evident among Saint John, Regina and Edmonton unions. Compared with the returns for March, 1934, Saint John members were much more busily engaged during the month reviewed and in Winnipeg also substantial recovery was shown. Increases in activity, on a more moderate scale, were reflected by Edmonton, Montreal, Regina and Halifax unions, while in Toronto the improvement recorded was less than 1

per cent. Conditions in Vancouver remained unchanged from March a year ago.

The chart which appears with this article illustrates the unemployment trend by months from January, 1929, to date. The curve which has shown little variation during January and February from the December level, though tending toward lessened activity, changed its course in March, the projection being downward, denoting an increased employment volume available. In this descending movement during March the curve paralleled its course of the corresponding month a year ago, though employment as represented by the curve at the close of the month was in greater prevalence than in March last year.

jewellery workers increases in activity on a noteworthy scale. Among papermakers, printing tradesmen, textile and carpet, and iron and steel workers the expansion noted was small. Brewery workers, however, were slacker than in February, and among cigarmakers, and bakers and confectioners employment eased off very slightly. When contrasting with the reports for March, 1934, hat and cap, and glass workers, cigarmakers, metal polishers and general labourers were all afforded a much better volume of work during the month reviewed, and activity for leather workers improved appreciably. Among iron and steel workers moderate increases in employment were recorded, papermakers and printing

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

A better situation was shown in the manufacturing industries during March than in either the previous month or March, 1934, unemployment standing at 13.2 as contrasted with percentages of 16.0 in February and 16.6 in March, 1934. The percentage for March was based on the reports tabulated from 468 local unions, embracing a membership of 51,656 persons, 6,824 of whom were unemployed on the last day of the month. There was a generally upward employment movement in the majority of trades and industries during March when compared with February, glass, fur, hat and cap, and wood workers, and general labourers all showing decided advancement from February, and garment and

tradesmen showing slight gains. On the other hand, activity was considerably curtailed for wood and jewellery workers, bakers and confectioners, and brewery workers. Recessions, on a smaller scale, were reflected by textile and carpet, and fur workers, while garment workers showed but small declines.

Activity for coal miners was slightly retarded during March from the previous month, the 49 unions making returns with 15,632 members showing that 1,748 were without work at the end of the month, a percentage of 11.2 in contrast with 9.4 per cent in February. In Alberta diminishing orders due to the closing of the coal season was responsible largely for the drop in activity recorded from February,

and in British Columbia also unemployment was more prevalent. The level of activity in Nova Scotia, however, remained the same as in February. In making a comparison with the returns for March a year ago when 14.4 per cent of idleness was recorded in the coal mining industry as a whole, Alberta and Nova Scotia miners reported heightened employment during the month reviewed while in British Columbia there was a substantial falling off in available work.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.3	2.0	7.9	3.4
Average 1920.....	1.8	2.0	7.2	3.4	3.1	3.3	2.8	11.2	4.9
Average 1921.....	11.3	8.5	16.6	9.7	8.5	7.8	7.8	23.5	12.7
Average 1922.....	7.1	4.3	8.6	5.0	8.9	5.4	6.1	12.4	7.1
Average 1923.....	3.0	2.0	6.7	3.7	5.8	3.0	6.0	5.8	4.9
Average 1924.....	5.1	4.0	10.9	6.1	6.5	4.3	5.4	5.8	7.2
Average 1925.....	5.0	3.6	10.9	5.5	5.1	3.3	8.4	5.7	7.0
Average 1926.....	7.8	2.1	6.8	4.2	3.6	3.0	4.9	5.5	5.1
Average 1927.....	3.7	1.9	6.8	4.1	4.4	3.2	4.1	5.5	4.9
Average 1928.....	4.0	1.2	6.1	3.5	4.2	3.0	4.2	5.1	4.5
Average 1929.....	4.0	1.6	7.7	4.3	7.1	5.3	6.4	5.9	5.7
Average 1930.....	5.4	3.7	14.0	10.4	9.6	10.6	13.3	11.6	11.1
Average 1931.....	8.5	9.2	19.3	17.2	15.7	15.6	19.4	17.6	16.8
Average 1932.....	9.6	14.4	26.4	23.7	20.0	15.8	22.6	21.6	22.0
Average 1933.....	16.0	13.0	25.2	24.4	20.3	17.2	21.7	20.8	22.3
Average 1934.....	8.7	7.9	22.8	18.1	17.7	13.2	17.8	20.2	18.2
Mar., 1919.....	2.2	3.0	3.9	6.7	1.2	5.3	3.6	8.2	5.0
Mar., 1920.....	1.9	3.1	3.3	2.3	3.2	4.0	2.1	7.6	3.1
Mar., 1921.....	17.9	11.7	16.9	13.0	10.5	12.1	9.8	34.6	16.5
Mar., 1922.....	9.5	7.1	7.7	8.3	14.1	11.0	10.1	17.7	9.6
Mar., 1923.....	3.0	1.4	7.3	5.5	8.5	5.0	7.6	14.0	6.8
Mar., 1924.....	3.6	3.6	8.7	7.0	7.4	6.5	5.3	3.2	6.7
Mar., 1925.....	3.7	2.4	11.6	7.2	8.2	6.6	11.2	7.8	8.5

April, 1933.....	21.3	15.1	25.7	26.5	20.3	17.8	22.1	22.6	24.5
May, 1933.....	26.6	14.2	25.5	24.0	19.0	17.9	25.9	19.5	23.8
June, 1933.....	13.8	13.0	26.2	23.3	19.4	14.9	24.5	18.6	21.8
July, 1933.....	12.3	11.0	26.0	22.9	19.0	15.4	23.1	17.5	21.2
Aug., 1933.....	12.6	11.1	22.6	21.7	17.9	14.2	22.0	19.9	19.3
Sept., 1933.....	11.0	10.4	24.1	20.9	19.1	13.5	19.7	21.3	19.8
Oct., 1933.....	12.5	9.8	25.1	20.3	19.4	13.3	16.5	21.7	19.8
Nov., 1933.....	17.1	10.7	22.8	22.1	20.4	16.1	15.0	21.3	20.4
Dec., 1933.....	11.2	11.5	23.2	24.9	20.3	17.2	17.6	19.8	21.0
Jan., 1934.....	10.7	9.4	23.6	24.2	21.2	17.9	16.4	25.0	21.2
Feb., 1934.....	10.8	9.8	21.9	22.5	21.6	18.3	17.1	21.2	20.0
Mar., 1934.....	9.1	10.7	22.3	19.9	21.8	18.5	20.3	19.9	19.5
April, 1934.....	10.9	9.6	22.3	18.6	19.5	15.6	22.4	19.2	19.1
May, 1934.....	11.8	8.1	23.6	15.9	17.8	14.2	24.3	18.4	18.5
June, 1934.....	11.4	7.3	22.9	15.9	17.0	12.1	24.8	17.2	18.0
July, 1934.....	9.9	6.6	21.4	16.3	16.1	9.3	24.1	16.2	17.9
Aug., 1934.....	7.8	6.1	18.8	17.0	16.2	9.6	18.5	20.5	16.5
Sept., 1934.....	7.3	6.6	21.2	16.7	14.6	9.0	15.3	18.1	16.4
Oct., 1934.....	4.7	6.7	22.2	16.5	13.9	9.7	11.0	19.9	16.2
Nov., 1934.....	5.3	7.9	25.7	16.3	16.3	11.7	10.7	21.3	17.5
Dec., 1934.....	4.7	7.2	24.5	18.7	16.1	13.1	9.0	24.6	18.0
Jan., 1935.....	7.0	7.1	22.5	20.2	15.5	12.3	11.2	22.6	18.1
Feb., 1935.....	6.4	8.2	22.3	20.0	15.1	11.8	13.8	21.1	18.2
Mar., 1935.....	6.6	8.2	20.2	17.2	14.4	12.0	15.7	20.8	16.7

The building and construction trades afforded considerably more work during March than in the preceding month as manifest by the reports tabulated from 208 unions, with a total of 17,569 members. Of these, 10,409 were unemployed on the last day of the month, a percentage of 59.2 in contrast with 65.1 per cent in February. Conditions were also decidedly better than in March, 1934, when 69.6 per cent of idleness was recorded. Electrical workers were much more actively engaged than in February, and improvement in substantial measure was evident among carpenters and joiners, and bridge and structural iron workers. Increases in employment of more moderate degree were reported by bricklayers, masons and plasterers, painters, decorators and paperhangers, and tile layers, lathers and roofers. Granite and stonecutters, however, suffered some curtailment from February, and among plumbers and steamfitters the tendency was toward retarded activity though the change from February was slight. Steam shovelmen and hod carriers and building labourers, however, reported the same unemployment volume as in February. Compared with the situation in March a year ago extensive employment recovery was noted during the month surveyed by electrical workers, carpenters and joiners, hod carriers and building labourers, and tile layers, lathers and roofers. Activity for painters, decorators and paperhangers also showed a substantial rise from March last year, and increased employment, on a somewhat smaller scale, was evident among plumbers and steamfitters, and granite and stonecutters. The gains reported by bricklayers, masons and plasterers, and steam shovelmen, however, were but fractional. Among bridge and structural iron workers there was no variation in conditions shown from March, 1934.

Employment in the transportation industries eased off very slightly during March from the previous month, though the situation was more favourable than in March of last year. This was apparent from the reports furnished by 768 organizations embracing 53,150 members, 5,540 or 10.4 per cent of whom were without work on the last day of the month in contrast with percentages of 9.9 in February and 12.6 in March a year ago. Responsibility for this less favourable trend from February rested largely with navigation workers who were much slacker during March, though losses in employment were also evident among teamsters and chauffeurs. Steam railway employees, whose returns constituted nearly 80 per cent of the entire group membership reported, were afforded the same volume of

work as in February. Among street and electric railway employees, however, minor contractions in activity occurred. The improvement shown in the transportation industries from March last year was confined entirely to the steam railway division. Navigation workers, on the other hand, suffered heavy losses in employment and noteworthy curtailment was apparent among teamsters and chauffeurs. Street and electric railway employees showed little change from March, 1934, the situation, however, tending unfavourably.

Retail shop clerks reported employment recessions during March over both the previous month and March last year, the reductions in the former comparison being most pronounced. Returns for March were received from 5 associations of these workers, with 1,703 members, 125 or 7.3 per cent of whom were idle at the end of the month as compared with 3.8 per cent in February and 6.8 per cent in March, 1934.

Civic employees, with 74 unions reporting a membership of 7,550 persons during March indicated an unemployment percentage of 2.0 as compared with percentages of 2.1 at the close of February, and 2.7 in March a year ago.

The trend of activity in the miscellaneous group of trades was more favourable during March than in the previous month, though the change was slight, according to the reports tabulated from 116 unions with a membership aggregate of 3,787 persons. Of these, 582 were out of work at the end of the month, a percentage of 15.4 in contrast with 16.0 per cent of idleness in February. A somewhat better volume of work was available to hotel and restaurant, and theatre and stage employees than in February, and improvement of less than one per cent was registered by stationary engineers and firemen. Curtailment of activity on a rather small scale, however,

was apparent among unclassified workers while among barbers a nominal adverse change was noted. The situation in the miscellaneous group of trades, as a whole, was also slightly better than in March, 1934, when 16.9 per cent of unemployed members was reported. In this comparison stationary engineers and firemen showed gains in activity on a noteworthy scale, and theatre and stage, and hotel and restaurant employees improvement of lesser degree. Among unclassified workers and barbers there was some falling off in work afforded.

Fishermen were much better engaged during March than in the previous month, though unemployment still remained at a high level, the 4 unions making returns with 567 members indicating 64.2 per cent of idleness, in contrast with 88.5 per cent in February. Unemployment was, however, much more pronounced than in March, 1934, when only 1.3 per cent of the members reported were idle.

Employment advancement on a large scale was evident among lumber workers and loggers during March from the preceding month as shown by the reports tabulated from 3 unions with a membership numbering 601 persons. Of these, 5.8 per cent were idle on the last day of the month as compared with a percentage of 46.3 in February. Gains in activity of much lesser degree were recorded from March a year ago when 9.1 per cent of unemployed members was registered.

Table I shows by provinces the percentage of members who were on an average unemployed each month from 1919 to 1934 inclusive, and also the percentage of unemployment by provinces for March of each year, from 1919 to 1932 inclusive, and for each month from January, 1933, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for March, 1935

The volume of business transacted by the offices of the Employment Service of Canada during the month of March, 1935, as represented by the average daily placements, showed a decrease of 11 per cent from February, 1935, and of over 25 per cent from March a year ago, the deciding factor in each change being a marked reduction in relief placements under the group construction and maintenance. In comparison with the preceding month, manufacturing and logging also registered declines, all other divisions, except construction and maintenance, showing gains, the largest

of which were in services and farming. Decreased placements from March last year were likewise registered in farming, transportation and trade, as well as in construction and maintenance, the remaining industrial sections showing increases, the highest being in services and logging.

The accompanying chart shows the trend of employment since January, 1933, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations be-

ing made semi-monthly. As may be seen from the graph, the curves both of vacancies and placements in relation to applications showed a marked downward trend throughout March; and at the end of the period the curve of vacancies was over 7 points and that of placements nearly 9 points below the levels recorded at the close of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 54.8 during the first half and 52.9 during the second half of March, 1935, in contrast with the ratios of 52.8 and 60.3 during the corresponding periods in March, 1934. The ratios of placements to each 100 applications during the periods under

The average number of placements made daily by the offices of the Service during March, 1935, was 894, of which 554 were in regular employment and 340 in work of one week's duration or less, as compared with a total daily average of 1,006 during the preceding month. Placements in March a year ago averaged 1,199 daily, consisting of 590 in regular and 609 in casual employment.

During the month of March, 1935, the offices of the Service referred 25,017 persons to vacancies and effected a total of 23,231 placements. Of these, the placements in regular employment were 14,393, of which 10,491

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

review were 52.0 and 48.9, as compared with 50.4 and 57.7 during the corresponding month of 1934.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during March, 1935, was 954, as compared with the daily average of 1,255 during the corresponding month a year ago and with 1,061 recorded daily in February, 1935.

The average number of applications for employment received daily by the offices of the Service during the month under review was 1,770, in comparison with 2,225 in March, 1934. Applications for work during the preceding month of 1935 averaged 1,729 daily.

were of men and 3,902 of women, while placements in casual work totalled 8,838. The number of vacancies reported by employers was 16,695 for men and 8,093 for women, a total of 24,788, while applications for work numbered 46,014, of which 33,210 were from men and 12,804 from women. Reports for February, 1935, showed 25,453 positions available, 41,487 applications made and 24,138 placements effected, while in March, 1934, there were recorded 32,607 vacancies, 57,828 applications for work and 31,162 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment

Service of Canada, each year, from January, 1925, to date:—

Year	Placements		
	Regular	Casual	Totals
1925.....	306,804	106,021	412,825
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679

1935 (3 months).....	44,949	30,551	75,500

#### NOVA SCOTIA

During the month of March, orders received at employment offices in Nova Scotia called for nearly 15 per cent more workers than in the preceding month, but nearly 30 per cent less than during the corresponding month of last year. There was a gain of nearly 16 per cent in placements when compared with February, but a loss of over 28 per cent in comparison with March, 1934. The decline in placements from the corresponding month of last year was due to a reduction in relief placements on highway construction, as small changes only were reported in all other groups. A gain in services was offset by a loss in logging. Placements under construction and maintenance numbered 729, and in services 317. Of the latter, 230 were of household workers. During the month 106 men and 81 women were placed in regular employment.

#### NEW BRUNSWICK

Orders listed at employment offices in New Brunswick during March called for nearly 4 per cent more workers than in the preceding month, but nearly 44 per cent less than during the corresponding month of last year. Similar percentages of change were reported in placements under both comparisons. There was a considerable reduction in the number of persons sent to relief work on road construction when compared with March, 1934, which accounted for the decline in placements for the province as a whole under this comparison. This loss was offset in part by a gain in services. The changes in all other groups were quite small. Placements under construction and maintenance numbered 193, and in services 535. Of the latter, 399 were of household workers. There were 155 men and 79 women placed in regular employment during the month.

#### QUEBEC

Opportunities for employment, as indicated by orders received at employment offices in the province of Quebec during March, were over 4 per cent better than in the preceding month and over 40 per cent above the corresponding month of last year. There was a nominal decline only in placements when compared with February, but a gain of nearly 48 per cent in comparison with March, 1934. All industrial divisions, except logging and trade, participated in the increase in placements over March of last year, the largest gain being in construction and maintenance. Smaller increases in manufacturing and services almost offset losses in logging and trade. Placements by industrial divisions included manufacturing, 160; logging, 79; construction and maintenance, 1,469; trade, 125; and services, 1,887. Of the latter 1,691 were of household workers. During the month 1,811 men and 1,374 women were placed in regular employment.

#### ONTARIO

There was a decrease of over 9 per cent in the number of positions offered through employment offices in Ontario during March, when compared with the preceding month and of over 42 per cent in comparison with the corresponding month of last year. Placements also were nearly 11 per cent less than in February and nearly 44 per cent less than during March, 1934. Fewer placements in construction and maintenance on work provided in relief of unemployment accounted for the decline from March of last year, as all other groups, except transportation and trade, in which small losses only were reported, showed gains under this comparison. The most important increases were in logging, services, manufacturing, farming and mining. Industrial divisions in which most of the placements were effected during the month were manufacturing 660; logging 794; farming 694; mining 121; transportation 64; construction and maintenance 2,608; trade 288; and services 3,106, of which 2,040 were of household workers. Placements in regular employment numbered 3,380 of men and 1,289 of women.

#### MANITOBA

Employment opportunities, as indicated by orders received at employment offices in Manitoba during March, were nearly 3 per cent less than in the preceding month and 25 per cent below the corresponding month of last year. Placements also declined over 5 per cent when compared with February and were nearly 26 per cent less than during

\*129 Placements effected by offices since closed.

\*\*Totals also include placements through sub-offices during quarter ending Mar. 31, 1934.

March, 1934. There was a substantial decrease in the number of workers sent to relief employment on highway construction and farms when compared with March of last year, and a minor loss in logging. Increases were reported in all other groups, but none were important, the largest gain being in services. Placements by industrial divisions included logging 80; farming 511; construction and maintenance 799; and services 545, of which 423 were of household workers. During the month 1,273 men and 274 women were placed in regular employment.

#### SASKATCHEWAN

During the month of March, positions offered through employment offices in Saskatchewan were 9 per cent higher than in the preceding month, but nearly 9 per cent less than during the corresponding month of last year. Placements also were over 9 per cent above February, but over 13 per cent less than during March, 1934. The only decline of importance in placements from March of last year was in farming. There were, however, in addition, small losses in manufacturing, trade, and services, which were partly offset by gains in logging and mining. Industrial divisions in which most of the placements were effected during the month were farming 429; construction and maintenance 408; and services 618, of which 464 were of household workers. During the month 556 men and 360 women were placed in regular employment.

#### ALBERTA

There was a decline of over 11 per cent in the number of positions offered through employment offices in Alberta during March, when compared with the preceding month and of nearly 11 per cent in comparison with the corresponding month of last year. Placements also were nearly 8 per cent less than in February and 11 per cent less than during March, 1934. A reduction in relief placements on road construction was responsible for the decline from March of last year. Small increases were reported in farming, manufacturing and logging, and nominal changes only in all other groups. Placements by industrial divisions included manufacturing, 43; logging 80; farming 621; construction and maintenance 796; and services 367, of which 304 were of household workers. Placements in regular employment numbered 1,264 of men and 254 of women.

#### BRITISH COLUMBIA

The demand for workers, as indicated by orders received at employment offices in

British Columbia during March, was nearly 2 per cent better than in the preceding month, but nearly 12 per cent less than during the corresponding month of last year. Slightly higher percentages of change were reported in placements under both comparisons. The decrease in placements from March, 1934, was due to fewer workers being sent to relief camps on highway construction, supplemented by minor losses in manufacturing and logging. These declines were slightly offset by small gains in mining, farming and services. Placements by industrial divisions included farming 124; construction and maintenance 2,834; and services 643, of which 376 were of household workers. There were 1,946 men and 191 women placed in regular employment during the month.

#### Movement of Labour

During the month of March, 1935, the offices of the Employment Service of Canada effected 14,393 placements in regular employment, 6,364 of which were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter 580 were granted the employment service reduced transportation rate, 536 going to centres within the same province as the despatching office and 44 to other provinces. The reduced transportation rate, which is 2.7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may desire to travel to distant employment for which no workers are available locally.

In Quebec, during March 19 certificates for reduced transportation were granted at the Hull office to bushmen bound for employment in the Pembroke zone. Benefiting by the Employment Service reduced rate in Ontario during March 391 persons went to provincial situations. Of these, 192 travelled from Port Arthur to centres within the same zone, included among whom were 102 mine workers, 79 bush workers, 5 restaurant employees, 3 fishermen, 2 carpenters and one housekeeper. From Fort William 92 bushmen, 2 restaurant cooks, 2 bricklayers, 1 carpenter, and 1 miner, and from Sudbury 98 bushmen proceeded to positions within the territory covered by their respective city offices. To the Fort William zone also 1 miner was transferred from Timmins. The Kitchener office was instrumental in the despatch of 1 cooper to Sault Ste. Marie, and the North Bay office of 1 painter to Timmins. All transfers at the reduced rate in Manitoba during March were effected by the Winnipeg office and numbered 48. Of these, 23 were provincial

and 25 interprovincial. Within the province 1 hotel waitress was conveyed to Brandon and 12 bush workers, 9 farm hands and 1 miner to centres in the Winnipeg zone. Among the persons going to other provinces were 18 bushmen, 3 farm hands and 1 miner destined to the Port Arthur zone, 2 farm hands to Weyburn and 1 garage mechanic to Prince Albert. Offices in Saskatchewan granted 29 certificates for reduced transportation during March, all of which were to provincial points. From Regina 2 farm hands and 1 teacher went to Swift Current, 1 farm hand to Yorkton and 11 teachers and 3 farm hands within the Regina zone. Receiving certificates at the Saskatoon office 1 farm hand proceeded to North Battleford and 1 farm hand and 1 farm housekeeper to employment in the Saskatoon zone. The Moose Jaw office assisted in the transfer of 1 farm domestic to Prince Albert and 1 farm hand within its own zone. The balance of this provincial movement was of bushmen, 6 in number, who were carried at the reduced rate from Yorkton to points in the same zone. In Alberta 66 persons took advantage of the Employment Service reduced transportation rate during March, these going to provincial employment. Granted certificates

at Edmonton 29 bush workers, 15 farm hands, 3 farm household workers, 2 mine workers, 2 hotel cooks, 1 carpenter and 1 labourer were transported to various centres within the Edmonton zone, and 1 farm hand and 1 farm housekeeper to Drumheller. Travelling from Calgary 8 mill hands and 1 farm worker went to Edmonton, and 1 farm hand each to employment within the Drumheller and Calgary zones. The labour movement in British Columbia during March was entirely provincial and comprised the despatch of 27 workers. Of these, 26 journeyed from Vancouver, among whom were 6 mine workers, 2 farm hands and 1 farm housekeeper going to Penticton, 3 miners to Kamloops, and 12 mine workers and 2 household workers within the Vancouver zone. The one remaining transfer was of a teamster shipped from Prince Rupert within its own zone.

Of the 580 workers who profited by the Employment Service reduced transportation rate during March, 441 were transported by the Canadian National Railways, 122 by the Canadian Pacific Railway, 13 by the Pacific Great Eastern Railway, 3 by the Northern Alberta Railway and 1 by the Timiskaming and Northern Ontario Railway.

#### (4) Building Permits Issued in Canada in March, 1935

According to returns tabulated by the Dominion Bureau of Statistics, the value of the building permits issued by 61 cities during March was \$4,009,675; this was an increase of \$411,226 or 11.4 p.c. over the February total of \$3,598,449, while there was also the substantial increase of \$2,900,590 or 261.5 p.c. in the more significant comparison with the aggregate of \$1,109,085 reported for March, 1934. The authorization of a large public building in Winnipeg was an important factor in the increase during the month under review, but the general movement in construction activities shown in this report is also decidedly upward. The value of the building authorized during the first quarter of the present year amounted to \$8,394,668, an increase of \$5,683,669, or 209.7 p.c. over the same period of 1934; it was also higher by 173.8 p.c. than in the months, January-March of 1933, but was lower than in the first quarter of any other year since 1920.

Some 50 cities furnished detailed statistics, showing that they had granted over 150 permits for dwellings valued at more than \$450,000 and some 1,000 permits for other buildings estimated to cost approximately \$3,400,000. In addition, one centre reported that it had authorized an engineering project valued

at approximately \$14,000. In February, authority was given for the erection of some 95 dwellings and more than 500 other buildings, estimated to involve expenditures of approximately \$300,000 and \$2,808,365, respectively.

New Brunswick, Manitoba, Saskatchewan and Alberta reported increases in the value of the building authorized during March, 1935, as compared with the preceding month. The greatest gain was that of \$1,216,850 or 398.1 p.c. in Manitoba. The largest decline in the remaining provinces was that of \$673,976 or 28.1 p.c. in Ontario.

As compared with March, 1934, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia recorded increases, those of \$1,269,709 or 279.0 p.c. in Ontario and \$1,492,454, or almost fifty-fold in Manitoba being most marked. The reductions elsewhere recorded were small, the largest being that of \$54,256 or 18 p.c. in Quebec.

Of the larger cities, Winnipeg and Vancouver showed increases as compared with February, 1935, and March, 1934, those in the former city being substantial. Toronto reported a slight decline in the first, but a large gain in the second comparison, while Montreal recorded losses in both comparisons. Of the other centres, Shawinigan Falls, Sher-

brooke, Three Rivers, Belleville, Brantford, Guelph, Kitchener, London, Oshawa, Owen Sound, Peterborough, Port Arthur, St. Cath-

arines, Sault Ste. Marie, York and East York Townships, Welland, Windsor, East Windsor, Riverside, Woodstock, Moose Jaw, Regina, Saskatoon, Calgary, Lethbridge, Nanaimo and Prince Rupert reported higher totals than in either February, 1935, or March, 1934.

#### *Cumulative Report for First Quarter, 1935.—*

The following table gives the value of the building authorized by 61 cities during March and in the first quarter of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first quarter of the same years are also given (1926=100).

As already stated, the total value of the building authorized in the first quarter of 1935 was higher than in the same period of 1934 or 1933, but with these exceptions, was lower than in any other year since 1920.

Year	Value of permits issued in March	Value of permits issued in first quarter	Indexes of value of permits issued in first quarter (1926=100)	Average Indexes of wholesale prices of building materials in first quarter (1926=100)

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, April, 1935, summarized the employment situation as follows:—

Employment in March showed a substantial improvement extending to nearly all the principal industries. The most marked improvement occurred in the building industry; but there were also considerable reductions in the numbers unemployed in public works contracting, coal mining, engineering and iron and steel manufacture, in the clothing, cotton spinning, pottery and motor vehicle industries, in the transport and distributive trades, and in hotel, boarding house, etc., service. In none of the principal industries was there a marked decline in employment.

There was an improvement in employment in all sections of the country. Employment continued fairly good in the Southeastern counties (including London); it was fair in Southwestern England and in the Midlands, but very slack in the North of England and in Scotland; while it remained bad in Northern Ireland and very bad in Wales.

Among those workpeople of ages 16-64 who were insured against unemployment in Great Britain and Northern Ireland the percentage unemployed at March 25, 1935 (including those temporarily stopped as well as those wholly unemployed), was 16.5, as compared

with 17.5 at February 25, 1935, and with 17.2 at March 19, 1934. The percentage wholly unemployed at March 25, 1935, was 14.0, as compared with 14.8 at February 25, 1935; while the percentage temporarily stopped was 2.5, as compared with 2.7. For males alone the percentage at March 25, 1935, was 18.7 and for females, 10.7; at February 25, 1935, the corresponding percentages were 19.8 and 11.4.

At March 25, 1935, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,746,277 wholly unemployed, 317,910 temporarily stopped, and 89,683 normally in casual employment, making a total of 2,153,870. This was 131,593 less than a month before, and 47,707 less than a year before. The total included 1,707,469 men, 61,308 boys, 328,874 women, and 56,219 girls.

The persons on the Registers included 1,001,743 persons with claims for insurance benefit; 769,790 insured persons with applications for unemployment allowances; 241,174 insured persons (including 22,724 insured juveniles under 16 years of age), not in receipt of insurance benefit or unemployment allowances, and 141,163 uninsured persons. In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at March 25, 1935, was 2,224,719.

### United States

*Manufacturing Industries.*—Employment increased 1.5 per cent from February to March and payrolls increased 2.5 per cent. Increased employment was shown in 68 of the 90 manufacturing industries surveyed and increased payrolls in 67 industries. Among the industries in which increases of approximately 4,000 or more workers were shown were: women's clothing, men's clothing, knit goods, automobiles, electric and steam railroad cars, foundries and machine shops, blast furnaces, steel works, rolling mills, electrical machinery, furniture, sawmills, and fertilizers.

March marks the fourth successive month in which gains in factory employment and payrolls have been shown. Increases in employment and payrolls are usually reported in March. Over the 16-year period 1919-1934 gains in employment in this month have been shown in 13 instances and gains in payroll in 12. The increases in March, 1935, compare favourably with the gains in March of preceding years, although the current gains are not so pronounced as in March of last year when the expansion in manufacturing activity was much in excess of the usual seasonal movement.

The Bureau of Labour Statistics' index of factory employment for March, 1935, is 82.4 (preliminary) and the index of factory payrolls is 70.8 (preliminary). With the exception of April and May of last year, the index of employment in March, 1935, stands at the highest point recorded since November, 1930. The March, 1935, payroll index exceeds the level reported in any month since June, 1931. In March, 1935, employment was 2.0 per cent above the level of the March, 1934, index (80.8) and weekly payrolls were 9.3 per cent over the March, 1934, index (64.8).

A comparison of factory employment and payrolls in March, 1935, with March, 1933, in which month the low point was recorded, shows gains of 40.1 per cent in employment and 90.8 per cent in payrolls over the 2-year interval.

The indexes of factory employment and payrolls are computed from returns supplied by representative establishments in 90 important manufacturing industries of the country. The base used in computing these indexes is the average for the 3-year period, 1923-1925, which is taken as 100. Reports were received in March from 24,600 establishments employing 3,827,579 workers whose weekly earnings were \$80,670,135 during the pay period ending nearest March 15. The employment reports received from these co-operating establishments cover more than 50 per cent of the total wage earners in all manufacturing industries of the country.

*Non-manufacturing Industries.*—Gains in employment from February to March were shown in 11 of the 17 non-manufacturing industries surveyed monthly by the Bureau of Labour Statistics and increased payrolls were reported in 15 of these industries.

Employment in retail trade establishments increased 1.1 per cent over the month interval, reflecting expansion for spring trade. The increase was most pronounced in the general merchandising group of retail establishments (department, variety, general merchandise, and mail order houses). Wholesale trade establishments reported 0.7 per cent fewer employees in March than in February.

Two of the three utility industries surveyed reported small increases in employment over the month interval, power and light, 0.1 per cent, and electric railroad and motor-bus operation 0.4 per cent. Employment in telephone and telegraph companies declined 0.2 per cent from February to March.

In the group of mining industries, gains in employment were shown in bituminous coal mining (0.6 per cent), metalliferous mining (1.6 per cent), and quarrying and non-metallic mining (8.7 per cent). Employment in the crude petroleum producing industry decreased 0.2 per cent and the anthracite mining industry showed 20.2 per cent fewer employees in March than in the preceding month. The pronounced decrease in the last-named industry was largely due to market conditions, a large number of collieries reporting suspended or only partial operations in March, due to lack of orders.

Increased employment was shown in 2 of the 3 service industries surveyed, dyeing and cleaning establishments reporting a seasonal expansion of 4.1 per cent and laundries a gain of 0.1 per cent. Employment in hotels declined 0.3 per cent over the month interval.

Based on reports supplied by 10,404 contractors employing 68,461 workers in March, 1935, engaged in building construction not aided by P.W.A. funds, there was a gain of 3.2 per cent in employment in private building construction over the month interval.

In the banks-brokerage-insurance group, small gains were noted in employment in both insurance and banks while brokerage firms reported 0.8 per cent fewer employees in March than in the preceding month.

The New Brunswick Forest Operations Commission has established the minimum rate of wages for stream driving at one dollar and seventy-five cents (\$1.75) per day and board net (or its equivalent in case of piece work), and "notwithstanding Section 34 of the Act no stream driver may be paid at less than the above rate."

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. On December 31, 1934, however, an Order in Council was passed rescinding what are known as the "B" Conditions of this Policy and substituting other conditions therefor, the full text of which appeared in the *LABOUR GAZETTE* for January, 1935, pp. 24-25. These "B" Conditions are applicable to all contracts for the manufacture and supply to the various departments of the Government of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers and other Government officers and employees; mail bags, letter boxes and other postal stores.

The original provision for the payment of not less than current wages rates, or fair and reasonable rates if there are no current rates, is retained in the new "B" Conditions, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, be less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wage laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wage scales of the respective provinces.

The Fair Wages Policy of the Dominion Government, from its inception in 1900, has applied also to contracts for building and construction work. In the Fair Wages Orders in Council of 1922 and 1924 above referred to, the provisions applicable to building and construction contracts were designated as "A" Conditions. An Act of Parliament, entitled "The Fair Wages and Eight Hour Day Act" (chapter 20-21, Geo. V), was adopted on May 30, 1930, with respect to contracts "for construction, remodelling or demolition of any work," and provides as follows:—

The practice of the different departments of the Government, before entering into con-

tracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

In the case of contracts for the construction of, or repairs to, Government vessels, where it is not known beforehand at what point the work may be carried out, the practice is to utilize, instead of a fair wages schedule, a general clause providing for the observance of rates of wages generally accepted as current from time to time for competent workmen in the district where the work is being performed, provided that such wages shall in all cases be such as are fair and reasonable, and for the observance of the hours of labour which are customary in the district, provided that such working hours shall not exceed eight a day.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions known as the "A" conditions, for the protection of the workmen employed, which are sanctioned by the original Orders in Council.

Both in the case of contracts for building and construction work, and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen. These records to be open for inspection by fair wage officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have

been complied with. In the event of default being made in the payment of the wages of any workman employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

The Department of Labour is furnished from month to month with information regarding the contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed. During the past month, statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "A" (Construction, Remodelling, etc.)*

Laying a new concrete and asphalt surface floor in the Drill Hall of the Armoury, Moose Jaw, Sask. Name of contractors, Bird Construction Co., Ltd., Moose Jaw, Sask. Date of contract, April 9, 1935. Amount of con-

tract, \$7,227. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Cement mixer operator—Gas or Elec.....	\$0 50	8
Cement finisher.....	0 55	8
Mastic floor layers.....	0 75	8
Asphalt tile layers.....	1 00	8
Labourers.....	0 40	8
Motor truck driver.....	0 45	8
Teamster, team and wagon.....	0 80	8
Teamsters.....	0 40	8
Plumbers and steamfitters.....	0 90	8
Carpenters.....	0 75	8

N.B.—Where, by agreement or current practice, the working hours of any class of labour are less than 48 a week, such lesser hours shall not be exceeded on this work.

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of April, 1935, for various classes of manufactured goods, which include in all cases the "B" labour conditions above referred to:—

Goods contracted for	Contractor
Skylights.....	Canadian Metal Window Steel Products, Toronto, Ont.
Ankle boots.....	Eudore Fouraier, Plessisville, P.Q.
L. W. Drawers and shirts....	Schofield Woollen Co., Ltd., Oshawa, Ont.
L. W. Drawers and shirts....	Joseph Simpson Sons Ltd., Toronto, Ont.
Household soap.....	Guelph Soaps, Guelph, Ont.
Soap.....	Colgate Palmolive Peet Co., Toronto, Ont.
Bedstead springs.....	Simmons Ltd., Vancouver, B.C.
Whipcord jackets.....	W. R. Johnston & Co., Ltd., Toronto, Ont.
Drill.....	Dominion Textile Co., Ltd. Montreal, P.Q.
Trousers.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Paints.....	Crown Diamond Paint Co., Outremont, P.Q.
Service trousers.....	Turner Beeton & Co., Ltd. Victoria, B.C.
Marquee tents, pin bags and valises.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Enamelware.....	General Steel Wares Ltd. Montreal, P.Q.
Earthenware cups and plates.	Sovereign Potters Ltd., Hamilton, Ont.

#### DEPARTMENT OF PUBLIC WORKS

##### *Contracts in Group "A" (Construction, Remodelling, etc.)*

Construction of dykes and repairs to the South Jetty, Fraser River, Steveston, B.C. Name of contractors, Coast Quarries Ltd., Vancouver, B.C. Date of contract, April 17, 1935. Amount of contract, approximately

Construction of a sheet pile protection wall at Calgary, Alberta. Name of contractors, Messrs. Mannix & Owens, Calgary, Alberta. Date of contract, January 18, 1935. Amount of contract, approximately \$91,693.42. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Carpenters.....	\$0 75	8
Blacksmiths.....	0 70	8
Teamster, team and wagon.....	0 75	8
Teamsters.....	0 45	8
Motor truck driver.....	0 45	8
Labourers.....	0 45	8
Engineer—pile driver.....	0 75	8
Steam winch engineers.....	0 65	8
Steam winch fireman.....	0 50	8
Blacksmith helpers.....	0 45	8
Pile driver men.....	0 50	8

N.B.—In any cases where, by agreement or current practice the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Construction of a breakwater extension at Point Sapin, Kent County, N.B. Name of contractors, Messrs. J. E. & D. P. Connolly, Bathurst, N.B. Date of contract, April 1, 1935. Amount of contract, approximately \$18,760. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Hoist engineer—steam.....	\$0 55	8
gas.....	0 45	8
Timbermen or cribmen (using such tools as broadaxe, hammer, cross cut saw, auger, adze).....	0 37½	8
Blacksmith.....	0 45	8
Labourers.....	0 40	8
Driver, horse and cart.....	0 45	8
Driver, team and wagon.....	0 55	8
Drivers.....	0 30	8
Motor truck driver.....	0 35	8

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Blacksmiths.....	\$0 55	8
Boatmen.....	0 35	8
Carpenters and joiners.....	0 60	8
Hoist engineer (steam).....	0 65	8
Hoist engineer (gas).....	0 50	8
Pile driver operator.....	0 65	8
Firemen.....	0 40	8
Labourers.....	0 35	8
Driver, team and wagon.....	0 65	8
Timbermen or cribmen (using such tools as cross cut saw, adze, axe, auger, etc.).....	0 42	8
Motor truck drivers.....	0 40	8

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Pile driver foreman.....	\$1 12½	8
Pile driver engineer.....	1 00	8
Pile driver man.....	0 90	8
Boomman.....	0 90	8
Bridgeman.....	0 90	8
Fireman.....	0 65	8
Labourers.....	0 40	8

Reconstruction of and repairs to the East Breakwater at Meaford, Ontario. Name of contractors, King Paving Co., Ltd., Oakville, Ontario. Date of contract, April 16, 1935. Amount of contract, approximately \$11,647.82. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Divers.....	\$1 00	8
Blacksmiths.....	0 55	8
Boatmen.....	0 35	8
Carpenters and joiners.....	0 60	8
Cement mixer operator.....	0 45	8
Hoist operator—gas.....	0 50	8
Hoist engineer—steam.....	0 65	8
Firemen.....	0 40	8
Labourers—ordinary.....	0 35	8
Driver, team and wagon.....	0 65	8
Driver.....	0 35	8
Motor truck driver.....	0 40	8
Cement finishers.....	0 55	8
Timbermen or cribmen (using such tools as broadaxe, cross cut saw, hammer, adze, auger).....	0 42	8

Construction of a public building at Westport, Ontario. Name of contractor, Mr. Alex. I. Garvock, Ottawa, Ontario. Date of contract, April 8, 1935. Amount of contract, \$24,700 and unit prices for additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 45	8
Cement finishers.....	0 55	8
Stonemasons.....	0 80	8
Stonecutters.....	0 70	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Removal of submerged dam at Steveston, Fraser River, B.C. Name of contractors, McKenzie Barge & Derrick Co., Ltd., Vancouver, B.C. Date of contract, March 28, 1935. Amount of contract, approximately \$5,430. The General Fair Wages Clause was inserted in the contract.

Repairs to Tug “Canso,” Pictou, N.S. Name of contractors, Pictou Foundry & Machine Co., Ltd., Pictou, N.S. Date of contract, March 8, 1935. Amount of contract,

\$11,470. The General Fair Wages Clause was inserted in the contract.

Repairs to Dredge “P.W.D. No. 5,” at Sydney, N.S. Name of contractors, The Sydney Foundry and Machine Works, Ltd., Sydney, N.S. Date of contract, March 28, 1935. Amount of contract, \$15,879. The General Fair Wages Clause was inserted in the contract.

#### POST OFFICE DEPARTMENT

Following is a statement of payments made in April, 1935, for supplies ordered by the Post Office Department under contracts which were subject to regulations for the suppression of the sweating system, the securing of payment to the workers of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of orders	Amount
<i>Making Metal Dating Stamps and Type, Brass Crown Seals, Cancellors, etc.—</i>	
Pritchard-Andrews Co. of Ottawa, Ltd., Ottawa, Ont.....	\$316 86
<i>Making and Repairing Rubber Stamps, Daters, etc.—</i>	
Pritchard-Andrews Co. of Ottawa, Ltd., Ottawa, Ont.....	123 54
<i>Making and Supplying Letter Carriers' Uniforms—</i>	
Workman Uniform Co., Ltd., Montreal, P.Q.	15 62
Tayside Textiles Ltd., Perth, Ont.....	3,707 27
Miner Rubber Co., Ltd., Granby, P.Q.....	2,382 38
Uniform Cap Co., Ottawa, Ont.....	924 48
Kaufman Rubber Co., Ltd., Kitchener, Ont.	1,806 63
Yamaski Garments Ltd., St. Hyacinthe, P.Q.	8,989 92
J. R. Shuttleworth & Sons Ltd., London, Ont.	2,079 00
<i>Mail Bag Fittings—</i>	
F. W. Carling, Ottawa, Ont.....	6,354 88
Chas. A. Duff, Montreal, P.Q.....	901 00
Hamilton Cotton Co., Hamilton, Ont.....	1,072 55
<i>Stamping Machines, etc.—</i>	
Machine Works Ltd., Montreal, P.Q.....	4,666 98
<i>Scales—</i>	
Pritchard-Andrews Co. Ltd., Ottawa, Ont....	61 75

At the recent annual meeting of the Ontario Pulp and Paper Makers' Safety Association the safety trophies, annually competed for by the Pulp and Paper Makers' employees, were awarded. (These annual competitions have been referred to from time to time in the LABOUR GAZETTE, the 1934 competition being reported in the issue for April, 1934, page 323). The Howard Smith Paper Mills Limited, Cornwall, won the Association trophy for the best accident prevention record in Class “A,” and London Shipping Containers Limited, one of the three units with perfect records, was awarded the trophy in Class “B.” Of the eight teams in the first-aid teams contest, the Alliance Paper Mills (aggregation) won the trophy; with team No. 2 of the Hinde & Dauch Paper Company

of Canada Limited, Toronto plant, in second position. The trophies were presented to representatives of the mills, and the captain of the winning first-aid team; while souvenir medals were presented to the individual members of both the winning team and the runner-up.

A resolution was recently introduced in the Senate of the United States authorizing the Committee on Manufactures or any sub-committee thereof “to investigate the desirability of establishing a National Economic Council and to make recommendations with respect to the functions and duties which might be assigned to such council.” The committee is to report to the Senate the result of its investigation together with its recommendations.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the *LABOUR GAZETTE*. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Iron Steel and Products

GUELPH, ONTARIO.—A CERTAIN IRON FOUNDRY AND THEIR EMPLOYEES

Agreement (settlement of a strike) reached following the strike reported on page 403 of this issue. The following conditions are to be in effect from April 17, 1935 to October 1, 1935. Thirty days before the expiration date the schedule of hours and wages may be discussed.

No discrimination to be shown employees on account of union membership. The employer agrees to discuss all questions affecting wages, hours and working conditions with the elected shop committee and the employees agree not to take action inimical to the employer on any question of wages, hours or working conditions before exhausting all reasonable methods of peaceful settlement.

Wages: a piece rate will be set for moulders that will permit the average moulder to earn not less than \$3.75 per day; male coremakers so that they can earn an average of \$3.60 per day, female coremakers an average of 27 cents per hour; wage for men chippers 30 cents per hour, for hand sand blasters 35 cents per hour; piece rates for grinders to be set so they can earn 33 cents per hour; hourly rate for firemen on anneal ovens 33 cents, sand mixers 30 cents, air furnace firemen 45 cents, labourers 29 cents. Piece rates are specified for other classes of work.

### Manufacturing: Textiles and Clothing

MONTREAL, QUEBEC.—THE ASSOCIATION OF MANUFACTURERS OF MILLINERY AND WOMEN'S AND CHILDREN'S HEAD WEAR AND THE UNITED HATTERS, CAP AND MILLINERY WORKERS' INTERNATIONAL UNION, No. 49

Agreement signed following strike reported on page 403 of this issue, to be in effect from March 30, 1935, to March 30, 1936. On or before January 15, 1936, committees from each party may meet to confer on the continuation or revision of the agreement.

Only union members or those who become union members to be employed as cutters, straw operators, fabric operators, blockers, drapers and trimmers.

The union representative may visit shops at reasonable times to adjust grievances. The union will not make an agreement with any other employer on more favourable terms.

During dull periods and also at any time after completion of the regular day's work, no foreman, forelady, partner or shareholder of the employer may work at the operations covered by this agreement. In the dull season, work is to be distributed as evenly as possible in each shop, such distribution to be arranged by the shop committee.

No employer is to send any material from his factory to be made up or to have any work performed thereon at any outside factory unless such factory is a union factory and unless his own employees are fully employed. No employer to distribute work to be performed by contractors or sub-contractors nor purchase any such work from contractors or sub-contractors who do not conduct union shops. The application of this paragraph is left to the discretion of the representatives of both parties who may waive its provisions, if considered advisable.

Wages are on a weekly basis: hand blockers \$31 per week, straw operators, fabric operators, blockers and cutters \$28, drapers \$19, trimmers, \$14. Workers who have not acquired the necessary skill and whose productivity is below the average for any reason may be paid less than the above minimum rates, and such rates to be adjusted between the union and the employer, but at no time may more than 25 per cent of the workers in any classification be paid less than the above minimum scale.

Hours: 44 per week until June 30, 1935; from July 1, 1935, 40 per week, a 5 day week, provided the 40 hour week is also adopted by the Ontario manufacturers and provided the agreement is made obligatory under the Quebec Collective Labour Agreements Extension Act.

Overtime: no overtime to be worked except for 4 to 6 weeks in the spring and for 4 weeks in the fall, and then a maximum of 2 hours per day and 10 per week only may be worked. Overtime to be paid for at time and one-half rates.

No worker is to be discharged without sufficient reason and any dispute over this is to be submitted to representatives of each party. If an employee leaves one employer to work for another employer in the industry without sufficient reason, the union undertakes to supply another equally skilled worker to the employer.

A shop committee to be elected in each shop to adjust any grievance with the employer. If any dispute cannot be settled in this way, it will be referred to a representative of the union and the representative of the employer, or if this fails to a joint board of adjustment whose decision will be final, and no strike or lockout to occur during the continuance of the agreement.

TORONTO, ONTARIO.—THE MILLINERY MANUFACTURERS' ASSOCIATION AND THE UNITED HATTERS, CAP AND MILLINERY WORKERS, LOCAL No. 46.

Agreement signed following strike reported on page 403 of this issue and conciliation by a representative of the Ontario Department of Labour. Agreement to be in effect from April 8, 1935, until February 28, 1936. On or before January 15, 1936, committees from

each party may meet to determine whether the agreement be continued or revived.

The agreement is similar to the one summarized above for Montreal, except that the minimum wage rates for Toronto are \$1 per week higher than in Montreal for all classes covered except drapers for whom the rate is the same as in Montreal.

The provision for the 40-hour week after July 1, 1935, is conditional on its being accepted by the manufacturers of Montreal and its being made obligatory under the Collective Labour Agreements Extension Act of Quebec and the Industrial Standards Act of Ontario.

### Transportation and Public Utilities: Street and Electric Railways

**BRANTFORD, ONTARIO.**—BRANTFORD PUBLIC UTILITIES COMMISSION AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, DIVISION No. 685

Agreement is a renewal of an agreement reached October 17, 1934, as a result of conciliation by a representative of the Department of Labour, the present agreement to be in effect from April 4, 1935, to April 3, 1936.

No discrimination against any employee or member of the union, and the Commission agrees to meet and confer with accredited members of the union.

Overtime to be paid at straight time rates.

Wages: one man car and bus operators 45 cents per hour; other classes of work also to continue at existing rates.

Uniforms and tickets and change to be supplied by the Commission.

Seniority to prevail in the choice of runs by operators and also in all classes of work in case the staff is being reduced.

Operators to alternate from day work to night work each week. Regular operators to take a day off as required for the purpose of dividing work as equally as possible between those in the service as of October 17, 1934. Days off to be

taken in rotation and the spare operators to take the place of men taking their day off.

Any employee suspended or discharged will have the right to a hearing before the Commission and may be assisted by a union representative, and if found to be unjustly suspended or discharged, will be reinstated and paid for time lost.

### Transportation and Public Utilities: Water Transportation

**VANCOUVER, B.C.**—BRITISH COLUMBIA LOG EXPORTERS' ASSOCIATION AND THE VANCOUVER EXPORT LOG WORKERS' ASSOCIATION (LOCAL No. 8, LONGSHOREMEN AND WATER TRANSPORT WORKERS OF CANADA)

Agreement reached following strike and conciliation by the Department of Labour representative, as reported on page 403 of this issue.

Agreement to take effect from April 23, 1935, and to continue until either party gives 60 days notice of any desired change. Upon such notice being given, a joint conference will be held to consider the proposed changes.

No discrimination against any employee and preference to be given men recommended by the union, if efficient, when new men are being hired. Any employer who dismisses or refuses to employ a workman shall, on request, furnish a written complaint to the union and the matter will be brought up before the joint grievance committee, which shall decide whether or not such employee must be employed or reinstated by the employer.

Hours: 8 per day.

Overtime and work on Sundays and holidays, time and one-half.

Wages: minimum rate of 65 cents per hour, with 10 cents per hour extra for boatmen, graders and sawyers, and 15 cents per hour extra for sawyer who also does the grading.

A joint grievance committee to be formed to investigate and settle all grievances. If no settlement can be reached, the matter will be referred to a third party mutually agreed upon.

During the month of April there were 4,486 accidents reported to The Workmen's Compensation Board, as compared with 4,880 during March, and 3,884 during April a year ago. The fatal accidents numbered 18, as against 21 in March, and 11 last April. The total benefits awarded amounted to \$395,732.31, of which \$315,216.01 was for compensation and \$80,516.30 for medical aid. The benefits awarded during March were \$511,469.91 and \$370,124.66 was awarded during April a year ago.

The Committee on Interstate Commerce (United States Senate) has reported favour-

ably upon a bill whose main objectives are: To stabilize the bituminous coal mining industry and promote its interstate commerce; to provide for co-operative marketing of bituminous coal; to levy a tax on bituminous coal and provide for a drawback under certain conditions; to declare the production, distribution, and use of bituminous coal to be affected with a national public interest; to conserve the bituminous-coal resources of the United States and to establish a national bituminous-coal reserve; to provide for the general welfare; and for other purposes.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, APRIL, 1935

### Cost of Living, Prices of Staple Articles and Index Numbers

THE cost of the weekly family budget was slightly lower, mainly because of the lower cost of foods, while the Dominion Bureau of Statistics index number of wholesale prices advanced, due chiefly to higher prices for grains and non-ferrous metals.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.50 at the beginning of April as compared with \$7.63 for March; \$7.81 for April, 1934; \$6.83 for April, 1933; \$11.24 for April, 1930; \$11.36 for April, 1926; \$10.26 for April, 1922; \$16.92 for June, 1920 (the post war peak); and \$7.51 for April, 1914. The decline in April of the present year as compared with March was due mainly to lower prices for eggs and butter while the prices of beef, mutton and evaporated apples showed the largest advances. Including the cost of fuel and rent with that of foods the total budget was \$15.97 at the beginning of April as compared with \$16.10 for March; \$16.28 for April, 1934; \$15.74 for April, 1933; \$21.53 for April, 1930; \$21.64 for April, 1926; \$20.66 for April, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.32 for April, 1914. Fuel was slightly lower, due to a seasonal fall in the price of anthracite coal. Rent was fractionally higher.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1926 as 100, was higher at 72.5 for April as compared with 72 for March. Comparative figures for earlier dates are: 71.3 for April, 1934; 65.3 for April, 1933; 91.2 for April, 1930; 101.2 for April, 1926; 164.3 for May, 1920 (the post war peak); and 64.0 for April, 1914.

In the grouping according to chief component materials the Vegetable and Vegetable Products group was considerably higher, due to increased prices for grains, chiefly wheat. The Non-Ferrous Metals group also advanced, due in part to much higher prices for silver. The other groups in this classification were lower, the greatest decline occurring in the Wood, Wood Products and Paper Group.

#### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of April of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quota-

tions in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

#### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expendi-

(Continued on page 472)

## COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

ture for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices

and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Beef prices were again higher in most localities, sirloin steak being up from an average of 21.2 cents per pound in March to 22.6 cents in April, rib roast from 16.1 cents per pound to 17.2 cents and shoulder roast from 11.7 cents per pound to 12.6 cents. Mutton also averaged higher in many localities, the price being up from 20.9 cents per pound in March to 21.5 cents in April. Pork prices were little changed. Egg prices were generally lower, fresh being down from an average of 34.1 cents per dozen in March to 24.3 cents in April and cooking from 25.9 cents per dozen in March to 20.3 cents in April. The price of the former in April last year was 27.1 cents per dozen and of the latter 23 cents. The price of creamery butter declined from 29.6 cents per pound in March to 28.1 cents in April. Decreases occurred in most localities. Onions were again somewhat higher at an average price of 4.1 cents per pound. Anthracite coal averaged about 10 cents per ton lower at \$15.06. Bituminous coal was also slightly lower at \$9.38 per ton. An increase in rent was reported from Trail.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16; Windsor, \$16.50; Moncton, \$16; Saint John, \$14; Quebec, \$14.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$15.50; Montreal, \$15.75; Ottawa, \$16.75; Kingston, \$16; Belleville, \$16.50; Peterborough, \$16.50; Oshawa, \$14.75; Toronto, \$15; St. Catharines, \$14.75; Hamilton, \$15; Brantford, \$16.75; Galt, \$16.50; Windsor, \$12.50; Sudbury, \$17.50; Cobalt, \$19; Timmins, \$19.50; Port Arthur, \$16; Fort William, \$16; Winnipeg, \$19.50.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices during April averaged higher than in the previous month. No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, averaged 87.6 cents per bushel in April as compared with 81.9 cents in March. Prices towards the end of the month were at the highest level since October, 1934. In other grains western oats advanced from an average in March of 41.1 cents per

### CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1935\*

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

bushel to 42.2 cents in April, rye from 49 cents per bushel to 51.7 cents and barley from 44.8 cents per bushel to 45.9 cents. In milled products the price of flour at Montreal rose from \$5.40 per barrel to \$5.70, while rolled oats at Toronto were 10 cents per ninety pounds lower at \$2.75. Raw sugar at Montreal was up from \$1.90 per cwt. to \$1.94, while granulated was unchanged at \$4.90 per cwt. In live stock the price of cattle advanced, a factor being the continued shipment of supplies to the United States. Choice steers at Toronto were up from \$6.80 per hundred pounds to \$7.11 and at Winnipeg from \$5.88 per hundred pounds to \$6.32. Bacon hogs at Toronto also advanced, the price being up from \$8.17 per hundred pounds to \$8.74 and at Winnipeg from \$7.51 per hundred pounds to \$7.72. Creamery butter at Montreal was about 1 cent per pound lower averaging 25 cents. Stocks in cold storage at the beginning of April were reported to be about

80 per cent more than at the beginning of April, 1934, but 54 per cent lower than at the beginning of the previous month. Egg prices were also seasonally lower at Montreal the average for March being 23.9 cents per dozen and for April 21.3 cents. At Toronto the price was down from 21.5 cents per dozen to 19 cents. The price of raw cotton was fractionally higher at an average of 11.8 cents per pound. Visible supplies were substantially lower toward the end of April as compared with the end of March. Raw silk at New York was up from \$1.61 per pound to \$1.74. Fir timber declined \$1 per thousand board feet to \$15. Scrap steel advanced from \$9 per ton to \$10. In non-ferrous metals electrolytic copper at Montreal was up from \$7.48 per hundred pounds to \$8.25, tin at Toronto from 52½ cents per pound to 56½ cents and silver from 59.6 cents per ounce to 68.4 cents. The price of silver in April, 1934, was 45.1 cents per ounce.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. The authorities for the wholesale prices index numbers are named in all cases. The latest table showing cost of living and wholesale prices index numbers for various countries appeared in the April issue of the LABOUR GAZETTE.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1930=100, was 86·9 for March, a decrease of 1·2 per cent for the month. The principal decline was in foods, in which all groups were lower than in February, the meat, fish and eggs group showing a fall of 4·8 per cent. Non-foods were 0·8 per cent lower, showing declines in all groups except the metal groups which were slightly higher.

The *Statist* index number, on the base 1867-1877=100, was 82·9 at the end of March, a decrease of 0·6 per cent for the month. Foods were 1·7 per cent lower, chiefly owing to lower prices for animal foods. Industrial materials were 0·2 per cent higher for the month due to the advance of 1·6 per cent in the minerals group.

**COST OF LIVING.**—The Ministry of Labour's index number on the base July 1914=100, was 139 at April 1, a fall of 1·4 per cent for the month, due entirely to a decrease of 2·4 per cent in food, in which group lower prices were recorded for eggs, butter, milk and fish. The non-food groups were unchanged from the previous month.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base July 1914=100 (gold index) was 70 for March, a decline of 1·4 per cent for the month, due entirely to lower food prices, as industrial materials were slightly higher than the February level.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913=100, was 100·7 for March, a decrease of

0·2 per cent for the month. Both agricultural and industrial products were lower than the February level, although colonial products showed an increase. The greatest change in any one group was a decrease of 6·5 per cent in rubber.

**COST OF LIVING.**—The official index number, on the base 1913-1914=100, was 122·2 for March, a decrease of 0·2 per cent for the month. Decreases in food and sundries were partly offset by small advances in heat and light and clothing.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 79·4 for March, a decrease of 0·1 per cent for the month. Of the ten main groups, seven showed decreases, two groups, namely fuel and lighting materials and chemicals and drugs were higher, while the group of house-furnishing goods was unchanged from the February level. Raw materials were 1 per cent lower, while semi-manufactured and finished products were slightly higher than for February.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is the sum total of the prices per pound of 96 commodities of common consumption, was \$9.6643 at April 1, a decline of 1·3 per cent for the month. Of the 13 groups, seven were lower, of which textiles showed the largest decrease.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities, was \$172.461 at April 1, a fall of 2·46 per cent for the month, the downward movement extending to all groups except "other food."

**COST OF LIVING.**—The National Industrial Conference Board index number, on the base 1923=100, was 82·4 for March, showing no change from the February level. The slightly lower levels of the food and clothing groups were offset by a small increase in the housing group.

## FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FIRST QUARTER OF 1935

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the first quarter of 1935, was 202, there being 69 in January, 73 in February and 60 in March.

The report for the fourth quarter of 1934, showing 260 fatalities, was given in the LABOUR GAZETTE, February, 1935, page 215. In the first quarter of 1934, 193 fatal accidents were recorded (LABOUR GAZETTE, May, 1934, page 484). The supplementary list of accidents, not reported in time for inclusion in the reports covering the periods in which they occurred, contains 15 fatalities for 1934.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the LABOUR GAZETTE. Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the first quarter of 1935 were as follows: agriculture, 24; logging, 23; fishing and trapping, 7; mining, non-ferrous

smelting and quarrying, 47; manufacturing, 26; construction, 13; electric light and power, 1; transportation and public utilities, 40; trade, 10; service, 11.

Of the mining accidents, 31 were in "metaliferous mining" and 16 in "coal mining."

Of the accidents in manufacturing, 2 were in "vegetable foods, drink and tobacco," 1 in "textiles and clothing," 2 in "leather, fur and products," 10 in "saw and planing mill products," 1 in "wood products," 2 in "pulp, paper and paper products," 2 in "iron, steel and products," 2 in "non-ferrous metal products," 1 in "non-metallic mineral products," and 3 in "chemical and allied products."

In construction there were 4 fatalities in "buildings and structures," 7 in "highway and bridge," and 2 in "miscellaneous construction."

In transportation and public utilities, there were 19 fatalities in "steam railways," 2 in "street and electric railways," 9 in "water transportation," 1 in "air transportation," 7 in "local transportation," and 2 in "telegraphs and telephones."

In trade there was 1 fatality in "wholesale," and 9 in "retail."

Of the fatalities in service, 6 were in "public administration," 1 in "custom and repair," and 4 in "personal, domestic and business."

The most serious accident occurring during the period under review was in metalliferous mining in which seven miners lost their lives when their camp was buried under a snow

slide, at Taseko Lake, British Columbia, about January 27.

Other accidents involving the loss of two or more lives were as follows:—

On January 30, two farmers were fatally injured by a saw when their machine broke, at Nipawin, Saskatchewan; and on March 20, a farmer and his son were killed at St. Francois, Quebec, when struck by a belt wheel of a corn grinding machine when it broke loose.

Two lobster fishermen were drowned off New Edinburgh, Nova Scotia, on March 28, when their craft capsized while hauling in traps.

Two mining packers lost their lives when buried in a snowslide near Camborne, British Columbia, about January 1.

A premature explosion in a mine near Wells, British Columbia, caused two fatalities on February 14; and two miners were killed in a similar accident near Gold Ridge, British Columbia, on March 15. Another two miners were killed by a fall of rock at Schumacher, Ontario, on March 30.

On February 17, two men were burned by a burst of liquid fire from a furnace in a carbide shop of a chemical factory at Shawinigan Falls, Quebec.

When buried under a snowslide at Coryell, British Columbia, on January 24, a railway roadmaster, foreman and labourer lost their lives.

A milkman and his helper were killed at Valois, Quebec, on February 10, when a train struck their truck; and on February 25, a junk dealer and his helper were fatally injured in a similar accident at Cainsville, Ontario.

*Supplementary list of accidents.*—A supplementary list of accidents occurring during 1934 has been compiled which contains 15 fatalities, of which 1 was in agriculture, 1 in logging, 1 in mining, non-ferrous smelting and quarrying, 3 in manufacturing, 3 in construction, 1 in transportation and public utilities, 2 in trade and 3 in service. One of these accidents occurred in May, 1 in July, 3 in August, 2 in October, 2 in November and 6 in December.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Priority of Workmen's Compensation Levy upon Property Assigned to Bank as Security

**I**N a special case submitted before the Supreme Court of Nova Scotia that body was called upon to decide as to whether a bank's security is subject to levy under the Workmen's Compensation Act in priority to the bank's claim.

The bank (defendant) holds a security on lumber manufactured by a company. As outlined by Justice Mellish, this "security was given in compliance with the requirements of the Bank Act, R.S.C. 1927, c. 12 (now 1934 (Can.), c. 24) by a written conveyance of the lumber as security for advances made to said company and under s. 88 of said Act. After the said security was given, assessments were made against the employers of labour performed or to be performed for the purposes of said lumber company's operations, and a judgment was taken against the company for the amount of said assessments and costs, and execution was issued on said judgment under which the sheriff levied for the recovery of the amount of said judgment upon the lumber conveyed as aforesaid to the defendant bank as security for said advances."

There was the further question of the overlapping of Dominion and Provincial legislation, and this aspect of the case was expressed by Justice Carroll as follows:

"Here we have Dominion legislation primarily dealing with banks and banking, and also dealing with securities for loans, a matter

ancillary or necessary to banking business and therefore within the jurisdiction of Parliament to enact. On the other hand we have an enactment of our Legislature dealing with civil rights within the Province.

"Neither legislation is *ultra vires* of the enacting body but there is a conflict in the operation of the two Acts, because the field is occupied by both."

The decision of the Court on the two points in question was thus summarized:

A bank, although it obtains a valid security under the Bank Act, R.S.C. 1927, c. 12 (now 1934 (Can.), c. 24) for good consideration and prior in point of time to an assessment and levy made by the Board under the Workmen's Compensation Act, R.S.N.S. 1923, c. 129, is not thereby able to override the levy of the Board. The levy of the Workmen's Compensation Act is a first lien and so created by the provincial legislature and the bank took its security with knowledge that the goods in question, the products of labour were subject to an inchoate claim against the employer-owner for an amount rated upon the payrolls which would ripen into a lien when the assessment was made.

The erection by the Province under s. 78 (2) of the Workmen's Compensation Act, R.S.N.S. 1923, c. 129, of a lien upon property in priority to the claim of a bank which operates under the Dominion Bank Act is not *ultra vires* the local Legislature.

*Nova Scotia Workmen's Compensation Board versus Royal Bank, 1935, Dominion Law Reports, vol. 2, page 250.*

## SURVEY OF FEDERAL RELIEF ACTIVITIES SINCE 1930

### Report of Dominion Commissioner of Unemployment Relief Details Administration of Various Measures to Alleviate Distress and Promote Employment

**I**N accordance with the provisions of the Relief Act, 1934, a report on its operations during the fiscal year has been submitted to Parliament. The administration of the Act is vested in the Minister of Labour, Mr. Harry Hereford being the Dominion Commissioner of Unemployment Relief. The report gives detailed relief statistics as reported by the Provinces and Federal Departments for the fiscal year up to and including February, 1935. However, since the report went to press, the preliminary figures for March, 1935, have been made available. These figures for March, 1935, indicate 222,265 heads of families on direct relief (not including those on relief in the dried out areas in the West). When compared with the number on relief for the same month last year, this total shows a diminution of 13.68 per cent.

Including the heads of families, their dependents and individual cases, the total number on direct relief (exclusive of those in the dried out areas of the West) for March, 1935, is shown to be 1,080,961, a decrease of 10.36 per cent over the corresponding month of last year. In the dried out areas in the three Prairie Provinces, there are 34,963 heads of families shown to be on relief with 138,838 dependents. There are also 5,218 individual cases in this category.

In addition to those on direct relief, there were 31,322 homeless persons being cared for in the Provincial and Federal Camps and 45,731 engaged on relief work on a wage basis. There were 12,245 single homeless persons being cared for in the Prairie Provinces under what is known as the Farm Bonus Plan, and under the Relief Settlement, or Back-to-the-Land Plan, there were 18,279 settlers and dependents on the land at the end of March, 1935.

Taking into consideration all classes of relief, including those working on relief works carried out under the provisions of the relief legislation, the total for March is 1,367,557 which is 9 per cent less than the number on relief for the same period last year.

The report reviews in a special Appendix, which is reprinted below, the entire scope of government activity in relief measures since September, 1930.

## FEDERAL CONTRIBUTIONS TO RELIEF EXPENDITURES

SEPTEMBER 22, 1930-MARCH 30, 1935

In the year 1930 unemployment had become so general throughout Canada as to constitute a matter of national concern and, while not overlooking the principle that it is primarily a provincial and municipal responsibility, it was deemed desirable that assistance should be rendered by the Government of Canada towards its relief. The first session of the Seventeenth Parliament was, therefore, specially summoned for the purpose of dealing with the problems arising out of the exceptional economic conditions with resultant unemployment which were prevalent. At that session Parliament enacted The Unemployment Relief Act, 1930, which received Royal Assent on September 22, 1930. Under the provisions of this statute the sum of twenty million dollars was appropriated for the relief of unemployment under such terms and conditions as might be approved by the Governor General in Council. The Act specified that the \$20,000,000 might be expended "in constructing, extending or improving public works and undertakings, railways, highways, bridges and canals, harbours and wharves; assisting in defraying the cost of distribution of products of the

field, farm, forest, sea, lake, river and mine; granting aid to provinces and municipalities in any public work they may undertake for relieving unemployment and reimbursing expenditures made by provinces and municipalities in connection with unemployment and generally in any way that will assist in providing useful and suitable work for the unemployed."

At the date of expiration of The Unemployment Relief Act, 1930, namely March 31st, 1931, unemployment conditions throughout Canada had increased to the extent that the twenty million dollars voted by Parliament in 1930, while alleviating unemployment, proved insufficient to entirely cope with the situation, and Parliament therefore enacted at the second session of the Seventeenth Parliament legislation cited as The Unemployment and Farm Relief Act, 1931. This Act which received Royal Assent on August 3, 1931, unlike the previous legislation which appropriated a specific amount for the relief of unemployment, conferred power upon the Governor in Council to expend such moneys as in his discretion might be deemed expedient for relieving distress, providing employment and maintaining within the competence of Parliament, peace, order, and good government throughout Canada.

When the Unemployment and Farm Relief Act, 1931, expired on March 1, 1932, an Act cited as The Unemployment and Farm Relief Continuance Act, 1932, was enacted by Parliament. This Act received Royal Assent on April 4th, 1932, and in effect extended all the provisions of the Unemployment and Farm Relief Act, 1931, to May 1, 1932, notwithstanding the expiration of this statute on March 1, 1932.

As a condition of unemployment still existed in the years 1932, 1933 and 1934, it was deemed desirable to continue rendering assistance to the unemployed. Provision was, therefore, made by Parliament in the form of The Relief Act, 1932, which received Royal Assent on May 13, 1932, The Relief Act, 1933, which received Royal Assent on March 30, 1933, and The Relief Act, 1934, which received Royal Assent on April 20, 1934. These statutes invested the Governor in Council with similar powers to those invested by The Unemployment and Farm Relief Act, 1931.

Expenditures for relief extended to those in need, which were participated in by the Dominion Government under the provisions of the legislation referred to above, have included contributions to the construction of federal, provincial and municipal works, such as public buildings, the Trans-Canada and other highways, sidewalks, sewers, gas mains, water mains, breakwaters, dams, wharves, bridges, culverts, National Park improvements, subways and grade crossing eliminations, interest on the cost of railway construction carried out in advance of normal programs, the movement of settlers from the dried out areas of Western Canada, freight on feed into the dried out areas, freight on livestock from and return to the dried out areas, the transportation of unemployed to employment opportunities, a land settlement plan, the operation of relief camps for single homeless men, the making of loans, the furnishing of various guarantees, and the provision of food, fuel, clothing and shelter to those for whom no employment could be provided, all of these matters being dealt with in detail in the following pages.

## PUBLIC WORKS AND UNDERTAKINGS

Under the provision of The Unemployment Relief Act, 1930, agreements were entered into between the Dominion and the provinces providing that the Dominion would contribute 25% of the cost of public works and undertakings carried on by the municipalities to provide work for the unemployed, it being provided that a like percentage would be contributed by the province and the balance of 50% borne by the municipality concerned. The agreements further provided that the Dominion would pay one-half of the cost of provincial public

works and undertakings carried on to provide work for the unemployed, including one-half of any amounts expended by the provinces on the Trans-Canada Highway.

The agreements between the Dominion and the provinces, and the tripartite agreements between the Dominion, the province and the municipalities, in the case of municipal works, contained a provision that on all works to which the Dominion contributed fair wages were to be paid and that the maximum work day should be eight hours; that all persons employed on such works were to be, so far as practicable, residents of the locality in which the work was to be performed, and that there should be no discrimination in the employment of persons by reason of their political affiliations.

The amount contributed by the Dominion under the provisions of the Unemployment Relief Act, 1930, towards the cost of public works and undertakings carried out by the provinces and municipalities was \$11,720,257.45.

Supplementary to the contributions made to municipal and provincial works and undertakings, \$500,000 was transferred from the unemployment relief appropriation to the Grade Crossing Fund to be used to implement the fund available for the elimination of grade crossings so that unemployment might be relieved by the building of subways.

In order to provide employment for Canadian miners, in the Nova Scotia coal mines, and further to create a greater consumption of the Canadian product, the Dominion contributed one-third, namely \$41,718.22 of the additional cost of banking during the winter of 1930 and 1931 an additional 100,000 tons of Nova Scotia bituminous coal for use by the Canadian National Railways in areas west of Montreal. The remaining two-thirds of the cost was borne in equal portions by the Canadian National Railways and the coal producers.

Agreements were also entered into with the Canadian Pacific Railway Company and the Canadian National Railways whereby there would be expended by the two railway companies the sum of approximately \$25,000,000 in the performance of certain works, and the purchase of certain material over and above their normal expenditures. As compensation to the railway companies for undertaking the various works immediately the Dominion paid, under the provisions of The Unemployment Relief Act, 1930, interest at the rate of 5 per cent per annum, calculated for a period of eighteen months on the total estimated cost of the works referred to. The Dominion's disbursement in this respect was \$863,550.00 to the Canadian Pacific Railway Company, and \$882,412.35 to the Canadian National Railways.

In addition to the foregoing the sum of \$36,996.37 was expended out of the appropriation provided under The Unemployment Relief Act, 1930, by the Department of Interior on certain works in the National Parks of Canada to provide relief for the permanent residents of the Parks.

Under The Unemployment and Farm Relief Act, 1931, and the Continuance Act, 1932, the agreements between the Dominion and the provinces provided, with respect to municipal public works and undertakings, that the Dominion would contribute 25% towards the expenditures of municipalities in the five eastern provinces and 50% in the western provinces, unless by reason of their financial condition any municipality was unable to contribute the required amount in which case assumption of a greater proportion by the Dominion might be specifically authorized by the Governor General in Council. With respect to provincial works and undertakings, the Dominion contribution was 50% in all provinces and a similar percentage in all provinces was contributed by the Dominion in connection with work carried out on the Trans-Canada Highway. Towards the cost of provincial highways, the Dominion contribution was 50 per cent in Prince Edward Island, Manitoba, Saskatchewan, Alberta, and British Columbia, and 40 per cent in Nova Scotia, New Brunswick, Quebec and Ontario.

The agreements provided that a maximum work day of eight hours was to prevail; that fair and reasonable rates of wages were to be paid by the provinces and municipalities, but that such rates were not to be in excess of the rates required to be paid by the federal Government for the character or class of work in the district; that only goods and materials of Canadian manufacture or production if available were to be used; that contracts were to be let only to bona fide Canadian construction firms; and that not less than 40 per cent of the amounts spent on public works and undertakings was to be expended for labour. Provision was also made in the agreements that all persons employed on works or undertakings were to be residents of Canada and so far as practicable of the locality in which the work was being performed and in no case was discrimination to be made or permitted in the employment of any person by reason of their political affiliation, race or religious views.

The amount contributed by the Dominion under the provisions of The Unemployment and Farm Relief Act, 1931, and continuance Act, 1932, toward's the cost of public works and undertakings carried out by the provinces and municipalities was at March 30, 1935 \$25,225,707.79.

In addition to the employment afforded by the construction of public works and other undertakings of the provinces and municipalities, certain works were undertaken by the federal Government through various departments as follows:

Department of Interior—public works in the Yukon and National Parks of Canada.

Department of Agriculture—Improvements at experimental station, Fredericton, New Brunswick.

Department of Railways and Canals—Construction of C.N.R. subway at St. Lambert, P.Q., and construction on the Welland ship canal.

Board of Railway Commissioners—Grants to construction of subways and grade crossings at various points in Canada.

Department of National Defence—Repairs to Peterborough armoury, exterior painting of the Napanee armoury, completion of construction of the North Vancouver, British Columbia, rifle range; repairs to fortification walls at Quebec, P.Q.; repairs and improvements, Levis, P.Q.; repairs and improvements at the Valcartia camp, P.Q.

National Battlefields Commission—terracing a portion of avenue destined to be connected later to one of the avenues to be built across the "Covefields" in the National Battlefields of Quebec, also exploitation of Corrigan Quarry on St. Louis road, Quebec City and district, and extraction of stones for building avenues.

An extensive programme of public works was also undertaken throughout the Dominion by the Department of Public Works.

The amount expended under the Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, on such federal works and undertakings was at March 30, 1935 \$3,878,648.29.

Prior to the enacting of The Relief Act, 1932, a conference was held at which all the provinces were represented. At this conference the view expressed by the provinces was that the situation would not permit of any further extension of programmes of public works to relieve unemployment and that it was desirable that the Dominion Government should continue to contribute to the expenditures of the provinces and municipalities in respect to direct relief. Consequently public works were not carried out as extensively as under the previous relief statutes. The Dominion did, however, at the request of the provinces contribute to the construction of the various works and undertakings outlined below.

Prince Edward Island—Falconwood Hospital.

Nova Scotia—Trans-Canada highway and provincial highways.

Ontario—Roads and Trans-Canada Highway. Also board camps established by the provincial Government for unemployed who were engaged chiefly on road work.

Manitoba—Roads.

Saskatchewan—Roads.

Alberta—Roads and Embankment on Highwood River.

British Columbia—Board camps.

The amount contributed by the Dominion towards the cost of public works and undertakings carried out by the provinces under the provisions of The Relief Act, 1932, was at March 30, 1935, \$1,350,425.18.

Under the 1932 legislation, as under the 1931 legislation, the undertakings carried out by the provinces were supplemented by various federal projects, namely, relief works in the Yukon, also works in the National Parks to provide relief for the permanent residents of the Parks carried out by the Department of Interior; construction of dykes on the Assiniboine River at Winnipeg (to the cost of which the province contributed 10 per cent) carried out by the Department of Public Works; and the equipping of two steamers for the exporting of cattle by the Department of Agriculture. In addition camps for the care of single homeless men were established by the Departments of National Defence and Interior. These camps, which were continued and expanded under the subsequent Relief Acts are dealt with under the heading of "Relief to Single Homeless Persons".

The amount expended by the Dominion on federal works and undertakings under the provisions of The Relief Act, 1932, exclusive of the Department of National Defence and Department of Interior camps, was at March 30, 1935 \$38,297.43.

At a Dominion-Provincial conference held in January, 1933, the provinces expressed the view that the Dominion should resume the policy in effect in 1930 and 1931 whereby extensive programmes of public works and undertakings were carried out.

Agreements were, therefore, entered into with the provinces providing generally for Dominion contribution to municipal works on a basis of  $33\frac{1}{3}$  per cent of the direct labour cost; to Trans-Canada Highway work on a basis of 60 cents per man-day of work performed; and to work undertaken on roads other than the Trans-Canada Highway on a basis of 50 cents per man-day of work performed.

Provision was made in the agreements, as in the 1930 and 1931 agreements, that a maximum work day of eight hours should prevail on all works; that only goods and materials of Canadian manufacture or production, if available, should be used; that contracts were to be let only to Canadian persons, bona fide Canadian firms or corporations; that and all persons employed on the works were to be residents of Canada; and in no case was discrimination to be made or permitted by reason of political affiliation, race, or religious views.

With respect to municipal works, the agreements provided that the rates of wages were to be set by the municipalities, while with respect to work on the Trans-Canada Highway, and roads other than the Trans-Canada Highway, the agreements provided that should the provinces, for the purpose of carrying out the construction of such highways, establish work camps, the conditions regarding clothing, subsistence, accommodation, medical care, and allowances to labourers, and supervisory staffs, should be similar to those standardized by the Department of National Defence in their relief camps.

Under the provisions of The Relief Act, 1933, the Dominion contributed as at March 30, 1935, \$3,059,340.85 towards the cost of public works and undertakings carried out by the provinces and municipalities.

Under the 1933 legislation the Department of Interior continued relief works in the National Parks for the relief of permanent residents of the parks, the expenditure in this connection being \$66,683.06 during the fiscal year.

Under the provisions of The Relief Act, 1934, public works were not carried out as extensively as under the 1930, 1931 and 1933 statutes. However, the agreements entered into with the provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and Alberta provided for Dominion contributions with respect to construction of public works as follows:

Prince Edward Island—Trans-Canada Highway; provincial roads and municipal works.

Nova Scotia—Trans-Canada Highway; completion of various provincial highway works and municipal works approved under the 1933 Act.

New Brunswick—Trans-Canada Highway and provincial roads.

Quebec—Trans-Canada Highway; completion of certain provincial highway works and municipal works approved under the 1933 Act.

Ontario—Trans-Canada Highway; completion of various provincial highway works and municipal works approved under the 1933 Act.

Manitoba—Trans-Canada Highway; provincial roads; addition to Brandon Mental Hospital.

Alberta—Trans-Canada Highway, provincial roads, and addition to Ponoka Hospital.

No agreements were entered into with the provinces of Saskatchewan and British Columbia under The Relief Act, 1934, but authority for Dominion contribution towards the cost of camps established by the province of Saskatchewan for the purpose of carrying out road work was obtained by Order of His Excellency the Governor in Council, for the period April 1, 1934, to September 1, 1934.

The approved Dominion contribution towards the provinces' cost of construction of the Trans-Canada Highway under The Relief Act, 1934, was 50 per cent.

The provisions of the agreements with respect to rates of wages were similar to those contained in the agreements entered into with the provinces under The Relief Act, 1933, viz., a maximum work day of eight hours was to prevail; rates of wages with respect to municipal works to be set by the municipalities; rates of wages with respect to provincial works to be set by the provinces; and in no case was discrimination to be made or permitted against any resident of Canada by reason of his or her race, religious views or political affiliation.

Under The Relief Act, 1934, the carrying out of works in the National Parks to provide relief for the permanent residents of the Parks was continued by the Department of Interior, the Dominion's expenditure in this respect being \$56,468.46 during the fiscal year.

In addition to expenditures under The Relief Act, 1934, the Public Works Construction Act, passed at the last Session of Parliament, provided for a programme of Dominion public works with a total expenditure of \$39,690,000. While the actual disbursements to the end of the fiscal year were approximately \$8,500,000, contracts and commitments actually made to date are in the neighbourhood of \$25,000,000.

The following table sets forth the Dominion's disbursements with respect to public works under relief legislation from September 22, 1930, to March 30, 1935, by provinces, etc.:—

	1930 Act	1931 Act	1932 Act	1933 Act	1934 Act		Total
					On Expenditures prior to March 31, 1934	On Expenditures after March 31, 1934	
	\$	\$	\$	\$	\$	\$	\$
Prince Edward Island....	90,000.00	131,054.85	5,328.24	68,454.57		118,056.16	412,893.82
Nova Scotia.....	699,022.09	954,346.53	82,327.29	620,101.39		32,173.43	2,387,970.73
New Brunswick.....	499,990.37	718,874.30		278,798.74		13,600.00	1,511,263.41
Quebec.....	2,756,504.77	4,359,134.01		564,058.15	451.83	18,610.29	7,698,759.05
Ontario.....	3,850,000.00	8,600,134.13	928,908.05	1,359,855.96	1,756,046.32	513,299.35	17,008,243.81
Manitoba.....	871,580.46	2,593,821.94	3,500.00	86,908.60		114,104.02	3,669,915.02
Sashatchewan.....	964,407.86	2,582,995.07	16,353.59	1,767.55			3,565,524.07
Alberta.....	899,261.88	2,401,681.68	31,230.11	77,791.45		31,458.50	3,441,423.62
British Columbia.....	1,089,490.02	2,883,665.28	282,777.90	1,604.44		2,002.26	4,259,539.90
Yukon and N.W.T.....	19,998.29	9,996.91	3,395.63	5,257.70			38,648.53
Dept. of National Defence.....		70,936.20					70,936.20
Dept. of Public Works.....		1,726,732.64	6,904.43				1,733,637.07
Dept. of Agriculture.....		6,999.79	3,000.00				9,999.79
Dept. of Railways & Canals.....		673,366.35					673,366.35
Board of Railway Commissioners.....	500,000.00	500,000.00					1,000,000.00
National Battlefields Commission.....		24,809.05					24,809.05
Banking Nova Scotia Coal	41,718.22						41,718.22
Canadian National Railways	882,412.35						882,412.35
Canadian Pacific Railway Co.....	863,550.00						863,550.00
	14,027,936.31	28,238,548.73	1,363,725.24	3,064,598.55	1,756,498.15	843,304.01	49,294,610.99

The above table does not include expenditures made by the Department of Interior for works in the National Parks to provide relief for the permanent residents of the Parks as the records of that Department with respect to such works are kept by fiscal years and not by Acts. The total amount expended by the Department of Interior from September 22, 1930, to date, in this connection is, however, \$1,050,952.81.

### DIRECT RELIEF

Out of the sum of \$20,000,000 appropriated under The Unemployment Relief Act, 1930, an amount of \$4,000,000 was set aside for the purpose of supplementing the expenditures of the municipal and provincial authorities for "Direct Relief" (which was defined as food, fuel, clothing and shelter, or the equivalent thereof) where suitable work could not be provided. The Dominion contribution towards the direct relief expenditures of municipalities was  $33\frac{1}{3}$  per cent, a similar proportion being borne by the province and municipality concerned, while the cost of provincial direct relief in unorganized territories was borne on a 50-50 basis between the Dominion and province concerned.

Unlike relief works, the amounts granted to the various provinces and municipalities were not approved prior to the incurring of the expenditure, but were paid by the Dominion on receipt of certified statements of expenditure from the provinces.

Of the \$4,000,000 set aside for direct relief under the provisions of The Unemployment Relief Act, 1930, the Dominion disbursed to the provinces for that purpose the sum of \$3,532,119.44.

The agreements entered into between the Dominion and the provinces under the terms of The Unemployment and Farm Relief Act, 1931, provided for Dominion contribution towards the direct relief expenditures of the municipi-

palities and provinces on a similar basis to that in effect under the 1930 Act. In 1931 however a situation had arisen chiefly in the western provinces whereby a number of destitute persons, who having no settled place of abode, were moving about the country and receiving direct relief at different centres. It was represented that the cost of this class of relief was not a proper charge against the municipalities, and authority was therefore obtained under the provisions of the 1931 Act for a Dominion contribution of 50% of the cost of direct relief distributed to "transients," the balance of the cost of such relief being borne by the province concerned. Authority was also obtained under the 1931 legislation for a Dominion contribution of 50 per cent of the direct relief expenditures of municipalities which, owing to their financial condition were unable to bear their share of direct relief costs.

The amount expended by the Dominion for direct relief purposes under The Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, was at March 30, 1935, \$6,406,654.54. This figure does not include contributions to the province of Saskatchewan for direct relief distributed by the Saskatchewan Relief Commission, the activities of that Commission being dealt with under the heading "Relief in the Dried Out Areas."

Under the provisions of The Relief Act, 1932, the same basis of contribution in respect to direct relief as was in force under The Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, applied generally. In the case of municipalities unable to bear the full  $33\frac{1}{3}$  per cent, special percentages were approved on the recommendation of the provinces, the Dominion and province concerned bearing the increased balance equally. Under this legislation, the Dominion also contributed 100 per cent, not exceeding 40 cents per person, per diem, of the cost of direct relief extended to single homeless persons. This phase of relief is dealt with under the heading "Relief to Single Homeless Persons."

The total cost to the Dominion for direct relief purposes under The Relief Act, 1932, exclusive of "Single Homeless Persons" relief was at March 30, 1935, \$16,989,313.09.

The agreements entered into with the provinces under The Relief Act, 1933, provided for Dominion contributions towards the cost of direct relief similar to those made under The Relief Act, 1932. One deviation from previous direct relief regulations, however, was the provision contained in the 1933 agreements requiring that before the equivalent of food, fuel, clothing or shelter was distributed by the municipalities and provinces, the distribution of such equivalent must be approved by the Dominion.

The amount expended for direct relief purposes by the Dominion under The Relief Act, 1933, was at March 30, 1935, \$18,226,980.66.

Under the provisions of The Relief Act, 1934, the agreements entered into with the provinces under the provisions of The Relief Act, 1933, in so far as they concerned direct relief, were extended by Orders of the Governor General in Council to July 31, 1934. From August 1st, 1934, to March 30th, 1935, the federal Government in place of contributing to direct relief expenditures on a percentage basis paid to the provinces for the period mentioned, a monthly grant-in-aid to assist each province in discharging its responsibilities connected with the relief of necessitous persons within its borders during the period referred to; the province undertaking that all moneys received by virtue of this arrange-

ment should be used solely for relief purposes. These grants-in-aid for the eight months August 1934 to March 1935 inclusive, were determined on the basis of need and the ability of the province to deal with the problem, as follows:

Prince Edward Island.....	\$ 17,000	equal to \$ 2,125.00	per month
Nova Scotia.....	327,000	" " 40,875.00	" "
New Brunswick.....	200,000	" " 25,000.00	" "
Quebec.....	4,000,000	" " 500,000.00	" "
Ontario.....	4,800,000	" " 600,000.00	" "
Manitoba.....	1,080,000	" " 135,000.00	" "
Saskatchewan.....	1,600,000	" " 200,000.00	" "
Alberta.....	800,000	" " 100,000.00	" "
British Columbia.....	1,200,000	" " 150,000.00	" "

Apart from the direct relief arrangements set out above, the Dominion paid to the province of Saskatchewan 100 per cent of the direct relief expenditures of the Saskatchewan Relief Commission in certain sections of the dried out areas of that province under the 1931 and 1932 legislation. Likewise the Dominion contributed 100 per cent of certain direct relief expenditures made by the province of Alberta in the dried out areas of that province under the 1932 Act. These undertakings however are dealt with under the heading of "Relief in the Dried Out Areas."

The following table sets forth the Dominion's disbursements with respect to "Direct Relief" under relief legislation since 1930 by provinces exclusive of the grants-in-aid under the Relief Act, 1934:—

	1930 Act	1931 Act	1932 Act	1933 Act	1934 Act		Total
					Expendi- tures for fiscal year March 31, 1934	Expendi- tures after March 31, 1934	
	\$	\$	\$	\$	\$	\$	\$
Prince Edward Island.....	5,199.45	4,041.23	19,770.69	18,464.18	12,122.23	6,387.57	65,985.35

## RELIEF SETTLEMENT

Under the provisions of The Relief Act, 1932, agreements were completed with all the provinces except Prince Edward Island providing for a Dominion non-recoverable expenditure of one-third of an amount not to exceed \$600.00 per family for the purpose of providing a measure of self-sustaining relief to families who would otherwise be in receipt of direct relief by placing such families on the land, it being provided that the remaining two-thirds of the expenditure were to be contributed by the province and municipality concerned as might be decided between the province and the municipality. The agreements provided that the Dominion contribution should be payable to the provinces progressively as expenditures were made by the provinces and municipalities and that the total expenditure on behalf of any one family during the first year should not exceed \$500.00 for all purposes, inclusive of subsistence and establishment, a minimum amount of \$100.00 to be withheld to provide subsistence if necessary during the second year of settlement. The agreements which covered a period of two years expired on March 31, 1934.

Under the provisions of The Relief Act, 1934, agreements effective from April 1, 1934, to March 31, 1936, providing continuity of settlement with the agreements which expired March 31st, 1934, were entered into with all the provinces excepting Prince Edward Island and British Columbia. Provision is made in the new agreements for an additional non-recoverable contribution by the Dominion, on the recommendation of the province and with the approval of the Governor in Council, of one-third of an amount not exceeding \$100 in the case of a settler who may not be self-supporting at the end of the two year period and for whom subsistence expenditures during the third year of settlement are deemed necessary. This additional amount for subsistence during the third year where necessary, applies both to those settled under the 1932 agreements and 1934 agreements.

With respect to transportation, arrangements have been made with the railway companies whereby reduced passenger and freight rates are in effect for settlement operations under this plan.

Under the terms of the Dominion-Provincial relief settlement agreements the provinces are responsible for the administration of the settlement including,

- (a) the selection of suitable families;
- (b) the selection of suitable lands;
- (c) the settlement of families on the land;
- (d) the expenditure of the public monies involved.

The agreements further provide that the provinces shall each set up an advisory committee upon which shall be included representatives of the Dominion Land Settlement Branch, the Colonization Branch of the Canadian Pacific Railway Company, and the Colonization Branch of the Canadian National Railways. The counterpart of the provincial advisory committees is a Dominion committee appointed to act in an advisory capacity to the Minister of Labour, who is charged with the responsibility of the disbursement of the Dominion funds involved. The Dominion advisory committee consists of the Deputy Minister of Immigration and Colonization, the Dominion Commissioner of Unemployment Relief, the Chief Commissioner of Colonization of the Department of Immigration and Colonization, the Chief Commissioner of Colonization for the Canadian Pacific Railway Company, the Director of Colonization for the Canadian National Railways and the Chief Accountant of the Dominion Unemployment Relief Branch.

Reports received from the provinces in regard to the number of approved settler families and the total number of individuals on the land, both under the 1932 and 1934 agreements as at March 30, 1935, are as follows, while the total cost to the Dominion in connection with this scheme at the same date is \$527,392.75:—

Province	No. of Settler Families	No. of Indi- viduals
Nova Scotia.....	263	1,655
Quebec.....	795	4,929
Ontario.....	503	2,483
Manitoba.....	507	2,430
Saskatchewan.....	826	4,096
Alberta.....	518	2,451
British Columbia.....	43	235
	3,455	18,279

## RELIEF TO SINGLE HOMELESS PERSONS

In the fall of 1932, representations were made to the Government with respect to certain municipalities in Western Canada to the effect that they were unable to bear the cost of relief of many thousands of transients who, it was represented, were neither residents of the municipalities nor the provinces themselves.

Agreements were consequently entered into with the four western provinces whereby it was agreed that the provinces should establish camps under the management of honorary commissions appointed by provincial Executive Order, such camps to be operated at various leading centres where single homeless persons selected by the commissions could be provided with food, fuel, clothing and shelter and so far as possible be engaged in useful work. It was also provided by the agreements that, where suitable, single homeless persons might be placed on farms, or, at the discretion of the commissions, cared for by any municipality or charitable organization. The agreements provided that the Dominion Government would pay 100 per cent of the cost of providing necessary food, fuel, clothing and shelter to this class of unemployed persons at a cost not to exceed 40 cents per person per diem, except in the case of persons placed on farms, who, it was provided, would receive \$5.00 per month, the provinces bearing any necessary costs of administration.

These agreements were in effect to July 31st, 1933, after which date agreements entered into with the four western provinces under the terms of The Relief Act, 1933, provided that the Dominion would assume the responsibility for the care of physically fit homeless men. This responsibility the Dominion discharged by establishing camps under the administration of the Departments of Interior and National Defence. With respect to those not eligible for the federal camps, the 1933 agreements provided that the Dominion would contribute one-half of the actual cost, the total of such actual cost not to exceed 40 cents per day per person, of providing the necessary food, fuel clothing and shelter for each homeless person placed in residence in a provincially operated camp with the same allowance when relief was distributed to such persons by a municipality or charitable organization. Under the Relief Act, 1934, the Dominion is continuing to care for physically fit homeless men in federally operated camps, while the Dominion's contribution to the provinces' cost of caring for physically unfit homeless persons is included in the monthly grants-in-aid being made to the provinces as described in the section of this summary dealing with direct relief.

At March 30, 1935, the Dominion's contributions to the provinces for the care of single homeless persons exclusive of the cost of operating the federal camps, the grants-in-aid under the 1934 Act, and the placement of persons on farms, all of which are dealt with in other sections of this summary, aggregated to the province of Manitoba \$679,863.34, to the province of Saskatchewan \$124,255.27, to the province of Alberta \$585,843.51, and to the province of British Columbia \$1,896,168.70.

## DEPARTMENT OF INTERIOR

In 1932 relief operations for the care of single homeless men were carried on by the Department of Interior during the summer season and until December 31st, camps being established on the Banff-Jasper Highway and men taken principally from the cities of Calgary and Edmonton. This work was done under an agreement with the province of Alberta whereby the cost was divided between the province of Alberta and the Dominion. The allowance to ordinary labour was \$7.50 per month up to November 1st, from which date on the allowance was \$5.50 per month. Early the same fall relief work was carried out in Riding Mountain Park under a somewhat similar arrangement between the Dominion Government and the provincial Government of Manitoba.

Since the fall of 1933, 20 cents per working day has been the allowance granted the men taken into the camps. Supplementary to the allowance mentioned above for general labour, free clothing, food, living quarters, medical attention, transportation, etc., were supplied by the Government.

In addition to the relief works undertaken in the National Parks, construction operations, as a relief measure for single homeless men and at relief rates, were undertaken by the Department of Interior on the Big Bend Highway in the province of British Columbia beginning in the fall of 1931 and for various periods since that date.

In all the different National Parks a great variety of projects were undertaken including general brushing and clearing of deadfall and debris adjacent to town-sites, along highways, etc., in order to improve the general appearance of the Parks, as well as to reduce the fire hazard. During the first few years relief operations were undertaken, considerable labour was used in the cutting out of boundary lines for Riding Mountain, Prince Albert, Jasper and Banff Parks. In the way of development in townsites in the various Parks, such works were undertaken as the construction of recreational areas, camp sites, and various structures necessary in the development of the Parks.

Road construction was a major class of work undertaken as a relief measure and the following are examples of this class:—

Clear Lake-Norgate and Clear Lake-Dauphin Roads in Riding Mountain Park,

Rabbit-Meridian Road in Prince Albert Park,

Sandy Beach Road in Elk Island Park,

Maligne Canyon and Jasper West Roads in Jasper Park,

Belly River Road in Waterton Lakes Park.

The most outstanding and better known roads on which there has been relief work are the Banff-Jasper Highway, to join Banff and Jasper National Parks, and the Big Bend Highway in British Columbia, the latter road being part of the Trans-Canada Highway.

The number of men in the camps administrated by the Department of Interior at March 30, 1935, was 743 while the total cost of maintaining these camps to March 30, 1935, was \$2,111,320.30.

#### DEPARTMENT OF NATIONAL DEFENCE

An Order in Council of October 8, 1932, passed under the provisions of The Relief Act, 1932, provided for the establishment of camps by the Department of National Defence wherein a maximum of 2,000 single unemployed homeless men in need of relief might be employed on the clearing of 24 landing fields, on the Trans-Canada Airway, and on repairs to the citadel walls at Halifax and Quebec, both of which are important national historical memorials. This plan of taking care of the unemployed homeless men through the Department of National Defence proved so effective that it was steadily expanded under subsequent relief legislation with a view to taking care of additional single homeless men out of employment, with the result that authority obtained at March 30, 1935, for the care of a maximum of 28,173 men on works that included development of intermediate landing fields, aerodromes and municipal and provincial airports; forestry; clearing; development of air stations; highway construction; rifle ranges; development of military training camps; improvements to barracks, and repairs to historic fortifications.

The men taken into the National Defence Relief camps were provided with transportation, food, accommodation, clothing, a free issue of tobacco, an allowance of 20 cents per working day, and in addition necessary medical, dental and hospital attention.

Since October 8, 1932, 137 projects have been instituted by the Department of National Defence of which 103 were active at March 30, 1935.

The actual personnel in the camps at March 30, 1935, numbered 20,359, while the total number who had passed through the Defence Camps at February 28, 1935, was 112,949.

The Dominion disbursements with respect to the operation of the National Defence camps aggregated at March 30, 1935, \$13,657,957.21.

\* \* \* \*

One of the fundamental reasons for the establishment of the federal camps was the far reaching injury to the State which might result from the effect of unemployment upon those just reaching manhood who are faced with idleness and uncertainty. It was with a view of preserving the morale and efficiency of this class of needy persons that the camps were established and not with the idea of giving permanent employment to young men. The purpose was to maintain their health and efficiency until such time as they could be absorbed into the natural channels of industry.

### FARM PLACEMENTS

Under the provisions of The Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, the Dominion agreed at the request of the province of Manitoba to contribute 50 per cent towards the cost of placing unemployed men on farms, it being agreed that the province and municipality concerned would each contribute 25 per cent of such cost. The arrangement consisted of payment by the province of \$5.00 per month to the worker and \$5.00 per month to the farmer. Under this plan 1,602 men were placed on farms during the fall and winter of 1931-32 at a cost to the Dominion of \$14,885.04.

Under the provisions of the 1931 legislation, the Dominion also agreed at the request of the province of Saskatchewan to contribute 50 per cent towards the cost of placing unemployed men on farms in that province, the balance of such cost being borne by the province. The arrangement in Saskatchewan provided for payment of \$5.00 per month with board and laundry to the worker and \$10.00 per month to the farmer. In the province of Saskatchewan 7,937 men were placed on farms under the 1931 Act at a cost to the Dominion of \$140,274.91.

During the months of May, June, July and August, 1932, the province of Saskatchewan placed 335 unemployed men taken from the three year crop failure area of that province on farms paying the worker \$5.00 per month. Towards the cost of these placements the Dominion contributed under the provisions of The Relief Act, 1932, 50 per cent or \$1,567.89.

The agreements entered into with the four western provinces under the 1932 Act respecting "Single Homeless Persons" provided amongst other things for the placement of such persons on farms on a basis of \$5.00 per month being paid to the worker, the Dominion contributing to the provinces in this connection 100 per cent of their expenditures exclusive of administration costs. These agreements were in force to July 31, 1933.

The arrangements made with the four western provinces under the "Single Homeless Persons" agreements insofar as they concerned farm placements were extended under the terms of the general relief agreements entered into with those provinces under The Relief Act, 1933, to March 31, 1934, while provision for a similar contribution from the Dominion namely \$5.00 per month for each person placed on a farm was included in the arrangements made with the provinces of Manitoba, Saskatchewan and Alberta under the provisions of The

Relief Act, 1934. The farm placement arrangement under the 1934 Act was effective in the provinces of Alberta and Manitoba from August 1, 1934, to March 31, 1935, and in Saskatchewan from October 1, 1934, to March 31, 1935.

Statistics as to the number of persons placed on farms under the "Single Homeless Persons" agreements and subsequent farm placement arrangements were submitted by the provinces on a monthly basis not cumulatively as was the case under the 1931 Act. The following table shows in the case of the 1931 Act the total number of placements effected as reported by the provinces and in the case of the other Acts the number on farms during the peak month. The Dominion's disbursements with respect to farm placements are also set forth in the ensuing table:—

Province	1931 Act		1932 Act		1933 Act		1934 Act		Totals

## RELIEF IN THE DRIED OUT AREAS

During the years 1929 and 1930 a large area of the province of Saskatchewan consisting of approximately 50 rural municipalities, with a population of approximately 125,000 people, was affected by drought. In view of the great distress caused by this drought, an agreement was entered into between the Dominion and the province of Saskatchewan under the provisions of the Unemployment Relief Act, 1930, in which agreement it was provided that the Dominion might pay to the province a sum not to exceed \$500,000 to reimburse to the province one-half the cost of its expenditures for undertakings and other services carried on by the province to provide necessary relief in the dried out areas. Under the provisions of this agreement the full amount of \$500,000 was paid to the province.

By 1931 a situation had arisen in the province of Saskatchewan by which 93 rural municipalities and local improvement districts, known as "A" area, had suffered three years of successive crop failure; a smaller portion consisting of 76 rural municipalities and local improvement districts, known as "B" area, had suffered two years' successive crop failure and a still smaller portion consisting of 69 rural municipal and local improvement districts, known as "C" area, had suffered a total crop loss. In addition to the areas above referred to, a problem presented itself in the northern areas of the province comprising 90 rural municipalities and local improvement districts to which families had migrated from the dried out areas of the south carrying with them their personal belongings, but who had no means of support. It was apparent that the task of relieving distress in these areas was too serious and too difficult to be dealt with by ordinary methods, that is to say, through local welfare societies or ordinary local constituted authority, where such authority existed in the form of municipal councils. A commission known as the Saskatchewan Relief Commission was, therefore, appointed by Executive Order of the Saskatchewan Government dated August 3, 1931.

The Dominion contributed to the province towards the relief expenditures of the Saskatchewan Relief Commission under the provisions of the Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, as follows:—

1. 50 per cent of freight charges on shipments of food supplies and other commodities shipped to "A" area by churches and other organizations in Canada for distribution by the commission.
2. 100 per cent of direct relief expenditures in "A" area.
3. 100 per cent of direct relief expenditures for those moved from "A" area to other parts of the province.
4. 100 per cent of expenditures for feed grain and fodder in "A" area.
5. 50 per cent of expenditures for movement of settlers' effects at a reduced rate arranged with the railway companies from "A" and "B" areas.
6. 50 per cent of expenditures for the movement of stock from "A" and "B" areas to other parts of the province at a reduced rate arranged with the railway companies for the purpose of feeding and return of such stock to owners.
7. Payment of 100 per cent grazing dues for stock.
8. 50 per cent of direct relief expenditures in "B" area.

The Dominion contributions towards the expenditures of the Saskatchewan Relief Commission were made by way of advances to the province of Saskatchewan, who, in turn, advanced the money to the commission against which certified statements of expenditure were credited after audit.

The total cost to the Dominion for relief distributed by the Saskatchewan Relief Commission, under The Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, was at March 30, 1935, \$5,372,971.30.

In 1931 a similar situation to that existing in Saskatchewan was prevalent in certain sections of the province of Alberta and it was deemed advisable that the Dominion contribute towards the cost of special relief measures in the dried out areas of that province. Special measures in Alberta were contributed to by the Dominion on a 50 per cent basis and consisted of the following:—

- (1) Movement of settlers from dried out areas.
- (2) Freight for movement of stocker and feeder cattle.
- (3) Freight on feed.
- (4) Freight and passenger expenditures for movement of settlers.
- (5) Freight on six cars of donated vegetables.
- (6) Bonus to registered seed growers.
- (7) Freight on seed grain.
- (8) Seed grain including cleaning charges.

The cost to the Dominion in connection with special relief measures in the dried out areas of Alberta under The Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, was at March 30, 1935, \$146,433.20.

Under the provisions of The Relief Act, 1932, the Dominion continued to contribute to the expenditures of the Saskatchewan Relief Commission on the same basis as under The Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932. In addition, however, the Dominion contributed 100 per cent of the cost of freight on feed and fodder shipped at reduced rates to "A" area and 100 per cent of the cost of freight for removal of haying outfits at reduced rates from and return to "A" area. The Dominion also agreed to contribute 100 per cent not exceeding \$100,000 of expenditures for medical relief in the dried out areas of the province of Saskatchewan to be utilized for payment of not more than \$75.00 per month to Doctors treating patients residing

in "A" area, and not more than \$40.00 per month for Doctors treating patients residing in "B" area, to enable them to visit their patients, and not more than 50 cents per patient, per diem, for city hospitals treating patients from "A" area, and not more than 25 cents per patient, per diem, to city hospitals treating patients from "B" area.

The amount contributed towards the expenditures of the Saskatchewan Relief Commission, under the provisions of The Relief Act, 1932, which, as under The Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, were made by way of advances to the province against which certified statements of expenditure were credited after audit, was at March 30, 1935 \$4,455,533.28.

Under the provisions of The Relief Act, 1932, the Dominion contributed towards the expenditures of the province of Alberta for relief in the dried out areas as follows:—

- (a) 50 per cent of the cost of purchase and shipment of seed grain for the dried out areas in less than car load lots.
- (b) 100 per cent of the cost of fodder distributed to settlers in the dried out areas.
- (c) 100 per cent of certain direct relief expenditures incurred in the dried out areas.

The dominion disbursements with respect to such relief in the dried out areas of the province of Alberta under The Relief Act, 1932, aggregated at March 30, 1935, \$43,942.80.

Under the provisions of The Relief Act, 1933, the Dominion agreed to contribute with respect to the dried out areas of Saskatchewan and Alberta one-third of the cost of moving settlers from dried out areas; 25 per cent of the cost of transportation of stock from dried out areas for winter feeding and return and one-third of the cost of freight on fodder moved into the dried out areas.

By 1933, certain sections of the province of Manitoba had also suffered crop failures and the Dominion agreed to contribute to that province under the provisions of The Relief Act, 1933, 25 per cent of the cost of transportation of livestock from dried out areas for winter feeding and return and one-third of the cost of freight on fodder moved into the dried out areas.

No accounts have at this date been received from the provinces of Saskatchewan and Alberta with respect to this type of relief, but payments to the province of Manitoba under The Relief Act, 1933, in this connection aggregate \$6,831.79.

Under The Relief Act, 1933, the Dominion also contributed towards the direct relief expenditures of the provinces in the dried out areas, the amount of the Dominion assistance in this regard being similar to the arrangements in effect in the other sections of the provinces, which arrangements are set out fully under the heading "Direct Relief".

Under the provisions of The Relief Act, 1934, the Dominion agreed to contribute towards the cost of relief in the dried out areas of the three Prairie Provinces from September 1, 1934 to March 31, 1935 one-half of:—

1. Movement of settlers with their effects and stock from dried out areas to suitable location.
2. Movement of cattle from dried out areas to suitable locations for winter feeding and return.
3. Movement of feed and fodder into dried out areas.

The Dominion expenditures with respect to these measures were at March 30, 1935, \$59,965.42 in Manitoba and \$13,760.81 in Alberta while no accounts had been received from the province of Saskatchewan.

The Dominion further agreed to pay one-half of the net cost of freight on live cattle shipped under provincial certificate from dried out areas in the provinces of Manitoba, Saskatchewan and Alberta, to stockyards within those provinces where abattoirs were located, provided that such cattle were there slaughtered and converted into tankage or boneless beef. The Dominion also agreed to pay one-half of the net cost of freight on such tankage or boneless beef from the point of manufacture to the point of marketing, provided that such tankage was not shipped to the United Kingdom and that such boneless beef was not consumed in Canada or the United Kingdom. It was provided that the provinces were also to pay one-half the net cost of freight on the live animals and manufactured products. At March 30, 1935, no accounts had been received from the provinces with respect to this arrangement.

To March 30, 1935, \$5,000,000 has been paid out under the Relief Act 1934 by way of advance to the province of Saskatchewan for relief in the dried out area and actual disbursements by the province are being checked by a representative of the Dominion stationed at Regina. A final decision has not yet been reached with the province as to the amount of the cost of these relief measures which will be assumed by the Dominion and, in the meantime, the sum advanced is being treated by the Department of Labour as an accountable advance.

Under the provisions of The Relief Act, 1934, as under The Relief Act, 1933, contributions were also made by the Dominion towards the direct relief expenditures of the Prairie Provinces in the dried out areas, the Dominion's contribution to such expenditures being on the same basis as in other sections of those provinces.

### TRANSPORTATION OF UNEMPLOYED TO EMPLOYMENT OPPORTUNITIES

Since 1931 arrangements have been in effect with the Canadian Passenger Association whereby a reduced fare of  $.01\frac{1}{2}$  cents per mile was granted on Railways for men going to relief camps, both federal and provincial, and for the movement of unemployed farm help from urban centres to farms under arrangements made by provinces, municipalities, and farmers, whereby farm help would be given employment. The cost of such transportation was borne generally on a fifty-fifty basis by the Dominion and the province concerned, except of course in the case of men going to federal camps in which case the Dominion paid the entire cost.

Upon termination of employment, provided that the worker remained 90 days or more, a return fare was arranged at the rate of .02 cents per mile payable by the worker.

The following table shows the amounts contributed by the Dominion to the provinces with respect to the transportation of unemployed as at March 30, 1935, but does not include the cost of transportation of men to federal camps such cost being included in the figures shown under the Department of National Defence and Department of Interior camps.

\*Includes \$880.90 collectible from the Province.

## LOANS AND GUARANTEES

Apart from contributing to the cost of public works and undertakings, direct relief, etc., the Dominion assisted the four western provinces by way of loans. These loans, which were authorized under relief legislation, were secured by provincial Treasury Bills and bore interest at rates ranging from  $4\frac{1}{2}$  per cent to  $5\frac{1}{2}$  per cent.

Generally speaking, loans were made for the purpose of:—

- (1) Assisting the provinces in defraying their share of the cost of approved relief works and/or to loan to the municipalities for the same purpose.
- (2) Assisting the provinces in defraying their share of the cost of direct relief and/or to loan to municipalities for the same purpose.
- (3) Meeting commitments in Canada and New York.
- (4) Assistance to farmers in connection with seeding operations including purchase of seed grain.

At March 30, 1935, the amounts due to the Dominion by the provinces of Manitoba, Saskatchewan, Alberta and British Columbia with respect to loans were as follows:—

Manitoba.....	\$ 13,108,629 45
Saskatchewan.....	34,123,151 16*
Alberta.....	11,977,000 00
British Columbia.....	15,014,234 73

all of which bore interest at  $4\frac{1}{2}$  per cent.

In addition to the foregoing at March 30, 1935, loans aggregating \$5,518,000.00 had been authorized under the Relief Act, 1934, but not yet paid.

In addition to the loans made to the western provinces for relief purposes, the Dominion loaned to the Canadian Pacific Railway Company, under the provisions of The Unemployment and Farm Relief Act, 1931, the sum of \$1,447,222.71 for the purpose of paying shop wages to 8,455 employees of that railway company from November 17 to December 31st, 1931, in order that the company might give employment during that period to that number of employees who would otherwise have been laid off. The Order in Council authorizing this loan specified that repayment was to be made to the Government without interest on demand, as soon as the railway company was able to resume payment of dividends at more than at the rate of 5 per cent per annum.

Under the provisions of The Relief Act, 1932, authority was obtained by Order in Council for a loan to be made to the Canadian Pacific Railway Company of \$1,000,000 for the purpose of paying the wages of workmen in connection with shop operations prior to December 31, 1932. This loan the Order in Council specified, was to be repaid without interest before further dividends were declared by the company.

The Dominion also under authority of the various Relief Acts authorized the following guarantees:—

- (1) Orders in Council dated June 28, 1933, and July 27, 1933, authorized the guarantee of repayment to the Bank of Montreal of an amount up to \$660,000 advanced to the Algoma Steel Corporation relative to the production of 30,000 tons of steel rails and authorized payment by the Dominion of interest at 5 per cent on such guaranteed advances until such time as the rails are paid for by the Canadian National Railways.

\*This figure does not include an advance of \$5,000,000, to the province of Saskatchewan for relief purposes in the dried out areas as referred to on page 42, outstanding for settlement when accounts respecting the Dominion contribution thereto are received and approved.

- (2) Orders in Council dated July 11, 1932, February 6, 1933, and June 6, 1933, authorized a guarantee to certain banks against loss in respect to advances amounting to \$15,538,500 secured by first mortgage bonds of the Beauharnois Light, Heat and Power Company.  
(All liability under this guarantee has been extinguished as the company repaid the guaranteed bank advances.)
- (3) An Order in Council dated June 2, 1933, authorized the guarantee of interest and principal of Treasury Bill of the province of British Columbia to the amount of \$626,533.75; issued to the Canadian Bank of Commerce to meet New York maturity.
- (4) An Order in Council of June 2, 1933, authorized a guarantee to certain chartered banks of repayment of an amount up to \$1,100,000 advanced to the Dominion Steel and Coal Corporation relative to the production of 50,000 tons of steel rails and authorized payment by the Government of interest at 5 per cent on such guaranteed advances until such time as the rails are paid for by the Canadian National Railways.
- (5) An Order in Council of June 2, 1933, authorized the guarantee of interest and principal of Treasury Bill of the province of Manitoba to the amount of \$5,894,127.49; issued to the Royal Bank of Canada to meet New York maturities.
- (6) Orders in Council dated April 28, 1932, and February 22, 1933, authorized a guarantee to chartered banks in Winnipeg against loss due to the assumption of liabilities of the province of Manitoba Savings Office which were, at March 30, 1935, \$8,820,660.08.
- (7) Order in Council dated March 22, 1933, authorized the guarantee of repayment to certain chartered banks of an advance of \$625,000 and interest made to Newfoundland.
- (8) Orders in Council dated September 12, 1931, July 11, 1932, April 12, 1933, and May 14, 1934, authorized the guarantee of repayment of advances made by chartered banks to Canadian Co-operative Wheat Producers in connection with wheat or other grains grown in 1930 and purchases of wheat or other grains deemed necessary to secure the advantageous sale of such grains.

Orders in Council dated September 12, 1931, September 28, 1931 and November 30, 1931, authorized the guarantee of repayment of advances by chartered banks to marketing agencies in connection with the 1931 crop.

Orders in Council dated September 20, 1932, March 20, 1933, and April 20, 1933, authorized the guarantee of repayment of advances by chartered banks to marketing agencies in connection with the 1932 crop.

(In connection with the 1931 and 1932 crops, the advances obtained by the marketing organization under guarantee were repaid and no liability was incurred by the Dominion Government).

- (9) An Order in Council of November 29, 1933, authorized the guarantee by the Dominion of repayment of loans made by chartered banks to the Canadian Pacific Railway Company totalling \$60,000,000 with interest thereon at the rate of 5 per centum, per annum, payable half yearly, said loan to be repaid on or before the 1st of December, 1938, and to be secured by the deposit with, and pledge to the several banks by the said railway company of its perpetual 4 per cent consolidated debenture stock having a nominal or par value of \$100,000,000. In the event of the Dominion being called upon to repay at maturity the whole or any part of the said loans and interest, provision is made for the transfer by the banks to the Crown of securities held. (The Government's liability under this guarantee has to date been reduced by \$12,000,000.)

## OTHER UNEMPLOYMENT RELIEF PROJECTS TO WHICH THE DOMINION CONTRIBUTED

In addition to the various, more or less, set policies under which assistance with respect to unemployment relief was rendered to the provinces as illustrated in the foregoing pages, a number of other methods of alleviating unemployment were followed which, while not carried out as extensively as the major projects, are of interest by reason of their nature. A description of these measures which indicates the extent of the Dominion's contributions follows:

Under the provisions of The Unemployment and Farm Relief Act, 1931, and Continuance Act, 1932, authority was obtained by Order in Council for payment by the Dominion, not in excess of \$1,300,000 of the cost of 2,000,000 railway ties to be immediately purchased by the Canadian National Railways, throughout Canada, with a view to substantially relieving the existent unemployment situation. Under this authority the sum of \$1,099,359.39 was expended.

Arrangements were made with the Canadian Pacific Railway Company under the same legislation for the laying during the months of October, November and December, 1931, of heavy steel rail which had been rolled for that company, but which was not intended to be laid in the Fall of 1931, and also for the relaying of released rail. The labour cost incurred in the rail laying programme referred to, which amounted to \$209,196.98, was paid by the Dominion.

In the summer of 1932 representations were made to the Dominion Government by the provincial authorities of Nova Scotia to the effect that owing to the closing of the mine at the Town of New Waterford, which is the centre of the mining district in Cape Breton, a serious unemployment situation had arisen, it being estimated that there were some 700 men out of work. The province further represented that there were some 300 foreigners and their families amongst those unemployed who were not deportable, but who were willing to go to their native countries if transportation was provided. The places to which these people sought return included the British Isles, France and some Central European countries, while others wished to return to the West Indies. In view of the existent situation, the Dominion agreed to contribute under the provisions of The Relief Act, 1932, 2/5 of the total cost of repatriation of these miners from the Town of New Waterford to their homes, such total cost not to exceed \$20,000. The cost of this undertaking, however, proved more expensive than was estimated, and when the repatriation operations, which were carried out by the Town of New Waterford and the Dominion Steel and Coal Corporation the latter contributing 1/5 towards the cost, were completed, it was found that only 234 persons had been repatriated, the total cost of such repatriation being \$19,893.53. The Dominion contributed towards this undertaking as agreed 2/5 of the total cost or \$7,957.41.

In order to relieve distress in the coal mining area of Nova Scotia, an arrangement was entered into between the Dominion, the province of Nova Scotia, the province of Ontario and the Dominion Coal Company, whereby it was agreed that the excess cost of \$2.39 per ton over the price at which American coal could be purchased, for a cargo not exceeding 6,500 tons of Nova Scotia coal to be delivered in Toronto for use in provincial public buildings, be divided as follows:—

Dominion Coal Company.....	.52
Province of Ontario.....	.37
Province of Nova Scotia.....	.50
Dominion Government.....	.50

Under this arrangement 6,087 tons 441 lbs. of Nova Scotia coal were delivered, toward the cost of which the Dominion contributed, under The Relief Act, 1932, as agreed 50 cents per ton, or \$3,043.61.

Under the provisions of The Relief Act, 1933, an Order in Council dated June 2, 1933, was passed authorizing, as a temporary measure to off-set the disturbing effects of instability in the exchange markets, the establishing of a fund from which payments might be made to exporters of certain commodities to Great Britain of the difference between the amounts actually received in respect of such exports at the ruling rate of exchange, and the amount which would have been received had the pound sterling been valued at \$4.60. Out of this fund the Dominion paid the following amounts:—

<i>Commodity—</i>	
Cheese.....	\$ 5,466.99
Bacon and Hams.....	24,021.03
Cattle.....	10,683.44
Eggs.....	409.80
Canned lobsters.....	2,010.57
Canned salmon.....	158.39
	<hr/>
	\$42,750.22
Administration.....	217.82
	<hr/>
	\$42,968.04
	<hr/>

In the spring of 1933 the province of New Brunswick supplied various municipalities with seed grain, potatoes, etc., for distribution to farmers, the amount of seed obtainable by any one farmer being limited as follows:—

Oats.....	30 bush.
Wheat.....	4 bush.
Buckwheat.....	4 bush.
Timothy.....	80 lbs.
Red clover.....	40 lbs.
Potatoes.....	As may be determined by Councillors.

For the seed grain, etc., supplied, the province took the municipalities cash or six month notes with interest at 6 per cent, the municipalities in turn taking cash or six month notes with interest at 6 per cent from the farmers. At the request of the province the Dominion agreed under the provisions of The Relief Act, 1933, to share one-third of any loss which might result from this arrangement, the Dominion contribution, however, not to exceed \$7,000. At the date of this report, namely, March 30, 1935, no accounts have been received from the province with respect to this arrangement and it is, therefore, not known whether or not any loss was sustained.

In the summer of 1933, representations were made to the Dominion by the province of New Brunswick to the effect that fishermen in the counties of Charlotte, Gloucester, Kent, St. John and Restigouche, were financially in a very poor condition, many of them being on relief, although the hake fishing industry showed by far the largest catch for some time. The price being paid for hake, however, was very low. The province further represented that local dealers had offered to assist the unemployment situation by paying fishermen 80 cents per cwt., if the province would also assist the industry by contributing 20 cents, that being half of the amount required to bring the current price up to 80 cents per cwt. The province requested, therefore, that the Dominion contribute 50 per cent of the provincial expenditure, namely 20 cents per cwt., the Dominion's expenditure in this respect not to exceed \$8,000. This request which met with the approval of the Dominion was included in the agreement respecting relief measures entered into with the province of New Brunswick under the provisions of The Relief Act, 1933, and at March 30, 1935, the Dominion had paid to the province with respect to this undertaking the sum of \$7,041.83.

The Dominion agreed to contribute to the province of British Columbia under the provisions of The Relief Act, 1933, twenty-five cents per day for a period not exceeding two months for each homeless man sent by the province for a course of instruction in the processes of placer mining at camps which the province established for that purpose, together with one-half the cost of the transportation of each such man from relief camps, or other points, within the province, to the placer mining camps. The Dominion's share of the cost of the transportation of each man, it was provided, should not exceed three-quarters of a cent per mile. At March 30, 1935 no accounts had been received from the province with respect to this arrangement.

A somewhat similar arrangement was also entered into with the province of Alberta, the Dominion agreeing to contribute to the province twenty-five cents per day for a period not exceeding sixty days for each physically fit homeless man selected by the province as a suitable person to undertake placer mining. The Dominion contribution to the province of Alberta in this respect was at March 30, 1935, \$5,734.40.

Under the provisions of The Relief Act, 1934, the Dominion Government agreed to contribute towards the cost of emergency relief for 1934 forest fire sufferers and their dependents, in the colonization areas of the province of New Brunswick, such expenditures to be made for the purpose of replacing burned cabins and such other necessities as might be required in the judgment of the province. The approved Dominion contribution in this connection was 50 per cent of a total expenditure not to exceed \$10,000. Approval was also given under The Relief Act, 1934, for Dominion contribution not in excess of 50 per cent of a total expenditure of \$24,000 to be utilized in aiding colonization settlers and their dependents on location in the province of New Brunswick. Expenditures under this arrangement were to be made for food and such other necessities as were deemed essential in the opinion of the province. At March 30, 1935 the Dominion had paid to the province of New Brunswick \$2,204.14 with respect to the former arrangement and \$10,423.06 with respect to the latter.

### ADMINISTRATION

The regulations governing the administration of The Unemployment Relief Act, 1930, stipulated that not more than one-half of 1 per cent, namely \$100,000, of the amount appropriated by Parliament was to be expended for administration purposes. The total cost of administration of The Unemployment Relief Act, 1930, however, was only \$43,061.97.

There were no definite amounts set aside for administration purposes under the subsequent relief Acts, it being provided that such expenditures were to be paid out of the Consolidated Revenue Fund, but taking into consideration the amount expended by the Dominion Government for unemployment relief, which aggregates at the date of this report as shown in the recapitulation of disbursements appearing on page 49 \$160,686,331.40, the cost of administration of the various relief measures set forth on the preceding pages has not been excessive.

The following tables show the classification and number of persons engaged in the administration of the various relief Acts and the cost of such administration respectively.

The chart which follows indicates the numbers receiving various classes of relief as reported monthly by the provinces and federal departments carrying out projects under relief legislation.

The large increase from *October, 1932* to *November, 1932*, is accounted for by higher numbers afforded Direct Relief in November in the provinces of New Brunswick, Quebec, Ontario and in Saskatchewan through the Saskatchewan Relief Commission.

From *September, 1933* to *October, 1933*, while all the provinces except Nova Scotia reported increased numbers on direct relief, the increase in Quebec was proportionately greater than the increases in other provinces. In *November, 1933*, there were substantial increases in Ontario direct relief figures and in direct relief distributed by the Saskatchewan Relief Commission.

In *April, 1934*, all provinces reported decreased figures for direct relief as compared with *March, 1934*, the largest decreases being reported by Nova Scotia, Ontario, Manitoba and the Saskatchewan Relief Commission.

Commencing *April 1, 1934*, relief previously administered by the Ontario Department of Northern Development on a subsistence basis was changed to a wage basis.

The decrease in direct relief shown from *May, 1934*, to *June, 1934*, was fairly uniform in all provinces.

The increase in Direct Relief from *September, 1934*, to *October, 1934*, was chiefly accounted for by an increase of 34% in Saskatchewan, 14½% in Quebec and 11½% in Ontario.

The employment index is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees reported during the calendar year 1926, which is taken as 100.

When reading employment index scale, 100,000 is to be read as 10; for example, on February 1, 1935, the employment index is 94.6.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

**I**NDUSTRIAL employment in Canada showed an increase at the beginning of May, according to returns received by the Dominion Bureau of Statistics from 9,203 firms, each employing a minimum of 15 workers and representing all industries except agriculture, fishing, hunting and highly specialized business. The working forces of these firms aggregated 892,506 persons, as compared with 875,149 in the preceding month. The employment index (with the average in the calendar year 1926, as the base equal to 100) stood at 95.2, as compared with 93.4 on April 1, and 92.0 at the beginning of May last year. In the preceding thirteen years, the indexes for May 1 were as follows: 1933, 77.6; 1932, 87.5; 1931, 102.2; 1930, 111.4; 1929, 116.2; 1928, 106.8; 1927, 101.8; 1926, 95.4; 1925, 91.9; 1924, 92.9; 1923, 92.5; 1922, 84.3 and 1921, 85.1. The index was higher than at May 1 in any other year since 1931, and was also higher than in any of the years from 1921 to 1925. The gain of nearly 17,400 persons in the staffs of the co-operating employers from April 1 to May 1, 1935, was smaller than the average recorded on May 1 in the fourteen preceding years for which data are available; thus the index of employment after correction for seasonal influence showed a decline, falling from 98.9 in the preceding month to 97.4 at the latest date.

At the beginning of May, 1935, the percentage of unemployment reported to the Department of Labour by local trade unions stood at 17.0, in contrast with 16.7 per cent at the beginning of April, 1935, and with 19.1 per cent at the beginning of May, 1934. The May percentage was established from reports furnished by 1,735 labour organizations, with a membership aggregate of 162,410 persons.

Reports received by the Department of Labour from the offices of the Employment Service of Canada showed a gain in business transacted by those offices during April, 1935, when compared with that of the preceding

month, but a decline from the transactions of April, 1934, farming and mining being the groups in which the highest gains were shown under the first comparison, and construction and maintenance the greatest loss under the second. Vacancies in April, 1935, numbered 27,183, applications 52,397 and placements in regular and casual employment 24,641.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was unchanged at the beginning of May from that of the previous month, the lower cost of fuel being offset by slight advances in rent and in the cost of foods. Comparative figures for certain dates are: \$15.97 for April and May, 1935; \$15.95 for May, 1934; \$15.41 for June, 1933 (the low point in recent years); \$21.49 for May, 1930; \$21.54 for May, 1926; \$20.57 for May, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.21 for May, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1926 as 100, was 72.3 for May as compared with 72.5 for April; 71.1 for May, 1934; 63.5 for February, 1933 (the low point in recent years); 93.4 for May, 1929; 100.2 for May, 1926; 164.3 for May, 1920 (the post war peak); and 64.2 for May, 1914.

The most recent statistics available reflecting industrial conditions in Canada are given in a table on page 506. The index of the physical volume of business was more than 4 per cent higher in April than in March and 6 per cent higher than in April last year. Of the principal factors in the index those used as indicators of mineral production, manufacturing, electric power output, trade employment, car loadings, imports and exports were higher, while construction was considerably lower. All of these factors except mineral production were higher in April of this year than in April, 1934. Information available for May shows improvement as compared with the previous month in wholesale prices, employment, contracts awarded and in sugar manufactured while car loadings were lower.

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(4) Figures for end of previous month.

(5) Figures for four weeks ending June 1, 1935 and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending May 18, April 20, and March 23, 1935, May 19, April 21 and March 24, 1934.

(7) MacLean's Building Review.

During May there were on record twenty-two strikes and lockouts involving 5,189 workers, causing a time loss of 32,357 man working days as compared with eleven disputes during April involving 2,952 workers with a time loss of 14,900 working days. Most of the disputes during May involved relatively small numbers of workers for short periods, but strikes of gold miners in British Columbia, longshoremen at Montreal, salmon and halibut fishermen in British Columbia and steel workers at Hamilton, Ont., involved comparatively large numbers of workers and caused most of the time loss for the month. In May last year there were thirty-two disputes involving 5,950 workers and resulting in a time loss of 31,284 working days, the most important disputes being the strikes of loggers in Vancouver Island, coal miners in Nova Scotia and New Brunswick and pulp and paper mill workers at Fort Frances, Ont. Of the twenty-two disputes in May, fourteen were recorded as terminated, nine resulting in favour of the workers involved, three in favour of the employers concerned, a compromise settlement being reached in one case while the result of one dispute was recorded as indefinite. The disputes terminated at the end of the month numbered eight and involved some 870 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off or definitely declared terminated by the unions involved.

**Proposed  
establishment  
of Dominion  
Trade and  
Industry  
Commission.**

Following along the lines recommended in the majority report of the Price Spreads Commission (LABOUR GAZETTE, May, 1935, page 409) legislation was introduced in the House of Commons on June 6, providing for the establishment of a Dominion Trade and Industry Commission.

Functions of a committee of three, to administer the Act are to be performed by the members of the Tariff Board, acting as commissioners. There is a further provision for the appointment of a director of prosecutions to carry on such legal proceedings as may be required to make effective the terms of the bill.

Broadly, the Commission is given authority to establish commodity standards and grades, and enforce their observance. Wide powers are given the Commission to investigate and report on all complaints of unfair practices or violations of any of the numerous statutes which are designed to guarantee fair treat-

ment of both producers and consumers. The Act, if adopted, will come into effect on October 1, 1935.

**Amendment to  
Combines  
Investigation  
Act.**

In connection with the proposed formation of a Dominion Trade and Industry Commission, an Act to amend the Combines Investigation Act (Bill 79) received its first reading in the House of Commons on May 31. The bill, which was introduced in the name of the Minister of Labour, is designed to transfer the administration of the Combines Investigation Act from the Department of Labour to the proposed new Trade and Industry Commission.

In addition to amendments to effect this purpose the principal change to be made by the bill as introduced is the addition of a definition of the words "Merger, trust or monopoly." This added definition is designed to widen the scope and effectiveness of the Act in the direction of inquiries into alleged injury to the public arising from trade policies of single firms occupying dominant positions in their respective fields of trade or industry. Such mergers, trusts and monopolies if found on investigation to be to the detriment or against the interest of the public are subject to the penalties of the Act as unlawful combines.

**Employment  
and Social  
Insurance Act  
amended.**

The Employment and Social Insurance Act in its amended form was adopted by the Senate on May 29 and has been referred back to the House of Commons. (The original provisions of the bill were detailed in the LABOUR GAZETTE, February, 1935, page 135).

There are 51 amendments to the Bill as introduced, but many of these are of minor consequence, the changes being chiefly for the purpose of removing ambiguity and clarifying the enactment. The major amendments of more than ordinary importance are summarized as follows:

The Commission (administering the Act) may only acquire real property with the approval of the Governor in Council.

The Commissioners must reside in Ottawa or within ten miles thereof.

Persons with an income of \$365 or upwards, not depending on personal exertions, shall not be eligible to exemption from coming under the Act.

The Commission shall finally determine questions arising regarding the applicability of the Act to certain persons or certain classes, or the rate of contributions, or whe-

ther a person is employed or not, thus eliminating references to the Exchequer Court.

Sawmills, planing mills and shingle mills shall only come under the Act if reasonably continuous in their operations.

Employees in banks, mortgage, loan, trust, insurance or other financial business shall not be in the exempted class.

**I.D.I. Act  
Amendment  
Rejected by  
Senate.**

In pursuance of recommendations made by the Price Spreads Commission, a bill (71) amending section sixty-five of the Industrial Disputes Investigation Act was introduced in the House of Commons on May 23 by the Minister of Justice for the Minister of Labour. The text of the amending bill, with the proposed changes in italics, was as follows:—

"65. Where in any industry *subject to the legislative jurisdiction of the Parliament of Canada, (whether or not it be an industry to which other provisions of this Act apply)* any strike or lockout has occurred, or seems to the Minister to be imminent, *or complaint has been made to the Minister that intimidation has been practised or other discriminatory action taken either by employers or employees,* and in the public interest or for any other reason it seems to the Minister expedient, the Minister, on the application of any municipality interested, or of the mayor, reeve or head officer or acting head officer thereof, or of his own motion *with or without application of either of the parties to the dispute, strike, lockout or complaint* whether it involves one or more employers or employees in the employ of one or more employers, may establish a Board under this Act in respect of the dispute, strike, lockout *or complaint* or may in any such case, if it seems to him expedient, either with or without an application from any interested party, recommend to the Governor in Council the appointment of *such* person or persons as a commissioner or commissioners under the provisions of the Inquiries Act to inquire into the dispute, strike, lockout *or complaint* or into any matters or circumstances connected therewith."

Dealing with the recommendation of the Price Spreads Commission, that the Act be made more generally applicable to industry throughout Canada, Hon. Mr. Guthrie stated:

"Careful consideration was given to this recommendation and a bill was drawn to carry out this recommendation in full. The opinion of the law officers of the Department of Justice was taken in regard to the matter as well as the opinion of two very able constitutional lawyers, Mr. Tilley, K.C., of Toronto, and Mr.

Aimé Geoffrion, K.C., of Montreal. The opinion of the departmental counsel as well as of the two gentlemen, whose names I have given, was that if the bill was drawn up in conformity with the report of the Price Spreads Commission it would be beyond the powers of the Parliament of Canada. It therefore became necessary to limit the operation of the bill by inserting in the first clause the words, 'where in any industry subject to the Legislative jurisdiction of the Parliament of Canada,' when certain things arise certain things shall be done."

After receiving its three readings in the House of Commons, the Bill was referred in the Senate to the Committee on Banking and Commerce.

This committee in its report (which was adopted) recommended that the Bill be not further proceeded with "for the reason that its passage would not be in the public interest, and would interfere with the spirit and purpose of the *Industrial Disputes Investigation Act* which is to prevent by conciliatory methods industrial disputes and breaches of the peace connected therewith."

In a further explanation of the reasons for rejection of the measure, Rt. Hon. Mr. Meighen stated in the Senate:

"The purport of the Bill, freed from its rather circumlocutory language, is that even when there is no cause to fear a lockout or strike, but complaint is laid, say, by an individual employer or employee, 'that intimidation has been practised or other discriminatory action taken'—these are the words employed in the Bill—The Minister may appoint a Board of Conciliation for the purpose of trying to effect a settlement: not of a dispute threatening a strike or lock-out, but more probably a difference between one section of labour and another, or one employer and other; that is to say, a difference more or less local or domestic, and consequently within the realm of civil rights, which is a provincial jurisdiction. The committee felt that to invite reference of disputes of that kind to a Minister, and thus to impose on him almost a direction to appoint a board unless he could give reasons to the contrary, would not only throw upon him an unnecessary burden, but would place a weapon in the hands of an employer desirous of preventing what he regarded as discrimination by workers, or in the hands of a worker trying to prevent what he thought was discrimination on the part of a labour organization. Aside from any constitutional feature, it was felt that it would be unwise for Parliament to attempt to invade that field,

and that such questions should be settled in other ways.

"The constitutional feature did interpose itself. It was considered that the purpose of a conciliation board established to deal with any such complaint would be entirely foreign to our jurisdiction under the British North America Act and consequently that the power of a board to secure witnesses, or resist interference, or deal with refusal to testify, would be very doubtful. I want to emphasize, however, that neither I nor any other member of the committee expressed the view that the constitutional danger alone was sufficient to warrant us in not proceeding further with the measure. Nor was any final view expressed on that phase. The measure, on its merits, was considered to be unnecessary and unwise, because the Industrial Disputes Investigation Act gives the Minister ample powers in all cases where, in the general public interest, there would be any reason at all for the exertion of efforts at conciliation. That is why the committee acted as it did. I may say it was influenced in no small degree by the judgment of those most closely associated with Labour, not only within this House, but without—by the honourable Senator from Parkdale (Hon. Mr. Murdock) and Mr. Tom Moore—who stated definitely that there was nothing in the Bill worth saving. In that I was compelled to agree."

#### **Federal hours and wages legislation governing public works.**

New legislation respecting fair wages and hours of labour in relation to public works and contracts was introduced in the House of Commons on May 28.

This measure, known as the Fair Wages and Hours Act, 1935, repeals the Fair Wages and Eight-Hour Day Act, 1930. However, while operating as a repeal of the 1930 legislation, it re-enacts many of the clauses of that Act. It also provides new sections to comply as far as possible with the recommendations of the Price Spreads Commission.

The new features, as outlined by the Hon. Mr. Guthrie, in introducing the Bill on behalf of Hon. Mr. Gordon, make provision for an eight-hour day and a forty-four-hour week on government construction works and contracts, and extends the Federal government's policy of fair wages and the forty-four-hour week to works and contracts toward which federal aid is granted by way of contribution, subsidy, loan, advance, or guarantee, by providing that in all contracts hereafter entered into conditions shall be imposed which shall bind the contractors to maintain the same standard of hours and wages.

#### **Minimum wages and limitation of hours.**

In addition to the above legislation on hours and wages in respect to public works, the Federal Government's program—concerning enactments providing for minimum wages and limitation of hours (implementing Conventions of the International Labour Organization)—has been further advanced. The Minimum Wages Act which had been referred to the Senate Committee on Banking and Commerce has been reported back in amended form and approved by the Senate. The Limitation of Hours of Work Act (LABOUR GAZETTE, March 1935, page 233) which was also dealt with by the Senate Committee on Banking and Commerce, has also been amended in a number of minor details. When enacted in their final form all Federal labour legislation will be given in full in an early issue of the LABOUR GAZETTE.

#### **Nineteenth International Labour Conference.**

The nineteenth session of the International Labour Conference opened at Geneva on June 4, under the presidency of the Hon. H. P. Creswell, South Africa. A complete report of the proceedings with text of Draft Conventions and adopted recommendations will be given, if possible, in the July issue of the LABOUR GAZETTE. (Elsewhere in this issue there is a review of the annual report of the Director of the International Labour Organization which was presented to the Conference).

The agenda of the Conference includes the following subjects:

(1) Maintenance of rights in course of acquisition and acquired rights under invalidity, old-age, and widows' and orphans' insurance on behalf of workers who transfer their residence from one country to another. (Second discussion).

(2) Employment of women on underground work in mines of all kinds. (Second discussion).

(3) Unemployment among young persons. (First or single discussion).

(4) The recruiting of labour in colonies and in other territories with analogous labour conditions. (First discussion).

(5) Holidays with pay. (First discussion).

(6) Reduction of hours of work, with special reference to—

(a) Public Works undertaken or subsidized by Governments.

(b) Iron and Steel.

(c) Building and contracting.

(d) Glass bottle manufacture.

(e) Coal mines.

(7) Partial revision of the Hours of Work (Coal Mines) Convention, 1931, in respect of the following five questions:

- (a) The question of allowing a normal shift to work during certain hours on Sundays and legal public holidays, and of the amount of the rest period for these workers which fall within the Sunday or legal public holiday.
- (b) The question of extending the additional time allowed for workers employed on operations which by their nature must be carried on continuously, so as to enable the necessary work to be done by three shifts.
- (c) The question of extending the additional time allowed for preparatory and complementary work, in the case of underground storemen, enginemen and drivers of locomotives, so as to enable them to complete the work of this kind on which they are employed.
- (d) The question of allowing additional time to be worked on the day of the periodical change-over of shifts of men (working on the three-shift system) in charge of main underground ventilation and pumping machinery which has to be operated continuously for seven days in the week.
- (e) The question of modifying Article 22 of the Convention (the Article relating to the legal consequences of revision) for the purpose of making it uniform with the Article upon this subject included in other Conventions submitted to the Conference at its Nineteenth Session.

#### Canadian delegation to Geneva.

The Canadian Delegation to the Nineteenth Session of the International Labour Conference of the League of Nations, now being held in Geneva, includes the following representatives on behalf of the Government Employers and Workpeople of Canada:

*Delegates representing the Government of Canada:* Dr. W. A. Riddell, Canadian Advisory Officer, League of Nations, Geneva, Switzerland; and Mr. P. E. Renaud, Secretary, office of the Canadian Advisory Officer, League of Nations, Geneva, Switzerland.

*Delegate representing the Employers of Canada:* Mr. A. R. Goldie, Galt, Ontario, President of the Goldie-McCulloch Company, and Chairman of the Industrial Relations Committee of the Canadian Manufacturers Association.

*Delegate representing the Workpeople of Canada:* Mr. P. M. Draper, Ottawa, Ontario, Secretary-Treasurer of the Trades and Labour Congress of Canada.

*Technical Advisers to the Government Delegates:* Mr. H. Quevillon, Hull, P.Q.; Mr. A. R. Mosher, Ottawa, Ontario; Mr. W. L. Best, Ottawa, Ontario; Mr. R. H. McGowan, Cobalt, Ontario.

*Technical Adviser to the Employers' Delegate:* Mr. H. W. Macdonnell Toronto, Ontario, Secretary of the Industrial Relations Department, Canadian Manufacturers Association.

*Technical Adviser to the Workpeople's Delegate:* Mr. Robert J. Tallon, Montreal, P.Q., Vice-President of the Trades and Labour Congress of Canada, and President of Division No. 4, Railway Shop Crafts.

From information recently received, it is learned that Mr. A. R. Goldie was elected vice-president of the Employers' Group.

#### New Health Insurance Bill in Great Britain.

In the British House of Commons a new National Health Insurance and Contributory Pensions Bill has been introduced by which important concessions will

be made to persons coming under the health insurance scheme who have been unemployed for long periods.

The principal objects of the Bill are:—

(1) To secure that persons who have been contributing to the interlocked schemes of National Health Insurance and Contributory Pensions for a sufficiently long period shall not forfeit their pensions rights or all their health insurance rights if they become unemployed and if the continued absence of contributions is due only to the fact that they are unable to obtain employment; and

(2) to provide that insured persons who are covered for sickness, disablement, and maternity benefits under the Health Insurance Scheme shall not suffer any reduction or suspension of those benefits by reason of arrears of contributions due to unemployment.

About 18,000,000 persons now come within the scope of the National Health Insurance scheme, which is chiefly operated by nearly 7,000 approved societies, the membership of which constitutes about 98 per cent of the whole insured population. The importance of the new Bill may be gathered from the fact that last year the societies issued nearly 5,000,000 notices to their members notifying them of arrears of contributions. Under the new scheme no arrears due to unemployment can accrue in future, and it is estimated that the arrears notices will be reduced by nearly 80 per cent.

**U.S. Supreme  
Court decisions  
adverse to  
N.R.A.**

Two recent decisions of the United States Supreme Court have reflected an unfavourable attitude toward the Administration's program in general, and the National Industrial Recovery Act, the Agricultural Adjustment Act, the proposed Social Security Act and the Wagner Labour Disputes Bill in particular.

The first major reverse sustained by the N.R.A. was the judgment of the Supreme Court in the case of "Railroad Retirement Board et al, vs. The Alton Railroad"—the so-called "Railroad Pensions Case"—which was instituted to contest the constitutionality of the Railroad Retirement Act of July 27, 1934, which established a compulsory retirement and pension system for all carriers subject to the Interstate Commerce Act.

By a decision of 5 to 4 the Court held the Act to be unconstitutional on the ground that it violates the guaranty that property shall not be confiscated without due process of law, thus refusing to accept the contention that the Act provides "a proper and necessary regulation to interstate commerce."

The majority opinion was that "the pension plan thus imposed is in no proper sense a regulation of the activity of interstate transportation. It is an attempt for social ends to impose by sheer fiat non-contractual incidents upon the relation of employer and employee, not as a rule or regulation of commerce and transportation between the States, but as a means of assuring a particular class of employees against old age dependency. This is neither a necessary nor an appropriate rule or regulation affecting the due fulfilment of the railroads' duty to serve the public in interstate commerce."

The second test case impinging on the legality of the network of codes under the N.R.A. was that concerning the Schechter Poultry Corporation of New York. This company had been found guilty of violating the poultry code. The conviction was sustained in the lower courts in so far as the "fair practice" counts were involved, but the company had not been found guilty on charges involving wages and hours, it being successfully contended that these matters did not affect interstate commerce over which Congress had no jurisdiction.

The case proceeded to the Supreme Court where on May 27, Chief Justice Hughes gave the decision of that body. In so doing, the Chief Justice analyzed the entire system of code formation. He emphasized that they consisted of rules of competition, "deemed

fair for each industry by the persons most vitally concerned and most familiar with its problems."

On this point he declared:

"But would it be seriously contended that Congress could delegate its legislative authority to trade or industrial associations or groups so as to empower them to enact the laws they deem to be wise and beneficial for the rehabilitation and expansion of their trade or industries?"

"The answer is obvious. Such a delegation of legislative power is unknown to our law and is utterly inconsistent with the constitutional prerogatives and duty of Congress."

It had been contended by the government that the adoption of the codes "must be viewed in the light of the grave national crisis with which Congress was confronted;" that the crisis "demanded a broad intensive co-operative effort by those engaged in trade and industry; and that this necessary co-operation was fostered by permitting them to initiate the adoption of codes."

However, the Court declared that "extraordinary conditions do not create or enlarge constitutional power"; that the statutory plan "is not simply one for voluntary effort"; and that the codes were "codes of law," violations of which are "punishable as crimes."

In the concluding part of the decision, the Chief Justice stated:

"In view of . . . the nature of the few restrictions that are imposed, the discretion of the President in approving of prescribing codes, and thus enacting laws for the government of trade and industry throughout the country is virtually unfettered. We think that the code-making authority thus conferred is an unconstitutional delegation of legislative power."

Following this decision, President Roosevelt, at a press conference on June 4, announced a "stop-gap" program designed to continue the National Recovery Administration in modified form until April 1, 1936. The new program would remove from the NRA those powers which the U.S. Supreme Court on May 27 held to be unconstitutionally delegated.

The Canadian Seminar of Public Administration—Dominion Civil Service organization for study of public administration—concluded its first year's operation on May 17. Officers for 1935 were re-elected as follows: president, N. R. Boutin; secretary, C. R. Medland; treasurer, J. Hopkinson; advisory council, Dr. O. D. Skelton, under-secretary of state for external affairs, and Dr. Brady.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

TWO applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour during the month of May as follows:—

(1) From employees throughout Canada of the Canadian National Telegraphs being repeater attendants, radio attendants, manager-operators and operators, members of the Canadian National System Division No. 43, Commercial Telegraphers Union of North America. The dispute concerns two specific grievances arising out of (a) the company's refusal to recognize the right of the union to represent approximately fifty employees in the Testing and Regulating Department whose positions, in some cases, had been created subsequent to the present working agreement taking effect on October 1, 1927; and (b) the action of the company in abolishing seven or more scheduled telegraph offices and operating them as commissioned offices, the employees being retained on a commission basis with a certain monthly guarantee. Approximately 1,300 employees were stated to be indirectly affected by the dispute.

(2) From the members of the Shipping Federation of British Columbia, Limited. The dispute relates to the matter of union despatching, for which the Vancouver and District Waterfront Workers' Association have been pressing for some time. Under the three-year agreement which was entered into on November 1, 1934, the despatching of waterfront labour is controlled by the Shipping Federation. On May 23 the Waterfront Workers' Association notified the Shipping Federation that on and after 7 a.m. Monday, May 27, 1935, the union would despatch the men for longshore work, and requested the co-operation of the Federation in placing existing despatching facilities at their disposal. This was refused by the Shipping Federation, which, on May 25, applied to the Department of Labour for the establishment of a Board of Conciliation and Investigation. An approximate estimate of the number of employees affected or likely to be affected by the dispute is given as 927. A Board was established by the Minister of Labour on May 31 to inquire into this dispute and the parties concerned were requested to submit their nominations of board members.

### Board Established

A Board of Conciliation and Investigation was established by the Minister of Labour on May 21 to deal with a wages dispute between various coal mining companies in the Drumheller, Rosedale and Wayne Districts in Alberta and certain of their employees, approximately 1,350 in number, being members of District 18, United Mine Workers of America. The application in this matter had been received from the employees on April 23 (see May LABOUR GAZETTE, page 397). The personnel of the Board is as follows:

Hon. Mr. Chief Justice Horace Harvey, Edmonton, chairman, appointed by the Minister in the absence of a joint recommendation from the other members of the Board, Major L. R. Lipsett and Mr. A. J. Morrison, both of Calgary, nominees of the employers and employees respectively.

### Application Withdrawn

It was reported in the May issue of the LABOUR GAZETTE, page 397, that an application for a Board of Conciliation and Investigation had been received from employees of the Track Department of the Winnipeg Electric Company with reference to the alleged violation of the seniority clause of the existing agreement by the company in laying off a general labourer, one H. Wroblosky. The application, which had been made on behalf of 75 employees, members of the Winnipeg Electric Trackmen's Unit, One Big Union, was withdrawn on May 23, the Secretary of the union notifying the Department that the dispute had been amicably arranged between the parties concerned.

The Workmen's Compensation Board of British Columbia, has recently gazetted its accident prevention regulations. These apply to every important phase of industrial activity in the province including:—workshops, factories, and all other plants; transmission machinery and equipment; sawmills; shingle-mills; wood-working machinery; logging operations; construction; explosives; fire and gas; cranes, derricks, conveyers, gangways and similar structures with their appurtenances; and electrical operation and equipment. It is provided that in every manufacturing plant, construction camp, logging camp and workshop in which twenty-five or more men are employed there is to be established an Accident Prevention Committee of not less than three members.

## STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1935

THE following table shows the number of disputes, workers involved and time loss for April, 1935, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*May, 1935.....	22	5,189	32,357
*Apr. 1935.....	11	2,952	14,900
May, 1934.....	32	5,950	31,284

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time is frequently not received until some time after its commencement.

The number of strikes and lockouts during May was greater than during April and, although several of these involved small numbers of workers for short periods, the numbers of workers involved and the time loss in man working days was greater than in April and about the same as during May last year. Strikes of gold miners in British Columbia, longshoremen at Montreal, salmon fishermen in British Columbia and steel workers at Hamilton, Ont., accounted for two-thirds of the time loss during the month. During April most of the time loss was due to strikes of coal miners at Corbin, B.C., millinery workers in Toronto and Montreal, boom-log workers and longshoremen at Vancouver, B.C., and wood cutters at South River, Ont. In May last year there were several important disputes involving loggers in Vancouver Island, coal miners in Nova Scotia and New Brunswick, pulp and paper workers at Fort Frances, Ont., newspaper printing compositors at London, Ont., and shoe factory workers at Toronto, Ont.

Four disputes, involving 885 workers, were carried over from April. Information as to two of these—compositors at Winnipeg, Man., and halibut fishermen at Prince Rupert and Vancouver, B.C.—was not reported in time

for inclusion in the May issue of the LABOUR GAZETTE. Eighteen disputes commenced during May. Of these twenty-two disputes, fourteen were terminated during the month, three being in favour of the employers concerned, nine in favour of the workers involved, a compromise settlement being reached in one case, while the result of one dispute is recorded as indefinite. At the end of May, therefore, there were eight disputes in progress recorded as strikes or lockouts, namely: compositors, Calgary, Alta., compositors, Winnipeg, Man.; salmon fishermen, Gulf of Georgia, B.C.; gold miners, Bridge River, etc., B.C.; fur dressers, etc., St. Johns, P.Q.; leather garment workers, Toronto, Ont.; furniture factory workers, Toronto, Ont.; and longshoremen, Powell River, B.C.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to four such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; moulders, Peterborough, Ont., February 27, 1934, one employer; and hat factory workers, Montreal, P.Q., March 5, 1935, one employer.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A dispute between beet field workers and sugar beet growers in the Lethbridge district of Alberta has been reported, the workers demanding \$22 per acre for the field work instead of \$17 and the bonus according to the crop production. Negotiations were in progress before work had begun and by May 21 the dispute was settled, a rate of \$19 per acre being agreed upon.

A dispute involving coal handlers employed by one dealer in Toronto has been reported at the end of April. It appears that men to help in unloading a boat refused to work for less than 50 cents per hour at trimming, the work, therefore, being done by the dealers' regular employees. A rate of 50 cents per hour for trimming and 40 cents for dock work was accepted by the coal dealers at the docks.

A dispute between dress manufacturers and embroidery contractors at Montreal, P.Q., led

to a suspension of operations in the establishments of the latter from May 20 to May 24, the employees being out of work but not directly involved in the dispute. The embroidery manufacturers proposed that the members of the Dress Manufacturers' Association should not send work to other than members of the Pleating and Embroidery Manufacturers' Association, but a compromise was reached and operations resumed.

Disputes as to wages of painters have been reported in connection with repainting certain buildings in Toronto early in May. It appears that representatives of painters' unions objected to the employment of non-union painters at less than the union rate of 75 cents per hour and in some cases were successful in arranging to have the union rates paid and union members employed.

A cessation of work by 1,500 fishermen on the west coast of Vancouver Island toward the end of May has been reported in the press but particulars have not yet been received.

A minor strike involving six bakery employees for several hours in one establishment in Toronto, Ont., occurred on May 22. The demands of the workers for union recognition and reduced hours of labour were conceded.

A minor strike involving employees in one establishment, manufacturing shoes in Kitchener, Ont., for an hour on May 31 has been reported in the press, thirty employees ceasing work against a wage reduction and resuming work when the reduction was withdrawn.

A dispute between beet field workers and sugar beet growers in Kent County, Ontario, has been reported. The workers demanded \$18 per acre instead of \$14 offered and refused to commence work when the season opened in April. The growers then engaged farm labourers instead of making contracts with the workers. The latter picketed the fields. Early in June a resumption of work was reported.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**COAL MINERS, CORBIN, B.C.**—The mines of one company involved in a strike since January 21, 1935, were closed down on May 7, the proposals made by the Deputy Minister of Labour for British Columbia, for a reference of the dispute to a Board under the Industrial Disputes Investigation Act, not being accepted by the miners although accepted by the company. The Eastern British Columbia Railway with thirteen miles of track and about thirty-five employees in Canada was also closed down. The cause of the strike

was the demand of the miners, members of the Mine Workers' Union of Canada, for reinstatement of a dismissed worker, and certain changes in conditions as to repair of houses, rotation of work, transportation of workers, etc. In later negotiations carried on with the assistance of the western representative of the federal Labour Department the company offered to meet these terms but the miners then demanded further concessions. As a result of a disturbance on April 17 in connection with picketing a number of strikers were charged with assault, creating a disturbance on a public highway, and impeding police in the discharge of duty. About May 12 it was reported nine were sentenced to terms in jail of three and six months and thirteen were fined. Appeals from the jail sentences were entered in some cases and the convicted men released on bail.

**PRINTING COMPOSITORS, CALGARY, ALTA.**—In connection with the dispute involving compositors employed by one newspaper publisher as a result of a decrease in wages the western representative of the federal Department of Labour early in May as in January conferred with both parties but a settlement was not reached.

**PRINTING COMPOSITORS, NEWS, WINNIPEG, MAN.**—A dispute involving a number of compositors and two newspaper publishing establishments, commencing in April, has been reported recently to the Department as a lock-out. The Winnipeg local of the International Typographical Union, in accordance with new union rules as to the forty-hour week, sought to amend its agreement with the publishers making a provision for this. A number of the newspaper compositors, however, being against the adoption of the forty-hour rule seceded from the union and organized an independent union under the name of the Winnipeg Newspaper Printers' Association which reached an agreement with the publishers providing for the same wages and hours as before but also providing for employment of none but members of the new union. It is reported that eight regular employees and forty-seven part time employees did not join the new union and were notified of dismissal on April 7 and April 8. The agreement to be in effect from March 1, 1935, to March 31, 1937, is outlined elsewhere in this issue.

**HALIBUT FISHERMEN, PRINCE RUPERT AND NEW WESTMINSTER, B.C.**—Reference was made in the issue of the LABOUR GAZETTE for May to a dispute involving halibut fishermen at Prince Rupert, B.C., toward the end of April. Reports on the dispute received later show that

other fishermen along the coast, including those in the vicinity of Vancouver, were also involved and that a strike was in effect from April 27 to May 3, involving 600 men. It appears that the commencement of operations for the season had been delayed, to some extent, since April 1, owing to a claim by the vessel owners for a share in the proceeds from the sale of the halibut livers, on the same basis as from the sale of the fish, namely eighty per cent to the crew and twenty per cent to the vessel owner. Hitherto the fishermen had sold the livers for themselves but with an increase in the price from about six cents per pound to about forty cents on account of its value for medicinal purposes the above claim was made. As a result of negotiations work was resumed on May 3, the fishermen conceding the claim of the vessel owners tentatively, but reserving the right to resume negotiations later.

**SALMON FISHERMAN, GULF OF GEORGIA, B.C.**—Fishermen demanded a higher rate per pound for blueback salmon when the season opened and a number, estimated at about five hundred, refused to work about May 16. A number of cannery workers were indirectly affected and a cessation of work by a number of these, partly in sympathy with the fishermen, partly to secure higher piece rates themselves, was reported in the press. Toward the end of the month a settlement with some of the fishermen was reported as imminent.

**GOLD MINERS, BRIDGE RIVER, ETC. (CARIBOO DISTRICT), B.C.**—Miners in several mines ceased work on May 5 and succeeding days demanding increases in wages. Following discussions with the provincial authorities a scale proposed by the Minister of Mines and Labour was accepted by the three principal mine operating companies and the strikers' committee and work was resumed in these mines on May 23. This provided for \$5.40 per day for miners, \$4.50 for muckers and \$4 per day for surface labourers instead of \$4.75 for miners, \$4 to \$4.25 for muckers and \$3.50 to \$3.75 for labourers before the dispute, plus a bonus. The strikers had demanded increases of \$1 per day. The operators of the other mines stated they were unable to pay the increased scale as their mines were not making profits. The western representative of the federal Department of Labour proposed that the miners apply for a Board under the Industrial Disputes Investigation Act, and return to work pending the investigation, but at the end of the month this proposal had not been accepted.

**BAKERY EMPLOYEES, WINNIPEG, MAN.**—Employees of one bakery ceased work from May

6 to May 8, to maintain equal division of work among employees instead of reducing staff, the employment of two dough makers instead of three being in dispute. Delivery employees were also involved. It was arranged that equal division of work would be continued and a new agreement would be made.

**BAKERY EMPLOYEES, WINNIPEG, MAN.**—Employees in one bakery ceased work from May 24 to May 25, against the discharge of two workers, alleged to be for union activity, when the union was about to submit an agreement providing for reduced hours and improved working conditions. As a result of negotiations the discharged employees were reinstated.

**FUR DRESSERS, ETC., ST. JOHNS, P.Q.**—Employees in one establishment ceased work on May 21, demanding increased wages, improved working conditions and the reinstatement of three discharged employees. The city authorities proposed that the dispute be referred to the provincial authorities. On May 22 a disturbance occurred when pickets interfered with new employees from Montreal approaching the establishment. Two men were charged with assault as a result of driving two motor cars into a crowd and four pickets were arrested. The city council on May 28 proposed terms of settlement but these were refused by the strikers. At the end of the month the dispute was untermiated but the employer was reported to have replaced most of those on strike.

**LEATHER GARMENT MAKERS, TORONTO, ONT.**—A number of the employees in one establishment ceased work on May 2, demanding recognition of the Industrial Union of Needle Trades Workers and changes in working conditions. The employer stated that he recognized the National Clothing Workers' Union to which some of his employees belonged. At the end of the month no settlement had been reached.

**FURNITURE FACTORY WORKERS, TORONTO, ONT.**—Employees in one establishment ceased work on May 16 alleging that the employer had violated a closed shop agreement with the Chesterfield and Woodworkers' Industrial Union by taking in working partners who were paid less than union wages and worked beyond union hours. The employer reported that the partners worked on union wages and hours. On May 23 three of the strikers were arrested on charges of aggravated assault. A settlement had not been reported at the end of the month.

**CREOSOTING PLANT WORKERS, TRANSCONA, MAN.**—Employees in one establishment ceased

## STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1935\*

Industry, occupation and locality	Number of workers involved	Time lost in working days	Remarks
<b>(a) Strikes and Lockouts in progress prior to May, 1935.</b>			
MINING, ETC.— Coal miners, Corbin, B.C.....	200	1,000	Commenced Jan. 2, 1935; against dismissal of worker and for certain changes in conditions; terminated May 7, 1935; indefinite.
MANUFACTURING— <i>Printing and Publishing—</i> Compositors, Calgary, Alta...	30	780	Commenced Jan. 10, 1935; against decrease in wages; unternminated.
Compositors, Winnipeg, Man...	55	1,430	Alleged lockout, April 7, 1935; re employment of members of one union only; unternminated.
FISHING AND TRAPPING— Halibut fishermen, Prince Rupert and Vancouver, B.C.....	600	1,200	Commenced April 27, 1935; re division of proceeds from sale of halibut livers; terminated May 2, 1935; in favour of employers.
<b>(b) Strikes and Lockouts commencing during May, 1935.</b>			
FISHING AND TRAPPING— Salmon fishermen, Gulf of Georgia, B.C.....	500	5,000	Commenced May 16, 1935; for increase in rates for salmon; unternminated.
MINING, ETC.— Gold miners, Bridge River, etc., Cariboo District, B.C.....	800	10,000	Commenced May 5, 1935; for increase in wages; unternminated.
MANUFACTURING— <i>Vegetable Foods—</i> Bakery employees, Winnipeg, Man.....	30	90	Commenced May 6, 1935; to maintain equal division of work; terminated May 8, 1935; in favour of workers.
Bakery employees, Winnipeg, Man.....	38	76	Commenced May 24, 1935; against discharge of workers; terminated May 25, 1935; in favour of workers.
<i>Fur, Leather, etc.—</i> Fur dressers, etc., St. Johns, P.Q.....	90	800	Commenced May 21, 1935; for increased wages, improved conditions and reinstatement of discharged employees; unternminated.
Leather garment makers, Toronto, Ont.....	6	126	Commenced May 7, 1935; for recognition of union and changes in working conditions; unternminated.
<i>Other Wood Products—</i> Furniture factory workers, Toronto, Ont.....	25	625	Commenced May 16, 1935; alleged violation of agreement; unternminated.
Creosoting plant workers, Transcona, Man.....	55	330	Commenced May 20, 1935; for increased wages and improved conditions; terminated May 27, 1935; in favour of workers.
<i>Metal Products—</i> Steel workers (sheet mill), Hamilton, Ont.....	230	2,300	Commenced May 6, 1935; for changes in wages and working conditions; terminated May 16, 1935; compromise.
Foundry workers, St. Boniface, Man.....	65	65	Commenced May 8, 1935; against suspension of worker and for changes in conditions; terminated May 9, 1935; in favour of workers.

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1935—*Concluded*

Industry, occupation and locality	Number of workers involved	Time loss in working days	Remarks
<b>(b) Strikes and Lockouts commencing during May, 1935—<i>Concluded</i></b>			
CONSTRUCTION— Harbour, etc.— Labourers, Summerside, P.E.I.	40	200	Commenced May 22, 1935, for employment of union members only; terminated May 28, 1935; in favour of employer.
TRANSPORTATION— Water— Longshoremen, Montreal, P.Q.	2,000	6,000	Commenced May 1, 1935; for changes in working conditions; terminated May 5, 1935; in favour of workers.
Deckhands, stewards, firemen, etc., Vancouver, B.C.	120	720	Commenced May 23, 1935; for union agreement providing for increased wages, reduced hours and employment of union members only; terminated May 29, 1935; in favour of workers.
Coastwise longshoremen, Vancouver, B.C.	60	360	Commenced May 23, 1935; for union agreement providing for increased wages and employment of union members only; terminated May 29, 1935; in favour of workers.
Longshoremen, Powell River, B.C.	65	845	Commenced May 17, 1935; for union recognition and union wage scale; untermiated.
TRADE— Rag sorters, Montreal, P.Q.	23	100	Commenced May 13, 1935; for increased wages; terminated May 23, 1935; in favour of employer.
SERVICE— Business and Personal— Restaurant employees, Edmonton, Alta.	150	300	Commenced May 7, 1935; for increased wages; terminated May 8, 1935; in favour of workers.
Restaurant employees, Vancouver, B.C.	7	10	Commenced May 3, 1935; for payment of wages due and against dismissal of workers; terminated May 5, 1935; in favour of workers.

work on May 20 demanding increased wages and improvements in working conditions, particularly as to washroom accommodation. A settlement was reached on May 27, increases in wages, piece rates, being made and also improvements in sanitary conditions.

**STEEL MILL WORKERS, HAMILTON, ONT.**—Employees in one department of one establishment ceased work on May 6, demanding changes in wages and working conditions. It is reported that changes in the methods of production had been made with the installation of new machinery and a tentative day wage scale was in effect, pending the determination of suitable piece rates. As a result of negotiations between the management and workers' committee a settlement was reached providing for some increases in wages and changes in working conditions and a reduction

of eight hours per week during June, July and August. Work was resumed on May 17.

**FOUNDRY WORKERS, ST. BONIFACE, MAN.**—Employees in one establishment ceased work on May 8 for one day against the suspension of one worker following an accident and against overtime work unless all employees were working full time. The demands of the workers were reported to be conceded.

**LABOURERS, SUMMERSIDE, P.E.I.**—Employees engaged on concrete work at the harbour undertaken by the municipal council as a relief measure ceased work from May 22 to May 29 in protest against the employment of three or four labourers who were not members of the labourers' union. After six days' work was resumed, the demand for the dismissal of the non-union men being dropped.

**LONGSHOREMEN, MONTREAL, P.Q.**—Employees ceased work on May 1, their demands for certain conditions in the agreement with the Shipping Federation for the 1935 season not having been accepted. Prior to the opening of navigation, negotiations had been in progress for some weeks and an increase in wages had been conceded by the employers and work was carried on pending an agreement on all terms. The chief difficulty arose as to a demand for restrictions in sling loads. Negotiations carried on with the assistance of the representative of the Department of Labour resulted in a settlement accepted by the union committee but rejected by a vote of the workers. The latter, also, refused to submit the dispute to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. On May 3 the Harbour Commission met the parties to the dispute in conference and an agreement was reached on the next day, the demands of the union being conceded, and work was resumed. The agreement is outlined elsewhere in this issue.

**DECKHANDS, STEWARDS, FIREMEN, ETC., VANCOUVER, B.C.**—These classes of employees of one company operating coastal steamers ceased work on May 23 demanding increases in wages and reductions in hours of labour, also recognition of the Seafarers' Industrial Union and employment of union members only for these classes of work. An agreement having been signed conceding these demands, work was resumed on May 29. The agreement is outlined elsewhere in this issue.

**COASTWISE LONGSHOREMEN, VANCOUVER, B.C.**—Employees of the company involved in the dispute with the Seafarers' Industrial Union on May 23 ceased work the same day demanding an agreement with the Coastwise Longshoremen and Freight Handlers' Association, both unions being affiliated with the Longshoremen and Water Transport Workers of Canada; also increases in wages to 80 cents per hour with \$1 per hour overtime. An agreement being reached, work was resumed on May 29. The agreement is outlined elsewhere in this issue.

**LONGSHOREMEN, POWELL RIVER, B.C.**—Demanding an increase in wages to the union scale of 85 cents per hour and other union conditions members of the Powell River and District Waterfront Workers' Association became involved in a cessation of work on May 17. It was claimed in addition that union members had been dismissed. Boats loaded by other employees were then declared unfair by the longshoremen at Vancouver, who refused to handle such cargoes. At the end of the month the dispute was unternminated, with a dispute impending at Vancouver between the

longshoremen's union and the Shipping Federation as to alleged violations of the agreement in this and other cases in recent months.

**RAG SORTERS, ETC., MONTREAL, P.Q.**—Employees of one establishment ceased work on May 13 demanding increases in wages. It is reported that the provincial minimum wage commission was asked to intervene but replied that no order fixing minimum rates had been set for this industry but that an inquiry would be made. The employer offered increases of \$1.50 to \$2.00 per week, stating that he was already paying from \$4.00 to \$12.00 per week for a nine hour day but this was refused. The strikers, numbering 23 out of 27 employees, stated they were being paid from \$3.00 to \$7.00 per week. The employer replaced the strikers from time to time and by May 23 had replaced all who had not returned to work. The strikers arranged with the police that four pickets would be stationed in front of the establishment but this number was exceeded and as a result of a disturbance on May 15 fifteen women and two men were arrested on charges of obstructing traffic and resisting arrest. A number were convicted and given suspended sentence or were ordered to pay costs.

**RESTAURANT EMPLOYEES, EDMONTON, ALTA.**—Employees (female) in approximately twenty-five restaurants ceased work on May 7 demanding increases in wages to the minimum rates under orders of the provincial Minimum Wage Board. The strikers were unorganized but the secretary of the Trades and Labour Council met the employers who agreed to pay these rates and work was resumed on May 9. It was reported that an agreement as to wages and working conditions would be negotiated and that the minimum prices for meals in the restaurants were raised. A number of the employers were prosecuted by the Minimum Wage Inspectors. A number of unemployed men who were picketing for the strikers were arrested on charges of unlawful assembly or vagrancy. One was sentenced to six months' imprisonment and four were remanded for trial.

**RESTAURANT EMPLOYEES, VANCOUVER, B.C.**—Employees in one establishment ceased work to secure wages due and the reinstatement of two employees dismissed when this demand was made, following the death of the proprietor. Arrangements were made to pay these claims in instalments and work was resumed on May 4, the dismissed employees being reinstated. The hours for dishwashers were reduced from ten per day to eight and the following scale was agreed upon: cooks \$15.00 per week, waiters \$10.00 per week, dishwashers \$10.00 per week, with meals; 48 hours per week.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, in the review of Strikes and Lockouts in Canada and Other Countries, 1934. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

### Great Britain

The number of disputes beginning in April was 34 and 21 were still in effect from the previous month, making a total of 55 disputes in progress during the month, involving 21,800 workers, with a time loss of 204,000 working days. Of the 34 disputes beginning in April, 11 were over demands for increased wages, 4 over proposed wage reductions, 5 over other wage questions, 6 over questions respecting the employment of particular classes or persons, 4 over other questions as to working arrangements and 4 over questions of trade union recognition. Settlements were reached during the month in 44 disputes, of which 6 were settled in favour of workers, 24 in favour of employers and 14 resulted in compromises; in one other dispute, work was resumed pending negotiations.

A dispute involving directly and indirectly 4,700 trawl fishermen at Hull was in effect April 1 to April 20 due to a reduction in the amounts paid to deckhands and cooks for cod liver oil produced at sea. The settlement reached was on the basis of smaller price reductions than those originally proposed by the employers.

### Irish Free State

After eleven weeks, the strike of tramway workers in Dublin, which was mentioned in the April LABOUR GAZETTE was settled May 17 through Government conciliation by the granting of an increase in wages. Over 3,000

workers were involved in this dispute which tied up tramway traffic over this period during which army trucks were used morning and evening to convey people to and from their work.

### Belgium

Fifteen thousand coal miners in the Charleroi district were involved in a strike which began May 21 and was settled May 27 when an increase of  $2\frac{1}{2}$  per cent in wages was granted. The strikers had demanded a 5 per cent increase.

### France

A strike of about 2,000 seamen and other ship employees at La Havre delayed the sailing of one or more liners from May 15 to May 20. The strikers sought to be employed on an annual basis. A compromise settlement was reached through government intervention.

### United States

The number of disputes beginning in February was 144, and 106 were still in effect from the previous month making a total of 250 disputes in progress during the month, involving 89,000 workers, with a time loss of 811,000 working days for the month.

The dispute of automobile factory workers which began at Toledo, Ohio, April 23, later spreading to other cities and involving directly and indirectly 33,000 workers, and which was noted in the May issue of the LABOUR GAZETTE, was settled May 13, when an increase in wages of 4 cents per hour, with time and one-half for all work over 48 hours per week was granted at Toledo. The demand for a signed agreement was not conceded.

The strike of 7,000 employees of cleaning and dyeing establishments which began April 23, and was mentioned in the last issue of the LABOUR GAZETTE, was settled April 29 in all except non-union shops. The settlement continued the conditions in effect in 1934.

Strikes in the lumbering industry and other related industries were in effect during May in various centres in the State of Washington over demands for increased wages, involving directly and indirectly about 40,000 workers. By the end of May settlements had been made in several centres on a compromise basis and progress was being made in reaching settlements throughout the industry in the district affected.

## OLD AGE PENSIONS IN CANADA

### Financial Summary as at March 31, 1935

THE accompanying table is a summary of the financial features of operations, to March 31, 1935, under the Old Age Pensions Act (Revised Statutes of Canada, 1927, chapter 156, amended by Statutes of 1931, chapter 42), and under the concurrent legislation adopted by the provinces which participate in the scheme.

Effective from January 1, 1935, a change was made in the scheme of administration of old age pensions in Ontario, the text of these regulations appeared in the *LABOUR GAZETTE* for February, 1935, page 143.

In order to avoid the duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

#### FINANCIAL AND STATISTICAL SUMMARY OF OLD AGE PENSIONS IN CANADA AS AT MARCH 31, 1935

	Alberta	British Columbia	Manitoba	Nova Scotia	Ontario	Prince Edward Island	Saskatchewan	North-west Territories	Totals
	Act effective Aug. 1, 1929	Act effective Sept. 1, 1927	Act effective Sept. 1, 1928	Act effective March 1, 1934	Act effective Nov. 1, 1929	Act effective July 1, 1933	Act effective May 1, 1928	Order in Council effective Jan. 25, 1929

## LABOUR LEGISLATION IN BRITISH COLUMBIA, ONTARIO AND QUEBEC IN 1935

### British Columbia

**D**URING the recent session of the British Columbia Legislature which opened on February 12 and closed on March 23, 1935, a new Metalliferous Mines Regulation Act was enacted to replace the earlier statutes dealing with metal mines and quarries. An Apprenticeship Act, similar to the Ontario Act, was also passed. Existing statutes which were amended included the Hours of Work Act, Male Minimum Wage Act, Female Minimum Wage Act, Workmen's Compensation Act, Truck Act, Shops Regulation Act, Weekly Half-Holiday Act and Woodmen's Lien for Wages Act.

The Metalliferous Mines Regulation Act consolidates and amends the laws relating to metalliferous mines and quarries. Coal-mines are covered by the Coal-Mines Regulation Act and petroleum or natural gas mines by the Coal and Petroleum Act. New rules require inspectors to have had either five years' experience in metalliferous mine management, or four years' experience and a degree in mining from a recognized university, or a first-class certificate as mine manager under the Coal Mines Regulation Act. Inspectors are to inquire into any conditions affecting the health or safety of employees and into any unusual conditions. As under the former Metalliferous Mines Regulation Act, special inspections may be made at any time and written reports forwarded to the Minister of Mines. Additional points to be covered by such reports are, whether more exits from the mine are required, and the condition of bunk-houses, kitchens, dining-rooms and dressing rooms as regards sanitation, health and safety of employees. New sections provide that an owner or manager may appeal from an inspector's orders to the Minister, and authorize the enforcement of such orders and of the rules and regulations by court process. Employers must keep registers of all employees, not merely of women and young persons as formerly, and such registers must give the nationality as well as the name, age, residence and date of first employment.

No boy under 15 years of age may be employed about a metal mine or quarry and no boy under 18 years of age may be employed below ground. The minimum age for underground employment was formerly 12 years. As heretofore no Chinese or Japanese may be employed below ground. The Act provides as before for an eight-hour day from bank to bank for underground workers and

for persons above ground about a mine or quarry or metallurgical works. The limitation on hours does not apply to persons employed in the office, boarding or bunk-house of any mine or metal works. A new clause enables the Lieutenant-Governor in Council to amend or repeal the provision as to hours and to prescribe hours of employment. No such regulation may be issued, however, until the Minister has had an investigation made by an officer of his Department and has made recommendations on the matter to the Lieutenant-Governor in Council.

Provision is made for the making of special rules by the owner or manager for the protection of workers in mines having over fifty employees. Such rules must be sent by the owner or manager to the Chief Inspector for approval by the Minister but they must be posted at the mine and objection to them may be made by any employee to the Chief Inspector during the two weeks preceding their transmission to the Minister. The Minister may propose modifications and if differences arise they may be arbitrated under the Arbitration Act. Printed copies of the Act and of the special rules must be kept posted in a conspicuous place at or near the mine and copies must be supplied to employees applying for them. Failure to comply with the rules when established by the Minister is an offence under the Act.

A number of new general rules for all mines within the scope of the Act are added to the rules laid down in the old Act. These cover such subjects as ventilation, explosives, fire protection, aid to injured, handling of water, sanitation, prevention of dust, protection of working places, shafts, winzes, raises, etc.; ladderways, shaft equipment and operation; testing of brakes; haulage; protection from machinery; electrical installations; and connection between mines. The rules also forbid the employment of any person as foreman or shift boss in supervising the work of other men underground unless he can give and receive orders in English. Operators of hoisting machinery used for handling persons must be at least twenty-two years of age instead of eighteen as formerly, have adequate experience, and hold a certificate of physical fitness. Such certificates must be renewed annually.

The Chief Inspector is given power to declare to what extent the general rules for

mines are to be applied to quarries. The rules respecting blasting are to apply to all quarries and additional precautions are prescribed. The Chief Inspector may also classify as a quarry any place where the work of excavation is carried on. The general rules for mines may similarly be applied to metallurgical works and other rules in respect of such works may be made by the Minister. The Act requires that metallurgical works shall provide guard-rails at approaches to railway tracks, guards at dangerous places, safety ropes and belts, rescue apparatus, safety devices and protection against machinery, and heat. No person under 18 years of age may operate any machinery in metallurgical works except under an experienced operator. The Lieutenant-Governor in Council may make additional safety rules for mines, quarries and metallurgical works. The Chief Inspector, on written application showing satisfactory reasons, may suspend the application of any rules to any establishment, on such conditions as he may see fit. Penalties are provided for offences against the Act.

The Apprenticeship Act, which will come into force on Proclamation, is largely similar to the Ontario Apprenticeship Act. It provides for the appointment by the Lieutenant-Governor in Council of an Inspector of Apprenticeship charged with the following duties: to promote interest in the adoption of apprenticeship in trades, to assist in establishing a permanent system of training apprentices, to collaborate with educational authorities in the training of apprentices, to keep a register of contracts entered into under the Act, to make such enquiries as are necessary to ascertain whether the provisions of the Act are being complied with, and to provide such information as may be required by the apprenticeship committees to be appointed under the Act. These committees, as well as the Provincial Apprenticeship Committee provided for, are to advise the Minister on matters connected with apprenticeship conditions. The Inspector must make an annual report to the Minister. The Act applies to certain "designated trades" listed in a schedule: carpentry and joinery (bench work), painting and decorating, plastering, sheet-metal working, plumbing and steam-fitting, and electrical work. Other trades may be added on receipt of a petition from a representative number of employers in any trade or of a collective agreement in the trade or the recommendation of the Minister.

After the commencement of the Act, no minor may enter into a contract of appren-

ticeship in a designated trade except in accordance with the provisions of the Act. Existing contracts must be filed with the inspector for his approval within three months. Where there has been employment without a formal contract, the Act is to apply after a period of three months from its commencement or from the time of the addition of the trade to the Schedule, as the case may be, and such prior employment may be allowed by the Apprenticeship Committee as part of the period of apprenticeship. Except as above provided no minor under 16 years of age may be employed in a designated trade and no minor over that age may be so employed for more than three months except under contract of apprenticeship. This restriction does not apply, however, to a common labourer or to a minor who, before the commencement of the Act, completed the period of apprenticeship customary in the trade or who, after the commencement of the Act, completes such period. A contract must be in the prescribed form and for a period of at least two years. It must be signed by the employer and the minor, and by the latter's guardians, and approved by the Provincial Apprenticeship Committee and the Inspector and registered. It may be terminated by mutual agreement of all parties or cancelled by the Inspector on cause being shown by the employer, apprentice or guardian.

The Lieutenant-Governor in Council may make regulations for the establishing of apprenticeship committees for defined areas; specifying the number and qualifications of members, governing their procedure and prescribing records to be kept, prescribing the powers and duties of such committees in relation to the designation of any trade, the length of apprenticeship, conditions required in the trade, standard of education for apprentices, training and educational classes, certificates on completion of training, wages and hours of labour of apprentices and the assessment of employers. Such regulations may also deal with the obligations of employers and apprentices and the number and qualifications of apprentices who may be employed in any designated trade.

An amendment to the Hours of Work Act stipulates that the exemption from the limitation as to hours of persons in supervisory, managerial or confidential capacities applies only so long as their duties are entirely of that nature. A new clause provides that the Board of Industrial Relations may require an employer to provide for the registration of the hours of work of each employee with respect to starting time,

stopping time, and rest intervals, by means of time clocks or in the manner directed by the Board. The clause enabling the Board to require from employers sworn statements of the working hours of their employees was replaced by a clause enabling the Board to require employers to make such statements either orally or in writing and, in its discretion, to require such statements to be verified by statutory declaration.

The Male Minimum Wage Act was amended to authorize the Board to fix the wages and conditions of labour of male persons under twenty-one years of age, as well as of males between 18 and 21 years as formerly. The section empowering the Board to fix a price for the board and lodging charged to an employee by an employer was amended to make it more definite and applicable to any or all his employees.

Both the Male and the Female Minimum Wage Acts were amended to make the same change regarding employers' statements of wages as that made by the amendment to the Hours of Work Act in regard to statements of hours and to enable the Board to promulgate decrees taking effect on publication, and to extend the period for which wages might be claimed six months instead of 60 days.

An amendment to the Workmen's Compensation Act applies only to accidents occurring on or after the date of the commencement of the amending Act (March 21, 1935). Compensation for total disability may not be less than \$10 per week or the average earnings instead of \$5 per week or average earnings as formerly. A new clause provides that, where, owing to the short period of employment or to its casual nature or its terms, it is inequitable to compute average earnings in the manner provided by the Act, regard may be had to the average daily, weekly or monthly amount which was earned during a stated period previous to the accident by a person in the same or a similar grade of employment.

The Truck Act was amended to strike fuel from the list of articles which an employer could supply to a workman and deduct the cost from wages. A new section forbids deductions from wages on account of the purchase or subscription price of any stock or shares in any corporation. Payment of wages to a workman by the allotment or delivering to him of stock or shares is made illegal. The amending Act applies to wages earned by workmen after its enactment (March 21, 1935), on contracts made before as well as after that date. The clause providing that no proceedings might be taken

for a second offence after more than two years from the last preceding offence was struck out.

The Unemployment Relief Act, 1933, was amended to provide that where moneys are borrowed from the Government of the Province by a municipality, the claim of the Province against the municipality shall have priority over other claims. The Minister of Labour is authorized to designate any person in the service of the Crown as an Unemployment Relief Investigation Officer to inquire into the needs of applicants for relief and into any other necessary matters. The Lieutenant-Governor in Council may make regulations for carrying out these provisions. Other amendments deal with agreements regarding loans by the Province to the municipalities.

The Shops Regulation Act was amended to empower the Lieutenant-Governor in Council to define any area of unorganized territory for the purposes of the Act, and to fix the closing time for shops in that area. Such Orders may only be made on petition signed by not less than three-fourths of the licensed occupiers of shops within the area. In respect of any such area, the Lieutenant-Governor in Council is vested with the powers given to a municipal council in respect of a municipality.

The section of the Weekly Half-Holiday Act which provides for closing of shops at 1 p.m. was amended to permit the closing hour to be fixed at such earlier hour as may be determined by the municipality.

The Woodmen's Lien for Wages Act was amended to enable a number of lien-holders to join in taking proceedings.

A Bill to amend and consolidate the Trade Unions Act of 1902 was introduced by a private member but not passed. The former Bill, in addition to reproducing the sections of the Act of 1902, would have imposed a penalty on any employer who refused to hire or who discharged a workman on the ground that he was a member of a trade union. Moreover, an employer who refused to discuss with the representatives of his workmen, whether they were on strike or locked out or not, any matter respecting wages, hours or other conditions of labour was to be liable to a penalty. An employee was to be required to notify promptly the Minister of Labour for the Province whenever a strike or lock-out occurred in his establishment. A strike or lockout, as the case might be, was to be deemed to exist when 50 per cent or more of the workmen employed by any employer within a radius of  $2\frac{1}{2}$  miles ceased work or

where 60 per cent or more of the members of any trade or craft ceased work or were suspended or prevented from working by the closing of the establishment or the refusal of the employer to continue to employ them

as a result of a dispute as to working conditions.

An amendment to the Workmen's Compensation Act to add certain diseases to those compensatable also failed to pass.

## Ontario

During the session, which opened on February 20 and closed on April 18, 1935, the Ontario Legislature enacted new laws dealing with collective agreements and land settlement, revised legislation relating to unemployment relief and amended statutes respecting master and servant, exemption of wages from seizure and workmen's compensation.

The Industrial Standards Act, which is designed to encourage agreements between employers and employees in the various industries and to enable the terms as to wages and hours of such agreements to be given the force of law for a period of one year, is printed in full in this issue of the *LABOUR GAZETTE* on page 534. A similar law was passed by the Alberta Legislature during its recent session.

The Unemployment Relief Act, which repeals the Unemployment Relief Acts of 1933 and 1934, makes provision for the appointment by the Lieutenant-Governor in Council of a Commission of not more than five members to administer unemployment relief. The Act gives the Lieutenant-Governor in Council full power respecting unemployment relief measures of every kind and, more particularly, power to enter into and perform agreements with the Government of Canada and the municipalities, to undertake or complete works or other measures or provide direct relief, to require municipalities to make similar provision for their residents and to pay all or part of the cost of the works or direct relief furnished by the Government of Ontario and to make regulations with respect to such matters. Past and future agreements, existing Orders in Council and previous payments are validated and the Lieutenant-Governor in Council is authorized to pay out of the Consolidated Revenue Fund or raise by way of loan the sums required for the purposes of the Act. Powers of municipalities to provide funds for relief purposes and to issue debentures with the approval of the Municipal Board are continued as is the power conferred in 1934 to undertake relief works beyond the municipal limits.

A new provision enables municipalities, with the approval of the Lieutenant-Governor in Council, to undertake, as a relief measure, the repair of dwelling houses, with power to charge part of the cost against the lands by annual instalments to be collected as taxes, and also

to participate in any scheme for housing or abolition of slum areas inaugurated or aided by the Government of Canada or the Provincial Government or by the municipality itself, the cost to be met in the same manner as the cost of other work under the Act. Another section allows municipal authorities to levy unemployment relief rates against factories which for purposes of general taxation have a fixed assessment. A municipality furnishing direct relief to any person who has removed thereto may recover the cost of such relief for a period of twelve months after removal from the municipality where such person formerly resided. Under the old Act the period for which such cost might be recovered was three months.

The Relief Land Settlement Act validates an agreement of May 31, 1934, between the Government of Canada and the Government of the Province, for the purpose of authorizing the expenditure of relief moneys to assist families to settle on the land and authorizes the making of agreements between the Minister of Lands and Forests on behalf of the Province and any municipality for the purpose of carrying out the provisions of the Act.

An amendment to the Master and Servant Act adds the same definition of the term "wages" as is given in the Wages Act. "Wages" includes wages and salary whether employment is by time or by the job or piece or otherwise.

The Wages Act was amended to exempt from seizure or attachment in all cases a sum not exceeding \$2.50 for each working day represented by the wages seized or attached. Formerly, a sum not exceeding \$15 was exempt.

The Workmen's Compensation Act was amended to provide that after October 15, 1934, members of the Workmen's Compensation Board should hold office during pleasure of the Lieutenant-Governor in Council, subject to the rule already in force, that unless the Lieutenant-Governor in Council directs otherwise such members shall retire at the age of seventy years. Formerly, members of the Board held office during good behaviour but might be removed at any time for cause.

The section of the Public Vehicle Act which forbids the owner of a public vehicle to allow any driver or operator to work as driver or operator for more than ten hours in any

twenty-four hour period, was amended to conform with a new definition of "public vehicle." This definition includes motor vehicles which operate between two or more given points in the same manner as buses.

That section of the Mining Act was repealed which forbade the operation of any shop or store for the sale of liquor within six miles of a mining camp at which six or more workmen were employed except when such store was in a city, town or village.

The Mothers' Allowance Act was the subject of a number of amendments. The definition of "Commission" was altered to permit the administration of the Act by a single person instead of by a department or branch of the Government or by a body of persons. An allowance is now payable to a widow or the wife of a man who is permanently unemployable by reason of mental or physical disability, or of a man who has deserted her and has not been heard of for at least three years. Formerly, the period of desertion was five years and provision for the families of mentally disabled persons was restricted to cases where such persons were inmates of an institution. The nationality qualification was amended to permit a widow who is otherwise eligible to qualify for an allowance if she becomes naturalized. A mother or foster-mother caring for only one child may now be granted an allowance whereas formerly

allowances were paid only where there were two or more children. Inquiries and investigations as to persons to whom allowances may be paid may now be conducted by any person appointed by the Commission for the purpose. Formerly, such inquiries were conducted by local boards.

Three Bills of interest to labour were introduced in the Legislature but failed to pass. A bill to amend the Factory, Shop and Office Building Act would have enabled municipalities to extend the provisions of early closing by-laws to boot and shoe repair shops. A Bill to amend the Woodmen's Employment Act was designed to prevent lumber operators from requiring or permitting employees to move logs or timber more than four feet in length. A Bill to revise the Fire Department Act would have required permanent fire departments in cities with a population exceeding 10,000 to work on a three-platoon system with three eight-hour shifts per day.

A resolution of the Legislature on April 16, 1935, approved the principle of social insurance and expressed confidence in the Provincial Government co-operating with the Government of Canada to establish an adequate system of unemployment insurance. A resolution passed on April 18, 1935, approved pensions for blind persons over 40 years of age and urged that the Old Age Pensions Act be amended by the Parliament of Canada to that effect.

## Quebec

During its session from January 8 to May 18, the Legislature of Quebec enacted new laws to aid the unemployed and amended existing statutes dealing with workmen's compensation, collective agreements, minimum wages, industrial and commercial establishments and Sunday observance.

A provisional Act to be in force from April 1, 1935, to June 1, 1936, empowers a municipal corporation to contribute out of its funds or by borrowing as authorized by by-law to assist the unemployed within its jurisdiction. The approval of the Quebec Municipal Commission and the Lieutenant-Governor in Council is required for such by-laws. Another enactment ratifies by-laws for the same purpose which were adopted before April 11, 1935.

Under the Colonization Promoting and Return to the Land Act, ten million dollars is appropriated for the purposes indicated in the title. Subsidies may be granted by the Lieutenant-Governor in Council to colonization societies or organizations engaged in the movement, to farmers for establishing their

sons or sons-in-law on land not then used in farming, to British subjects who wish to settle on such land, to settlers who need help in the cost of buildings or for breaking new land or to bachelors who will be employed by farmers. In the case of farmers and British subjects, the subsidy is limited to \$300 to be paid in equal annual instalments. Not more than \$100 may be given to any settler for building purposes or for ploughing new land. Provision is made also for granting loans for the purchase of stock and implements, for developing the districts in which colonists settle, for aiding colonists previously settled, paying transportation expenses, building or improving schools, providing seed grain, giving technical assistance in agriculture and encouraging establishment of mills and small industries. The Lieutenant-Governor in Council is authorized to acquire any land necessary for the purposes of the Act and to enter into agreements with the Dominion Government or with any municipal corporation in the Province for the purpose of promoting the colonization.

Under the Colonization Land Acquisition Act, power is given to the Lieutenant-Governor in Council to authorize the acquisition of any territory required for the purpose by way of purchase, exchange or expropriation.

The Women's Minimum Wage Act was amended to extend its application to hotels, clubs and restaurants in cities and towns with a population of not less than 5,000. The Minimum Wage Commission or persons authorized by it are given the same powers as to entry into establishments, production of documents, examination of witnesses, etc., as inspectors appointed under the Industrial and Commercial Establishments Act. The minimum fine to which an employer violating the Act, or order under it, is liable for a first offence is raised from \$50 to \$100 and the maximum fine from \$200 to \$300. For a subsequent infraction, the penalty is increased from not less than \$100 and not more than \$300 to not less than \$200 and not more than \$500. For a third offence, an employer was liable to one month in prison without the option of a fine. The Act as amended stipulates that imprisonment shall be for three months for a third offence. The Bill as presented to the Legislature provided that the Lieutenant-Governor in Council might amend any order of the Minimum Wage Commission but this section was rejected by the Legislature.

An amendment to the Industrial and Commercial Establishments Act enables the chief inspector to authorize the double-shift system in industrial establishments. Under the Act, women and young persons could not be employed before 6 a.m. or after 9 p.m. As amended, the Act restricts the work-period for two shifts of eight hours each to the period between 6 a.m. and 11 p.m. In establishments operating on the double-shift system, an hour must be given for a meal between 10 a.m. and noon and again between 6 p.m. and 8 p.m. A proposal to repeal the 1934 enactment limiting the working day for women and young persons in shops on the days before Christmas, New Year's Day and Easter Sunday to 10 p.m. was defeated.

The Collective Labour Agreements Extension Act, 1934, was amended in several particulars. An agreement that might be extended by the Lieutenant-Governor in Council to all persons engaged in the trade or industry in the district specified in the agreement is now stipulated to be an agreement entered into by "one or more associations of *bona fide* employees according to the decision of the Minister of Labour" and to bind all the employers and employees in the "same trade, business or industry." The words

"*bona fide*," "according to the decision of the Minister of Labour" and "business" are inserted in the section. Previously, the only provisions of the agreement which could be made obligatory were those relating to wages and hours. Under the amended Act, conditions laid down in the agreement as to apprenticeship and the proportion of apprentices to workmen in any establishment may be made binding on all persons in the trade. A joint committee of the employers and employed who are parties to a binding agreement is given power to levy an assessment on the employers concerned, or if the agreement so provides, on both the employers and employees, for the purpose of paying the expenses of enforcing the agreement. The Lieutenant-Governor in Council must, however, approve the assessment rate and the estimated receipts and expenses, and quarterly reports of receipts and expenditures must be made to the Department of Labour. The levy may not exceed one-half of one per cent of the workman's wages or of an employer's payroll. When an agreement expires or is not renewed, any funds on hand must be turned over to the Department of Labour as trustee. Joint committees are constituted corporations under the Act with all the powers of an ordinary corporation but a joint committee cannot be held liable for the damages suffered by an employee through a suit brought in good faith but unfounded in fact. If a committee does not establish a board of examiners to determine the competence of the workmen, as permitted by the original Act, workmen or apprentices who make a sworn declaration as to their experience, or apprenticeship for a five-year term, may claim at law rights accruing to them from a collective agreement. Claims under the Act by a workman, trade union or joint committee must be brought within six months. Labourers are not required to make a declaration. A joint committee in any municipality of more than 10,000 population is given power to make obligatory a certificate of competency for the workmen and apprentices to be issued either by a board of examiners set up by the committee or by the trade union concerned. A workman without such a certificate may not be employed in the industry in the district covered by the agreement.

Special conditions are provided for certain parts of the building industry. No building in connection with the agricultural industry may be made subject to a collective agreement under the Act and workmen permanently employed in maintenance work in connection with churches, seminaries, colleges, convents, hospitals, orphanages and other such institu-

tions or with the maintenance of immovables mostly or wholly used as manufacturing establishments may be paid a lower rate of wages than that fixed in the agreement for the district. Such agreements must take account of the permanent nature of the employment and any payments in kind. The amended Act stipulates also that no collective agreement may fix a lower wage for female employees than that established by the Quebec Minimum Wage Commission for the trade. No penalties were provided in the original Act but the amendment of this year declares any person, association or corporation violating the wages provisions of a collective agreement liable to pay to the joint committee for the industry an amount equal to twenty per cent of the wage claim as determined by the Court. If a workman voluntarily agrees to work for a lower wage than that established, he is liable to the same penalty. Violation of any other provision of a collective agreement made obligatory renders the offender liable to a fine not exceeding \$10 and costs for a first offence and to not more than \$50 and costs for a second or subsequent offence. For giving false information to any inspector acting on behalf of a joint committee, refusing to give necessary information or obstructing such person in the performance of his duties, a fine of not more than \$25 and costs may be imposed for a first offence and not more than \$50 and costs for a second or subsequent offence. An employer who employs without a certificate of competency a workman who is required by a joint committee to have one is liable to a fine of \$5 and costs or, for a second offence, a fine of \$10 and costs but only the joint committee may take action against such employer.

A section in the Bill would have enabled the Lieutenant-Governor in Council to make binding any terms of a collective agreement as to wages for the direct hire of an artisan's services to a consumer and for the selling price of an article made by an artisan or his family for sale but this section was struck out by the Legislature.

Four Bills to amend the Workmen's Compensation Act were presented to the Legislature but three failed to pass. One of the latter would have permitted compensation to be paid to orphans up to 18 years of age instead of 16. This provision was embodied in a Bill which was assented to. Another Bill would have raised the minimum weekly compensation in the case of dependent children from \$10 to \$12.50 and enabled payment for the first seven days if disability continued beyond that time. This proposal was designed to restore certain conditions as they were be-

fore the amending Act of 1933. A third Bill that was rejected was designed to grant to an injured workman the right to choose his own physician as provided before the Act of 1933.

An Act to amend the Workmen's Compensation Act on several points was passed. Under its provisions compensation is now payable in cases where disability lasts seven days instead of three weeks but the waiting period of seven days is retained. The Workmen's Compensation Commission is empowered to bring action against a municipal or school corporation for an accident to a workman any time within a year from the date on which it is informed as to the workman's choice between action against such corporation and claiming compensation under the Act, provided that the corporation is notified by the Commission as to the workman's choice within thirty days after the Commission is informed. Prior to 1935, compensation was declared to be inalienable and exempt from seizure except where the Commission permitted. This power of the Commission is now done away with. An employer who fails to transmit to the Workmen's Compensation Commission the required information regarding an accident was liable to a fine and in addition to pay the compensation. As the Act is amended, he is liable also to pay the costs of medical aid. Compensation is now payable in respect of dependent children or orphans up to the age of 18 years instead of 16. Where the dependents are an invalid husband or a widow and one child, the minimum compensation is \$50 a month and where there are two children or more the minimum is \$54.16 a month or \$12.50 a week. Previously, the Act fixed a minimum of \$12.50 a week for an invalid husband or widow and one child or more. The minimum compensation for temporary or permanent total compensation is restored to \$12.50 a week as it was before the Act of 1933 by which it was reduced to \$10.

A section was added to enable the Workmen's Compensation Commission to allocate the general costs of an employer, who carries on several industries liable to different assessment rates, among all the industries carried on. None of the provisions of this amending Act applies to accidents which occurred before its enactment.

An amendment to the Civil Code prohibits any action under the Code against an employer for an industrial accident but if the workman or his representatives have recourse against any person other than the employer of an injured workman under the provisions of the Civil Code, they may exercise such right, or claim from the employer under the

Workmen's Compensation Act. Another amendment to the Civil Code, which affects beneficiaries under the Workmen's Compensation Act, prohibits any third person from receiving as remuneration or as collateral security or otherwise any part of an indemnity which an injured person or his representatives may claim. Every arrangement in violation of this provision is null and any payment made in pursuance of such arrangement is recoverable.

An Act amending the Montreal Police Benevolent and Pension Society of 1892 was also enacted.

A Bill was introduced to amend the Sunday Observance Act of Quebec to repeal the section declaring persons observing the seventh day of the week as the Sabbath day and abstaining from work on that day not to be liable to punishment for working on Sunday provided

other persons are not disturbed thereby. As discussion arose as to the right of the provincial Legislature to repeal this section, which was enacted shortly before the Lord's Day Act of the Dominion Parliament in 1906, a motion was adopted to refer the question to the Court of King's Bench.

A resolution in favour of the adoption in Quebec of an old age pensions scheme under the Dominion Old Age Pensions Act was amended in favour of postponing action until the Dominion Parliament should take action along the lines recently forecast by the Prime Minister. Another resolution that the province should take action to give effect to any federal legislation regarding minimum wages, hours of labour, unemployment and other social insurance was amended to urge that the Provincial Government should study the federal legislation as it affects provincial laws and put it into effect if advisable.

Unemployment relief work has been provided by National Parks Branch of the Interior Department according to the annual report of the Commissioner for the fiscal year 1934, which has recently been published. For the relief of single, homeless men, appropriations totalling \$1,050,000 (exclusive of the Golden-Donald advance) were authorized under the Relief Act, 1933, for disbursement by the Department of the Interior on public works in the National Parks of Canada and on the Golden-Revelstoke Highway. Additional advances, totalling \$70,000, were authorized for the relief of married, permanent park residents. These funds were drawn on to the extent of \$67,471.82 during the fiscal year under review, leaving an unallotted balance of \$2,528.18 as at March 31, 1934. The number of man-days of relief for single homeless men was 753,037 while for married permanent park residents the man-days of work was 24,697.

According to the 1934 annual report of the Nova Scotia Department of Public Works and Mines, the average number of men employed in the coal mines during 1934 was 12,297, as compared with 11,884 in the previous year. The total number of man-days worked was 2,680,265, as compared with 1,862,169 in the fiscal year of 1933, which is an increase of 818,096 man-days. Coal output for the year was 5,526,987 tons of 2,240 pounds, as compared with the previous year's output of 3,663,671 tons, an increase of 1,863,316 tons. Coal sales for the year were 5,169,767 tons of 2,240 pounds, as compared with the previous year's sales of 3,277,251 tons, an increase of 1,892,516 tons. The number of fatal accidents at the coal mines during the year was 25 as compared with 21 in the previous year.

During the month of May 4,734 accidents were reported to The Workmen's Compensation Board, 17 of these being fatal cases. This compares with 4,486 during April and 4,452 during May of 1934, and brings the total this year to date to 23,104, as against 20,130 for the corresponding period last year. The total benefits awarded during May amounted to \$470,142.60, of which \$376,467.19 was for compensation and \$93,675.41 for medical aid. The benefits awarded during April were \$395,732.31.

A National Minimum Wage Bill has been introduced in the House of Assembly, South Africa. The proposed measure provides for a compulsory minimum wage not exceeding one shilling per hour which is to be paid to employees in various scheduled occupations exclusive of agriculture and government administration. The hours of work are limited to 9 per day and 50 per week with provision for overtime.

Details of a proposed plan to aid at least 2,000,000 unemployed youth were made public recently by the United States Commissioner of Education, John W. Studebaker. The plan calls for an adaptation of the present college student aid plan and the Civilian Conservation Corps Camp program for the purpose of assisting in their own communities the large number of unemployed youth unaided by other work relief projects. The committee developing the proposed program of community youth service was appointed as a result of a nation-wide conference on youth problems held last June. Representatives of many Government agencies and educational and recreational leaders co-operated in this conference which laid the ground plans for the proposals to aid unemployed youth.

# COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

## Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include: the extension to all employees and employers in the specified industry and district, by Order in Council of agreements affecting painters at Quebec city, building trades at Saint Hyacinthe, bakers at Hull; modifications to the Orders in Council affecting bakers at Quebec and building trades at Montreal; an application for a change in the Order in Council affecting plumbers at Three Rivers, and applications for the extension of agreements affecting plumbers at Hull, building trades at Drummondville, plumbers and electricians at Quebec, barbers and hairdressers at Quebec, Three Rivers, Sherbrooke, Saint Hyacinthe and Montreal, bakers at Montreal, longshoremen at Montreal and millinery workers at Montreal.

Under the Collective Labour Agreements Extension Act,\* Quebec, the text of which was printed in the LABOUR GAZETTE, May, 1934, page 417, applications may be made to the provincial Minister of Labour by any association of employees or employers, which is a party to a collective agreement, to have those terms of such agreement which concern rates of wages and hours of labour made obligatory on all employees and employers in the same trade or industry within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade or industry in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* and for the duration of the agreement. The provisions of an agreement thus made obligatory are to govern all individual labour contracts in the specified trades and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made

obligatory by Orders in Council have been given in the LABOUR GAZETTE beginning in the issue of June, 1934.

**PAINTERS, QUEBEC.**—An Order in Council, approved May 2, and published in the *Quebec Official Gazette*, May 4, makes obligatory the terms of an agreement between certain painting contractors of Quebec and the National Catholic Union of Painters of Quebec, Incorporated. (The application for the extension of this agreement was noted in the LABOUR GAZETTE, April, page 323). The terms of the Order in Council are as follows:—

I.—The words "Journeyman painter" signify and include any person doing painting work either with a paint-brush or pneumatic machine, varnishing, painting, decorating, papering or imitation or gilding or glazing.

II.—The territorial jurisdiction determined by the present agreement comprises the counties of Quebec, Portneuf, Charlevoix, Levis, Montmorency and Beauce.

III.—a) In the Cities of Quebec and Levis and in a radius of 10 miles from their limits, the minimum wage of a painter shall be \$0.45 per hour.

b) Notwithstanding the provisions of the preceding paragraph, and with the exception of the City of Quebec, of Levis and of a radius of 10 miles from their limits, it is stipulated and agreed that in all the municipalities of the said jurisdiction determined in article 2, having a population of less than 5,000 souls according to the last census of the Dominion of Canada, or where the general building contracts, the total cost whereof, wages and materials included, is less than \$5,000.00, the rate of wages per hour shall be (\$0.40) forty cents.

IV.—The wages of apprentices shall be as follows:—

1st year. . . . .	\$0.10 per hour
2nd year. . . . .	.15 " "
3rd year. . . . .	.20 " "

After three years, the apprentices will receive (\$0.10) ten cents less than the wages fixed for the journeymen in the course of their first year of as journeymen.

V.—Any work done outside of the regular hours will be paid at the rate of time and a half, with regard to the regular wage and double time after midnight. There will be no work on Sundays and feasts of obligation, on St.-Jean-Baptiste Day and on Labor Day; in case of necessity, work done on those days shall be paid at the rate of double time.

VI.—Painters engaged in the upkeep of public buildings (as set forth in article 2, Chapter 176, R.S.Q. 1925) or the buildings of a manufacturing establishment, if they are permanent employees, and paid per month or per week, shall receive a minimum wage of \$16.00 per week.

The employer may deduct from the workman's wages, \$3.00 per month, and per room, if such workman lives in the establishment. A maximum deduction of (\$0.20) twenty cents per meal will be allowed if the workman boards in the establishment.

\* For amendments see page 526.

VII.—Whatever be the form or kind of the individual labour contract entered into, that is to say, whether it be for work by the job or otherwise, and whether such contract has been entered into between an individual, or an employer and an employee, the latter is entitled to a remuneration, with regard to the number of working hours and according to the trade carried on, equal to that to which he would have been entitled in virtue of the rates of wages and the provisions of the Collective Labour Agreement rendered obligatory by an Order in Council enacted in virtue of Article 4.

VIII.—Notwithstanding the provision of Article 2 of the present agreement, the parties signing the said agreement must comply with the provisions of the said agreement when they are exercising their activities outside of the territorial jurisdiction determined in article 2.

IX.—The hours of labour shall be in conformity with the provisions of Order in Council No. 1496 of July 12th 1933, for the carrying out of the provisions of the Extension of Collective Labour Agreements Act, respecting the limiting of working hours (23 Geo. V, Chapter 40).\*

In case of non-application of said Order in Council or of authorized derogation thereto by competent authority, the hours of labour shall be nine (9) hours per day, from the 1st of April to the 30th of September, and of eight (8) hours per day from the 1st of October to the 31st of March.

X.—The travelling expenses and board of workmen who are sent out of town shall be paid by the employers.

XI.—All workmen shall be paid on the Friday of each week.

XII.—The present agreement does not apply to Agricultural Industry.

XIIa.—The present agreement does not apply to building contracts signed before the publication in the *Quebec Official Gazette* of the Order in Council approving the present request.

XIII.—The present agreement shall remain in force until the 30th of April 1936; it shall renew itself automatically each year unless one of the contracting parties hereto notify the other party, thirty days before the expiration of the said time, of his intention of amending or repealing the same.

**BUILDING TRADES, SAINT HYACINTHE.**—An Order in Council, approved April 27 and published in the *Quebec Official Gazette* May 4, makes obligatory the terms of an agreement between the City of Saint Hyacinthe, certain contractors and the Trade Union of Building Workers of Saint Hyacinthe. Following certain objections made to the application, a change was made in article III eliminating the appointment by the joint council of a board of examiners. (The application for the extension of this agreement was noted in the *LABOUR GAZETTE*, April, page 323.) The terms of the Order in Council as approved are:—

1. The minimum rate of wages per hour to be the following for each of the following trades:—

\* Maximum of 8 hours per day, 40 per week, except on public works, etc., for which maximum is 6 hours per day, 36 per week (*Labour Gazette*, August, 1933, page 776).

Trades.	Wages per hour.
Bricklayers.. . . .	\$0 50
Joiners and carpenters.. . . .	35
Cement finishers.. . . .	35
Electricians.. . . .	35
Hod carriers.. . . .	35
Labourers (common).. . . .	30
Lathers—metal.. . . .	35
Lathers—wood.. . . .	35
Masons.. . . .	50
Marble setters.. . . .	40
Ornamental iron workers:	
Erectors.. . . .	40
Helpers.. . . .	35
Painters.. . . .	30
Plasterers.. . . .	50
Roofers—slate and tile.. . . .	40
Roofers—composition.. . . .	35
Sheet metal workers.. . . .	40
Tile setters.. . . .	40
Terrazzo layers.. . . .	40
Plumbers and steamfitters.. . . .	35
Stationary enginemen.. . . .	35

However: a) A reduction of \$0.10 per hour for the following trades: bricklayers, masons and plasterers, and,

b) A reduction of \$0.05 per hour for the other trades, i.e.: joiners and carpenters, electricians, plumbers and steamfitters, cement finishers, hod-carriers, labourers, lathers—wood and metal, marble setters, ornamental iron workers (erectors and helpers), painters, roofers—slate and tile, roofers—composition, sheet metal workers, tile setters, terrazzo layers and stationary enginemen, will be permitted for journeymen the capacity of whom is lowered on account of age, invalidity or any other deficiency and who consequently cannot give the normal amount of work. However, the proportion of workmen of this class on a given work shall not exceed one per five qualified journeymen or fraction of this number.

II. The following minimum wages will be paid to apprentices in the trades mentioned in article (I) with the exception of labourers:

	Per hour
1st year.. . . .	\$0 12½
2nd year.. . . .	17½
3rd year.. . . .	22½

III.† The Joint Committee will not appoint a Board of Examiners, any workmen using the tools of a trade being considered as journeymen-workmen of the said trade and being on-titled to the minimum wages fixed at article I or at article VII, as the case may be.

However, the Joint Committee shall issue, upon justified request by the interested parties, annual cards of competency for apprentices contemplated in article II and special licences identifying the workmen contemplated in the second paragraph of article I and incapable, for some cause, of giving a normal amount of work.

IV. The territorial jurisdiction determined by the present agreement comprises the Saint Hyacinthe county.

V. Are exempted from the provisions of this agreement:

a) Those engaged in the agricultural industry or farms;

b) The municipal corporations carrying on certain unemployment relief work.

c) The building contracts signed and the building works already started before the pub-

† As amended.

lication in the *Quebec Official Gazette* of the Order in Council rendering obligatory the present collective agreement.

VI. The duration of labour shall be in conformity with the provisions of Order in Council No. 1253 of the 14th of June, 1933, and amendments thereto, for the putting into force of the Act respecting the limiting of hours of work (23 Geo. V, ch. 40).<sup>\*</sup> For building works exempted from the dispositions of the said Act, the regular day of work shall be eight (8) hours for qualified workmen and shall not exceed nine hours for labourers, helpers and unqualified workmen.

VII. The maintenance men, if permanent and paid monthly or weekly, shall benefit from the following conditions of labour:

a) Salary of qualified workmen: not less than \$15 per week; salary of unqualified workmen or labourers: not less than \$12 per week;

b) Hours of labour: 55 per week. Overtime shall be paid according to rates mentioned in article I;

c) The employer may subtract from the employee's salary \$2 per month and per room, if such workman lives in the establishment. A maximum reduction of \$0.20 per meal is authorized if the workman is boarded in the establishment.

VIII. The present agreement shall be valid from the date of the publication in the *Quebec Official Gazette* of the Order in Council approving the present petition and shall remain in force during 12 months from such date.

The present agreement shall renew itself automatically unless one of the contracting parties hereto notifies the other party of its intention of amending or repealing the same at least 30 days before its expiration.

**BAKERS, HULL.**—An Order in Council, approved May 10, and published in the *Quebec Official Gazette*, May 18, makes obligatory the terms of an agreement between certain bakery owners and master bakers and the Association of Employed Bakers and Confectioners, Registered for the counties of Hull, Pontiac, Gatineau and Papineau. (The application for the extension of this agreement was noted in the LABOUR GAZETTE, April, page 323). The terms of the Order in Council are:

I. The territorial jurisdiction determined by the present agreement comprises the town of Hull and the villages of Aylmer and Pointe-Gatineau and a radius of 40 miles from their limits.

II.—a) Master bakers baking 230 bags of flour or more per week (bags of 98 pounds) shall pay their employees as follows:

	Per week
1st baker.. . . .	\$28
2nd baker.. . . .	25
3rd baker.. . . .	22
4th baker.. . . .	18
5th baker.. . . .	14
6th baker.. . . .	12

b) Master bakers baking from 150 to 229 bags of flour per week:

<sup>\*</sup> Maximum of 8 hours per day, 40 per week, except on public works, etc., for which maximum is 6 hours per day, 36 per week (LABOUR GAZETTE, July, 1933, page 701).

	Per week
1st baker.. . . .	\$25
2nd baker.. . . .	22
3rd baker.. . . .	18
4th baker.. . . .	14
5th baker.. . . .	12

c) Master bakers baking from 80 to 149 bags of flour per week:

	Per week
1st baker.. . . .	\$22
2nd baker.. . . .	18
3rd baker.. . . .	14
4th baker.. . . .	12

d) Master bakers baking not more than 80 bags of flour per week:

	Per week
1st baker.. . . .	\$18
2nd baker.. . . .	14
3rd baker.. . . .	12

e) The weekly wage of confectioners shall be at least \$20. The weekly wage of apprentices confectioners of at least 3 years' experience shall be at least \$12.

The weekly wage of apprentices confectioners of less than 3 years' experience shall be at least \$6.

f) Apprentices:

Master bakers employing two workmen bakers or more shall have the right to employ only one apprentice at \$6 per week if such apprentice has less than 2 years' experience. If he has more than 2 years' experience the minimum weekly wage to be paid shall be not less than \$12.

g) The supplementary or temporary employees shall receive at least \$3 per day. An employee unable to work shall pay a substitute the same amount he is receiving.

h) Notwithstanding the provisions of the preceding subsections, the salaries to be paid outside the limits of the town of Hull and the villages of Aylmer and Pointe-Gatineau, may be reduced 15%.

III. Duration of labour:

The duration of labour shall be 60 hours per week; overtime work shall be paid at the rate of ordinary work.

IV. The present agreement shall be valid from the date of the publication in the *Quebec Official Gazette* of the Order in Council approving the present request and shall remain in force until the 1st of March, 1936. It shall then renew itself, automatically each year, unless a notice of thirty days be given before the expiration of this term, by one of the contracting parties to the other, that he desires to have the same modified or repealed.

**BAKERS, QUEBEC.**—An Order in Council, approved May 10, and published in the *Quebec Official Gazette*, May 18 (with corrections published in the *Quebec Official Gazette*, May 25) amends a previous Order in Council governing the bakery trade at Quebec, the terms of which were published in the LABOUR GAZETTE, February, page 148. The modifications to the original Order in Council thus approved and later corrected are as follows:

1. The second paragraph of article 1 is replaced by the following:

"When less than 30 bags of flour per week are baked, the men shall be paid eighty cents

per bag of flour, it being understood, however, for 28 to 30 bags, the minimum wage for the foreman shall not exceed \$22 per week, as established hereinabove."

2. Article 3 is amended by the addition of the following paragraph:

"The number of bags of flour per man applies to workshops where the baking shall not be less than 30 bags and not more than 60 bags."

3. Article 4 is replaced by the following:

"4. In shops baking more than sixty bags per week, the wages for apprentices shall be at least \$6 per week. Subsequent increases shall be fixed by an agreement between the employer and the employee, subject to confirmation by the Joint Committee."

4. The following article 7a is added:

"7a. However, in the counties of Portneuf and Lotbinière, only master-bakers selling all or any part of their product in one or more adjoining counties belonging to the judicial district of Quebec, shall be subject to the present provisions.

County of Portneuf:

A master-baker who bakes less than 30 bags per week, shall pay his workmen the amount of sixty-five cents per bag, to be distributed among them. If the baking exceeds thirty bags, article 7 shall apply."

County of Lotbinière:

Only master-bakers of the county of Lotbinière shall be subject to the same conditions as those concerning the master-bakers of the county of Portneuf who sell all or a part of their production in one or more of the adjacent counties belonging to the judicial district of Quebec."

5. The following article 7b is added:

"7b. The bakers of doughnuts and rolls shall be subject to the following scale of wages:

	Per week
First man. . . . .	\$20
Second man. . . . .	18
Third man. . . . .	15
Fourth man. . . . .	8

6. The following article 7c is added:

"7c. Employees, wages shall be paid weekly."

**BUILDING TRADES, MONTREAL.**—An Order in Council, approved May 25 and published in the *Quebec Official Gazette*, June 1, amends the previous Order in Council governing building trades at Montreal, the terms of which were published in the *LABOUR GAZETTE*, May, page 424. (The application for this amendment was noted in the *LABOUR GAZETTE*, May, page 426.) The terms of the amendment are as follows:

1. Article 1 is modified by the addition of the following two classifications:

Elevator mechanics. . . . .	\$0 75
Helpers. . . . .	0 52½

1a. A) The wage for plasterers mentioned in article 4 of the Order in Council, is 50 cents instead of 40 cents;

B) The wage for roofers—slate and tile—mentioned in article 4 of the Order in Council, is 45 cents instead of 40 cents.

2. Article IV is modified by the addition of the following two classifications, immediately after the list of trades:

Elevator mechanics. . . . .	\$0 75
Helpers. . . . .	0 52½

3. The Order in Council is modified by the addition of the following article IV-D:

"IV-D. Any overtime work as well as work done on New Year's Day, Labour Day and Christmas, will be paid at the rate of time and a half the regular salary."

3a. "Elevator mechanics and their helpers shall receive double their regular wages for any overtime work done after 5 p.m., on ordinary days; Saturday afternoons as well as Sundays, New Year's Day, Christmas Day, Good Friday and Labour Day."

**PLUMBERS, THREE RIVERS.**—An application has been made and published in the *Quebec Official Gazette*, May 18, for a modification to the Order in Council for this industry (*LABOUR GAZETTE*, December, 1934, page 1146). The modification provides, for the inclusion of wages for apprentices at from 10 cents per hour during the first year to 18 cents during the fourth year.

**PLUMBERS, HULL.**—Application has been made and printed in the *Quebec Official Gazette*, May 11, for the extension of an agreement between certain plumbing and steam-fitting contractors of Hull and the Association of Plumbing and Heating Employees. The wage rates in the application are \$1.25 per hour for master plumbers (personal services), 75 cents for journeymen, apprentices from 10 cents per hour during first year to 25 cents during fourth year, improvers 40 cents during first six months and 50 cents during second six months.

**BUILDING TRADES, DRUMMONDVILLE.**—Application has been made and printed in the *Quebec Official Gazette*, May 18, for the extension of an agreement between certain contractors of Drummondville and the National Catholic Union of Building Trades of Drummondville. The rates of wages in the agreement include:—bricklayers and masons, 60 cents; plasterers and plumbers and steam-fitters, 55 cents; electricians, 50 cents; carpenters and joiners, 45 cents; cement finishers, marble setters, painters, slate and tile roofers, sheet metal workers, tile setters, terrazzo layers, ornamental ironworkers (erectors) 40 cents; ornamental iron workers' helpers, composition roofers, hod carriers, lathers (metal and wood) 35 cents; stationary enginemen and common labourers, 30 cents.

**PLUMBERS AND ELECTRICIANS, QUEBEC.**—Application has been made and printed in the *Quebec Official Gazette*, May 25, for the extension of an agreement between certain contractors and the Brotherhood of Plumbers and Electricians of Quebec, Incorporated. The wage rates in the agreement are 45 cents per hour for journeymen and from 10 cents per hour for apprentices during first year to 18 cents during fourth year.

**BARBERS AND HAIRDRESSERS, QUEBEC.**—Application has been made and printed in the *Quebec Official Gazette*, May 25 for the extension of an agreement between the Union of Master Barbers and Hairdressers of Quebec, Incorporated, and the Catholic Union of Journeymen Barbers of Quebec, Incorporated. The wage rates for journeymen are \$15 per week and 50 per cent of gross receipts over \$25 per week for each journeyman; female hairdressers to be paid according to the orders of the Minimum Wage Board. If paid by the hour \$1 per hour, or if by the work done, the prices are stipulated in the agreement for each piece of work.

**BARBERS AND HAIRDRESSERS, THREE RIVERS.**—Application has been made and printed in the *Quebec Official Gazette*, May 25, for the extension of an agreement between the National Catholic Union of Master Barbers and Hairdressers of Three Rivers and the National Catholic Union of Employed Barbers and Hairdressers of Three Rivers. The minimum wage rate for men is \$15 per week plus 50 per cent of receipts over \$25 per week, the minimum wage for women is \$12.50 per week. Minimum prices are set for piece work.

**BARBERS AND HAIRDRESSERS, SHERBROOKE.**—Application has been made and published in the *Quebec Official Gazette*, May 25, for the extension of an agreement between the Master Barbers and Hairdressers' Union of the district of Saint Francis (City of Sherbrooke) and the Union of Employed Barbers of the District of Saint Francis (City of Sherbrooke). Minimum wage rates for barbers and hairdressers are \$13 per week plus 50 per cent of any receipts exceeding \$20 per week made by the employee; extra employees 45 cents per hour. Prices for piece or job work are stipulated in the agreement.

**BARBERS AND HAIRDRESSERS, SAINT HYACINTHE.**—Application has been made and published in the *Quebec Official Gazette*, May 25, for the extension of an agreement between the Trade Union of Master Barbers and Hairdressers of Saint Hyacinthe and the Trade Union of Employed Barbers and Hairdressers of Saint Hyacinthe. Minimum wage for men in the agreement is \$13 per week plus 50 per cent of all receipts over \$18 made by the employee. Minimum wage for women \$12.50 per week. Extra employees 45 cents per hour. Prices for piece work are set for each type of work.

**BARBERS AND HAIRDRESSERS, MONTREAL.**—Application has been made and published in the *Quebec Official Gazette* May 25, for the extension of an agreement between the Trade Union of Master Barbers and Hairdressers of the Island of Montreal and the Trade Union

of Employed Barbers of the Island of Montreal. Minimum wage rates for barbers and hairdressers (men) are \$15 per week plus 50 per cent of all receipts in excess of \$25 per week made by the employee. Minimum wage for women hairdressers \$12.50 per week. Extra employees 45 cents per hour. Prices are set for piece work.

**BAKERS, MONTREAL.**—Application has been made and printed in the *Quebec Official Gazette*, May 25, for the extension of an agreement between certain master bakers and bakery owners and the Union of Bakery Workers of Montreal. The wage rates in the agreement are \$22 per week for men in charge of the oven or of the dough or of the pastry, \$18 for journeymen bakers, helpers and labourers employed inside the bakery, \$15 for salesmen, \$10 for first year apprentices and \$12 for second year apprentices.

**LONGSHOREMEN, MONTREAL.**—Application has been made and printed in the *Quebec Official Gazette*, June 1, for the extension of an agreement between certain inland navigation companies and the Longshoremen's Union of Montreal governing conditions in the loading and unloading of ships engaged in inland navigation in the Montreal Harbour. The wage rates are 42 cents per hour for day work and 45 cents for night work.

**MILLINERY WORKERS, MONTREAL.**—Application has been made and printed in the *Quebec Official Gazette*, June 1, for the extension of an agreement between the Association of Manufacturers of Millinery and Women's and Children's Headwear and the United Hatters, Cap and Millinery Workers International Union, Local No. 49. The weekly wage rates are: \$31 for hand blockers, \$28 for straw operators, fabric operators, blockers and cutters, \$19 for drapers and \$14 for trimmers.

According to the annual report recently published by the Hollinger Mining Company, employees have co-operated enthusiastically in the welfare plans established by the company in 1934. Last year a savings plan calling for a voluntary contribution of \$1 per employee each two weeks, and carrying \$250 extra insurance, was inaugurated. Initially, 95 per cent of the employees availed themselves of the opportunity, and since then practically 100 per cent have joined the plan. The savings have now reached a total of \$65,000. Group insurance, starting at \$500 and increasing to \$1,500 in five years, was started at the same time. Under this group policy, \$26,000 in death claims was paid during the year.

## INDUSTRIAL STANDARDS ACTS IN ONTARIO AND ALBERTA

**S**TATUTES have been recently enacted in Ontario and Alberta designed to promote the establishment of standards of wages and hours of labour by agreement between the employers and employed in any industry in any zone or zones of the province and to enable the Lieutenant-Governor in Council to declare any written agreement as to wages and hours binding, for not more than one year, on all persons engaged or employed in the industry in the zone or zones to which it applies if, in the opinion of the Minister of Labour for the province, the agreement was arrived at "by a proper and sufficient representation of employees and employers." The Acts and schedules of wages and hours are to be enforced by the Minimum Wage Boards and penalties are provided for violation of the Act or the schedules. Joint boards may be set up by the parties in any industry to hear complaints and assist in enforcing the terms of the schedule as to wages and hours.

Except in the references to other provincial statutes and departments and in two other particulars, the Ontario and Alberta Acts are identical. The Ontario Act requires wages found to be due and unpaid to be paid to the Minimum Wage Board on behalf of the Provincial Treasurer or of the employee in the discretion of the magistrate. The Alberta statute requires wages to be paid to the employee. Further, to the Bill as presented to the Alberta Legislature was added Part IV empowering the Lieutenant-Governor in Council to make regulations presenting standard specifications as to commodities for industrial use or for sale in the province.

The text of the Industrial Standards Act of Ontario follows:—

1. This Act may be cited as *The Industrial Standards Act, 1935*.

2. In this Act,—

- (a) "Association of Employees" shall mean a group of employees organized for the purpose of advancing their economic conditions and which is free from undue influence, domination, restraint or interference by employers or associations of employers;
- (b) "Deputy Minister" shall mean the Deputy Minister of Labour;
- (c) "Employee" shall mean and include every person engaged in any industry who is in receipt of or entitled to compensation for labour performed in Ontario whether such labour is performed on the premises of the employer or of the employee or elsewhere and whether such compensation is on the basis of time or of the amount of work performed or piece work, but shall not include domestic servants;

- (d) "Employer" shall mean and include every person, corporation, partnership, firm, manager, representative, principal, agent, contractor, and subcontractor, directly or indirectly responsible for the payment of wages to an employee;
- (e) "Industry" shall mean and include every business, calling, trade, undertaking and work of any nature whatsoever and any branch thereof in which there are employees and employers except the mining and agricultural industries;
- (f) "Minister" shall mean the Minister of Labour or such member of the Executive Council as is for the time being charged with the administration of this Act;
- (g) "Officer" shall mean Industrial Standards Officer appointed under the authority of this Act;
- (h) "Regulations" shall mean the regulations made by the Lieutenant-Governor in Council under the authority of this Act;
- (i) "Schedule" shall include schedule of wages and schedule of hours of labour;
- (j) "Schedule of Hours of Labour" shall mean a schedule of the maximum number of hours in each day or of days in each week, or of both, which an employee shall be permitted to work;
- (k) "Schedule of Wages" shall mean a schedule of the minimum wages or remuneration payable to an employee.

### PART I

3. The Lieutenant-Governor in Council may appoint one or more persons as Industrial Standards Officers whose duty it shall be to assist in carrying out the provisions of this Act and of the regulations and schedules.

4. Every officer shall have such powers and duties as may be prescribed by this Act and regulations and shall have authority to conduct enquiries and investigations respecting all matters coming within the scope of this Act and of the regulations and shall, for such purposes, have all the powers, rights and privileges as a commissioner appointed under *The Public Enquiries Act*.

5. The Minister may define and redefine zones in the various industries for the purpose of carrying out the provisions of this Act and the regulations.

6. The Minimum Wage Board shall have authority to enforce the provisions of this Act and of the regulations and schedules.

### PART II

7. The Minister may, upon the petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers engaged in such industry in any one or more zones, for the purpose of investigating or considering the condition of labour and the practices prevailing in such industry and for negotiating standard or uniform rates of wages and hours and days of labour in each industry in said zone or zones.

8. The employees and employers in attendance may formulate and agree upon a schedule of wages and of hours of labour for all or any class of employees in such industry with-

in such zone or zones and the parties to every agreement entered into under the authority of this Act shall assist in maintaining the standard of wages and hours and days of labour provided for by any schedule affecting such parties.

9. If, in the opinion of the Minister a schedule of wages and of hours of labour for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve thereof, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force for a period not exceeding twelve months and thereupon such schedule shall be binding upon every employee and employer in such industry in such zone or zones to which such schedule applies.

10. No such schedule shall become effective until ten days after publication of the order in council in the *Ontario Gazette*.

11. Every employer affected by any schedule shall cause a copy of such schedule to be posted in a conspicuous place where his employees are engaged in their duties so that the same may be readily seen and read by all employees and further shall cause such schedule to be there maintained so long as it remains in force.

### PART III

12. The Minister may investigate and enquire into any partnership or association and if he considers any such partnership or association is being used for the purpose of defeating the provisions of this Act or the regulations, he may, in writing, declare any or every partner or member of such partnership or association an employee for the purpose of this Act and the regulations.

13. Whenever a schedule is in force, the Minimum Wage Board may require any employer affected thereby to,—

- (a) furnish the name, address and age of all employees and such further information respecting wages, hours and days and conditions of labour as may be required;
- (b) produce for inspection at a place named by the Board any books, registers, pay-rolls, financial statements, attendance records, time records, contracts of employment and all such records as may be deemed necessary.

14. The Lieutenant-Governor in Council may make such regulations not inconsistent with this Act as he may deem necessary for carrying out the provisions of this Act and for the efficient administration thereof and such regulations shall be published in the *Ontario Gazette*, and upon being so published shall have the same force and effect as if enacted in this Act and such regulations may be repealed, altered or amended from time to time and such repeal, alterations or amendment shall be published in the *Ontario Gazette* and upon being so published shall have the same force and effect as if enacted in this Act.

15. In every zone or group of zones to which any schedule applies, the employees and employers engaged in the industry to which such schedule applies may establish a board of not more than five members, one of whom may act as chairman, and such board shall hear complaints of employees and employers to whom such schedule applies, and shall generally assist in enforcing such schedule.

16. (1) No employer shall pay or cause to be paid to any employee wages or remuneration of a sum less than is prescribed by any schedule nor shall he require or permit any employee to work a greater number of hours in each day or a greater number of days in each week than is prescribed by any schedule, which schedules apply to the industry in which the employee or employer is engaged and to the zone in which the employer's business is located or in which the work is performed.

(2) Everyone who violates any of the provisions of subsection 1 shall be guilty of an offence and shall be liable to a fine of not less than \$25 and not exceeding \$100, and in default of payment, to imprisonment for a term not to exceed three months, and in addition shall pay to the Minimum Wage Board, on behalf of the Provincial Treasurer, or of the employee in the discretion of the magistrate, the full amount of the wages then found to be unpaid under the provisions of the schedule and in default of payment the said amount of wages may be recoverable by distress at the instance of the Minimum Wage Board.

17. (1) No employee shall agree or consent to be employed for wages or remuneration of a sum less than he is entitled to by any schedule nor shall any employee work a greater number of hours in each day, or a greater number of days in each week than is prescribed by any schedule, which schedules apply to the industry in which the employee or employer is engaged and the zone in which the employer's business is located or in which the work is performed.

(2) Everyone who violates any of the provisions of subsection 1 shall be guilty of an offence and shall be liable to a fine of not less than \$1 and not exceeding \$10 and in default of payment to not more than ten days imprisonment.

(3) Every person who violates any of the provisions of this Act or the regulations shall be guilty of an offence under this Act and shall, upon conviction, where no penalty has been specifically provided, be liable to a fine of not less than \$1 and not exceeding \$100 and in default of payment, to imprisonment for not more than thirty days.

(4) Every penalty imposed for an offence under this Act shall be recoverable under *The Summary Convictions Act*.

18. (1) The provisions of *The Factory, Shop and Office Building Act, 1932*, *The Master and Servant Act*, *The Minimum Wage Act*, *The Public and Other Works Wages Act*, *The Wages Act*, *The Industrial Disputes Investigation Act, 1932*, and *The Woodmen's Employment Act, 1934*, shall be read and construed subject to the provisions of this Act, but in no case shall the wages prescribed by any schedule to this Act be for a less amount nor shall the hours of labour prescribed by any schedule to this Act be for a greater number of hours in each day or days in each week than is prescribed by any of such Acts.

(2) The wage rates for women and girls prescribed by any schedule shall not be for lesser amounts nor shall the number, of hours of labour in each day or the number of days of labour in each week be greater than is provided in *The Minimum Wage Act* or *The Factory, Shop and Office Building Act, 1932*, and the regulations thereunder.

(3) The wage rates for apprentices to whom *The Apprenticeship Act, 1928*, applies shall be the rates provided under said Act and the regulations thereunder.

19. This Act shall not extend to persons employed by the Government of the Province of Ontario or by any of the Departments thereof or to any municipal corporation or by any board or commission created by any Act of this Legislature.

20. This Act shall come into force on the day upon which it receives the Royal Assent.

### First Agreement Under Act

Under the Ontario statute an order in council, May 30, 1935, on the recommendation of the Minister of Public Welfare, Municipal Affairs and Labour, made binding upon all employees and employers in the plumbing, steamfitting and gas fitting industry a schedule

of wages and hours of labour agreed to in writing by representatives of the employees and employers. This schedule is applicable in a zone including the city of Toronto and its vicinity from June 1, 1935, to May 30, 1936. The schedule provides for eight hours per day, forty hours per week, and a minimum wage rate of 85 cents per hour for journeymen and 55 cents for junior mechanics for all work contracted for prior to July 31, 1935, and 90 cents and 60 cents per hour respectively on work contracted for thereafter; time and one-half for overtime, Saturdays and Sundays and specified statutory holidays, double time.

### Trends in Vacation Policies

"Recent Trends in Vacation Policies for Wage Earners" is the subject of a brochure recently issued by the Industrial Relations Section of Princeton University. It is pointed out that before 1919, comparatively few firms gave vacations to any but their white-collar workers. "The others stayed on the job, when there was a job, fifty-two weeks a year." The growth of industrial relations techniques since the war has been a force in favour of vacations for all types of workers. It was found that companies have examined their labour policies more critically in the light of new standards and have become more aware of the advantages of morale and a favourable attitude toward the company on the part of all of their employees. The action of unusually progressive companies has stimulated that of others who might not have taken the lead themselves. Increased channels of communication between management and employees have made it possible for employees to present their case for vacations, as for other industrial relations activities.

"This tendency has been influenced by the pace of machine production which has been felt by the shop workers more than ever before," the report states, "and particularly during the depression, employees in many stable companies have been called upon to exert more sustained mental effort and physical co-ordination than an earlier generation would have deemed possible."

The survey also revealed that the policy of giving vacations with pay to wage earners has increased markedly in favour and application during the past year. New plans have been installed by several large and important industrial concerns and older plans have been made more liberal or re-established after having been discontinued during the depression.

"Vacation plans applying to hourly and piece-rate workers were discontinued in great numbers during the depression. In many

cases the discontinuance was announced as temporary and the company stated that it hoped to put the plan into effect again as soon as business conditions made such action possible. During the past year and a half, several of these plans have been reinstated; others are still inoperative. On the other hand, new plans have been established and the matter is under discussion in several large concerns. By the spring of 1935, the tide seems to have turned once more toward an increase in the number and coverage of such plans."

The Coal Mining Industry Act, 1935, of Saskatchewan has been proclaimed in force as from April 15, 1935. The provisions of this Act were outlined in the last issue of the Labour Gazette, page 416.

In a report recently presented to Parliament by the Minister of Labour, the British Government states that it is not prepared to ratify the Convention of the International Labour Conference (League of Nations) concerning fee-charging employment agencies. While the Government is in favour of the development of the work of the national employment exchanges so as to offer the widest practicable range of services for the free use of the public, it does not agree that it is desirable to abolish the specialized services provided by fee-charging agencies that are conducted with due regard to the public interest. The Government relies on local authorities in the United Kingdom to obviate the possibility of abuse under the powers which they exercise in accordance with existing legislation or in pursuance of private Acts. In these circumstances the Government was not prepared to ratify the Convention.

On May 21, Hon. David A. Croll, Ontario Minister of Welfare and Municipal Affairs, was sworn in as Minister of Labour. It is understood that the work of the departments of labour and welfare will be co-ordinated.

## WORKMEN'S COMPENSATION IN ALBERTA, MANITOBA AND ONTARIO IN 1934

### Alberta

THE seventeenth annual report of the Alberta Workmen's Compensation Board shows that there was a considerable increase in the number of accidents in the calendar year 1934. During that period there were 9,608 accidents—an increase of 1,448. Thirty-five of these were fatal, which is fourteen more than in 1933, and seventy-seven resulted in permanent disabilities of varying degrees, an increase of twenty over those of the previous year. In 9,496 cases the workmen either were temporarily disabled or required medical treatment only.

The cash receipts and expenditures for 1934 show that \$671,242.27 was collected and \$731,670.72 was expended, leaving a deficit in expenditures over revenue, of \$60,428.45. The corresponding deficit for 1933 was \$86,171.68.

The amount collected from assessments on the payroll of 1934 was \$666,237.20, as compared with \$653,427.25 for the previous year, an increase of \$12,809.95. "The assessment rate," the report states, "was increased in a few industries, which would explain this increase. However, the substantial increase in the amount of uncollected assessments over those of last year, when added to that of the collections, indicates a substantial increase in the industrial payroll of 1934. The sum of \$312,092.05 was paid to workmen who were temporarily partially disabled. In 1933 the disbursement under this heading was \$291,405.68."

The cost of administration for the year under review, was \$111,202.42, a reduction of \$2,039.20 as compared with 1933.

**Assessment rates.**—Explaining the method of rating, the report states: "Industry is divided into classes according to the hazard of the industry and as enumerated in this report. Separate accounts are kept of all receipts and disbursements in each industry and for each class of industry. Each class of industry is, therefore, in effect, a mutual insurance association of the employers within that class. The rates of assessment for the respective classes are determined at the beginning of the year and are based on the accident experience of the preceding year. The rates of assessment consequently fluctuate from year to year, as each class is assessed for an amount sufficient to meet the estimated expenditure within that class. Should a deficit occur within a class, a temporary loan from some other class with a surplus is arranged. It may, therefore,

be said that the mutual aspect of The Workmen's Compensation Act does extend beyond the mutuality within the class. . . . .

"There has been a substantial increase in the assessment rates in the last few years in hazardous industries such as lumbering, coal-mining, general contracting, etc. In addition to the regular assessment, a super-assessment may be levied upon those industries where the accident experience has been abnormally high. The authority for such super-assessment is contained in Section 20, Subsection (10) of the Act."

An analysis of assessment rates levied on employers per \$100 of pay-roll shows that among the industries with high assessment are the following: logging, \$12; sawmills, \$12 and \$10 (according to total amount of payroll); street construction, \$10; railway construction (with blasting) \$6; fishing, \$6; highway construction (with blasting), \$6; other highway construction, \$4.50; building construction (over four stories high) \$5; employment in and about coal mines, \$4.50.

In the same table is presented the medical aid rating under the various schedules, based on each shift or part of shift. Under the Alberta Act employers are authorized to deduct a sum, as determined by the Board, from the earnings of each workman. These deductions are credited to a medical fund from which payments are made for medical service and hospital attention to workmen injured in the course of employment.

The highest medical aid rating in 1934 occurred in logging and sawmills each with 10 cents; and in coal mining, steel construction, railway construction and highway construction each with 7 cents. During the year \$202,316.64 was collected from workmen for medical aid purposes and the amount expended was \$186,751.47.

**Pension Reserve Fund.**—The act provides that pensions are payable to permanently disabled workmen and to widows of fatally injured workmen for the remainder of their lives, and to the children of such fatally injured workmen until they have reached the age of sixteen years, and in some cases to eighteen years of age. Provision has, therefore, been made for the payment of pensions by the creation of a fund for that purpose called the Pension Reserve Fund.

The sum of \$325,733.81 was awarded in pensions as compared with \$358,597.66 for the preceding year, a decrease of \$32,863.85. The

total amount to the credit of the Pension Reserve Fund is now \$2,917,156.26. Payments from this fund for the year under review, amounted to \$368,784.43. At the present time there are 1,331 persons in receipt of monthly pensions, of whom 527 are disabled workmen, 392 are widows, and 412 are dependent children.

*Administration of the Act.*—Dealing with the administration of the Act the report states: "The depressed economic conditions of the past few years have made the administration of the Act more difficult than formerly, employers finding it more difficult to pay their assessments, and partially incapacitated workmen finding it more difficult to obtain employment, and the Board in consequence comes in for considerable adverse criticism from both parties. While some of the employers seem to feel that the assessments are too high, some of the injured workmen feel that the compensation is too low, and naturally enough perhaps, the Board is blamed for both conditions. The former fail to realize or seem to forget that the cost of Workmen's Compensation is entirely governed by the number, amount and extent, of the industrial accidents that occur, and as they reduce the hazard to employment in industry, so also will they reduce the cost of compensation, and the latter fail to realize that, as compensation is based on earnings, decreased earnings must of necessity mean a correspondingly decreased compensation for temporary disabilities.

The report points out that "there is one class of workmen that has been more unfortunate than others during these latter years, and which is deserving of all possible consideration. It is that of the workmen who have been partially incapacitated by accident, but who are unable to find suitable employment. The compensation payable under such circumstances is based on the workman's ability to earn, and where there are no earnings the compensation is often inadequate to provide a living. Some employers could do a great deal more than they are doing, to assist such unfortunate cases, by providing them with suitable employment."

*Summary of statistics.*—The payroll for all classes in 1934, amounted to \$61,880,494.41 and

the total number of employees in such classes was 59,192. Other statistics for the year were summarized as follows:—

Number of employers within the scope of of the Act as at December 31, 1934....	4,503
Number of accidents reported during the year 1934.....	9,608
Number of accidents and claims not finally disposed of as at December 31, 1933..	507
Number of claims disposed of by award of pension or payment of compensation .....	4,090
Number of claims disposed of by payment only of account for medical aid.....	3,512
Number of accidents disposed of for which no application for compensation was received .....	125
Number of accidents disposed of on which no compensation was due.....	1,291
Number of claims on which further payments have to be made.....	798
Number of accidents awaiting further reports and on which no payments have been made.....	599

Of the total of 9,608 accidents, 77 involved some permanent disability, 9,496 were of a temporary nature, while 35 were fatal. The mining industry was responsible for the greatest number of accidents with a total of 2,608. Second in accident frequency was the group involving trucking, manufacturing of textiles, bakeries, power laundries, food products, etc., with 1,040 accidents. The most frequent cause of accidents was that designated as "falling objects or bodies" (2,233) followed by "handling objects" (2,190).

The time loss in non-fatal claims totalled 142,043 days. The average time loss in permanent disability cases was 94.76 days and in temporary disability cases 31.46 days. The average age of injured workmen was 36.76 years. The number of accidents to minors (under 20 years of age) was 380 and to those of advanced age (60 years or over) 189.

The Mine Rescue and First Aid branch details the training and extent of equipment at the various stations. Particulars are also given of the first aid work at these stations.

Included in the report is the annual review of the administration of the Electrical Protection Act. The electrical industry has decidedly improved during the past year. There has been a considerable amount of rewiring done and also an increased amount of electricity used in the average home annually.

## Manitoba

The annual report of the Manitoba Workmen's Compensation Board which reviews the administration of the Act during the calendar year 1934, notes that "the improved trend of business first visible in 1933 continued during 1934 with the result that the volume of work handled by the Board showed a decided increase. There were twenty per cent more ac-

cidents reported to the Board during 1934 than in the previous year.

During 1934 the Board received reports of 7,879 accidents including 18 fatalities as compared with 6,560 accidents reported during 1933, of which 12 resulted fatally.

Final returns for the year 1933 showed that 6,608 accidents were reported to the Board as

having occurred during that year. Of these accidents, 83 per cent entailed the payment of compensation, either for medical aid only or for compensation for time loss and medical aid, while in 17 per cent of cases no expense was entailed.

On December 31, 1934, the Board had on its books 519 dependents of workmen killed in industry during the period March 1st, 1917, to December 31, 1934.

The total actual payroll for all classes of employees for 1933 was \$50,194,872.29. Of this total the returns for the largest group, known as the general body of employers, showed a payroll of \$24,481,750.00. During 1934 the Board assessed 5,163 employers in this group as compared with 5,072 in 1933.

In 1934 the actual cash disbursed by the Board amounted to \$797,996.90 as compared with \$789,560.51 expended during 1933.

The value of the Board Orders passed during 1934 for the payment of compensation, (including orders respecting Dominion Government employees and amounts transferred to General Unclassified Reserve to provide for the future payments in fatal and permanent disability cases) was \$666,854.85 as compared with \$715,522.53 for the year 1933.

The accidents as reported by the various industrial groups for the last two years are as follows:

According to the annual report of the Ontario Workmen's Compensation Board, for the year ending December 31, 1934, there was a considerable increase in the number of accidents reported to the Board, the total during the calendar year 1934 being 54,730 as compared with 38,042 in 1933, or an increase of about 44 per cent. Included in the 54,730 accidents in 1934 were some not serious enough to involve payment of either compensation or medical aid and for which no claims were made and others for which claims were made but which were not allowed by the Board. At the close of the year there were 1,374 claims in assembly, as compared with 1,032 at the end of 1933, notice of the accident having been given but reports necessary to deal with the case not yet having been received.

The number of accidents in which compensation or medical aid was paid during the year was 49,302, as compared with 33,706 during 1933. Of the 49,302 accidents 190 were fatal; 14 involved permanent total disability; 1,705 permanent partial disability; 23,238 temporary

Group	1933	1934
Steam railways.....	925	1,053
Province of Manitoba.....	164	204
City of Winnipeg.....	256	315
General Body of Employers.....	4,765	5,761
Winnipeg Electric Company.....	155	172
Dominion Government.....	295	374
	6,560	7,879

The Board also deals with all industrial accidents happening in Manitoba to employees of the Dominion Government, the Dominion agreeing to keep the Board in funds as required and to pay its share of the administration cost. With respect to such accidents, the report states: "It is perhaps worthy of note, that the cost of administration to the employers of this Province, \$56,645.60 in 1934, is the lowest for any year since the going into effect of the present Act in 1921. The cost of administration to Manitoba employers in 1924, a year of similar volume of industrial activity was \$77,303.34."

In addition, the Board also administers the old age pensions regulations for the province. Since April, 1928, some 16,000 claims have been dealt with. Nearly 10,000 pensioners are at present on the rolls, entailing a budget in excess of \$2,000,000 per year.

The latter part of the report contains a tabular analysis of the accidents occurring in 1933, showing the nature and causes of accidents, time loss, etc.

## Ontario

disability; while 24,155 entailed medical aid only. Except for Department of Northern Development cases, Schedule 2 and Crown cases, involving medical aid only, which are a large proportion of the accidents reported, are not included as accidents paid for, as the medical aid is furnished directly by the employer. In addition to the 49,302 claims compensated, the Board in 1934 opened for further award 506 claims which had been settled previously.

The Ontario Workmen's Compensation Act covers the greater number of industries in the Province, but not all of them. Industries under the Act are divided into two schedules. Schedule 1 includes manufacturing of all kinds and the operation of theatres and moving picture places, gas works, light and water-works systems, construction and repair of roads, streets, etc., fishing, dredging, stevedoring, and many other similar industries. Schedule 2 comprises railways, street railways, express, telegraph and telephone companies, navigation, municipalities, commissions, and school boards.

Much the greater number of industries are included in schedule 1. The number of employees reporting under schedule 1 at the end of 1934 was 19,942 as compared with 19,600 at the end of 1933. The industries in this schedule are dealt with under the collective liability system, that is, the industry as a whole bears the losses of the industry which are distributed over classes, groups, and individual items, for each of which items, numbering in all 426, there is a rate set from year to year. The rate is then applied to all the pay-rolls in the particular item for which the rate is fixed and the individual employer is assessed for an amount resulting from the application of the rate to his annual pay roll.

The disbursements in 1934 were: compensation, \$3,657,968.82; medical aid, \$841,738.41; accident prevention, \$146,065.93; rehabilitation, \$10,627.56; administration expenses totalled \$322,458.99.

The average general rate levied on the full payroll in schedule 1 since the commencement of the Act has been \$1.16 per \$100 of payroll. In some years the assessment has been higher, and in some years substantially lower. The provisional rate for the year 1934 is \$1.16

*Assessments.*—The total assessments in all the classes of Schedule 1 for the year 1934, including estimated adjustments, amounted to \$3,888,156.35. In assessments are included collections for default in making returns or payments and interest for under and over estimate of payroll. Other income and credits amounted to \$139,151.98, making a total of \$4,027,308.33, of which \$32,896.17 is to be refunded for merit rating. The net income and credits for the year are, therefore, \$3,994,412.16.

Employers in Schedule 2 are assessed their share of the expense of administration. For 1934 that share amounted to \$23,074.66, as compared with \$25,784.96 in 1933, and \$24,189.86 in 1932. Proportionate to the amount of compensation awarded, administration expenses in Schedule 2 and Crown Cases were 8.88 per cent in 1934, as compared with 8.71 per cent in 1933, and 5.85 per cent in 1932.

*Compensation.*—Compensation for Schedule 1 industries during the year, including estimate for what is still to be awarded for accidents happening during the year and for adjustments of prior years amounted to \$3,462,546.09; payment for medical aid, including estimate for what is outstanding, amounted to \$969,226.13. Administration expenses for Schedule 1, including \$11,403.09 for mine rescue work, totalled \$250,115.11; and \$146,065.93 was paid to employers' safety associations. Total expenditures and charges were \$4,827,953.26, while the provisional deficit for the year was

\$833,541.10. The balance forward from prior years was \$1,589,872.87, which, added to the year's deficit makes a net provisional surplus of \$756,331.77 at December 31, 1934.

The total amount of compensation awarded in Schedule 2, industries and Crown Cases during 1934 was \$912,729.66. Of this amount \$254,361.23 was for injured workmen of municipal corporations; \$152,805.71 for steam railroads; \$3,370.46 for electric railways; \$49,766.11 for navigation companies; \$1,926.04 for express and sleeping car companies; \$7,752.25 for telephone and telegraph companies, and \$208.63 for all other industries in Schedule 2; \$244,150.14 for Dominion Crown Cases and \$198,389.09 for Provincial Crown Cases. Of the total amount awarded \$457,868.69 was for pensions, and \$454,860.97 for compensation in non-pension cases.

*Administration.*—The gross administration expenses of the Board during 1934 were \$333,895.74, which included special statistical services for which refunds have been received of \$11,436.75 making the total administration expenses \$322,458.99, as compared with \$300,292.50 during 1933. The employers pay the whole expense of the administration of the Act. The amount is divided according to the accidents handled among Schedule 1 (accident and silicosis funds), Schedule 2, and Dominion and Provincial Crown. Administration expenses for 1934 were 7.11 per cent of all benefits awarded, being 6.65 per cent of benefits awarded in Schedule 1 and 8.88 per cent in Schedule 2 and Crown cases.

*Safety Associations.*—The safety or accident prevention associations are organizations of employers established under the authority of the Act by the employers in twenty-one out of the twenty-four classes of industry. They are under the management of the employers, but the expenses are paid by the Board out of the accident fund.

Total payments to such associations for 1934 were \$146,065.93, divided as follows:—Lumbermen's Safety Association, \$19,955; Ontario Pulp and Paper Makers' Safety Association, \$13,645.08; Class 5 Accident Prevention Association, \$11,200; Industrial Accident Prevention Associations, \$92,740.85; Electrical Employers' Association of Ontario, \$8,525. Payments for mine rescue work in 1934 totalled \$11,403.09, and for rehabilitation clinics it totalled \$730.33.

*Funds.*—The Schedule 1 funds are known and referred to in the Act as the "Accident Fund." They comprise, in addition to current funds out of which temporary payments of compensation, medical aid, and administra-

tion expenses are paid, the pension fund, disaster reserve, and compensation deferred. The balance of assets in excess of liabilities at December 31, 1934, was \$1,565,487.96

The pension fund, representing the outstanding pension liability, comprises the largest part of the funds standing to the credit of Schedule 1. It had a balance at the end of the year of \$20,007,875.02.

The disaster reserve is a fund set aside under the provisions of Section 99 (2) of the Act to meet any unforeseen disaster or other circumstance which might unduly burden the employers in any class of industry. The fund has been accumulated by a transfer of one per

cent of the gross assessments up to the end of 1922, and for the year 1923. These are the only moneys set aside or held by the Board which do not directly cover liabilities actually incurred by reason of accidents which have already happened. The balance in this fund at the end of 1934 was \$280,803.76.

The funds included under "compensation deferred" comprise compensation moneys held at interest for claimants in Schedule 1, payment being deferred to a future time by reason of the claimant being a minor or for other reasons. At the end of the year there was a balance in this fund of \$43,336.22.

### **Anthracite-silicosis Among Miners**

Anthracite-silicosis (Miners' Asthma) is the title of a pamphlet recently published by the Department of Labour and Industry of the Commonwealth of Pennsylvania, U.S.A. The report is the result of a study made in the anthracite region of Pennsylvania by the United States Public Health Service. This study of health conditions including the physical examination of 2,711 men (about 96 per cent of the number on the payroll) was made in three representative anthracite coal mines.

It indicated that the prevalence of anthracite-silicosis among the entire group of employees was about 23 per cent. Among all except rock workers, less than 2 per cent of the men developed anthracite-silicosis, when the duration of employment was less than 15 years, regardless of the amount of dust in the air. Among men exposed 15 to 24 years to dust containing less than 5 per cent free silica, 14 per cent of those who had worked where the average dust count was 100 to 199 million particles per cubic foot, 29 per cent of those exposed to 200 to 299 million particles, and 58 per cent of the men who had worked for this period in more than 300 million particles per cubic foot, developed anthracite-silicosis. With the exception of miners, their helpers, and rock workers, about 25 per cent of all the men employed under ground developed anthracite-silicosis after a working period of more than 25 years. This group was exposed to dust having a quartz content of about 13 per cent.

The prevalence of pulmonary tuberculosis among the hard-coal mining employees at ages below 35 was slightly less than that found among male adults in the general population of the country. In the age group 35 to 44 however, the prevalence of tuberculosis was about twice that found among the general population; at ages 45 to 54 about five times; and for the ages above 55 it was about ten

times the rate found in the general population.

Mortality from respiratory diseases was found to be much greater among anthracite workers than in the general adult male population of the country. The data indicated that underground work in the absence of dust did not predispose the fatal attacks of respiratory disease.

Under the section dealing with "recommendations" the report lists various methods of dust abatement already employed in some of the anthracite coal mines and concludes this section with the statement:—

"In the control of dust hazards there is no single measure applicable to all dusty operations and processes. All of the means of prevention must be practiced to insure success in the solution of the problem."

A statement on coal and coke statistics recently issued by the Dominion Bureau of Statistics shows that Canada's coal production in April reached a total of 881,661 tons as compared with 814,578 tons in April, 1934 and 807,339 tons, the average for the month during the past five years. Bituminous coal output in April, 1935, amounted to 687,536 tons, sub-bituminous coal, 34,928 tons and lignite coal, 159,197 tons.

The activities of the International Federation of Trade Unions during the period 1930-1932, have been published recently in book form. The contents comprise the subject of a report submitted to the sixth congress of the federation held in Brussels in 1933, and which was reviewed in the LABOUR GAZETTE for October, 1933, page 1006. The report is in several sections dealing with such subjects as economic policies, social activities, propaganda and educational work, fight against war and reaction, etc.

## LABOUR AND INDUSTRY IN ONTARIO IN 1934

### Fifteenth Annual Report of Provincial Department of Labour

THE fifteenth annual report of the Ontario Department of Labour reviews the administration of the various acts under its jurisdiction during the year ended October 31, 1934. The following enactments are administered by the Department: The Factory, Shop and Office Building Act; the Minimum Wage Act; The Sanitary and Hoisting Engineers Act; The Employment Agencies Act; The Steam Boiler Act; and The Apprenticeship Act.

In reviewing conditions in the province the Deputy Minister notes that a substantial improvement in employment conditions prevailed during the year, although there were minor set-backs in the upward trend which commenced the middle of the previous fiscal year, but these were of a temporary nature. Increased employment was apparent in almost all classes of activity and in all sections of Ontario.

Greatest increases in activity were reported in the construction industry, the index number of which was more than double that of last year, and in the logging industry, the index number of which almost tripled that of 1933. Mining, the manufacturing industry as a whole, services and trade ranked next in order of improvement. Slight decreases were recorded for communication and transportation groups. It was stated that a considerable portion of the increase in the construction industry was undoubtedly due to unemployment relief work on highways. However, the fact that the value of building permits issued in 30 municipalities in Ontario during the year showed an increase of approximately 35 per cent over the previous year indicates a substantial improvement in building construction also. The total value reported for 1934 amounted to \$12,807,744 as compared with \$9,482,217 for 1933.

Further indication that industry is on the upward grade in Ontario, observes the Deputy Minister, is evident in the report of the Examiner of Plans in the Factory Inspection Branch of the Department. The estimated value of plans for factory, shop and office buildings which were submitted to the branch for approval amounted to \$6,426,550 for the year, as compared with \$2,534,000 in 1933, which was the lowest figure for any year on record. The fact that this year's figure was more than two and one-half times that of last year and approximately 45 per cent greater than that of 1932 was regarded as a decided step towards recovery.

In touching on labour legislation, the Deputy Minister summarizes amendments to two enactments—the Factory, Shop and Office Building Act and the Minimum Wage Act. The former established a maximum of 56 hours per week in bake shops with written permission required for overtime. The latter was amended on several points. Working hours were fixed at a maximum of 48 per week in municipalities of more than 50,000 population; 50 hours in municipalities between 10,000 and 50,000 population; and 54 hours in other municipalities. If, however, these hours are less than the prevailing hours, then the prevailing hours are to be considered the maximum. Other amendments concerned the payment of not less than the minimum rate to male employees replacing female employees; and increased penalties for contravention of Board orders.

*Employment Service.*—Statistics of the Ontario Government Employment Offices indicated that during the year 221,580 vacancies were reported in 28 centres throughout the province; 85,864 men and women were referred to positions of assumed permanency; and 124,006 placements of a casual nature were made. A very high percentage of the vacancies were in connection with municipal, provincial or federal relief projects. Placements on relief work were made on municipal relief projects, provincial construction projects, provincial highway projects and federal airport and relief camp projects.

The report indicates that Ontario Employment Offices continued to serve agricultural employers. In most centres the demand was above that of 1933, and with one exception, all offices reported an increase in farm wages. An interesting feature of the reports on farm placements was the improvement in the demand in Northern Ontario, where farm work retains many of the features of pioneer days, inasmuch as the orders generally call for a man who can adapt himself to clearing land as well as farming.

"Unemployability among applicants" was a subject of special study by employment superintendents during the past year. The results indicate the problems faced by the unemployable group, or those who are on the borderline due to advancing years or physical disability. The statistics compiled from various provincial offices indicated a considerable percentage in various municipalities who were classed as unemployable.

*Private Employment Agencies.*—During the year there were no serious complaints registered regarding the operation of private employment agencies and no prosecutions under the Act. The number of placements effected by these agencies totalled 3,118; of these, 2,233 were men and 885 were women.

*Factory Inspection.*—The forty-eighth annual report of the Factory Inspection Branch states that: "The upward trend which was evident in industrial conditions during the last year was again apparent and slowly but surely industry is approaching normalcy. Attention was drawn to the increase in double shift and overtime permits indicating increased employment over a more or less extended busy season. Fewer prosecutions were necessary and little difficulty was encountered in the enforcement of the Act.

Employees in the firms inspected numbered 268,422 as compared with 291,252 in the previous year. The number of first inspections totalled 18,398, there being 17,797 such inspections in 1933.

There were 2,246 applications or 968 more than the previous year, for overtime permits, while double shift permits increased from 67 to 94. Accidents increased during the year. The total number reported was 2,446 of which 32 were fatal, as compared with 1,890 reported in 1933 with 23 fatalities.

In the accompanying table are given the number of employees by sex and age in industrial and mercantile establishments and office buildings, together with hours of work during 1933-1934.

NUMBER OF EMPLOYEES IN ONTARIO FACTORIES

Employees	1933	1934
Males over 16 years.....	195,523	183,232
Males 14 to 16 years.....	10	342
Females over 18 years.....	94,914	83,830
Females 14 to 18 years.....	803	1,018
Total.....	291,250	268,422
Children under 14 dismissed.....	2	1

HOURS OF LABOUR IN ONTARIO FACTORIES

	Number of Employees
Males—	
45 hours per week.....	99,935
50 hours per week.....	28,810
54 hours per week.....	16,414
58 hours per week.....	1,813
60 hours per week.....	16,857
Females—	
45 hours per week.....	54,095
50 hours per week.....	13,822
54 hours per week.....	4,856
58 hours per week.....	593
60 hours per week.....	33,730

There were also 27,497 employees, male and female, working approximately 50 hours per week.

*Apprenticeship Act.*—The Apprenticeship Board reported that the prolonged inactivity and lack of employment in the building trades have made it impossible to revive operations under the Apprenticeship Act, but conditions were reported as improving with "signs of renewed interest which should result in new developments during the coming year." Conditions vary throughout the province and it may be several years before the whole program of apprentice training can be put into operation in all sections, but it is expected that an increasing number of boys will be indentured in the larger centres and adequate provisions made for their training both on the job and in special school classes.

Some employers are continuing to indenture apprentices despite the fact that day classes have been discontinued and little is being done by way of special evening classes for apprentices even in large centres. The number of boys registered during the past year was 15 as compared with 27 for the previous year. The total number of registered apprentices on October 31, 1934, was 343, a decrease of 304 for the year. The number of completions (185) was practically the same as for 1933 but cancellations of contracts numbered 134 for the past year as compared with 13 for 1933.

The 647 active registrations in effect at the end of the year were distributed by trades as follows: bricklaying, 43; masonry, 3; carpentry, 28; painting and decorating, 12; plastering, 12; plumbing, 120; steamfitting, 34; sheet metal work, 34; and electrical work, 57.

*Boiler Inspection.*—The annual report of the Boiler Inspection Branch shows a decided increase in all phases of the work, particularly in connection with infired pressure vessels, of which 214 more than last year were fabricated and inspected during construction in the shops of the various manufacturers.

Inspections in 1934 of second-hand boilers and other pressure vessels exceeded those of last year by 199. There were 289 designs submitted and approved, an increase of 38 over last year.

Throughout the province more boilers and other pressure vessels were sold or exchanged, and the additional vessels installed in existing plants were greater in number. Some plants re-opened after a period of inactivity, and their pressure vessels were again inspected with a view to safe operation. In some instances new pressure vessels were installed, all of which clearly indicates an upward trend in industry. The total amount of moneys transmitted

through this branch to the Treasurer of Ontario, for the year ended October 31, 1934, was \$14,636.80 or \$2,416.81 more than in 1933.

*Operating Engineers.*—The Board of Examiners of Operating Engineers reported an increase in the amount of revenue received from fees, certificates, etc. Last year the net revenue amounted to \$23,177.06, while this year the amount was \$24,522.60, an increase of \$1,345.51.

*Industrial Disputes.*—During the fiscal year 1934, 94 industrial disputes were reported in Ontario, involving 18,198 persons and causing a time-loss of 256,311 working days.

Compared with the years during the period 1921-1934, there were in 1934 more strikes and more persons were involved in the strikes than in any other year in the period. The time-loss due to these strikes was greater than in any year since 1922.

## MINIMUM WAGES IN ONTARIO IN 1934

### Annual Report of Minimum Wage Board

**F**EATURING the administration of the Ontario Minimum Wage Act in 1934 was a more intensive effort to enforce orders and regulations in all parts of the province. The annual report of the Board reflects not only the results of this effort but indicates the nature of several important amendments to the Act. Briefly, these amendments provide for the limitation of the number of hours per week for which the minimum wage shall be paid; part-time and overtime employment; prohibiting the replacement of women by men receiving less than the prescribed rates; safeguarding employees from being dismissed because of making complaint to the Board; and increased penalties.

The report emphasizes that the fixing of maximum hours for which the minimum wage must be paid does not in any way affect the period for which female workers may be employed, but it does prevent employers from working girls and women for longer periods than those prescribed without paying more than the minimum weekly wage.

During the period November 1, 1933, to October 1, 1934, there were 64 court prosecutions which were dealt with as follows: 7 cases dismissed; 30 cases withdrawn—arrears paid before date of trial; 24 cases completed—fines paid \$1,075.00; 1 case judgment reserved; 1 case warrant issued for arrest; 1 case remanded.

Complaints were received during the year from 790 persons, most of whom were the employees concerned. As a result of prosecution, investigations and complaints during the year, the Board collected arrears of wages from 664 employers for 1,601 girls and women, amounting to \$51,932.88.

Wage sheets were obtained from 6,035 employers throughout the province, showing the time worked and actual wages paid to 77,648 female employees during a specified four weeks period.

In commenting on these returns, the report states:—

“Ordinarily these returns are submitted once each year covering a period when the plant is fairly busy, but it sometimes occurs that the returns are obtained during a slack period in one year and at an exceptionally busy period the following year, so that the figures showing the number of employees and wages paid do not represent average conditions throughout the year, but are merely samples taken for the purpose of determining whether the Minimum Wage Regulations are being complied with. Wherever these wage returns reveal underpayments, or whether there is reason to believe that the returns are inaccurate or incomplete, additional returns are required and, if necessary, the books and payrolls are audited by a representative of the Board. These returns for the past year revealed underpayments in 771 firms affecting approximately 1,000 employees, whose wages were adjusted as a result of the Board's activity. It is impossible to estimate the amount of the increases in wages resulting from such action, but it is known that, in addition to the firms referred to above, there were many others who voluntarily made adjustments before submitting returns to the Board.”

The number of permits granted to employers, authorizing them to pay certain employees less than the prescribed minimum rates, was reduced from 159 at the beginning of the year to 66 on October 31, 1934. The Board explains that a few of these permits were issued to meet temporary conditions in an establishment but practically all of those now in effect cover individuals who, because of physical or mental disabilities, are unable to earn the established minimum wages.

The increasing volume of work during the past few years necessitated increases in staff which had been taken care of by co-operation between the Board and the inspection services of the Department of Labour, but, at the

close of the past year, arrangements were made to transfer four men and five clerical workers to the staff of the Board, and during the year two members were added from without the Public Service.

The sudden growth in the work of the Board is attributed directly to economic depression. "During the past three years employers have adopted the practice of reducing wage rates and actual hours of employment

\*Total employees only.

until, in many instances, the minimum rates fixed by the Board have become the prevailing rates and the short time worked has resulted in weekly earnings below the amount necessary to maintain a decent standard of living. Consequently, the Board has been faced with the necessity of either enforcing the Act more vigorously or permitting an ever increasing number of violations, which in a short time would render this protective legislation useless insofar as the workers are concerned, and a source of annoyance and unfair competition to the honest and conscientious employers. Backed by the Government, the Board has chosen the first alternative and is making a sincere effort to maintain the minimum wages for all female employees despite the increasing tendency to regard the minimum fixed by law as a fair rate of wages."

The Board considers that there is a general lack of information regarding the minimum

wage rates fixed by orders, while the fact that over forty orders have been issued during the past fourteen years "leads to confusion." This multiplicity of orders is due to the practice of calling conferences in each industry or class of employment before orders are issued and endeavouring to meet the peculiar needs of each industry. In effect, however, the minimum rates for experienced adults are fairly uniform throughout the province, being based on the cost of living, which varies according to the population of the municipality or place of residence.

In the accompanying table are summarized the chief data with respect to the various industries covered by the Act. As previously explained, these statistics were secured in various months and do not represent average conditions throughout the year. However, the prescribed minimum for experienced workers is indicated.

## MINIMUM WAGES IN QUEBEC

### New Orders Governing Textile Trades and Hairdressing Establishments

The Minimum Wage Board of Quebec has recently issued the following new orders:

#### Textile Trades

ORDER No. 5.—*Governing female employees and males when replacing females in any class of employment in the textile trades which include weaving, knitting, spinning, and allied processes.*

1. *Minimum.*—No wage shall be less than is set forth in the following table:—

*City and Island of Montreal and a radius of 10 miles around and beyond the Island—*

10 per cent of the employees, at not less than 14.5c. per hour.

25 per cent of the employees, at not less than 19c. per hour.

65 per cent of the employees, at not less than 25c. per hour.

*Province of Quebec, with the exception of the City and Island of Montreal and a radius of 10 miles around and beyond the Island—*

10 per cent of the employees, at not less than 12.5c. per hour.

25 per cent of the employees, at not less than 17c. per hour.

65 per cent of the employees, at not less than 21c. per hour.

The worker's salary shall be paid to her wholly in cash; no deduction being permitted for any cause or purpose whatsoever. This salary shall be given to her in a sealed envelope on which shall be written: her name, her register number, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour, the amount of money included in the envelope; same must be initialled by the person who paid the employee.

2. All employees, whether timeworkers, pieceworkers, or those paid according to a bonus system or any other basis, are subject to the above specified minimum wages.

3. *Deduction for absence.*—No deduction below the minimum wage line for absence shall exceed the value of the time lost.

4. *Waiting Time.*—Any employee required to wait on the premises shall be paid for the time thus spent.

5. *Exemption.*—The Board may grant permits of variation or suspension of any of these regulations to meet exceptional conditions.

6. *Discharge of employees.*—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act. All complaints are treated strictly confidential.

7. *Penalties.*—Any violation of this Order is punishable by fine or imprisonment.

8. *Posting.*—Each establishment shall keep a copy of this Order posted in a conspicuous place in the workshop.

9. This Order shall come into force and be effective on August 1, 1935, and is replacing Orders 5 and 6 which were in force and effective since September 1, 1928, which said Orders shall thereupon be rescinded.

#### Hairdressing Establishments

ORDER No. 19.—*Governing female employees and males when replacing females in hairdressing or manicuring establishments, beauty parlours, and similar occupations.*

1. *Minimum.*—No wage shall be less per week than is set forth in the following table:—

*City and Island of Montreal—  
Apprentices:*

Beginners, not less than.....	\$ 7 00
After 6 months' experience..	8 00
After 12 months' experience..	10 00
After 18 months' experience..	11 00

*Experienced workers:*

After 24 months' experience, an employee shall be considered an experienced operator and shall be paid not less than \$12.50.

Quebec, Three Rivers, Sherbrooke, Hull, and cities over 25,000 population.

*Apprentices:*

Beginners, not less than.....	\$ 6 00
After 6 months' experience..	7 00
After 12 months' experience..	8 00
After 18 months' experience..	9 00

*Experienced workers:*

After 24 months' experience, an employee shall be considered an experienced operator and shall be paid not less than \$10.

The worker's salary shall be paid to her wholly in cash; no deduction being permitted for any cause or purpose whatsoever. This salary shall be given to her in a sealed envelope on which shall be written: her name, the date of the week or of the fortnight she has worked, the number of hours she has performed, the rate per hour and the amount of money enclosed in the envelope.

2. *Hours of Work.*—The work period for which these minimum wages shall be paid, shall be 48 hours per week.

(a) Work in excess of the above work-period shall be counted as overtime and shall be paid for at not less than the minimum wages fixed by this Order.

(b) Work for less than the above work-period may be counted as short time and be paid for *pro rata* of the minimum wages fixed by this Order.

3. *Maximum of Apprentices.*—The number of apprentices in an establishment shall not exceed 25 per cent of the total number of female employees. However in establishments employing less than 4 employees, one apprentice shall be tolerated.

4. All employees, whether time workers, piece workers, or those paid on a bonus system, or any other basis, are subject to the above specified minimum wages.

5. *Waiting Time.*—Any employee required to wait on the premises shall be paid for the time thus spent.

6. *Exemption.*—The Board may grant permits of variation or suspension of any of these regulations to meet exceptional conditions.

7. *Discharge of Employees.*—No employer shall discharge or threaten to discharge or in any way discriminate against any employee, because such employee has lodged a complaint with the Board or has testified or is about to testify in any investigation or proceedings permitted or prescribed by or taken under the provisions of this Act. All complaints are treated strictly confidential.

8. *Uniforms.*—If a special uniform is required it shall be furnished and laundered by the employer without cost to the employee.

9. *Penalties.*—Any violation of this Order is punishable by fine or imprisonment.

10. *Posting.*—Each establishment shall keep a copy of this Order posted in a conspicuous place where the employees have access.

11. This Order shall come into force and be effective on August 1, 1935. It shall be subject to revision in conformity with Section 8 of this Act.

### Hours of Work, Quebec

The Quebec Official Gazette of May 18, contains a recommendation from the Minister of Labour that the Order in Council (422) of February 8, 1935, for the carrying out of the provisions of the Act Limiting the Hours of Labour be modified by the addition of the following Article 3-A:—

"3-A.—A workman (operarius) of either sex, exercising the art or trade of ladies' hairdresser, whether or not he or she employs other persons, is subject to the provisions of the present Orders in Council, if he or she personally work in a public or private parlour.

Any person hiring the services of such a workman, contrary to the provisions of the present Order in Council, is liable to the penalties set forth in article 7 of the said Act."

### Weekly Rest Day, Quebec

The Minister of Labour of Quebec has recommended according to notice in the Quebec Official Gazette of May 18, that the regulations of the Act providing for one day of rest per week (LABOUR GAZETTE, February, 1935, page 150) be amended by the following additions:

1. The following paragraph is added immediately after article 2:

"1. Within the limits of the Quebec Division, as determined by the Order in Council No. 1036 of June 17, 1921, it shall be permissible for the inspector of industrial and commercial establishments to grant to a proprietor or lessee of a hotel; the permission to replace the day of rest of 24 consecutive hours per week, by two periods of rest, in the same week, of 18 consecutive hours; such permit shall be posted up in the establishment."

2. The following paragraph is added immediately after article 9:—

"The clubs mentioned in article 1 of the present regulations and in the present article does not include clubs where only members are admitted and which are, for the purposes hereof, considered as private establishments. The inspector of industrial and commercial establishments shall himself decide, after inquiry, whether or not a club is a private or public establishment."

### Workmen's Compensation, Quebec

By the repeal of Regulation No. 9, of the Quebec Workmen's Compensation Commission (LABOUR GAZETTE, May, 1933, page 519) workmen engaged on relief works regain their right to indemnity under the Act.

According to a recent press despatch, Tip Top Tailors Limited, have announced a plan of unemployment insurance for their employees. The plan becomes effective on July 1, and is non-contributory, the company bearing the whole expense.

## BRITISH COLUMBIA BOARD OF INDUSTRIAL RELATIONS

THE Board of Industrial Relations of British Columbia — administering the Hours of Work Act, the Female Minimum Wage Act, and the Male Minimum Wage Act—has recently issued the following order.

### Male Minimum Wage Act

ORDER (No. 20) *establishing a Minimum Wage in the Shipbuilding Industry.*

Pursuant to the provisions of the "Male Minimum Wage Act," being chapter 47 of the Statutes of British Columbia, 1934, and the "Male Minimum Wage Act Amendment Act, 1935," the Board of Industrial Relations hereby *Orders*:

1. That where used in this Order the expression "Shipbuilding industry" includes all operations in the construction, reconstruction, alteration, repair, demolition, painting and cleaning of hulls, putting on or taking off the ways, or dry-docking, of any ship, boat, barge, or scow.

2. That the minimum wage for every employee and every male person under the age of twenty-one (21) years, employed in the shipbuilding industry as a ship-carpenter, shipwright, joiner, boat-builder, or wood-caulker,

shall be the sum of sixty-seven and one-half cents (67½c.) per hour.

3. That the minimum wage for every employee and every male person under the age of twenty-one (21) years, employed in the shipbuilding industry, exclusive of those mentioned in paragraphs 2 and 4 hereof, shall be the sum of fifty cents (50c.) per hour.

4. That, until further Ordered, it shall be permissible for an employer to employ a percentage of male persons under the age of twenty-one (21) years in the shipbuilding industry at a rate less than that fixed in paragraphs 2 and 3 hereof, but in no case shall the rate so paid be less than twenty-five cents (25c.) per hour, nor shall the percentage of male persons under the age of twenty-one (21) years paid at such rate (inclusive of employees and male persons under the age of twenty-one years in respect of whom a permit has been obtained under section 6 of the said Act) be in excess of ten per centum (10%) of the total number of employees and male persons under the age of twenty-one (21) years in the said employer's plant.

5. This Order shall become effective on the 14th day of June, 1935.

### Educational Refunds in Industry

"Educational Refunds in Industry" is the title of a brochure recently published by the Industrial Relations Section of Princeton University. Pointing out that a time of frequent and rapid change emphasizes the need for employee training, the report states that educational opportunities are an essential part of a sound promotional policy. In many cases training is given entirely by members of the staff or in a school supported by the company. Some companies with well-developed training programs feel that it is better policy not to duplicate outside educational facilities. Their courses are, therefore, limited to subjects peculiar to their own operations and hence not available elsewhere. Employees of these companies, as well as of those which offer no training, find much to help them in the schools of the cities in which they live. Public and business schools, colleges and universities frequently give courses useful either as direct preparation or as general background. Some outside courses are free, notably those in general public and vocational schools. Most colleges and private schools, however, charge a tuition which, with the books and necessary equipment, represent

a considerable outlay for the average employee. Where such courses are distinctly valuable to employees in their work, a few companies have developed plans for refunding all or a part of the tuition.

Such educational refund plans are comparatively infrequent. Of seventy-one large concerns interested in education from which the Industrial Relations Section requested information on current experience, eighteen reported plans in effect at present, seven reported plans which have been discontinued, and thirty-one, that they had never had a plan.

The April issue of the *Monthly Labour Review* (United States Department of Labour) contains a survey of dismissal compensation in foreign countries. According to this survey laws requiring notice of dismissal or the payment of dismissal compensation to employees have been enacted in 40 countries. In general, salaried employees have been better protected than manual workers. The payments have ranged from small sums in lieu of notice to comparatively large amounts of compensation. Important factors in the increased demands for and the adoption of dismissal compensation plans have been the increase in and the fear of technological unemployment.

## ALL-CANADIAN CONGRESS OF LABOUR

### Summary of Proceedings of the Fifth Convention

THE all-Canadian Congress of Labour held its fifth convention in Montreal, on May 7, 1935, with approximately 100 delegates present representing the following organizations: Amalgamated Building Workers of Canada; Electrical Communication Workers of Canada; Canadian Electrical Trades Union; Canadian Association of Stationary Engineers; Canadian Printers' Union; Canadian Brotherhood of Railway Employees; Canadian Association of Railwaymen; One Big Union; National Union of Operating Engineers; National Musicians Union of Canada and other unions.

Presiding at the opening ceremonies, Mr. Joe Wall, Secretary of Montreal National Labour Council, in his welcome to the delegates pointed out that the first organization meeting of the Congress was held in Montreal.

In opening his address, President A. R. Mosher, expressed his deep appreciation of the manner in which the affiliated organizations and directly chartered unions had co-operated in carrying out the purpose for which the Congress had been instituted. He informed the delegates that owing to the unprecedented tasks laid upon the officers of the Congress during recent years it had been difficult at times to give to the immediate problems of the individual union or to the more general problems of the Congress itself, the attention which they demanded. Notwithstanding this, the president stated that "there was a wide recognition of the value of the new basis of association which the Congress afforded, and a willingness to support its policies and program of action." He considered that the most difficult task which confronted the Congress after its institution, was to re-establish the confidence of the workers in their ability to direct their own affairs. "In helping to mould public opinion and develop national self-reliance, the Congress had performed a great service to the people of Canada," declared the president, adding that the Congress "has fought in defence of national autonomy, and insisted that the people of Canada, even though they were small in numbers as compared with the population of the United States, had their own vital and essential contribution to make to the world."

Continuing, the president referred to the influence exerted by the Congress on public opinion for economic and social reform, and to the legislation that had been already enacted in this direction. The more widespread representation of the Labour movement on

boards and councils was commented upon, as were also the recommendations of the Royal Commission on Price Spreads and Mass Buying, more particularly those which called for the consultation and co-operation of labour unions. Attention was drawn to the fact that the Congress was asked to nominate an adviser to the government delegation at the eighteenth session of the International Labour Organization, held at Geneva, in June, 1934, and it was expected that the Congress would be represented again this year. He stated that the immediate objective of the Congress was to secure complete independence of the Canadian Labour movement and to organize the workers of Canada in industrial unions covering every Canadian industry, while the ultimate objective is the transformation of the economic system into one based on service instead of profit—one in which production and consumption will be closely correlated, and work, pleasure, and product will be equitably shared among the workers.

In closing President Mosher stated that "the workers must always be ready to protect their rights on the job, under whatever system of production may be evolved. They must also be strongly organized in order to ensure representation on works councils or other agencies by which policy is determined, and they must be organized in order to exert their political power and take their full share of responsibility for the government of the country."

In the absence of Hon. W. A. Gordon, Minister of Labour, and Mr. W. M. Dickson, Deputy Minister of Labour, Mr. E. McG. Quirk, eastern representative of the Department of Labour, addressed the delegates. A letter from Hon. W. A. Gordon, Minister of Labour, regretting his inability to attend the convention owing to a previous engagement was read by the secretary.

Hon. Peter Heenan, Minister of Lands and Forests in the Ontario Cabinet, also forwarded a letter regretting his inability to be present.

The financial statement covering the period since the last convention, indicated total receipts amounting to \$35,269.94, expenditures totalling \$35,169.66.

### Executive Board Report

In the Executive Board's report reference was made to the combining of the Canadian unions of building workers in the Amalgamated Building Workers of Canada, the final step in this merger taking place on July 1, 1933. Satisfaction was expressed at the steady growth

of membership among some of the smaller occupational groups of workers such as the musicians and cinema projectionists. Attention was drawn to the fact that the All-Canadian Congress of Labour does not directly undertake the organizing of new unions or the extension of existing unions, as it was felt that the central body could best serve the interests of all unions by facilitating their organizing efforts rather than by supplementing them. With the co-operation of all its members and units the success of the National labour movement was confidently predicted. In the report mention was made of the postponement of the fifth convention, the executive believing that owing to so many of the members of local unions being unemployed they would not be able to defray the expense of sending delegates but it was pointed out that as a substitute for the regular convention, the executive board called conferences of the affiliated and chartered unions, which were attended by union officers and other delegates. From consultations at these conferences it was possible to make legislative representations which embodied the considered opinion of the movement as a whole.

It was pointed out that the Congress in its representations to the Federal Parliament had stressed the vital importance of measures to ensure the freedom of the workers to organize in the manner of their own choosing and to have the legal right to bargain collectively with employers. Satisfaction was expressed that the Commission on Price Spreads in its report emphasized the need of change in this respect as the basis of all plans for social security, and it was hoped that the commission's recommendation would be implemented in legislation, at least to cover so far as all public utilities were concerned.

The Board was also gratified by the strict impartiality with which the provisions of the immigration law are being enforced, and the board was glad to acknowledge the diligence of the Federal Department of Labour in their effort to prevent discrimination against groups of workers on public building projects.

The attention of the delegates was drawn to the desirability of amendments to the Railway Act and the Industrial Disputes Investigation Act.

In referring to the organization of a Labour political party, the report reiterated its declaration of six years ago, namely, "it has become increasingly apparent that political power must grow out of the economic organization of the workers and must indeed grow in proportion to the growth of unionism."

In reporting on the "outlook" the report drew attention to the danger of tactics de-

signed to effect changes by direct action or by continual strife as it might provide a pretext for repression and further intimated there was abundant evidence that powerful groups are ready in Canada to seize upon an emergent situation for the institution of a tyrannical form of government under which the workers would be deprived of even such liberty of expression and action as they now enjoy.

The objective of unionism was given as "the provision of a standard of living commensurate with the resources of a developed country for every person willing to perform socially necessary work," and suggested that "for the attainment of the first practical stage towards that objective—the supply and distribution of ample food, clothing and shelter—there is no need of adherence to any fine-spun theory of government or social organization." It was pointed out that dictatorship of the proletariat is not the goal.

In its recommendations of policy the executive urged that "wherever practicable the workers' organizations should be designed to embrace all engaged in the production of a particular commodity or the provision of a particular service, and it should be free from any influence or control by the employer." The hope was expressed that "the laws to facilitate and extend collective agreements in Quebec and Ontario will lessen the workers' handicap."

Endorsement was given to the recommendation of the Price Spreads Commission for the regulation of hours and wages by the same authorities, and the Executive believed that the most satisfactory means of regulation is a National Hours and Wages Board.

The executive took the stand that workers who had no jobs should not be forced to await the effect of remedial legislation but should receive a cash allowance from the Dominion treasury sufficient for the maintenance of themselves and their dependents in decency and comfort.

Other recommendations of the executive were:—The taking over of the basic industries by the state, as an emergency measure of national self-preservation, and their operation as public utilities.

Advocacy of the gradual acquisition of all land values by taxation, the revenue so derived being applied first for the provision of housing for the workers.

National ownership and control of radio broadcasting services.

Support of measures designed to maintain the collective peace system of which the League of Nations is the chief instrument.

Opposition to amalgamation of the railway systems of Canada, unless such amalgamation provides for the retention in the service of all the present employees and for the re-absorption of those who have been laid off during the period of depression.

Regret was expressed that the amendments to the Canada Shipping Act which were adopted in 1933 and 1934, in so far as they relate to the working conditions of seafarers and longshoremen, have not yet been put into effect.

A request from the Workers' Unity League that a representative from that organization be granted the privilege of extending fraternal greetings from the floor of the convention was refused by a vote of the delegates.

### Committee on Officers' Reports

This committee, to whom was referred the President's address and the Executive Board's report, recommended concurrence in the address as a whole and was adopted by the convention.

With reference to that section of the board's report on the organizing of new unions and the extension of existing unions the committee urged that as soon as the Congress was in a position to do so organizers be selected to organize new unions on an industrial basis, and endeavour to secure affiliation of unions which are not at present associated with the Congress. This was adopted.

That the Congress endeavour to secure a wider circulation of the *Canadian Unionist* among affiliated organizations was another adopted recommendation.

In the section of the board's report setting out the executives' opposition to amalgamation of the two railway systems and their related services, an addition was made to the effect that the secretary of the Congress make a request of the political groups in the next Dominion elections to place themselves on record as to their position on the question of amalgamation of the two railway systems and subsidiary companies. This was also adopted by the convention.

The convention did not concur in an executive recommendation to increase the licence fee of radio receiving sets.

With these amendments and a slight change in the phraseology of one other section, the report of the executive board as a whole was concurred in by the convention.

The convention approved of a recommendation of the committee on constitution and law that the time and place of the annual meeting of the All-Canadian Congress of Labour shall be decided by the executive board. A resolution calling for the appointment of a full time president was non-con-

curred in by the committee, and its recommendation adopted by the convention.

### Adopted Resolutions

Among the recommendations contained in resolutions adopted were:

Closer co-operation with the Federation of Catholic Workers of Canada.

Opposition to the levying of a special tax by cities and towns upon workers employed in these localities but residing outside.

Appointment by the Dominion Government in consultation with the All-Canadian Congress of Labour, of the workers representative on the Employment and Social Insurance Commission.

Extension of the Employment and Social Insurance Act to embrace all gainfully employed persons.

The calling of a convention of Canadian unions in Alberta to make representations to the Provincial Government, such representations to receive the approval of the executive of the Congress before presentation made.

Drawing the attention of the Federal Government to the conditions prevailing in the food and beverage dispensing industry, and asking that remedial legislation be introduced.

Strict enforcement by the Board of Railway Commissioners for Canada of Section 295 of the Railway Act.

Opposition to any form of railway amalgamation, unification, or co-operation.

The granting of federal conciliation boards to municipal workers regardless of any objection made by the municipal council concerned.

The pledging of the full support to the railway workers in their effort to secure restoration of basic wage rates.

Favouring legislation to guarantee to the workers the right to belong to the organizations of their choice and making interference by the employers with the exercise of that right a criminal offence.

Extension of the Old Age Pensions Act to provinces where it is not in operation.

An extensive building and public works program be undertaken by the Federal Government with the fair wage clause inserted in all contracts.

Removal of relief camps from military control.

Pensions for the blind.

Prevention of actors and troupes from the United States coming into Canada unless they are prepared to give equal recognition to Canadian unions with international unions.

Opposition to railway shops giving work to other than Canadian workers.

That the Congress place no restriction on affiliated organizations co-operating with other labour bodies where such was possible.

The convention approved of a recommendation that the secretary-treasurer express to Hon. W. A. Gordon, Minister of Labour, the regret of the delegates at his inability and that of his deputy of attending a session of the convention; and also conveying the thanks and appreciation of the convention to the Minister for the presence at the meeting of two representatives of the Department of Labour.

### Election of Officers

The election of officers for the ensuing year resulted as follows: President, A. R. Mosher, Ottawa, Ont.; vice-presidents, Z. David, Montreal, Que., and J. McKinley, Vancouver, B.C.; secretary-treasurer, W. T. Burford, 230 Laurier Ave. W., Ottawa, Ont. Executive board members: G. W. McCollum, Toronto, Ont.; M. M. McLean, Ottawa, Ont.; A. Meikle, Winnipeg, Man.

## WELFARE WORK IN MONTREAL IN 1934

### Report of the Montreal Council of Social Agencies

THE thirteenth annual year book of the Montreal Council of Social Agencies reviews welfare and relief work in Montreal during 1934 as carried on by thirty-four agencies, each dealing with some phase of the social and economic problem.

Referring to the unemployment situation in Montreal the report states that "the entry of Government into the field of relief has apparently created in the minds of some, the impression that all social service work is now being paid for by tax money. It has been one of the difficult tasks of the Federation to explain to the public that Government relief is applicable only to employable people and covers only food, fuel, clothing and shelter. Those who are too old to work, dependent children, widows with large families, individuals who are unable to work through sickness and many others, are all excluded from Government relief. Federated Charities assisted these people before the Government entered the field, and must continue to do so now, for there is no other organization to which to direct them."

"The year 1934," according to the report, "was one of increasing difficulties. While unemployment was somewhat less, the aftermath of depleted resources put a heavy load on a number of agencies, particularly on the Family Welfare Association. This, together, with decreasing revenues of the agencies through reduced grants, decreased interest returns, and virtual cessation of contributory payments further increased the demands on Federation."

The Federation's financial campaign of 1934 resulted in a total subscription from all sources of \$700,042, being 97 per cent of the objective of \$725,000.

The report of the Special Committee on Unemployment indicates that "the transfer of the administration of unemployment relief from the private charitable organizations to the Unemployment Relief Commission, which occurred in December, 1933, has relieved the private agencies of a great deal of responsibility. The new system of cash relief which replaced the 'voucher' system, appears to have operated satisfactorily, except in the first in-

stance, when sufficient money was not available to pay rents. As a result, a number of families suffered eviction. The unusual severity of the winter also rendered the fuel allowance unsatisfactory and undoubtedly many families suffered severely on this account. It is to be noted, however, that with the passage of time the points of dissatisfaction, which are perhaps inevitably associated with a re-organization of such a large program as that of present-day unemployment relief, have decreased. The principal lacks at present are a more adequate system of clothing distribution and medical care."

Reports from each agency are presented in the volume, each giving details of its own particular sphere of activity. A general idea of the scope of the organization is indicated in the following four main divisions and the agencies listed under each:—

Division of Children.—Boy's Home; Children's Bureau; Day Nursery; Ladies' Benevolent Society; Protestant Infants' Home; Protestant Orphans' Home; Women's Directory.

Division of Dependency and Delinquency.—Emergency Unemployment Relief Committee; Family Welfare Association; Protestant Employment Bureau; Girls' Cottage Industrial School; Montreal Boys' Association; Prisoners' Aid and Welfare Association; Protestant Bureau for Homeless Men; Protestant Industrial Rooms; Sheltering Home; Society for the Protection of Women and Children.

Division of Education and Recreation.—Big Sister Association; Daily Vacation Schools; Griffintown Club; Iverley Settlement; Negro Community Centre; Parks and Playgrounds Association; University Settlement; Young Women's Christian Association.

Division of Health.—Brehmer Rest Preventorium; Canadian National Institute for the Blind (Quebec Div.); Child Welfare Association; Montreal Diet Dispensary; Mental Hygiene Institute; Montreal Industrial Institute; Murray Bay Convalescent Home; Victorian Order of Nurses; Westmount Social Service Association.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

## Annual Report of the Director

IN a comprehensive world survey, Mr. H. B. Butler, Director of the International Labour Office, analyzes social and economic conditions, and finds that "the fifth year of the depression has now run out without bringing the hope of general recovery to fruition." He considered, however, that "on the whole it is clear that 1934 marked a distinct advance over 1933." This observation was based on the fact that "in most countries unemployment continued to diminish, production continued to increase, exchanges remained more stable. In the countries which made some progress in the previous year, a further advance was registered during the last twelve months, and in some of them the belief became current that the depression was already passing into history. No country saw a social or economic cataclysm such as those which, produced the German revolution and the American crisis in 1933. It may fairly be said then that the world's economic life has been running in smoother and deeper channels, but it is still far from having returned to the broad, even flow of real prosperity."

However, hopes of a general return to normal were not realized, and according to the Director, recovery is "still superficial rather than fundamental." Pointing out that international trade is very little, if any, better than in 1933; that "immense reserves of the capital still remain stagnant and sterile"; that exchanges, though steadier, are still inherently unstable; and that the "springs of international lending are still dried up,"—he considers that all these symptoms indicate little assurance as to the solidity and permanence of the gains so far registered. On the basis of these manifestations he states:

"While it is true that some countries have gained ground, others have lost it, and in most of the latter the nervous tension has notably increased. Though one or two nations may claim to have reduced their unemployment figure to normal, their position is still altogether exceptional. There is still widespread distress and frustration of hope. The world as a whole is still groping its way painfully and fearfully. It has not acquired confidence in the new economic system which is slowly emerging."

Continuing, the Director declared: Nearly all the progress so far accomplished "has been the result of national effort, and its effects have been mainly confined to the national field. But it has so far done little to restore the flow of international trade and international financing without which the world cannot finally recover complete or lasting

prosperity. Indeed, in the summer months of last year there were some indications that the upward movement was flagging, which may mean that the limits of national effort are being reached and that further progress can only be attained by setting the international machine once more in smooth and harmonious operation."

From the social point of view, he finds that the past year has confirmed some of the tendencies which had been gradually gaining strength since the depression, and by so doing "has demonstrated the radical change which is coming over social thinking." Among these tendencies which were being incorporated into social policy and becoming generally recognized as necessitous was that of "planning" which he defines as the "deliberate interference by government with the economic structure and the course of economic events in order to achieve social objectives."

Explaining this transformation in the regulation of national affairs, he states:

"The fatalistic faith in the benevolent operation of economic law was everywhere giving way to the demand for systematic collective action. In response to the vehement insistence of public opinion, one country after another had abandoned the *laissez-faire* outlook in an endeavour to arrest the inroads of depression, which by destroying its standards of life was undermining its social stability. Hence the initiation of controlled monetary policies, of ambitious schemes of public works, of new industrial structures of which the State was the architect and often the builder, of State-controlled and directed agricultural production and marketing, of managed international trade, of wholesale relief of unemployment at the expense of the community."

This new attitude he found "abundantly evident" in Germany, Italy, Japan, Sweden, United States, Union of Soviet Socialist Republics; and gaining a hold in Argentine, Australia and Great Britain. "It meant a definite break with the practices and the philosophies of the past. It implied that the crisis had brought the world to a turning-point from which there was no retreat. It had shown that there was a stage beyond which modern civilized communities would not brook the destruction of the economic and social security to which they had become accustomed. They had come to regard the standards already attained as the minimum requirements of decent living, not as an occasional boon to be enjoyed in good times but to be sacrificed without a murmur when depression sets in. In other words, the old self-regulating economy

was no longer likely to be tolerated unless it guaranteed the maintenance of social well-being. When it failed to do so, it became the business of Government to intervene in the general interest of society, and particularly in that of those agricultural and industrial groups which were most exposed to the ravages of the slump.

"The events of the last twelve months may be said to have set the seal upon this transformation of attitude. Instead of receding as signs of recovery have appeared, the demand for collective action and organization has, on the contrary, been reinforced. The very security of the State is now seen to depend not only upon the inviolability of its frontiers, but upon its ability to provide an orderly and sufficient existence to all classes of its citizens...

"In former times the resistance of the social fabric to economic strain was almost indefinite, because unemployment, privation and distress were looked upon as visitations of some blind providence from which there was no escape. Nowadays the breaking-point of passive endurance is far more quickly reached, because certain standards of health, comfort and well-being are considered as inherent rights which the community not only should but must guarantee by organized collective effort."

The Director asserts that this demand for government action "has been re-enforced by the patent fact that the present scarcity is not due to any failure of nature but failure to make the products of nature available to those who need them. . . . This paradox has sunk deep into the popular consciousness and has probably done more than anything else to destroy popular faith in the economic system. . . . It therefore now seems reasonable to expect Governments to devote the same energy, ingenuity and attention to the provision of the elementary needs of feeding, clothing and shelter on a civilized scale as to the provision of air communications, wireless services and elaborate systems of national defence."

He regards "the revelation of this profound psychological change as being perhaps the outstanding lesson of the present depression;" and that "it has been brought home to every government of every civilized country, whether conservative or radical, democratic or dictatorial in its complexion."

Drawing attention to the social effects and complications of the "new type of economic structure" now emerging, and to the practical problems involved in social planning, Mr. Butler deals directly with the new economic orientation. In a chapter on "Recovery and Employment," he shows how in the beginning the first interest was to alleviate distress by

relief either in cash or in kind, but that it is now realized that though relief wards off actual starvation, it "does not prevent the progressive undernourishment and demoralization of individuals and families in cases where unemployment is of long duration. It is also being realized," he added, "that it affords no solution at all in the case of the young, whose aptitude for work and whose whole moral fibre may be permanently weakened if they are unable to learn a job and turn their energies to some active and productive purpose in the formative period of their lives."

As a result, "insistence on the necessity of the State adopting energetic measures to create work, either indirectly by stimulating the revival of industry or directly by initiating work-giving schemes of national development is manifestly gaining momentum."

In this respect, he quotes Canada's Prime Minister, denouncing the dole as "a condemnation, final and complete, of our economic system. If we cannot abolish the dole, we should abolish the system." Also President Roosevelt denouncing "relief as a narcotic, a subtle destroyer of the human spirit." Other authorities are also quoted indicating the direction in which thought is moving.

After reviewing financial policies adopted in various countries, the Director observes that the results of this survey indicate that the nations that have taken expansionist measures have managed to revive production and to reduce unemployment better than those which have put their faith in the automatic operation of economic forces. "Deliberate interference by the State in economic affairs has continued to increase rather than to diminish, and there seems to be some ground for thinking that its success is justifying and strengthening the popular belief that, by bold well-conceived steps planned on a sufficiently comprehensive scale, it is within the power of Governments to influence the course of recovery to a very considerable extent. There is less and less willingness to accept the thesis that all human agencies are impotent to control the fluctuations of economic fortune, and the fact that this sentiment is becoming widespread is in itself a psychological element in the general situation which cannot be ignored."

### Remedies for Unemployment

*Unemployment Insurance.*—The Director discusses remedies for unemployment in a chapter dealing with insurance and relief, public works, hours of work, organization of industry, etc. On the matter of unemployment insurance, he points out that expenditures in this direction have been maintained everywhere, and increased where the growth

of unemployment has required it; and that the "economic value of such expenditure is being more widely recognized. "No doubt," he adds, "the organization of systems of State assistance involves some degree of interference in the play of economic forces, but experience is proving that it not only constitutes a social necessity but also provides some economic benefit." As evidence of the acceptance of this view, he outlines recent developments in Great Britain (with the longest experience and where it is now proposed to include agricultural workers); in the United States with its proposal of a national scheme; in Canada; in South Africa; and in Sweden.

Closely connected with unemployment insurance measures were other forms of social insurance, especially those providing against sickness and old age. In the past two years he found that such systems experienced extraordinary difficulties due to a variety of causes. But in 1934, an improvement was noted, and in general such insurance funds are now in a much stronger condition. The Director then adds:

"The structural changes which are taking place in industry, the growth of mass production and rationalisation on the one side, and the prevailing unemployment on the other, would have rendered it desirable substantially to reduce the pensionable age, which remains fixed at sixty-five under most of the general schemes of pension insurance. But if the desirability of this reduction is generally admitted, objection is always raised on the ground of increasing longevity and the charges it entails. Even so, it is possible to discern a movement in the direction of lowering the pensionable age."

Dealing with measures taken to offset the effects of unemployment on the young, he considers that the principal remedy is to be found in prolonging education and in the postponement of the normal age of industrial employment until fifteen or sixteen as has been adopted in a number of countries, in most States of the United States, and in some of the Canadian provinces.

"The justification of this measure," he declares, "lies not only in the relief which it affords to a congested labour market, but much more in the need to ensure greater intellectual and bodily development under the prevailing conditions of urban civilisation. Much has been done in this direction by residential training centres and by courses of instruction and physical training organized for the young unemployed in a number of countries. But it cannot be claimed that the problem has anywhere been solved. No social problem is of more vital importance."

*Public Works.*—With reference to public works, he asserts that "the experience so far gained is insufficient to enable any final conclusions to be drawn. It certainly does not justify the claim that public works offer the sovereign and complete cure for unemployment; still less, however, does it warrant the assertion that public works have failed to furnish any aid to the solution of the problem. It is unfortunate that a sterile controversy still rages round the question, usually nurtured by the desire to prove or disprove the value of some economic doctrine or political attitude rather than by any judgment of the real facts."

From the experience so far gained, he emphasizes: (1) That public works cannot produce any substantial effect either in stimulating general economic activity or in reducing the volume of unemployment unless undertaken on a large scale; (2) that beneficial results only seem to accrue where public works are financed by loan rather than by taxation—"to increase taxation in times of depression is liable to hinder fresh enterprise and thus in the last resort tends only to displace men from private industry to employ them on public works. Where, however, money, for which there is no outlet in private investment, can be borrowed at cheap rates for schemes of national development, the volume and the velocity of monetary circulation is increased, and as a consequence the aggregate amount of employment tends to expand; (3) that public works are economically effective in combating depression only when accompanied by "an expansionist monetary policy." He also states that it is generally agreed that work should not be undertaken unless it is of real economic value... and that the amount of useful development work available varies with the extent to which a country is already equipped and developed.

*Hours of Work.*—With respect to hours of work, the Director says that the conviction is gaining ground that shorter hours may not only offer a means of spreading work in times of depression, but may also be the logical and necessary consequence of the enhanced productive power now at the service of industry. Another feature of hours reduction is "a marked tendency to attack the problem in industry by industry"—the method being followed along varying lines in the United States, in Italy, in France and in Great Britain. "The importance of the method," the Director notes, "lies in ensuring that the problems special to each industry receive full consideration, and that the regulations are drawn up with the co-operation of the organizations directly concerned."

*Organization of Industry.*—"The attempt being made in a whole series of countries

towards the organization of industry is one of the outstanding features of present-day economic development," observes the Director, who sees in it a search for a "half-way" house between complete freedom and complete regimentation. "What is sought," he states, "is some means of reconciling the merits of private enterprise with the need for some measure of discipline and organization." Hence, in country after country and industry after industry, efforts have been made to prevent "cut-throat" competition from bringing the producers to bankruptcy and forcing down labour conditions to impossible levels. Reviewing the varying experiments in different countries, the Director considers that they have already attained a degree of development "which suggests that in the future industry is likely to proceed towards closer integration rather than to return to its former state of uncontrolled and unregulated independence."

Though he does not anticipate any final solution except by a long process of trial and error, he does draw attention to one or two salient features.

The first is "the inevitability of some measure of State interference. In any competitive system it is rare that there should be sufficient unity among producers to ensure the observance of a common rule by voluntary agreement. Whether it is a question of regulating prices, of fixing wages and hours, of restricting production, of banning unfair practices or of eliminating inefficient units, a recalcitrant minority is almost always to be found that refuses to accept the dictates of the majority and to conform to their view of the general interest of the industry. It is for this reason that the intervention of Government is usually required sooner or later to secure the necessary degree of discipline and cohesion. Conversely, it has not infrequently happened that, where a voluntary association has really become sufficiently powerful to control a branch of production, it is tempted to exploit its monopoly to the detriment of the public, for whose protection the State is eventually obliged to step in."

In the broader field of international trade and organization, he considers that restriction of international production can at best only achieve a very relative and temporary success. In his opinion, experience suggests that the true problem to be tackled by international action is not how to restrict production but how to increase consumption. National planning, he states, has rendered the task more difficult. Neither does he see that bilateral trade agreements will make much impression on the stagnation of international trade except being helpful in some cases as a first attempt "to loosen the bonds by which commercial intercourse is now trammelled." He suggests

that more progress might be hoped for "from areas of freer trade formed by countries with similar economic and political instincts." But whatever the method, "it has to resolve the antimony between the need of all nations for foreign trade if their material civilization is to be maintained and developed, and the actual existence of national systems of economy aiming at regulating and controlling the internal level of production and consumption in the interests of steady employment and stable prices both for agriculture and industry."

*The I.L.O. in 1934:* In a chapter on the International Labour Organization in 1934, the Director reviews the expansion in membership due to the entry of the United States, the Union of Soviet Socialist Republics, Ecuador and Afghanistan. He traces the ratifications of the Conventions of the Organization, indicating progress.

Thirty States Members have now ratified 10 or more Conventions, 23 have ratified 15 or more Conventions and 10 have ratified more than 20 Conventions. Taking the 32 Conventions adopted up to 1932, the 27 European States Members of the Organization have now ratified over 51 per cent of the maximum possible number, and he considers it satisfactory that 31 per cent of the total ratifications now come from extra-European States, whereas five years ago the percentage was 14. "There are, however, still one or two grounds for disappointment. Although it cannot be contended that the situation in the European coal fields has substantially improved, no progress has been made towards ratifying the Hours of Work (Coal Mines) Convention. A further effort to secure simultaneous ratification was made in June of last year when a technical conference of six of the seven States primarily interested met to consider the situation. As a result the revision of the Convention in certain respects is on the agenda for this year's Conference and it may be hoped that it will lead to some progress being made. Similarly, it may be hoped that steps will soon be taken in some of the more advanced countries to put into operation the six Conventions adopted in 1933 relating to old-age, invalidity and survivors' insurance, particularly in those States where little or no modification of existing legislation is required."

In conclusion, the Director states: "The history of the Organization shows that it has already proved capable of continuous adaptation. It has come through the darkest period of reaction against the ideas of international fellowship which presided at its birth. There are signs that the ebb is slackening and the flood tide setting in. The objectives for which the Organization was created are steadily assuming greater prominence in the minds of

men. With the growing complexity of economic regulation it will be called upon to meet new demands and to shoulder heavier respon-

sibilities. Its past record is the best earnest of its capacity to rise to the opportunities of the future."

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF MAY, 1935

### Reports of the Superintendents of the Employment Service

THE employment situation at the end of May, 1935, was reported by the superintendents of the Employment Service of Canada to be as follows:—

There was little call for farm labour in the Maritime Provinces, although spring planting was in progress. Fishing was fair and logging quiet. Sawmills, however, were busy at Halifax, filling the demand for dressed lumber. Coal mines in the New Glasgow area operated from one to five days per week, while those in Cape Breton and vicinity, with the exception of one which was idle, worked from two to five days. Food manufacturers were busier, and pulp and paper mills and wood products were working full time, but cotton factories were quiet, and iron and steel plants, though slack at New Glasgow, reported no idleness at Sydney. Building construction consisted chiefly of the erection of small buildings and repairs. Road work with the Provincial Government was opening up, preference being given to men from the localities in which the work was being done. Transportation by rail, water and auto was busy. Trade was better, both wholesale and retail, and the demand for experienced domestics good.

Requests for farm labour in the Province of Quebec showed little change, Hull alone reporting a slight increase in orders. The call for river drivers was active, except at Rouyn, where a number of men were laid off, due to low water. Mining, also, was somewhat dull in this district. Manufacturing had not yet reached normal activity. Some improvement was noted in the paper and match factories at Hull, but no change of note in the lumber industry. At Montreal, rubber and textiles were quiet, with clothing and metal-lurgy busy, and shoe factories more active. Conditions at Quebec City, Sherbrooke and Chicoutimi were generally active, while a slight decrease was reported in cotton mills at Three Rivers. Repairs and alterations effected some improvement in building construction at Hull and Montreal, where more tradesmen were employed, and the demand for unskilled labour fair, while at Quebec and Three Rivers this group was slack. Conditions were satisfactory at Sherbrooke. Trade and transportation showed little change. Requests for women workers were many, particularly at Montreal, where there was a slight decrease in the number of applicants registered.

There existed a fairly good demand for farm labour in Ontario, particularly for fully experienced single men. River driving and pulpwood peeling afforded employment to a number of workers in the logging industry, and sawmills were busy. Men were also called out to assist in fighting bush fires near Pembroke. The rush on new prospects in the mining districts had fallen off considerably and outside of work sponsored by the larger producers, the situation in this line was not quite so good. The improvement noted since December in manufacturing seemed on the whole fairly well maintained. Fruit and vegetable canneries had taken on a few extra hands for seasonal employment, and iron and steel plants, auto accessory industries, also textile, rubber and tobacco companies were busy. Some slight curtailment of activity was reported by automobile manufacturers, particularly at Windsor, but fewer layoffs were reported, generally, in other lines. Better conditions existed in building construction, for although some skilled tradesmen were idle, more were working than at this time last year. Highway and airport construction, as relief work, took care of a number of the unemployed. Trade was fair. There was an increased call for experienced domestics in the Women's Division, with a shortage of this kind of help, for many applicants who were registered at the offices lacked the necessary qualifications and experience. Hotels and restaurants were also asking for summer help.

Seeding in the Prairie Provinces being about completed, fewer calls were received for farm help, but sheep ranchers were preparing for the shearing season which would commence shortly. In logging, several calls for cord wood cutters were listed, which were easily filled. Mining was quiet. Manufacturers at Winnipeg reported the volume of business for this season as comparing favourably with that of the corresponding period a year ago, but, elsewhere, manufacturing showed little change. Construction, other than road maintenance, was only fair, except at Winnipeg, where building permits issued at the end of May had reached a total of \$2,080,600 as compared with \$233,200 in May, 1934. Trade was better. Little change was noted in the Women's Division, with applicants still greatly in excess of vacancies, and country positions were difficult to fill as most of the experienced help sought city employment.

A decline in orders for farm help was shown in British Columbia, as most of the field work was finished until haying time. Fruit crops were progressing satisfactorily, but little extra help was required as yet. Logging and lumbering were quiet, although sawmills were running full time, with many export orders on hand. Extended work was being done at the mines in the Kamloops area and mining operations were also active at Prince Rupert and Penticton. Seasonal employment in canneries, fishing camps and cold storage plants in the district around Prince Rupert was general, but was chiefly available to local men

only. Building construction was quiet and highway construction, as a relief measure, was being carried on. Labour disputes, however, in some parts of the province had handicapped any likely progress which might have been made in the relief of unemployment. Shippers and longshoremen were active at New Westminster, Prince Rupert and Victoria, but work was hampered by a strike at Vancouver. The drydocks were quiet at Prince Rupert, but busy at Victoria. In the Women's Division few positions were offered other than those in domestic service and these were difficult to fill, for many of the girls preferred outside to inside work during the summer months.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN APRIL, 1935

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on May 1 was 9,203, the employees on their payrolls numbering 892,506 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for April was 1,735 having an aggregate membership of 162,410 persons, 17.0 per

cent of whom were without employment on May 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 65 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of May, 1935, as reported by the Employers

The Dominion Bureau of Statistics tabulated employment reports from 9,203 firms who reported an increase in personnel on May 1; their payrolls aggregated 892,506 persons, as compared with 875,149 in the preceding month. Reflecting this advance, the crude index rose from 93.4 p.c. of the 1926 average, to 95.2 at the date under review, as compared with 92.0 on May 1, 1934, while at the same date in the preceding thirteen years, it was as follows:—1933, 77.6; 1932, 87.5; 1931, 102.2; 1930, 111.4; 1929, 116.2; 1928, 106.8; 1927, 101.8; 1926, 95.4; 1925, 91.9; 1924, 92.9; 1923, 92.5; 1922, 84.3 and 1921, 85.1. The index was higher than at May 1 in any other year since 1931, and was also higher than in any of the years from 1921 to 1935. The gain of nearly 17,400 persons in the staffs of the co-operating employers from April to May 1, 1935, was smaller than the average recorded on May 1 in the fourteen preceding years for

which data are available; thus the index of employment, after correction for seasonal influences, showed a decline, falling from 98.9 in the preceding month to 97.4 at the latest date.

Manufacturing reported improvement on the date under review, mainly in the food, lumber, clay, glass and stone and iron and steel divisions; the advance in the last-named is particularly interesting because it is contrary to the downward movement which, on the average, has characterized the iron and steel group on May 1 in the years since 1921. Transportation, construction and maintenance, services and trade also recorded considerably heightened activity. In all of these except construction, the gains exceeded the average increases indicated at the beginning of May in the last fourteen years. On the other hand, large numbers of workers were released from logging camps, coal mines and tobacco fac-

tories, the losses being mainly of a seasonal character.

An analysis of the situation in the various industries is given in some detail on pages 563 to 566.

### Employment by Economic Areas

Improvement was reported in all provinces, firms in Quebec showing especially pronounced gains. The situation in four of the five economic areas was better than on May 1, 1934, the index for the Maritime Provinces only, showing a slight decline in this comparison.

*Quebec.*—Conditions improved in Quebec, according to 2,193 employers of 246,342 persons, as against 236,016 in the preceding month. Large increases took place in manufacturing, notably in food, pulp and paper, lumber, leather, clay, glass and stone, iron and steel and other metal, electric current and electrical apparatus plants. Logging, mining, transportation, highway construction, services and trade also afforded more employment. On the other hand, tobacco factories laid off many workers, and there were slight declines in a few other industries. Activity was greater than at the

### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

**NOTE.**—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

*Maritime Provinces.*—Employment in the Maritime Provinces advanced, the increase being rather smaller than the average recorded from April 1 to May 1 in the years since 1920. The index, at 97.4 on the date under review, was fractionally lower than at the beginning of May in 1934, though it was higher than at the same date in either 1933 or 1932. Six hundred and fifty-five firms reported 69,417 employees, or 1,217 more than in their last return. Manufacturing (especially in fish-preserving and iron and steel factories), logging, mining and building and highway construction reported gains, while transportation and railway construction released large numbers of workers, the declines in transportation being due to the falling-off of traffic at the winter ports.

beginning of May last year, when the seasonal advance had provided work for a much smaller number of persons than were added to the staffs of the firms making returns for the latest date. The general increase on May 1, 1935, was considerably above the average indicated on the same date in the preceding fourteen years.

*Ontario.*—Moderate industrial expansion was noted in Ontario, but the general advance was less than the average gain between April 1 and May 1 in the years since 1920. Manufacturing showed considerable improvement, especially in the iron and steel, lumber, clay, glass and stone, food and pulp and paper divisions. Mining, transportation, building and railway construction and maintenance, services and trade were also busier. On the

other hand, logging camps released many workers, following the completion of the winter's operations and before river-driving activities had absorbed any large number of men. Employment on the highways also decreased. The working forces of the 4,052 co-operating firms aggregated 388,701 employees, compared with 384,836 on April 1. Employment on May 1, 1934, had shown a decline, and the index then was over three points lower than at the latest date, when it was 101.7.

*Prairie Provinces.*—Manufacturing, construction, services and trade reported greater activity, the gains in railway construction being most pronounced; in the group of factory employment, a considerable part of the advance took place in the lumber, food, clay, glass and stone, textile, mineral product and iron and steel divisions. On the other hand, coal-mining and logging were seasonally slack. Statements were tabulated from 1,339 employers in the Prairie Provinces, whose staffs rose from 109,492 persons on April 1 to 110,815 on the date under review. This improvement was less than that recorded on May 1, 1934, being also below the average

indicated in the years since 1920. The index on the date under review, standing at 87.9, was two and a half points higher than at the beginning of May of last year.

*British Columbia.*—The increase in British Columbia was not so extensive as that noted on the same date of 1934; the index then, however, was over four points lower than on May 1, 1935, when it stood at 92.6. An aggregate payroll of 77,231 persons was employed by the 964 firms furnishing data, who had 76,605 employees in the preceding month. Logging, shipping, railway construction, services and manufacturing showed improvement over April 1, that in the last-named being most marked. Within the group of manufacturing industries, the greatest gains took place in the lumber, food and metal divisions. Highway construction, however, released a considerable number of workers.

Table 1 gives index numbers by economic areas.

### Employment by Cities

Improvement was shown in the eight cities for which separate tabulations are made, firms in Quebec City, Montreal, Toronto, Ottawa, Hamilton, Windsor and the adjoining Border

May 1.....	95.2	97.4	89.7	101.7	87.9	92.6
Relative Weight of Employment by Economic Areas as at May 1, 1935.....	100.0	7.8	27.6	43.5	12.4	8.7

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

Cities, Winnipeg and Vancouver reporting heightened activity. The largest gains were in Montreal, Toronto and Vancouver. The situation in each of these eight centres was better than on May 1, 1934.

*Montreal.*—Transportation recorded a substantial seasonal advance in Montreal, and manufacturing, services, trade and construction were also busier; within the manufacturing group, increases took place in textile, leather, food, electrical apparatus and iron and steel factories, but tobacco works showed marked seasonal curtailment. The 1,290 co-operating employers reported 129,021 persons on their payrolls, compared with 125,360 on April 1. The level of employment was higher than on May 1, 1934, when the increase had not been so pronounced.

*Quebec.*—Statements were tabulated from 165 firms with 12,687 employees, as against 12,235 on April 1. Most of the improvement took place in shipping, manufacturing, services and trade. The gain involved many more workers than that recorded on May 1, 1934, when the index was fractionally lower.

*Toronto.*—Transportation, building and highway construction, services, trade and

manufacturing reported increases in personnel in Toronto. The advance in manufacturing, which was most marked, was general in distribution, but the largest additions to staffs were in the iron and steel group. According to data furnished by 1,359 employers in Toronto, their payrolls aggregated 117,469 persons, as compared with 115,186 at the beginning of April. This gain exceeded that indicated on May 1 of last year, or of any other year of the record except 1927 and 1928, being considerably above the average for that date in the thirteen previous years for which statistics for Toronto are available. Employment was in greater volume than at the beginning of May last year, when the index stood at 92.9, as compared with 96.7 at the latest date.

*Ottawa.*—Construction, transportation and manufacturing registered moderate improvement in Ottawa, the increase in factory employment being most marked; the general advance in the city involved fewer workers than that noted at the beginning of May, 1934, when the index stood at 100.8, compared with 101.3 on the date under review. Statistics were tabulated from 171 firms em-

May 1.....	86.3	96.7	96.7	101.3	90.3	133.5	85.5	93.4
Relative Weight of Employment by Ci- ties as at May 1, 1935	14.5	1.4	13.2	1.5	3.2	2.0	4.1	3.3

Note.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

playing 13,007 persons, compared with 12,719 on April 1.

*Hamilton.*—A combined working force of 28,914 was reported by the 271 co-operating establishments, who had 28,059 employees on April 1. Manufacturing was brisker, particularly in the iron and steel division, and construction, transportation and trade showed heightened activity. Employment was at a much higher level than in the same month of 1934, when a smaller advance had been indicated.

*Windsor and the adjacent Border Cities.*—Further but rather slight improvement was noted in the Border Cities, where employment has increased steadily from the beginning of the year, the reporting firms having added over 7,500 persons to their staffs since December. Returns for May 1 were tabulated from 164 employers with 18,063 workers, compared with 17,951 in the preceding month. Most of the gain occurred in general factory and construction work. Additions to their payrolls had been indicated by the establishments reporting on May 1, 1934, but employment was then at a decidedly lower level,

the index standing at 109.3, as compared with 133.5 on the date under review.

*Winnipeg.*—Manufacturing (particularly of food, iron and steel and textile products), building construction and trade showed improvement, while other industries were generally unchanged. The 444 co-operating employers had 36,446 persons on their payrolls, compared with 35,639 on April 1. Employment was in rather greater volume than on the same date of last year, when a smaller gain had been noted.

*Vancouver.*—Manufacturing activity increased in Vancouver, the food and iron and steel groups in particular showing improvement; transportation and construction were also brisker. According to data received from 402 firms, they employed an aggregate working force of 29,612 persons, compared with 28,400 on April 1. The index was higher than at the beginning of May of a year ago, when a decidedly smaller advance had been reported.

Index numbers by cities are given in Table 2.

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100)

—	All industries	Manufacturing	Logging	Mining	Communications	Transportation	Construction	Services	Trade

Relative Weight of Employment by Industries as at May 1, 1935.....	100.0	53.7	2.9	6.0	2.3	10.6	11.1	2.8	10.6

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

### Employment by Manufacturing Industries

Employment in manufacturing at the beginning of May showed a further increase, the fourth reported since the opening of the year. Returns were tabulated from 5,466 manufacturers having 479,503 employees, compared with 471,020 on April 1, 1935. The general improvement approximated the average indicated in the years since 1920. The unadjusted index rose from 93.9 in the preceding month to 95.6 on May 1, 1935; after adjustment for seasonal variation, the index at the latest date was 94.9, or practically the same as at April 1. The crude index on May 1 in preceding years was as follows: 1934, 90.2; 1933, 76.8; 1932, 85.8; 1931, 100.7; 1930, 112.4; 1929, 119.8; 1928, 109.0; 1927, 103.9; 1926, 98.8; 1925, 93.7; 1924, 94.9; 1923, 97.9; 1922, 85.5, and 1921, 86.8.

The most marked advance on May 1, 1935, took place in lumber, iron and steel, animal food and clay, glass and stone factories, but

leather, vegetable food, pulp and paper, chemical, electric current, non-ferrous metal and mineral product plants also reported important gains. On the other hand, rubber and tobacco works were slacker.

The experience of the years since 1920 shows that employment on June 1 has almost invariably increased so that continued improvement may be anticipated for the next report.

*Animal Products, Edible.*—Large increases in employment were noted in fish and meat packing plants and dairies; the improvement was more extensive than that reported on May 1, 1934, when the index was some eight points lower. Statements were tabulated from 286 firms in this group, employing 20,904 workers, or 1,637 more than at the beginning of April. The expansion took place chiefly in the Maritime Provinces and British Columbia, but the trend in the group as a whole was generally upward.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1926=100)

Industries	Relative Weight	May 1, 1935	April 1, 1935	May 1, 1934	May 1, 1933	May 1, 1932	May 1, 1931	May 1, 1930
<i>Manufacturing.</i>								
Animal products—edible.....	53.7	95.6	93.9	90.2	76.8	85.8	100.7	112.4

Foundry and machine shop products.....	.5	72.1	67.9	56.5	45.8	71.2	128.9	169.0
Other iron and steel products.....	.6	92.7	89.6	77.2	62.5	74.9	98.7	118.4
Non-ferrous metal products.....	1.7	80.2	80.9	75.5	58.8	76.0	95.1	111.9
Non-metallic mineral products.....	2.1	119.0	116.2	106.5	75.1	83.2	119.8	126.8
Miscellaneous.....	1.5	129.3	126.8	129.7	114.8	119.4	123.6	146.7
	.6	118.7	117.4	109.4	90.8	102.8	106.6	111.2

The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

*Fur and Fur Products.*—Employment in the fur division gained, according to the 56 co-operating manufacturers, who had 1,773 workers, compared with 1,670 on April 1. Activity was greater than in the corresponding period of last year, when a smaller increase had been indicated.

*Leather and Products.*—Employment in boot and shoe and other leather factories showed moderate improvement, according to 284 manufacturers of leather products with 22,139 employees, as compared with 21,773 in the preceding month. The gain occurred mainly in Quebec. The increase was substantially larger than that noted on May 1, 1934, when the index was considerably lower.

*Lumber and Products.*—Seasonal activity caused a pronounced advance in this group, particularly in sawmills, although operations were somewhat retarded by the late season. Data were received from 801 employers of 35,196 persons, as against 32,895 in the preceding month. There were increases in all provinces, those in Quebec, Ontario and British Columbia being greatest. Much smaller additions to staffs had been registered on May 1, 1934, and the index then was below its level at the beginning of May of the present year.

*Plant Products, Edible.*—There was an increase in personnel in vegetable food factories, chiefly in sugar and syrup and fruit and vegetable preserving canneries. The general advance involved fewer workers than that noted on May 1, 1934, when the index stood at 92.4, compared with 92.6 at the beginning of May this year. Statements were compiled from 429 employers, whose payrolls aggregated 26,629 persons, as compared with 26,037 on April 1. The gains took place chiefly in Quebec and Ontario.

*Pulp and Paper Products.*—Further improvement was noted in these industries, in which employment was in greater volume than on the same date in 1934, although a more pronounced advance had then been reported. Increases took place on May 1, 1935, in pulp and paper and paper product mills, while printing and publishing houses were also busier. The working forces of the 580 co-operating establishments aggregated 56,514 employees, as against 55,990 in their last report. Heightened activity was shown in Quebec and Ontario, while elsewhere the changes were slight.

*Rubber Products.*—Losses were noted in rubber factories on May 1, 1935, these being on much the same scale as those reported on the corresponding date in 1934, when the index was slightly higher. Returns were tabulated

from 52 manufacturers employing 11,625 workers, or 186 fewer than at the commencement of April. Most of the decrease was in Quebec and Ontario.

*Textile Products.*—Practically no change, on the whole, took place in this group at the beginning of May, according to statistics from 973 manufacturers having 95,527 persons on their payrolls, as compared with 95,502 in the preceding month. Cotton and garment and personal furnishing factories added to their forces, but knitting, woollen and some other mills were slacker. An advance had been noted on May 1, of last year, when the index stood at 110.7, compared with 111.9 on the date under review.

*Tobacco, Distilled and Malt Liquors.*—Data were received from 168 plants in this group employing 14,401 persons, or 1,240 fewer than in the preceding month. This decrease, which was rather larger than that recorded on May 1 of last year, took place chiefly in tobacco manufacturing in Quebec. Employment was at a rather higher level than on the same date in 1934.

*Chemicals and Allied Products.*—Employment in chemical and allied products showed an increase, this occurring mainly in the Maritime Provinces, Quebec and Ontario. Information was compiled from 190 manufacturers, whose staffs included 10,201 workers, as against 9,992 in April. The gain was smaller than that of May 1 a year ago, but the index was then over five points lower.

*Clay, Glass and Stone Products.*—Building material factories in all provinces indicated seasonal improvement; the general gain resulted in the employment of a much greater number of additional employees than that reported at the beginning of May last year, when the index was over five points lower. The 191 co-operating firms had 7,604 employees as against 6,563 in the preceding month.

*Electric Current.*—Improvement was recorded on May 1 in electric current plants, in which employment was rather brisker than in the spring of 1934. Statements were received from 98 companies employing 13,756 workers, an increase of 268 over their April 1 forces.

*Electrical Apparatus.*—Employment on the whole was unchanged in electrical appliance work, according to data furnished by 108 establishments, which had 11,591 employees. A gain had been registered on May 1, 1934, when the index was much lower.

*Iron and Steel Products.*—The rolling mill, boiler, engine and tank, machinery, agricultural implement, heating appliance, iron and steel fabrication, sheet metal and some other groups reported heightened activity on May 1, employment in the iron and steel group as a whole showing its fourth consecutive increase since the beginning of the year. Returns were tabulated from 828 manufacturers with 113,215 operatives, as compared with 111,017 in the preceding month. Larger gains had been indicated at the beginning of May of last year, but employment was then in lesser volume. The movement was upward in all provinces, the improvement in Ontario being most marked.

*Non-Ferrous Metal Products.*—Non-ferrous metal products showed an increase in employment, according to data from 152 firms with a working force of 18,826 persons, or 437 more than on April 1. Similar additions to staffs had been recorded in this group in the same month in 1934, but the index number was then very much lower. All branches of this division shared in the gains recorded on May 1, those in smelters and refineries being largest.

*Mineral Products.*—Improvement was indicated in the mineral products division; the increase was of much the same size as that which occurred on May 1 of a year ago, when the index number was fractionally higher than on the date under review. Reports were received from 122 manufacturers, whose payrolls included 13,077 persons, as compared with 12,862 in the preceding month. The greatest advance was in the Prairie Provinces.

### Logging

Seasonal losses that exceeded the average, but were much smaller than on May 1, 1934, were recorded in logging; increases in the Maritime Provinces, Quebec and British Columbia were more than offset by declines in the Prairie Provinces and Ontario. The 302 co-operating firms employed 26,231 men, or 2,867 fewer than on Apr. 1. The index, at 93.9 was higher than at the beginning of May in any other year of the record, except 1924.

### Mining

*Coal.*—Employment in coal-mining showed a seasonal contraction, which was larger than that noted in the same month of last year. The index then, however, was slightly lower than on May 1, 1935. Data were received from 101 operators with 22,244 employees, as compared with 23,878 in the preceding month. The decline took place mainly in the coal-fields of the Prairie Provinces.

*Metallic Ores.*—There was a further increase in metallic ore mines, chiefly in Ontario and British Columbia. An aggregate working force of 25,089 persons was employed by the 151 co-operating firms, who had 24,682 workers in their last report. A similar advance had been indicated at the beginning of May a year ago, but activity then was not so great as at the date under review, when it reached the highest level yet recorded in the years since 1920.

*Non-metallic Minerals (Other than Coal).*—Employment in this group showed a seasonal gain; 77 employers enlarged their payrolls by 488 workers to 5,780 at the beginning of May. Quarries and other divisions reported heightened activity. The index was higher than on May 1, 1934, when considerable improvement had also taken place.

### Communications

A minor decrease was noted in communications, in which the level of employment was fractionally higher than on the corresponding date of last year. The co-operating branches and companies reported an aggregate working force of 20,510 persons, or 34 fewer than at the beginning of April.

### Transportation

*Street Railways and Cartage.*—Improvement was shown in local transportation on May 1, when the 199 firms from whom information was received, reported 24,164 employees, or 342 more than in the preceding month. The index was slightly higher than on the same date in 1934, when a larger gain had been noted. Quebec and Ontario registered most of the advance recorded on May 1, 1935, but the tendency was generally favourable except in the Prairie Provinces.

*Steam Railways.*—Steam railway operation afforded less employment in the Maritime Provinces and British Columbia, while elsewhere heightened activity was shown. Statements were received from 100 employers in this division, whose payrolls increased from 55,226 persons on April 1 to 55,532 at the beginning of May. A minor gain had been noted on May 1, 1934, but the index then was fractionally higher.

*Shipping and Stevedoring.*—A combined staff of 15,011 men, as compared with 11,043 in the preceding month, was reported by the 98 firms furnishing statistics in the water transportation group. This gain was much larger than that noted on the same date last year, when the index was some fifteen points lower. Seasonal reductions in the Maritime Provinces were more than offset by increases in Quebec, Ontario and British Columbia.

## Construction and Maintenance

**Building.**—Employment in building construction showed further expansion; the industry was rather more active than on May 1, 1934. The working forces of the 662 co-operating contractors aggregated 19,010 persons as against 18,221 at the beginning of April. The tendency was favourable in all provinces, except Quebec.

**Highway.**—Work on roads and highways increased at the beginning of May; 4,166 men were taken on by the 331 employers making returns, who had 57,097 workers on May 1. There were gains in the Maritime and Prairie Provinces, and Quebec, while in Ontario and British Columbia curtailment was reported. Generally lessened activity had been recorded on the same date last year, but employment on highways was then in greater volume than in the spring of the present year.

**Railway.**—Thirty-four companies and divisional superintendents in this group employed 23,110 workers, as against 22,666 in their last report. The Prairie Provinces recorded most of the increase; moderate improvement took place in Quebec, Ontario and British Columbia, but there were seasonal reductions in the Maritime Provinces. Expansion involving a larger number of workers was noted at the beginning of May a year ago; the index num-

ber then was slightly higher than on the date under review.

## Services

The service group reported considerably heightened activity, according to statements from 451 establishments employing 25,034 persons, as against 24,027 in their last report. Gains were made in laundries and dry-cleaning plants and in hotels and restaurants. Employment was brisker than on May 1 in 1934, when a slight decline had been indicated.

## Trade

Continued additions to personnel were shown in wholesale and retail trade; 1,147 trading establishments enlarged their forces by 1,492 persons to 94,191 on the date under review. The index was higher than at the beginning of May of a year ago, or of any other year since 1931.

## Tables

The accompanying tables give index numbers of employment by economic areas, leading cities and industries. The columns headed "relative weight," show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns on May 1, 1935.

## (2) Unemployment in Trade Unions at the Close of April, 1935

Unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle due to illness are not considered as unemployed, while unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent change in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Little variation in the volume of work afforded local trade union members was apparent at the close of April from the previous month, though the trend was toward lessened activity, unemployment standing at 17 per cent, as compared with a percentage of 16.7 in March. This percentage for April was established from the reports forwarded by 1,735 labour organizations, embracing 162,410 members, 27,562 of whom were idle on the last day of the month. The level of employment during April was, however, some-

what above that of the corresponding month last year when 19.1 per cent of unemployed members was recorded. Alberta and New Brunswick unions reported noteworthy curtailment in work afforded from March, between-season quietness in the coal mining industry in the former province being the determining factor in the adverse situation shown, while in the latter, the losses were attributable almost entirely to the pulp and paper industry. Quebec and Manitoba unions also indicated a less favourable employment tendency, though the changes from March were but fractional. Of the gains reported in the remaining provinces, and largely counteracting the recessions previously mentioned, none were outstanding, ranging from slightly over 2 per cent in Saskatchewan to less than one per cent in Ontario. When a comparison is made with the returns for April, 1934, Nova Scotia, Manitoba and Saskatchewan members were afforded considerably more employment during the month surveyed and improvement on a somewhat smaller scale was evident in Quebec, Ontario and Alberta. New Brunswick unions on the contrary suffered moderate

losses in activity, and the situation in British Columbia declined slightly.

The returns on unemployment furnished by unions in the largest city in each province, with the exception of Prince Edward Island, are tabulated separately each month. Of these, Saint John unions reported a 4 per cent drop in work available from March, and in Winnipeg activity was but nominally retarded. A more favourable employment trend, however, was indicated in all other cities making returns, Regina and Halifax showing gains of around 2 per cent and Montreal, Toronto, Edmonton and Vancouver fractional increases. In contrasting with the returns for April last year, Winnipeg and Edmonton unions regis-

ever, more favourable than in April of last year, when the point reached was above that of the month reviewed.

The manufacturing industries reported minor contractions in employment during April from the previous month, the 472 local unions making returns with a total of 52,690 members showing 13.5 per cent of idleness at the close of the month, in comparison with 13.2 per cent in March. Employment expansion on a substantial scale was noted during April by jewellery and fur workers, metal polishers and meat cutters and butchers, while conditions for iron and steel workers, and cigar makers improved slightly. On the contrary, among glass workers and general labourers

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

tered noteworthy employment expansion during the month reviewed and advances on a more moderate scale were evident among Montreal and Halifax unions. In Regina and Saint John also, a slightly better employment volume was recorded. Minor contractions in employment, however, were indicated by Toronto and Vancouver unions.

Appearing with this article is a chart which shows the trend of unemployment by months from January, 1929, to date. The curve at the end of April showed little variation in level from March, though the tendency was upward in a less favourable direction. The situation as indicated by the curve was, how-

pronounced curtailment was evident, and the recessions apparent among textile and carpet, hat, cap and glove, and wood workers were also noteworthy. Declines in activity of lesser importance were indicated by pulp and paper makers, printing tradesmen, leather workers and bakers and confectioners. A more favourable situation was shown in the manufacturing industries as a whole, from April, 1934, when 16.4 per cent of inactivity was recorded. In this comparison the iron and steel trades registered gains in employment involving the greatest number of members. Viewed from a percentage basis, however, the improvement shown by metal polish-

ers, cigar makers, fur workers and meat cutters and butchers was most substantial though their membership was small. Decided betterment of conditions was also indicated by general labourers and advances of lesser magnitude were reflected by textile and carpet, garment and leather workers and printing tradesmen. Bakers and confectionery, wood, hat, cap and glove, glass and brewery workers, however, were much quieter than in April a

year ago, paper makers showing moderate curtailment of activity.

In the coal mining industry during April a downward employment movement was noticed from the preceding month, between-season quietness affecting the situation adversely. Activity was, however, maintained in better volume than in April, 1934. This was manifest by the reports tabulated from 51 unions during April covering a membership of 16,340 persons, 2,434 or 14.9 per cent of whom were idle at the end of the month, as compared with percentages of 11.2 in March and 19.3 in April last year. The bulk of the decline in activity reported from March was confined to the Alberta mining areas, though in British Columbia also small recessions occurred. In Nova Scotia, however, there was some slight employment rise. Compared with the returns for April a year ago considerably better conditions prevailed for Nova Scotia miners during the month surveyed, British Columbia unions showing moderate curtailment of employment and Alberta but a fractional drop in work afforded. In addition to the miners reported totally unemployed at the end of the month, a number continued to work at greatly reduced time.

Slackness in the building and construction trades was slightly more marked during April than in the previous month, unemployment standing at 61.1 per cent, as compared with a percentage of 59.2 in March. Little change in the situation was apparent, however, from April a year ago when 61.3 per cent of the members reported were without work. The percentage for the month reviewed was based on the reports received from 197 organizations with an aggregate of 17,271 members, 10,552 of whom were idle on the last day of the month. Painters, decorators and paperhangers, and bricklayers, masons and plasterers were afforded a moderate increase in available work from March. Extensive curtailment of activity, however, was evident among electrical workers, bridge and structural iron workers, tile layers, lathers and roofers, and hod carriers and building labourers, while minor declines occurred among carpenters and joiners, plumbers and steamfitters, and granite and stonecutters. Steam shovelmen, however, reported the same unemployment percentage in both months compared. Carpenters and joiners, and plumbers and steamfitters alone reported a better volume of work than in April a year ago, the former group of tradesmen showing increases of moderate proportions and the latter but slight gains. Of the contractions in the remaining groups the

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919.....	3.1	2.0	3.4	2.7	2.1	3.2	2.0	7.9	3.4
Average 1920.....	1.8	2.0	7.2	3.4	3.1	3.2	2.8	11.2	4.9

most important were shown by electrical workers, and tile layers, lathers and roofers, though noteworthy recessions were also apparent among painters, decorators and paperhangers, hod carriers and building labourers, and bridge and structural iron workers. Employment for steam shovelmen, bricklayers, masons and plasterers and granite and stonecutters, however, subsided slightly.

Heightened activity on a small scale was recorded in the transportation industries during April from both the preceding month and April a year ago, the 772 organizations from which reports were tabulated, with 53,973 members, showing that 5,329 were without work at the end of the month, a percentage of 9.9, as compared with 10.4 per cent in March and 11.4 per cent in April, 1934. Steam railway employees, whose returns included over 78 per cent of the entire group membership reported, street and electric railway employees, teamsters and chauffeurs, and navigation workers all participated in this slightly better movement shown from March, the gains for navigation workers being the most substantial. Influencing the situation in the transportation industries as a whole, to a large degree, when compared with April, 1934, was the improvement noted in the steam railway division. Among street and electric railway employees the tendency was also favourable, though the change from April a year ago was practically negligible. Conditions in navigation, however, were more depressed during the month reviewed, and among teamsters and chauffeurs there was a noteworthy falling off in work available.

Quietness among retail clerks was more in evidence during April than in March and declines in activity were noted also from April a year ago. This was apparent from the reports received from 5 associations of these workers with 1,781 members, 205 or 11.5 per cent of whom were unemployed at the end of the month, as compared with percentages of 7.3 in March and 6.8 in April, 1934.

Civic employees indicated a more favourable trend during April than in the previous month, though the change was slight, the 72 unions making returns with a total membership of 7,364 persons showing an unemployment percentage of 1.7, compared with 2 per cent in March. The situation, however, remained identical with that of April, 1934,

when 1.7 per cent of idleness also was recorded.

The miscellaneous group of trades showed little variation in the level of employment during April from the previous month, though the tendency was towards retarded activity. Reports for April were furnished by 122 unions with 3,829 members, 608 of whom were without work on the last day of the month, a percentage of 15.9, contrasted with 15.4 per cent in March. Unclassified workers and barbers were afforded a better volume of employment than in March, which improvement, however, was slightly more than offset by the declines apparent among theatre and stage, and hotel and restaurant employees and stationary engineers and firemen. Minor contractions in activity were reflected in the miscellaneous group of trades from April, 1934, when unemployment stood at 15.2 per cent. In this comparison the situation for stationary engineers and firemen, and unclassified workers was slightly better during the month reviewed, while recessions on a rather small scale were evident among hotel and restaurant, and theatre and stage employees, and barbers.

Employment expansion of substantial proportions was noted by fishermen during March from the previous month, though conditions were still slack and considerably less favourable than in April, 1934. Reports were received for April from 2 unions of these workers with a membership numbering 485 persons, 230 or 47.4 per cent of whom were idle at the end of the month, in comparison with percentages of 64.2 in March and 2.2 in April, 1934.

Among lumber workers and loggers there was a slight drop in activity recorded during April from the preceding month, the 2 unions making returns with an aggregate of 601 members, showing 8.2 per cent of idleness, as compared with a percentage of 5.8 in March. Pronounced recovery was indicated from April last year when 29.9 per cent of unemployed members was reported.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1934, inclusive, and also the percentage of unemployment by provinces for April of each year from 1919 to 1932, inclusive, and for each month from January, 1933, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for April, 1935

The volume of business transacted by the offices of the Employment Service of Canada during April, 1935, as indicated by the average daily placements effected showed a gain of nearly 15 per cent over March, while a decline of almost 18 per cent was recorded from April a year ago. In comparison with the preceding month farming, services, transportation, and trade showed increased placements, and construction and maintenance, manufacturing, mining and logging losses, the most marked changes in each division being the gains in farming and services and the decline in construction and maintenance. When compared with the corresponding period a year

ago all groups, except construction and maintenance, services and manufacturing, showed increases, but the loss in construction and maintenance was such that it greatly overbalanced the improvement shown in logging, farming, trade, transportation and mining, none of which was very pronounced. The accompanying chart shows the trend of employment from January, 1933, to date, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for employment registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications declined considerably during the first half of the month, but more than recovered this loss during the latter half of the period under review, reaching levels above those recorded both at the close of March, 1935, and also those registered at the end of April a year ago. The ratio of vacancies to each 100 applications was 47.7 and 56.4, respectively, during the first and the second half of April, 1935, in contrast with ratios of 52.4 and 54.5 during the corresponding periods of 1934. The ratios of placements to each 100 applications during the periods under review were 43.5

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

ago all groups, except construction and maintenance, services and manufacturing, showed increases, but the loss in construction and maintenance was such that it greatly overbalanced the improvement shown in logging, farming, trade, transportation and mining, none of which was very pronounced.

The accompanying chart shows the trend of employment from January, 1933, to date, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for employment registered at the offices of the Service throughout Canada, computations being made semi-monthly. It will

and 50.8, as compared with 49.1 and 50.1 during April, 1934.

The average number of vacancies reported daily to the offices of the Service throughout Canada was 1,133, as compared with 954 in the previous month and with 1,346 in April a year ago.

The average number of applications for employment received daily, by the offices during the month under review was 2,184, as compared with 1,770 in March and with 2,515 in April last year.

The average number of placements made daily by the offices of the Service during

April, 1935, was 1,027, of which 619 were in regular employment and 408 in work of one week's duration or less, as compared with a total daily average of 894 during the preceding month. Placements in April last year averaged 1,249 daily, consisting of 624 placements in regular and 625 in casual employment.

During the month of April, 1935, the offices of the Service referred 26,412 persons to vacancies and effected a total of 24,641 placements. Of these, the placements in regular employment were 14,854, of which 10,638 were of men and 4,216 of women, while placements in casual work totalled 9,787. The number of vacancies reported by employers was 17,223 for men and 9,960 for women, a total of 27,183, while applications for work numbered 52,397, of which 39,621 were from men and 12,776 from women. Reports for March, 1935, showed 24,788 positions available, 46,014 applications made and 23,231 placements effected, while in April, 1934, there were recorded 32,287 vacancies, 60,349 applications for work and 29,968 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1925, to date:—

Year	Placements		
	Regular	Casual	Totals
1925.....	306,804	106,021	412,825
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679
1931.....	175,632	295,876	471,508
1932.....	153,771	198,443	352,214
1933.....	170,576	181,521	352,097
1934.....	223,564	182,527	406,091
1935 (4 months).....	59,803	40,338	100,141

#### NOVA SCOTIA

Orders listed at employment offices in Nova Scotia during April called for nearly 10 per cent more workers than in the preceding month, and nearly 10 per cent less than in the corresponding month of last year. There was a gain of nearly 4 per cent in placements when compared with March, but a loss of nearly 13 per cent in comparison with April, 1934. Fewer placements in the highway division were responsible for the decline from April of last year, although a reduction was also reported in services. The changes in all other groups were small. Placements during the month in construction and maintenance numbered 698, and in services 392. Of the latter 279 were of household workers. There were 114 men and 78 women placed in regular employment.

#### NEW BRUNSWICK

Opportunities for employment, as indicated by orders received at employment offices in New Brunswick during April, were nearly 17 per cent better than in the preceding month, but over 4 per cent less favourable than during the corresponding month of last year. There was an increase of nearly 15 per cent in placements when compared with March, but a decline of over 4 per cent in comparison with April, 1934. The only decrease of importance in placements from April of last year was in construction and maintenance. This reduction was largely offset by a gain in services. Nominal changes only were reported in all other groups. During the month 205 placements were effected in construction and maintenance and 625 in services. Of the latter 485 were of household workers. Placements in regular employment numbered 217 of men and 94 of women.

#### QUEBEC

There was an increase of over 12 per cent in the number of orders received at employment offices in the Province of Quebec during April when compared with the preceding month, and of nearly 33 per cent in comparison with April, 1934. Placements were less than 1 per cent higher than in March, but over 37 per cent above April, 1934. The substantial increase in placements over April of last year was due to gains in construction and maintenance, and logging. Small losses were reported in trade and services. Placements by industrial divisions included manufacturing 94; logging 474; construction and maintenance 1,104; trade 115; and services 1,980, of which 1,741 were of household workers. There were 1,820 men and 1,424 women placed in regular employment during the month.

#### ONTARIO

Employment opportunities, as indicated by orders received at employment offices in Ontario during April, were nearly 12 per cent better than in the preceding month, but nearly 31 per cent less favourable than during the corresponding month of last year. There was a gain in placements of nearly 10 per cent when compared with March, but a loss of over 31 per cent in comparison with April, 1934. A large reduction in the number of workers sent to relief employment on highway construction during the month under review, when compared with April of last year, was responsible for the decline under this comparison for the province as a whole. Small decreases were also reported in manufacturing and farming. Of the gains in all other groups, those in logging and services were the largest. Industrial divisions in which most of the

\*105 Placements effected by offices since closed.

placements were effected during the month were manufacturing 480; logging 480; farming 848; mining 75; transportation 116; construction and maintenance 3,096; trade 328; and services 3,689, of which 2,420 were of household workers. During the month 3,280 men and 1,395 women were placed in regular employment.

#### MANITOBA

During the month of April positions offered through employment offices in Manitoba were nearly 15 per cent higher than in the preceding month and over 11 per cent above the corresponding month of last year. There was a gain also in placements of over 13 per cent when compared with March and of nearly 5 per cent in comparison with April, 1934. The most important gains in placements over April of last year were in farming, construction and maintenance, and trade, while logging and services showed the largest losses. The changes in other groups were nominal only. Placements by industrial divisions included farming 651; construction and maintenance 872; and services 631, of which 522 were of household workers. Placements in regular employment numbered 1,409 of men and 317 of women.

#### SASKATCHEWAN

Employment offices in Saskatchewan were notified of over 37 per cent more vacancies during April than in the preceding month, but over 9 per cent less than during the corresponding month of last year. There was an increase in placements of over 42 per cent in comparison with March, but a loss of nearly 11 per cent when compared with April, 1934. All industrial divisions, except trade, showed declines in placements from April of last year. The largest reductions were in construction and maintenance, farming and services. Industrial divisions in which most of the placements were effected during the month were manufacturing 40; farming, 1,116; construction and maintenance, 351; trade, 45; and services, 692, of which 533 were of household workers. There were 1,196 men and 412 women placed in regular employment during the month.

#### ALBERTA

The demand for workers, as indicated by orders received at employment offices in Alberta during April was nearly 27 per cent greater than in the preceding month, but nearly 13 per cent less than during the corresponding month of last year. Placements were nearly 22 per cent above March, but over 14 per cent lower than in April, 1934. The reduction in placements from April of last year was due to fewer workers being sent to

relief camps or road construction, as small declines in services and logging were more than offset by gains in farming and manufacturing. Placements by industrial divisions included manufacturing 89; farming, 1,068; construction and maintenance, 637, and services, 499, of which 405 were of household workers. There were 1,549 men and 324 women placed in regular employment during the month.

#### BRITISH COLUMBIA

Orders received at employment offices in British Columbia during April called for nearly 25 per cent less workers than in the preceding month, and nearly 34 per cent less than during the corresponding month of last year. Similar percentages of loss were reported in placements under both comparisons. A substantial reduction in relief placements on road construction from April of last year was responsible for the decline under this comparison for the province as a whole, as none of the changes in other groups were important. Placements by industrial divisions included farming, 165; mining, 47; construction and maintenance, 1,843; and services, 660, of which 402 were of household workers. During the month 1,053 men and 172 women were placed in regular employment.

#### Movement of Labour

During the month of April, 1935, the offices of the Employment Service of Canada made 14,854 placements in regular employment, 7,648 of which were of persons for whom the employment found was outside the immediate district of the offices at which they were registered. Of the latter, 605 were granted the Employment Service reduced transportation rate, 542 going to points within the same province as the despatching office and 63 to other provinces. The reduced transportation rate which is 2·7 cents per mile, with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may wish to proceed to distant employment for which no workers are available locally.

The Hull office was responsible for all transfers at the reduced rate in Quebec during April, which were of bushmen, numbering 27 and bound for the Pembroke zone. The movement of labour in Ontario during April was entirely provincial and comprised the despatch of 326 workers. Travelling from Port Arthur to points within the same zone were 124 bush workers, 60 mine workers, 4 hotel employees, 2 axe-men, 1 restaurant worker, 1 sawmill labourer, 1 carpenter, 1 mail carrier and 1 town domestic. The Port

Arthur zone was also the destination of 2 loggers conveyed from Timmins. For employment within their respective zones the Sudbury office transferred 126 bush workers, and the Fort William office 1 mill hand, 1 domestic, and 1 handyman. Workers profiting by the Employment Service reduced rate in Manitoba during April totalled 61, of whom 28 were transported to centres within the province and 33 to other provinces. Provincially the movement was from Winnipeg to employment within its own zone, and included 24 farm hands, 1 farm domestic and 3 hotel workers. The transfers outside the province were also effected by the Winnipeg office, which sent 19 bushmen, 6 farm hands, 1 cook and 1 domestic to Port Arthur, and 6 farm hands to rural districts in Saskatchewan. Business transacted by Saskatchewan offices during April involved the issue of 32 reduced rate certificates, all provincial. Of these, 27 were granted to agricultural workers, the Regina office assisting in the transfer of 11 farm hands and 3 farm domestics, and the Saskatoon office of 12 farm hands and 1 farm housekeeper to various points within the province. From Regina also, 1 store clerk went to North Battleford, 1 town domestic to Yorkton, and 1 teacher within the Regina zone. The Yorkton zone also received 1 logger from Saskatoon. The remaining transfer was of a cook travelling from Prince Albert to employment within the territory covered by that city office. Alberta offices issued 134 reduced rate certificates dur-

ing April, 131 provincial and 3 interprovincial. The latter were granted at Edmonton to 1 farm hand and 1 farm housekeeper going to North Battleford, and to 1 farm hand travelling to Saskatoon. Within the province the Edmonton office transferred 36 sawmill workers, 27 bush workers, 22 farm hands, 6 farm household workers, 5 labourers, 5 steamship employees, 4 mine workers, 3 carpenters, 2 teamsters, 2 grader men, 2 housemaids, 2 garage mechanics, 1 cook and 1 waitress to employment at divers points in the districts superintended by that office, and 1 farm hand each to the Drumheller and Lethbridge zones. From Calgary 3 farm hands and 1 farm housekeeper went to Drumheller, and 6 farm hands and 1 maid within the Calgary zone. In British Columbia during April 25 persons were transported at the reduced rate, all to provincial employment. Travelling on certificates secured at Vancouver 4 mine workers proceeded to Penticton, 1 mine cook to Kamloops, and 15 mine workers and 1 hotel cook to employment in the Vancouver zone. From Nelson the movement included 4 tie makers bound for Penticton.

Of the 605 persons who were carried at the Employment Service reduced transportation rate during April, 447 travelled by the Canadian National Railways, 137 by the Canadian Pacific Railway, 15 by the Pacific Great Eastern Railway; 4 by the Northern Alberta Railway, and 2 by the Temiskaming and Northern Ontario Railway.

#### (4) Building Permits Issued in Canada During April, 1935

The Dominion Bureau of Statistics tabulated returns from 61 cities which granted building permits valued at \$6,272,052 during April, as compared with \$4,009,675 in the preceding month, and \$2,269,157 in the same month of last year. There was, therefore, an increase of \$2,262,377 or 56.4 per cent as compared with March, while there was also a pronounced increase of \$4,002,895 or 176.4 per cent in the more significant comparison with April, 1934. So far in 1935, the value of building authorized in each month has been higher than in the same month of last year, while the total for each of the last three months has also exceeded that for the corresponding months of 1933 or 1932. The cumulative total for the first four months of the present year was consequently higher than in the period January—April of 1932, 1933 or 1934. Although the improvement is mainly due to the granting of construction permits for large public buildings in several centres as an unemployment relief measure, the movement in general building operations has also been decidedly favourable as compared with the last few years. However, in compari-

son with earlier years of the record (viz., 1920-1931), the value of building authorization continues low. The index of wholesale prices of building materials during the elapsed months of the present year, at 81.5 per cent of the 1926 average, was lower than in the same period of any other of the sixteen years for which building permits statistics are available, with the exception of 1932 and 1933.

Some 50 cities furnished detailed statistics for April, 1935, showing that they had issued more than 350 permits for dwellings value at over \$2,500,000, and for almost 1,800 other buildings, estimated to cost over \$3,200,000. In addition, Brantford reported an engineering project valued at approximately \$8,000. In March, authority was given for the erection of about 150 dwellings and 1,000 other buildings, valued at approximately \$450,000 and \$3,400,000 respectively, while one engineering project valued at approximately \$14,000 was also reported.

All provinces except Manitoba recorded increases in the value of the building permits issued during April as compared with the pre-

ceding month, the greatest gains of \$1,793,634 or 104.0 per cent and \$1,557,866 or 628.6 per cent taking place in Ontario and Quebec, respectively.

As compared with April, 1934, there were increases in Quebec, Ontario, Manitoba and Alberta, those of \$2,486,456 or 241.0 per cent in Ontario, and \$1,306,968 or 262.0 per cent in Quebec being especially notable.

Of the four largest cities, Montreal and Vancouver registered increases in the building authorized during April as compared with the preceding month, and also as compared with April, 1934; the increase in Montreal was particularly pronounced. In Toronto and Winnipeg, the value was lower than in March, 1935, but higher than in April, 1934. Of the other centres, New Glasgow, Moncton, Quebec, Sherbrooke, Belleville, Guelph, Hamilton, Kingston, Kitchener, London, Niagara Falls, Peterborough, Port Arthur, Stratford, St. Catharines, St. Thomas, Sarnia, Sault Ste. Marie, York and East York Townships, Windsor, East Windsor, Riverside, Walkerville, Brandon, Edmonton, Medicine Hat, New Westminster and North Vancouver reported increases in the value of the permits issued as compared with March, 1935, and also with April, 1934.

*Cumulative Record for First Four Months, 1920-1935.*—The following table gives the value of the building authorized by 61 cities during April and in the first four months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices

of building materials in the first four months of the same years are also given (1926=100).

Year	Value of permits issued in April	Value of permits issued in first four months	Indexes of value of permits issued in first four months (1926=100)	Average indexes of wholesale prices of building materials in first four months (1926 avge. = 100)
1935.....	\$ 6,272,052	\$14,666,720	35.1	81.5
1934.....	2,269,157	4,980,156	12.0	82.4
1933.....	1,595,502	4,661,323	11.2	75.1
1932.....	4,370,863	13,823,873	33.3	79.1
1931.....	13,495,165	38,241,259	92.1	83.7
1930.....	16,978,076	46,471,338	111.9	96.2
1929.....	29,656,709	72,606,937	174.8	99.4
1928.....	18,606,167	51,769,505	124.6	95.7
1927.....	17,312,470	42,340,823	101.9	96.3
1926.....	19,044,499	41,538,073	100.0	101.7
1925.....	15,482,383	35,463,398	85.4	103.1
1924.....	13,689,101	31,737,100	76.4	111.6
1923.....	19,580,851	39,008,970	93.9	110.8
1922.....	15,833,688	34,513,861	83.1	107.7
1921.....	13,500,360	27,069,872	65.2	136.9
1920.....	15,648,915	34,558,901	83.2	143.1

As already stated, the aggregate for the first four months of this year was approximately three times greater than in the same period of 1933 and 1934, also exceeding the total for the months January-April of 1932. However, the value was lower than in any other year since 1920. It must also be noted that the index numbers of wholesale prices of building materials in the present year have been lower than in any of the years from 1920 to 1931; they were also slightly below the 1934 level, though higher than in 1932 or 1933.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, May, 1935, summarized the employment situation as follows:—

Between March 25 and April 15 employment showed a further improvement, affecting most of the principal industries. The industries showing the most marked advance were building, coal mining, the woollen and worsted industry, tailoring, the distributive trades, and hotel and boarding house service; but substantial improvements were also recorded in many other industries, including engineering and ironfounding, shipbuilding and ship-repairing, electrical cable and apparatus manufacture, dressmaking and millinery, the furniture trades, cotton manufacturing, printing and book-binding, public works contracting, bread, biscuit, etc., making, road transport, and shipping service. None of the principal industries showed any marked decline in employment.

The reduction in the numbers of persons unemployed extended to all sections of the country but was greatest in Northeast England. Employment continued fairly good in the Southeastern counties (including London), and fair in Southwest England and the Midlands. It was slack in the North of England, and very slack in Scotland; while in Northern Ireland it remained bad, and in Wales very bad.

Among those workpeople of ages 16-64 who were insured against unemployment in Great Britain and Northern Ireland the percentage unemployed at April 15, 1935 (including those temporarily stopped as well as those wholly unemployed), was 15.7, as compared with 16.5 at March 25, 1935, and with 16.6 at April 23, 1934. The percentage wholly unemployed at April 15, 1935, was 13.5, as compared with 14.0 at March 25, 1935; while the percentage temporarily stopped was 2.2, as

compared with 2.5. For males alone the percentage at April 15, 1935, was 17.9 and for females, 9.7; the corresponding percentages at March 25, 1935, were 18.7 and 10.7.

At April 15, 1935, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,676,623 wholly unemployed, 280,333 temporarily stopped, and 87,504 normally in casual employment, making a total of 2,044,460. This was 109,410 less than a month before, and 103,735 less than a year before. The total included 1,633,302 men, 57,989 boys, 300,943 women, and 52,226 girls.

The persons on the Registers included 926,883 persons with claims for insurance benefit; 763,985 insured persons with applications for unemployment allowances; 216,795 insured persons (including 20,351 insured juveniles under 16 years of age), not in receipt of insurance benefit or unemployment allowances, and 136,797 uninsured persons. In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at April 15, 1935, was 2,113,851.

### United States

*Manufacturing Industries.*—Aggregate factory employment and payrolls remained unchanged from March to April. In 50 of the 90 manufacturing industries surveyed each month by the U.S. Bureau of Labor Statistics, there were gains in employment and payrolls which were offset by declines in the remaining 40 industries.

Declines in employment from March to April have been recorded in 10 of the preceding 16 years for which data are available and payrolls have declined in 12 of these years.

The Bureau of Labor Statistics' index of factory employment for April, 1935, is 82.4 (preliminary) and the index of factory payrolls is 70.7 (preliminary). As compared with April of a year ago the employment index shows no change. The payroll index, however, shows an advance of 5.1 per cent above the level of the corresponding month of 1934 when the index was 67.3.

The indexes of factory employment and payrolls for April are computed from returns supplied by 24,597 representative establishments employing 3,821,329 workers. Their weekly earnings were \$80,780,232 during the pay period ending nearest April 15. The employment reports received from these co-operating establishments cover more than 50 per cent of the total wage earners in all manufacturing industries of the country. The base used in computing the indexes is the average for the 3-year period, 1923-1925, which is taken as 100.

*Building Construction.*—Employment in the private building construction industry increased

11 per cent from March to April, based on reports received from 10,395 contractors employing 77,025 workers in April. These reports do not include employees engaged on public projects financed by allotments from P.W.A. funds. The gain in employment from March to April was accompanied by an increase of 12.1 per cent in payrolls. Increases in both employment and payrolls were generally reported in each of the localities for which data are available.

*Non-manufacturing Industries.*—Based on data supplied by 106,996 establishments in the wholesale and retail trade, public utility, mining, service, and building construction industries, gains in employment from March to April were shown in 12 of the 17 industries surveyed and increases in payrolls were reported in 9 industries. The changes, for the most part, followed the usual seasonal pattern.

*WHOLESALE AND RETAIL TRADE.*—Employment in retail trade increased 4.2 per cent over the month interval, based on reports supplied by 54,543 establishments employing 879,495 workers in April, 1935. The general merchandising group, reflecting expansion for seasonal trade, showed a gain of 6.5 per cent. The remaining 50,985 establishments in other branches of the retail trade showed a net increase of 3.5 per cent in employment from March to April. Gains were shown in all of the major groups of retail trade, with the exception of the food group.

Employment in wholesale trade, based on reports received from 16,820 establishments in which 296,015 workers were employed in April, showed a decline of 1.0 per cent over the month interval. This decline was due largely to seasonal recession in the groups including wholesalers of leaf tobacco and packers and shippers of fruit. A loss of 0.6 per cent in payrolls accompanied the decreased employment in this industry.

*PUBLIC UTILITIES.*—The changes in employment in the public utility industries from March to April were small. Two of the 3 industries comprising this group showed gains in employment from March to April, electric light and power, 0.4 per cent, and electric-railroad and motor-bus operation and maintenance, 0.2 per cent. Employment in telephone and telegraph offices declined 0.2 per cent.

*SERVICE INDUSTRIES.*—Among the 6 industries included under this classification, 4 showed gains in employment over the month interval. The largest gain (10.2 per cent) was a seasonal increase in dyeing and cleaning establishments. Payrolls in this industry increased 15.7 per cent. Employment in laundries increased 0.4 per cent from March to

April, and banks and insurance companies reported gains of 0.2 per cent each. In hotels, a decrease of 1.1 per cent in employment from March to April was registered. This decrease was due entirely to the closing of winter resort hotels, employment in commercial hotels showing a slight gain. Brokerage firms reported 1.2 per cent fewer employees in April than in the preceding month.

**MINING.**—In the group of mining industries, employment gains were reported in all but one of the 5 industries surveyed. The quarrying and non-metallic mining industry showed the most pronounced gain (11.8 per cent),

continuing the seasonal expansion in this industry. An increase of 15.9 per cent in payrolls was reported from March to April. A gain in employment of 2.3 per cent was shown in both anthracite and metalliferous mining, accompanied by payroll increases of 28.1 per cent and 3.1 per cent, respectively. The crude petroleum industry showed a gain of 1.1 per cent in number of workers. The only regression in this group occurred in bituminous coal mining, in which a seasonal loss of 9 per cent resulted from a decrease in production. This decline was further evidenced by the sharp decrease of 33.3 per cent in payrolls.

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

**T**HE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. On December 31, 1934, however, an Order in Council was passed rescinding what are known as the "B" Conditions of this Policy and substituting other conditions therefor, the full text of which appeared in the *LABOUR GAZETTE* for January, 1935, pp. 24-25. These "B" Conditions are applicable to all contracts for the manufacture and supply to the various departments of the Government of fittings for public buildings; harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers and other Government officers and employees; mail bags, letter boxes and other postal stores.

The original provision for the payment of not less than current wages rates, or fair and reasonable rates if there are no current rates, is retained in the new "B" Conditions, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, be less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wage laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates

of wages not less than those provided for women and girls in the Minimum Wage scales of the respective provinces.

The Fair Wages Policy of the Dominion Government, from its inception in 1900 was applied also to contracts for building and construction work. In the Fair Wages Orders in Council of 1922 and 1924 above referred to, the provisions applicable to building and construction contracts were designated as "A" Conditions. An Act of Parliament entitled "The Fair Wages and Eight Hour Day Act" (chapter 20-21, Geo. V), was adopted on May 30, 1930, with respect to contracts "for construction, remodelling or demolition of any work," and provides as follows:—

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

In the case of contracts for the construction of, or repairs to, Government vessels, where it is not known beforehand at what point the work may be carried out, the practice is to utilize, instead of a fair wages schedule, a general clause providing for the observance of rates of wages generally accepted as current from time to time for competent workmen in the district where the work is being performed, provided that such wages shall in all cases be such as are fair and reasonable, and for the observance of the hours of labour which are customary in the district, provided that such working hours shall not exceed eight a day.

In addition to the requirements of the Fair Wages and Eight-Hour Day Act, government

contracts for the construction, remodelling, repair or demolition of any work, contain a number of other provisions known as the "A" conditions, for the protection of the workmen employed, which are sanctioned by the original Orders in Council.

Both in the case of contracts for building and construction work, and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates and working hours.

The contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wage officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of the contract shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any ap-

parent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any disputes which may arise.

The Department of Labour is furnished from month to month with information regarding the contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed. During the past month, statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:

#### DEPARTMENT OF INDIAN AFFAIRS

##### *Contract in Group "B" (Manufacture of Supplies, etc.)*

During the month of May a contract was awarded by the Department of Indian Affairs to the Horn Bros. Woollen Co., Ltd., Lindsay, Ont., for the manufacture of blankets, which contract included the "B" labour conditions above referred to.

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of May, 1935, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Goods contracted for	Contractor
Shirts and drawers—light weight.....	Schofield Woollen Mills Ltd., Oshawa, Ont.
Shirts and drawers—light weight.....	Joseph Simpson Sons Ltd., Toronto, Ont.
Marquee tents.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Woollen socks.....	Burritt's Rapids Woollen Mills, Burritt's Rapids, Ont.
Woollen socks.....	Royal Knitting Co., Ltd., Guelph, Ont.
Service trousers.....	Canadian Converters Co. Ltd., Montreal, P.Q.
Service shirts.....	Canadian Converters Co. Ltd., Montreal, P.Q.
Tap soles.....	Anglo Canadian Leather Co., Ltd., Toronto, Ont.
Top lifts.....	Beardmore Leathers Ltd., Toronto, Ont.
Cloth trousers.....	Houde Laroche & Cie., St. Croix, P.Q.
Sweater jackets.....	Regent Knitting Mills Ltd., Montreal, P.Q.
Peak caps.....	Hamilton Uniform Cap Co., Hamilton, Ont.
Blue serge.....	Paton Mfg. Co., Montreal, P.Q.
Drab serge jackets.....	Workman Uniform Co., Ltd., Montreal, P.Q.
Earthenware.....	Sovereign Potters Ltd., Ham- ilton, Ont.
Drab serge trousers.....	The Workman Uniform Co., Ltd., Montreal, P.Q.
Drab serge jackets.....	The Workman Uniform Co., Ltd., Montreal, P.Q.
Aircraft less engines.....	The Fleet Aircraft of Canada Ltd., Fort Erie, Ont.
Forage caps, drab.....	The Hamilton Uniform Cap Co., Hamilton, Ont.

## DEPARTMENT OF PUBLIC WORKS

*Contracts in Group "A" (Construction,  
Remodelling, etc.)*

Alterations and repairs to two passenger elevators and terra cotta wall in the Public Building at Vancouver, B.C. Name of contractors, Messrs. Moncrieff & Vistaunet, Vancouver, B.C. Date of contract, March 1, 1935. Amount of contract, \$3,628.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Carpenters and joiners.....	\$0 80	8
Bricklayers and masons.....	1 10	8
Bricklayers' mortar mixers.....	1 50	8
Electricians (wiremen).....	1 00	8
Electricians' helpers.....	0 50	8
Elevator constructors.....	1 04	8
Elevator constructors' helpers.....	0 73	8
Elevator maintenance.....	0 94	8
Labourers.....	0 45	8
Painters and glaziers.....	0 80	8
Plasterers.....	1 00	8
Plasterers' helpers.....	0 62½	8
Sheet metal workers.....	0 90	8
Sheet metal workers' helpers.....	0 50	8
Structural steel workers.....	1 00	8
Teamster with team and wagon.....	1 00	8
Teamster with team only.....	0 80	8
Teamsters.....	0 45	8
Truck drivers.....	0 50	8
Truck drivers with 1 ton truck.....	1 50	8
Truck drivers with 2 ton truck.....	2 00	8
Truck drivers with 3 ton truck.....	3 00	8
Truck drivers with 4 ton truck.....	3 50	8

N.B.—In any case where, by agreement or current practice, the working hours of any class of workers are less than 48 hours per week, such lesser hours shall not be exceeded on this work.

Interior painting and decorating of the public building at Calgary, Alta. Name of contractors, Messrs. Donaldson and Evans, Calgary, Alta. Date of contract, May 18, 1935. Amount of contract, \$11,892.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Painters and decorators.....	\$0 75	8
Plasterers.....	0 90	8
Labourers.....	0 45	8

Construction of a public building at New Toronto, Ont. Name of contractors, Dickie Construction Co., Ltd., Toronto, Ont. Date of contract, May 9, 1935. Amount of contract, \$75,655.00 and unit prices. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 60	8
Cement Finishers.....	0 70	8
Stonemasons.....	0 90	8
Stonecutters.....	0 87½	8
Brick and hollow tile layers.....	0 90	8
Structural steel workers.....	0 80	8
Ornamental iron workers.....	0 80	8
Hollow metal workers.....	0 75	8
Kalamein iron workers.....	0 75	8
Carpenters and joiners.....	0 80	8
Sheet metal workers.....	0 75	8
Man in charge roofers, felt and gravel	0 70	8
Terrazzo layers.....	0 75	8
Marble setters.....	1 10	8
Tile setters.....	1 07½	8
Lathers (nailed on wood furring).....	0 62½	8
Lathers (tied on metal furring).....	1 00	8
Plasterers.....	1 00	8
Plasterers' helpers.....	0 65	8
Painters and glaziers.....	0 75	8
Plumbers and steamfitters.....	0 85	8
Electricians.....	1 00	8
Labourers.....	0 50	8
Driver, team and wagon.....	1 00	8
Teamster.....	0 50	8
Motor truck driver.....	0 55	8

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Printing and Publishing

WINNIPEG, MANITOBA.—TWO NEWSPAPER PUBLISHERS AND THE WINNIPEG NEWSPAPER PRINTERS' ASSOCIATION.

The circumstances in connection with this agreement are outlined in the article on strikes and lockouts in this issue on page 514.

Agreement to be in effect from March 1, 1935, to February 28, 1937, but if either party gives 60 days' notice before March 1, 1936, the wage scale will become open to adjustment.

Only members of the Winnipeg Newspaper Printers' Association or those given a permit jointly by the parties to this agreement are to be employed, if available.

Hours: 46 per week for day work and 43½ for night work. Middle shift same as night shift, that is 7½ hours per shift, except that from June 1, to September 1, Saturday (or Sunday) 6 hours to be worked by middle shift, making a 42½-hour week for this period.

Overtime: time and one-half.

Wages for machine operators, make-ups, proofreaders, bankmen, machinists and employees engaged in hand composition and distribution: 87 cents per hour for day work and 96.6 cents for night work. Wages for machine learners: from \$15 per week during first three weeks to \$28 during sixth three weeks; learners working night or middle shift \$2 per week over the day rate.

Apprentices limited to one in shop with two and under ten journeymen, and an additional apprentice for each additional five journeymen with a maximum of five in any chapel. Apprentices to serve five years and to be paid from 25 per cent of journeymen's wage during first year to 75 per cent during fifth year.

A joint standing committee to be formed to whom any question as to wage scales or as

to the agreement and any dispute will be referred. If this committee cannot reach a decision, the matter will be referred to a board of arbitration whose decision will be final and binding. No strikes or lockouts to occur during the life of the agreement.

### Transportation and Public Utilities: Water Transportation

MONTREAL, QUEBEC.—HARBOUR COMMISSIONERS OF MONTREAL AND THE INDEPENDENT ASSOCIATION OF HARBOUR EMPLOYEES OF THE PORT OF MONTREAL.

Agreement to be in effect from May 1, 1935, to April 30, 1936, for employees of the grain elevator system, machine shop, guard pier repair shop, shipyard, locomotive shop, construction and maintenance forces, electrical department, cold storage warehouse and power house, fleet and shore equipment.

Hours and overtime: Elevator employees, including conveyor galleries, 10 per day from the opening of navigation to December 15, with time and one-half for overtime; from December 15 to the opening of navigation in 1936, 8 hours per day with time and one-half for work over 9 hours. All hourly men working overtime or on Sundays or legal holidays to be paid time and one-half; if called to work for emergency work on Sunday, at least 5 hours to be paid at overtime rate. Harbour Yard Shop, Locomotive Shop and Guard Pier employees, overtime to be paid after 9 hours and after noon on Saturdays. If called to work for a short time on Sunday on emergency work, these employees to be paid at least for 5 hours at time and one-half; time and one-half also for work on legal holidays. Construction and Maintenance Forces to be paid time and one-half after 10 hours between April 15 and December 15 and after 9 hours in winter. Electrical Department employees, overtime pay after 8 hours to electrical substations and cold storage power house operators and helpers when their regular shift is 8 hours; for journeymen electricians and linemen, time and one-half after ten hours between April 15 and December 15 and after 9 hours in winter. After two years' service, chief operators in electrical substations to get two weeks' holidays with pay and regular shift operators in electrical substations and cold storage power house, one week's holiday with pay. For cold storage warehouse employees, time and one-half after 10 hours. Derricks and Dredges, overtime to be paid after 10 hours and for work on Sundays. Fleet Forces, time and one-half for hourly paid men for work on holi-

days; monthly paid employees on tugs, derricks and dredges, blasting boat, floating crane and coal scow not to receive overtime pay.

Wages: The wage rates in this agreement are in most cases 3 or 4 cents per hour higher than last year. Sub-foremen or leading hands to be paid 5 cents per hour more than the men under their control except when otherwise provided.

Wages per hour: Grain Elevator System and Conveyor System—millwright 66 cents, weighman 60 cents, chief weighman 68 cents, carpenter 51 cents, fireman 50 cents, elevator helper 50 cents, conveyorman 50 cents; other classes from 50 to 65 cents. Harbour Yard Shop and Guard Pier—boilermaker and sheet metal worker, blacksmith, machinist, 65 cents; second class boilermaker 49 cents, second class machinist 53 cents, machinist's helper 42 cents, blacksmith's and boilermaker's helper, 44 cents, carpenter 64 cents, electrician 63 cents, plumber and steamfitter 60 cents, first class painter 60 cents, second class painter 55 cents, labourer 38 cents; other classes of work from 47 to 68 cents. Locomotive Shop—leading hand 72 cents, patternmaker and air brake inspector 68 cents, fitter 65 cents, labourer 38 cents; other classes from 42 to 66 cents. Construction and Maintenance Forces—foreman millwright 75 cents, foreman (construction and maintenance) 68 cents, crane engineer and locomotive engineer 67 cents, pavers and cement finishers 61 cents, pile driver engineer 55 cents, ironworker 53 cents, fireman 45 cents, blockman and labourer 38 cents, water boy 19 cents; other classes from 42 to 64 cents. Electrical Department—foreman lineman 71 cents, subforeman lineman 65 cents, journeyman electrician 63 cents, first class lineman 60 cents, second class lineman 55 cents, shift operator 55 cents, motor truck driver 51 cents; other classes from 38 to 58 cents. Cold Storage Warehouse—warehouseman 53 cents, shipper 48 cents, trucker and checker 43 cents, labourer 38 cents. Cold Storage Power House—operating engineer 63 cents, mechanic 63 cents, fireman 50 cents, operator's helper 45 cents, handyman 42 cents. Fleet Branch—dredge crews: engineer 75 cents, craneman 62 cents, assistant craneman 55 cents, fireman 45 cents, deckhand 40 cents; derrick crews: engineer 65 cents, assistant engineer 53 cents, fireman 45 cents, deckhand 40 cents; drilling and blasting boat:—blaster 51 cents, driller 47 cents, fireman 45 cents, helper 42 cents, powderman 42 cents, deckhand 40 cents; floating crane: captain 71 cents, engineer 65 cents, second engineer 55 cents, fireman 45 cents, deckhand 40 cents; coal barge: helper 42 cents; diver (when diving) 95 cents, assistant diver (when diving) 62 cents; launch runner

55 cents. In all branches covered by the agreement, watchman \$3.50 per shift and \$3.75 when firing.

Wages per month: chief operator at electrical substations \$169; tug crews, \$150 for senior captain, \$132.50 for captain, \$125.50 for engineer, \$60 for fireman, \$48.50 for deckhand and \$42 for cook. Certain classifications employed on tugs if still employed at the end of the navigation season to receive a bonus of \$2.50 for each continuous completed month.

If any difference arises between any employee and a foreman or superintendent, the employee has the right of a hearing before the superintendent and to have the assistance of a fellow employee. If a settlement is not reached, the employee may appeal to the Commissioners.

#### MONTREAL, QUEBEC.—VARIOUS STEAMSHIP COMPANIES AND STEVEDORING COMPANIES AND THE SYNDICATED LONGSHOREMEN OF THE PORT OF MONTREAL.

Agreement to be in effect from April 18, 1935, to March 31, 1936, and thereafter from year to year until notice. This agreement was reached following the strike reported on page 518 of this issue.

The agreement is similar to the one previously in effect which was summarized in the LABOUR GAZETTE, April, 1934, page 373, and August, 1933, page 852, with the following exceptions:

Hours: both parties agree to take such steps as they are able to ensure that the average number of hours per week of the workers shall not exceed 48.

Wage rates: for general cargo, 62 cents per hour for day work (an increase of 3 cents per hour over last year), 72 cents for evening work (an increase of 6 cents) and 82 cents for night work (an increase of 3 cents). For work on special cargoes viz. nitrate, bulk sulphur, full cargoes of china clay and fertilizers, for shifting bunker coal, for handling cargoes in refrigerators which are to be transported at 32° F. or lower, for grain trimming and bagging, 15 cents per hour over the general cargo rates. (Previously the difference was 11 cents extra for day work and night work and 12 cents extra for evening work for these cargoes.) A maximum weight of 1,500 pounds per slingload has been established for handling by a regular gang of 16 men, so that extra men are to be employed, by mutual arrangement, in fair proportion to any increases above this in the slingloads. Reductions have also been made in the number of bales per sling of pulpwood and the number of boxes per sling of tinplate.

**MONTREAL, QUEBEC.—VARIOUS STEAMSHIP COMPANIES AND STEVEDORING COMPANIES AND THE INDEPENDENT ASSOCIATION OF CARPENTERS AND SHIPLINERS OF THE PORT OF MONTREAL.**

Agreement to be in effect April 23, 1935, to March 31, 1936, and thereafter from year to year until notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, April, 1934, page 373, and August, 1933, page 853, with the following exceptions:

Hours: both parties agree to take such steps as they are able to ensure that the average number of hours per week for workers shall not exceed 48.

Wage rates for general work are 62 cents per hour for day work, 72 cents for evening work and 82 cents for night work (increases of 3 cents, 6 cents and 3 cents respectively over the rates previously in effect. For work in holds of steamers in which bulk sulphur or bulk fertilizer has been stowed and when the old wood is being used in whole or in part, 10 cents per hour over regular rates. (Previously the extra pay for this class of work was 11 cents, 12 cents and 11 cents per hour for day, evening and night work respectively.)

**VANCOUVER, B.C.—A CERTAIN STEAMSHIP COMPANY AND THE COASTWISE LONGSHOREMEN AND FREIGHT HANDLERS ASSOCIATION.**

The agreement covers the loading and unloading of coastal steamships and car work.

Agreement signed following strike reported on page 518 of this issue. Agreement to be in effect from May 29, 1935, to May 28, 1936. Either party desiring any change in conditions and rates of pay to give two weeks' notice and any new agreement reached to be confirmed in writing.

Only union members to be employed and all men to be despatched through the union hall. The union reserves the right to refuse to handle unfair cargo.

Hours: all time between 8 a.m. and 5 p.m. except noon hour and except Sundays and holidays to be paid at straight time. All overtime including all work on Sundays and holidays to be paid at overtime rates.

Wages: all labour 80 cents for straight time and \$1.00 for overtime, double winch drivers 90 cents for straight time and \$1.10 for overtime. The meal hour may be advanced or deferred one hour, in which case the men will be paid for their regular meal hour \$1.00 for all labour and \$1.10 for double winch drivers for straight time, and \$1.25 for all labour and \$1.35 for double winch drivers for overtime. Wages for all labour on car work: 60 cents straight time and 90 cents overtime.

A minimum of two hours pay, straight or overtime, to be paid for any work done on any one job except if discharged for cause.

**VANCOUVER, B.C.—A CERTAIN STEAMSHIP COMPANY AND THE SEAFARERS INDUSTRIAL UNION.**

Agreement reached following strike reported on page 518 of this issue.

Agreement to be in effect from May 29, 1935, to May 28, 1936. When any change in conditions and rates of pay is desired by either party, two weeks' notice to be given and any new agreement reached to be confirmed in writing.

Only union members to be employed, except officers, etc. The right is reserved to refuse to handle unfair cargo.

Hours: for desk and engine room, 9 per day, 54 per week, except on steamers which are at present on the 8 hour day basis. When in dry dock, the hours to be 44 per week. One full day off in seven.

Overtime: wage rate for overtime 50 cents per hour, except steaming time when the rate will be 25 cents per hour with certain exceptions.

A joint committee to be formed to inquire into any grievances.

**Quebec Labour Agreements Extension Act**

The following agreements in the Province of Quebec, not previously mentioned in this monthly article have been made obligatory by Orders in Council and the terms so made obligatory printed in the LABOUR GAZETTE as follows:

QUARRYMEN AND CUT STONE WORKERS (OTHER THAN GRANITE AND MARBLE), April, page 322.

MEN'S AND BOYS' CLOTHING WORKERS, PROVINCE OF QUEBEC, April, page 323 (correction); May, page 426 (amendment).

GLOVE MAKERS, PROVINCE OF QUEBEC, May, page 421.

BUILDING TRADES, THREE RIVERS, May, page 421.

BUILDING TRADES, JOLIETTE, May, page 423.

BUILDING TRADES, MONTREAL, May, page 424, and amendment in this issue, page 532.

BUILDING TRADES, QUEBEC, May, page 426 (amendment).

BAKERS, HULL, this issue, page 531.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, MAY, 1935

### Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month was slight, the cost of the weekly family budget being unchanged, the lower cost of fuel being offset by a slight advance in rent and in the cost of foods, while the Dominion Bureau of Statistics index number of wholesale prices was fractionally lower.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.52 at the beginning of May as compared with \$7.50 for April. Price changes were of a minor nature, the most important advances occurring in the cost of beef, pork and butter, while the largest declines occurred in the cost of eggs, bacon and potatoes. Comparative figures showing the cost of this budget for certain previous dates are: \$7.53 for May, 1934; \$6.67 for March, 1933 (the low point in recent years); \$11.17 for May, 1930; \$11.29 for May, 1926; \$10.22 for May, 1922; \$16.92 for June, 1920 (the post war peak); and \$7.43 for May, 1914. Including the cost of fuel and rent with that of foods the total budget was \$15.97 at the beginning of May the same as for April as compared with \$15.96 for May, 1934; \$15.41 for June, 1933 (the low point in recent years); \$21.49 for May, 1930; \$21.54 for May, 1926; \$20.57 for May, 1922; \$26.92 for July, 1920 (the post war peak); and \$14.21 for May, 1914. The cost of fuel was slightly lower mainly because of a seasonal fall in the price of anthracite coal. Rent was somewhat higher due to advances in certain cities chiefly in Ontario.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1926 as 100, was slightly lower at 72.3 for May as compared with 72.5 for April, due to a considerable extent to lower prices for grains. Comparative figures for certain earlier dates are: 71.1 for May, 1934; 64.5 for February, 1933 (the low point in recent years); 93.4 for May, 1929; 100.2 for May, 1926; 164.3 for May, 1920 (the post war peak); and 64.2 for May, 1914.

In the grouping according to chief component materials the vegetable and vegetable products group was down from 69.4 in April to 68 in May, due mainly to lower prices for grains and flour, while the non-ferrous metals groups was up from 67.9 in April to 70.7 in May. Other groups in this classification were little changed.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of May of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases

or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated

from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1935\*

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18%; Clothing 18%; Sundries, 20%.

### Retail Prices

Beef prices have advanced gradually in nearly all localities since the beginning of the year. In May sirloin steak averaged 23.9 cents per pound as compared with 22.6 in April and 20 cents in January. Rib roast averaged 18 cents per pound in May, 17.2 cents in April and 15.5 cents in January. Fresh pork also was higher in May than in the previous month, the figures being 20.4 cents per pound as compared with 20 cents. Breakfast bacon was down in the average from 31.2 cents per pound to 30.5 cents.

Egg prices were again generally lower, the decline having continued month by month since the beginning of the year. In May the Dominion average price for fresh eggs was 22 cents per dozen as compared with 24.3 cents in April and 37 cents in January. Cooking eggs averaged 18.6 cents per dozen in May, 20.3 cents in April and 29.5 cents in January. Prices now average lower in Ontario and the prairie provinces than in British Columbia and the Maritimes. Milk was seasonally lower in a few localities but the average price was unchanged at 10.3 cents per quart. The price of creamery butter was one-half cent per pound higher in the average at 28.6 cents per pound. Increases, however, occurred mainly in Ontario and in the Western provinces. Onions advanced from an average price of 4.1 cents per pound in April to 4.6 cents in May, while potatoes were slightly lower at an average price of 76.6 cents per ninety pounds.

The price of anthracite coal was down from an average of \$15.06 per ton in April to \$14.58 in May, as a result of seasonal decreases in several cities. Bituminous coal, coke and hard wood prices also declined but to a less important extent than that in anthracite coal. Increases in rent were reported from several

(Continued on page 596)

**COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN  
TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA**

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

localities and the Dominion average was slightly higher.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$16; Windsor, \$16.50; Charlottetown, \$12.90; Moncton, \$16; Saint John, \$14; Quebec, \$14.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$15.50; Montreal, \$13.25; Ottawa, \$15.25; Kingston, \$16; Belleville, \$15.50; Peterborough, \$15.50; Oshawa, \$14.25; Toronto, \$14; St. Catharines, \$14.75; Hamilton, \$13.50; Brantford, \$16.75; Galt, \$16.50; Windsor, \$12.50; Sudbury, \$17.50; Cobalt, \$17.75; Timmins, \$19.50; Port Arthur, \$16; Fort William, \$16; Winnipeg, \$19.50.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices declined considerably during the month, influenced it was said by improvement in crop prospects in Canada and the United States. No. 1 northern cash wheat, Fort William and Port Arthur basis, was down from

an average price of 87.6 cents per bushel in April to 85.7 cents in May; western oats from 42.2 cents per bushel to 40.8 cents; rye from 51.7 cents per bushel to 46 cents; and barley from 45.9 cents per bushel to 42.3 cents. Flour at Montreal was 40 cents per barrel lower at \$5.30. Raw rubber at New York advanced during most of the month but turned downward following the decision of the Supreme Court declaring the National Industrial Recovery Act invalid. The average price for Ceylon rubber was 12.1 cents per pound in May, 11.6 cents in April and 13.9 cents in May, 1934. Granulated sugar at Montreal was unchanged at \$4.90 per cwt. In live stock, cattle prices advanced early in the month and then reacted, influenced by the demand for supplies from the United States and its subsequent falling off. Choice steers at Toronto were up in the average from \$7.11 per hundred pounds to \$7.20 and at Winnipeg from \$6.29 to \$6.82. Hogs and lambs also were higher, influenced it was said by relatively small supplies. The price of the former at Toronto advanced from \$8.74 per

hundred pounds to \$9.39 and of the latter from \$7 per hundred pounds to \$8.36. Stocks of creamery butter in cold storage at the beginning of May were down to 3,466,000 pounds from 6,831,000 on the first of April and the price at Toronto averaged 23.2 cents per pound in May and 25 cents for April. The movement of eggs into storage continued but stocks on May 1st were about 28 per cent less than on the same date last year. The price at Toronto averaged 20.3 cents per dozen in May and 19 cents in April, while at Montreal the figures were 22.1 cents in May and 21.3 cents in April. Visible supplies of raw

cotton were lower at the end of May than at the beginning and the price at New York advanced from an average of 11.8 cents per pound in April to 12.3 cents in May. Raw wool at 14 cents per pound was one cent per pound higher in May than in April. The price in May, 1934, was 20.5 cents. In non-ferrous metals electrolytic copper at Montreal advanced from an average of \$8.25 per hundred pounds in April to \$8.72 in May, tin at Toronto from 56.5 cents per pound to 57.3 cents and silver at New York from 68.4 cents per ounce to 74.5 cents.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and certain other countries. The authorities for the wholesale prices index numbers are named in all cases. The latest table showing cost of living and wholesale prices index numbers for various countries appeared in the April issue of the LABOUR GAZETTE.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 87.5 for April, an increase of 0.7 per cent over the previous month's level. This increase extended to all groups except coal, cotton, chemicals and oils and miscellaneous commodities.

The *Statist* index number, on the base 1867-1877=100, was 84.1 at the end of April, an advance of 1.4 per cent over the March level. Advances were recorded in all groups except "animal food" which was unchanged. The principal changes were increases of 4.1 per cent in the "sugar, coffee and tea" group, 2.2 per cent in vegetable food and 2.1 per cent in textiles.

COST OF LIVING.—The Ministry of Labour index number, on the base July 1914=100, was 139 at May 1, showing no change from the previous month. The food group was slightly lower due to reductions in the prices of milk in some districts. The fuel and light group also showed a small decrease, while rent advanced slightly.

### France

WHOLESALE PRICES.—The index number of the General Statistical Office, on the base July 1914=100 (gold index) was 70 for April, remaining unchanged from the March level. There was a slight advance in foods, the minerals and metals group and textiles, while miscellaneous commodities were lower.

### Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913=100, was 100.8 for April, an increase of 0.1 per cent for the month. Agricultural products and colonial products were higher, while industrial materials declined slightly. The greatest change in any group was an increase of 4.1 per cent in non-ferrous metals.

COST OF LIVING.—The official index number, on the base 1913-1914=100, was 122.3 for April, an increase of 0.1 per cent for the month. There were no marked changes, advances in food, clothing and miscellaneous commodities being partly offset by a decline in the fuel and light group.

### Italy

WHOLESALE PRICES.—The index number of the Provincial Council of Corporate Economy, Milan, on the base 1913=100, was 289.44 for March, an advance of 2.8 per cent for the month. The advance was general, extending to all groups.

### United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 80.1 for April, an increase of 0.9 per cent for the month, and reaching the highest monthly average since November 1930. The increases for the month were in farm products, foods, hides and leather products and in the metals and metal products groups.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is the sum total of the prices per pound of 96 commodities of common consumption was \$9.7965 at May 1, an increase of 1.4 per cent over the April 1, level. This brings this index number to the highest point reached since

December 1, 1930. The advance for the month was due chiefly to a substantial increase in the hides and leather group and smaller increases in the textiles and metals groups. Foodstuffs on the whole were unchanged.

Dun's index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities, was \$176.231 at May 1, a rise of 2.2 per cent for the month due to increases in the breadstuffs, meat, dairy and garden

produce and clothing groups, while the "other food," metals and miscellaneous groups were lower.

**COST OF LIVING.**—The index number of the Department of Labour and Industries, Massachusetts, of the cost of living in Massachusetts, on the base 1913=100, was 138 for April, showing no change from the March level. Increases in the food and clothing groups were offset by a decline in the fuel and light group; shelter and sundries were unchanged.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

### Master and Servant—Liability for Injury

THE plaintiff, who was manager of defendant's farm, was injured while operating defendant's tractor-binder by being caught in a universal joint on a revolving shaft which connected the tractor to the grain binder. The tractor was being used at the time without a platform beneath the driver's seat and over the revolving shaft. Plaintiff alleged, *inter alia*, that the defendant was negligent in requiring or permitting him to operate the machinery without having a guard over the shaft. Plaintiff's testimony was that defendant told him the wooden platform which was sometimes used on the tractor could not be used when the tractor was connected with the binder because it would be in the way of the lever, and that defendant took it off the tractor and put it on the trailer. Defendant's testimony was that he told the plaintiff to put the platform on but that the latter said he did not want it. The trial judge, who tried the action without a jury, stated that he found on the facts for the plaintiff, and awarded him \$6,000 and costs.

In the Saskatchewan Court of Appeal, the Appeal was allowed. The court held that the trial judge's statement and judgment must be taken to mean that he accepted the plaintiff's testimony and accordingly found that the defendant was negligent in not providing proper appliances to protect the plaintiff against unnecessary risks; it followed, therefore, that it was immaterial whether there was an opening in the platform for the lever or not; if there was an opening the defendant should have permitted the plaintiff to put the platform on the tractor, and if there was not an opening and it could not be used for this reason, the defendant should either have altered it so that it could be used or should have provided some other guard to cover the revolving shaft so that the plaintiff would not be subjected to unnecessary danger. Having failed in his duty, ruled the court, the defendant was guilty of negligence and was liable for the damages caused by such neglect. The defence of *volenti non fit injuria* had no application.

The appeal was dismissed with costs.

*Wendel versus Wall* (Court of Appeal, Saskatchewan), *Western Weekly Reports*, 1935, vol. 1, page 163.

### Liability for Fatal Accident to Man on Relief While Working for Municipality

A workman on relief, in order to continue receiving such relief, was required to do certain work for the municipality (the defendant). He was employed with others on municipal work in clearing land. While engaged in felling trees, he sustained injuries resulting in his death. When the tree fell, it remained attached to the stump from which it was severed by one of the others employed. The tree then rolled, striking the workman on the head. He died subsequently from the effects of this blow.

The trial judge found that the man's death was caused by the negligence of the defendant (the municipality) or those for whom it was liable.

An appeal was entered by the defendant against the ruling of the trial judge, who had adjudged that the defendant pay damages under the Fatal Accidents Act (R.S.O. 1927, ch. 183) in the sum of \$2,400 (\$1,000 to the widow and \$1,400 to the infant daughter of the deceased). The plaintiff cross-appealed that the damages awarded were inadequate.

In the Court of Appeal, the findings of the trial judge were sustained. The Chief Justice was of the opinion that, on the facts, the deceased also was, when injured a servant of the defendant and that sec. 120 of The Workmen's Compensation Act, R.S.O. 1927, ch. 179, which provides that "a workman shall hereafter be deemed not to have undertaken the risks due to the negligence of his fellow workmen," applied to the present case.

The defendant's appeal was dismissed with costs, and the plaintiff's cross-appeal was allowed with costs, the damages being increased to \$3,600.

*Humphrey's versus the city of London*, *Ontario Weekly Notes*, No. 20, page 250.

**Workman Awarded Wage Rate Established  
under Collective Labour Agreements  
Extension Act (Quebec).**

Paralleling a previous case (dealt with in the LABOUR GAZETTE, March, 1935, page 306), a painter in Montreal brought an action against his employer for arrears of wages of \$121, representing the difference between the rate (25 cents per hour) actually paid him and the rate (60 cents per hour) established by a collective agreement under the Collective Labour Agreements Extension Act. The defendant claimed that the Act did not apply to him; that he was not a building contractor, building only for himself on his own properties; and that the plaintiff was a casual employee, inexperienced, and not a painter.

However, the Superior Court ruled that:

1. A proprietor who builds houses on his own land, for his own account, in the expectation of selling them at a profit, is engaged in the building industry and is subject to the Collective Labour Agreements Extension Act. It is immaterial that he does not contract to do work for others.

2. Where such proprietor admits that no contracts were entered into for the building of his houses but declares that he did the work personally through workmen employed and supervised by him, he cannot avail himself of the exception provided in section 5 of Order in Council No. 1780, which exempts from the operation of the agreement fixing wages payable *inter alia* to painters at sixty cents per hour contracts granted and signed before the adoption of the said Order in Council.

3. A plea of incompetency of a painter cannot be upheld, if such workman is the bearer of a certificate issued by the *Syndicat des Peintres* declaring that after examination it was found that he had the necessary competency to exercise the general trade of painter (sections 8 and 10 of the Statute 24 Geo. V, c. 56).

Judgment was issued for \$121 in favour of the plaintiff.

*Bertrand versus Forest* (Quebec) 1935. *Rapports judiciaires de Québec, Cour Supérieure*, vol. 73, page 154).

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### Monthly Summary

INDUSTRIAL employment in Canada at the beginning of June showed decided expansion, according to data tabulated by the Dominion Bureau of Statistics from 9,270 firms, each employing a minimum of 15 persons, the data being representative of all industries except agriculture, fishing, hunting and highly specialized business. The reporting firms had 915,792 employees on June 1, as compared with 893,088 in the preceding month. This advance, however, was smaller than the average gain between May 1 and June 1 in the years since 1920. The index of employment (with the average for the calendar year 1926 as the base equal to 100) stood at 97.6 on June 1, 1935, as compared with 95.2 on May 1, 1935, and 96.6 on June 1, 1934. At the beginning of June in the preceding thirteen years, the index was as follows:—1933, 80.7; 1932, 89.1; 1931, 103.6; 1930, 116.5; 1929, 122.2; 1928, 113.8; 1927, 107.2; 1926, 102.2; 1925, 95.6; 1924, 96.4; 1923, 98.5; 1922, 90.3, and 1921, 87.7.

At the beginning of June, 1935, reports were forwarded to the Department of Labour by 1,755 labour organizations with a total of 164,320 members. Of these, 26,078 or a percentage of 15.9 were unemployed as compared with percentages of 17.0 at the beginning of May, 1935, and 18.5 at the beginning of June, 1934.

Reports received by the Department of Labour from the offices of the Employment Service of Canada showed that the number of placements effected each day during May, 1935, was greater than that recorded during the previous month but considerably below the corresponding average for May, 1934, the major gains under the first comparison being in construction and maintenance and services, and the greatest decline under the second in construction and maintenance. Vacancies in May, 1935, numbered 30,847, applications 52,251 and placements in regular and casual employment 28,672.

In retail prices the cost per week of a family budget of staple foods, fuel and lighting, and rent was \$15.95 at the beginning of

June as compared with \$15.97 for May, fuel being somewhat lower while foods advanced slightly. Comparative figures for earlier dates are \$15.78 for June, 1934; \$15.41 for June 1933 (the low point in recent years); \$21.44 for June, 1930; \$21.74 for June, 1921; \$26.92 for July, 1920 (the post war peak); and \$14.27 for June, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1926 as 100, was down from 72.3 in May to 71.5 in June. These figures compare with 72.1 for June, 1934; 63.5 for February, 1933 (the low point in recent years); 93.4 for June, 1930; 105.3 for June, 1921; 164.3 for May, 1920 (the post war peak); and 64.4 for June, 1914.

The table on page 602 gives the most recent statistics available reflecting industrial conditions in Canada. The index of the physical volume of business in May was at the highest level reached since the end of 1930. The advance as compared with the previous month was 5 per cent, due chiefly to increases in the manufacturing group and in electric power output. Mineral production was lower and construction and distribution were little changed. In the latter group trade employment, imports and exports were higher, while car loadings declined. The business index was 3½ per cent higher in May than in the same month last year, all of the principal factors having advanced. Information available for June shows wholesale prices lower than in May and lower than in June, 1934, while in the same comparisons employment, car loadings, contracts awarded, building permits and sugar manufactured were higher.

During June there were on record fourteen strikes and lockouts involving 4,997 workers, causing a time loss of 57,081 man working days, as compared with 22 disputes during May, involving 5,189 workers with a time loss of 32,357 working days. As in May, most of the disputes involved relatively small numbers of employees for short periods of time but strikes of longshoremen at Vancouver, water transport workers on the British Columbia coast (sympathetic), loggers in the Nipigon district of Ontario, and salmon fishermen

(1) Calculated from yields of Ontario bonds.

(2) For group figures see articles elsewhere in this issue.

(4) Figures for end of previous month.

(5) Figures for four weeks ending June 29, 1935 and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending June 15, May 18, and April 20, 1935, June 16, May 19, and April 21, 1934.

(7) MacLean's Building Review.

in the Gulf of Georgia involved comparatively large numbers of employees and caused considerable time loss. In June last year there were twenty-four disputes involving 3,184 workers with a time loss of 31,689 working days, the most important dispute being the strike of metal miners at Flin Flon, Man. Of the fourteen disputes in June, five were recorded as terminated, one resulting in favour of the employer concerned while compromise settlements were reached in four cases. The disputes untermated at the end of the month numbered nine and involved upwards of 4,000 workers. These figures do not include those strikes and lockouts in which employment conditions were no longer affected, but which had not been called off or definitely declared terminated by the unions involved.

#### **Labour Legislation enacted by Dominion Parliament.**

The legislation of special interest to labour enacted by the Parliament of Canada during its recent session is summarized in this issue of the *LABOUR GAZETTE*. In accordance with the program for legislative action indicated by the Prime Minister in his radio addresses in January, 1935, laws were passed to provide for a National Economic Council to advise the Government, for unemployment insurance, for federal regulation in some measure of hours of labour and a weekly rest day in industrial undertakings, and for the establishment of minimum wages in trades where wages appear unduly low. Money was appropriated to aid in a housing program, for the extension of public works and for unemployment relief. Works to which the Dominion Government contributes financial assistance were brought within statutory regulation as to fair wages and hours of labour. Certain violations of provincial or Dominion labour laws, such as minimum wage and hours legislation, were made indictable offences.

A Trade and Industry Commission was provided for to take over the administration of the Combines Investigation Act and to deal with unfair trade practices. Much of this legislation was based on draft conventions of the International Labour Conference or recommendations of the Royal Commission on Price Spreads.

#### **Review of social welfare in Canada**

Under the title, "Canadian Cavalcade, 1920-1935," the Canadian Council on Child and Family Welfare has issued a review of social welfare activities during that period. This survey constitutes not only a record of the Council's progress in the greatly enlarged field of social

service, but it is also a cross-section of Canadian life during the post-war and depression years with old and new problems accentuated by the stress of economic conditions.

It is pointed out that the organized Council held its first conference in Montreal, as the Canadian National Council on Child Welfare, September 29 and 30, 1921; was given a grant by the federal authorities in that year; and initiated its first active program. The name was shortened to the Canadian Council on Child Welfare and in 1923, a small office was opened in Ottawa. Full time executive staff was appointed as of date January 1, 1926, and the Council then embarked on intensive work, carrying on in the child welfare field only until November 1929. Then because of widening contacts and problems, on recommendation of a small conference of interested executives who had met in Ottawa in June, the Council agreed to expand in name and service into the Canadian Council on Child and Family Welfare.

"Events have moved rapidly since then," states the report, "and the intensive pressure in public dependency has brought into strong outline the urgency of adequate, well-planned organization of both public and private welfare services. In the last five years the Council has attempted to advise in these problems with consequent, constant shifting in service and emphasis, and more and more emergence into the whole field of social work and generalized organization in community planning. Its initial fields of major interest—maternal and child hygiene, child protection, French-speaking services, and later family welfare—have been adjusted to provide for four more divisions—those on delinquency services, leisure time activities, community organization and public welfare administration. Its budget has expanded to one of \$40,000 for the current year, and its staff to provision for five senior executives serving specialized fields, two part-time consultants, and a junior staff for office administration."

In keeping with this enlarged program of major interests, the Board of Governors now recommend a further change in name to "The Canadian Welfare Council."

#### **Labour Research Service for Trade Unions**

With a view to providing trade unions with a research service, the Workers Educational Association of Ontario has recently organized a Labour Research Institute. This Institute is composed of trade unions with the W.E.A. represented on its Management Board.

In describing its service the Institute emphasizes the need for scientific examination of legal problems which confront trade unionists

and states that the development of the Institute will make available the following benefits:—

(1) A legal research committee will give their services free.

(2) The trade unions will provide secretarial services and so on and hope to furnish financial assistance for one or more full-time research workers as the developments justify themselves to trade unionists.

(3) The legal research committee will issue ten monthly bulletins on problems in industrial and trade union law. These bulletins will be regular. Additional copies of the bulletins may be obtained by trade union members at a nominal cost.

(4) The legal research committee will be prepared to receive and discuss suggestions for legal research on any industrial legal problem sent in to them by locals affiliated with the institute and, if the problem is of wide and general interest to trade unions, a special bulletin may be issued if necessary.

(5) Affiliated trade unions will receive from the legal research committee confidential information of an objective nature explaining the meaning and implications of any labour legislation which may be introduced.

The first bulletin issued by the Institute is entitled "The International Labour Organization" and is the result of a study by N. A. M. MacKenzie, Professor of Public and Private International Law in the University of Toronto.

#### **Convention call of Trades and Labour Congress**

The convention call of the Trades and Labour Congress of Canada for its 51st annual meeting at Halifax, commencing September 16th, has recently been issued. Drawing attention to the important social legislation enacted by the Dominion and provincial governments the "call" states in part:

"The past year has been an eventful one in the annals of the trade union movement in this Dominion. Spurred on by public indignation against unfair industrial practices and unsatisfactory social conditions resulting therefrom, against most of which organized labour has been vigorously protesting for many years, the Federal Government and several provincial legislatures have enacted a number of measures of a remedial character based upon the report of the Royal Commission on Price Spreads, etc.

"This year's convention affords a valuable opportunity to collectively review this new legislation and reach decisions as to how it can be made to most effectively benefit workers."

#### **Unemployment recommendation of C.M.A. Committee**

Reporting to the 64th annual general convention of the Canadian Manufacturers Association held at Hamilton recently, the Industrial Relations Committee of that body reviewed the Dominion and provincial programs of social legislation. After outlining its representations on unemployment insurance (which was made before the Senate Committee) the report deals with the matter of unemployment generally and declared:

"that there should be inaugurated along with the unemployment insurance scheme, a supplementary assistance or relief scheme participated in by municipalities and the provinces as well as the Dominion, to carry on where unemployment insurance leaves off. Without attempting to say exactly how such a scheme should be worked, your Committee ventures to lay it down that the primary responsibility must be put squarely on the municipalities in the first place and the provinces in the second place, the Dominion coming in only as a last resort."

#### **Convention on labour legislation and social insurance**

A special meeting of the American Association for Labor Legislation was held in Montreal on June 13-15. The membership in this Association from its beginning has extended over both Canada and the United States but this was the first formal meeting which had been held in Canada.

The session on June 13th was held jointly with the Social Action Section of the National Conference on Social Work which was meeting in Montreal at the same time. An address was given at this session on "Health Service and Health Insurance," by Dr. H. M. Cassidy, Director of Social Welfare of the Province of British Columbia. The proceedings on the following day were devoted to a discussion of the subject of Social Insurance in Canada and the United States, addresses being given by Mr. J. S. Woodsworth, M.P., on "Programme and Prospects in Canada"; by Mr. W. J. Couper, formerly Deputy Minister of Labor of Connecticut, on "Special Problems of Federal Administration"; and by Mr. Tom Moore, President of the Trades and Labor Congress of Canada, on "Canada's Attitude towards Unemployment Insurance."

Another joint session with the Social Action Section of the National Conference on Social Work followed on June 15th, at which the subject under consideration was that of "International Labour Standards." Addresses were given at this meeting by Mr. Leifur Magnusson, Director of the Washington Branch of the

International Labour Office, on "Why they are necessary" and by Mr. Tom Moore on "How they can be made effective."

### **Nineteenth International Labour Conference**

The nineteenth Conference of the International Labour Organization concluded on June 25 with the adoption of a number of important Draft Conventions and resolutions. Among the main items on the agenda was the question of reduction of hours of work in public works, iron and steel, building and construction, glass bottle manufacture and coal mines.

The Conference adopted by 79 votes to 30 a general Draft Convention embodying the principle of a forty-hour week, with the maintenance of the standard of living, it being contemplated that this principle would be applied to particular industries by separate conventions. A separate Draft Convention was also adopted for the application of this principle to glass-bottle works but proposed Draft Conventions for the application of the forty-hour week to public works, building and construction, iron and steel works and coal mines failed to obtain the necessary two-thirds majority in the Conference and will come up again next year.

A complete report of the proceedings is given elsewhere in this issue.

### **Unemployment and employment among women**

In an article entitled "Unemployment and Employment Among Women," which appeared in a recent issue of the *International Labour Review*, Henri Fuss, Chief of the Unemployment, Employment and Migration Section, of International Labour Office, estimates that there was a total of approximately four million unemployed women throughout the world. The writer in describing the restrictions imposed on the employment of women in various countries states:

"Unemployment is not a problem more especially concerning men than women. It affects workers of both sexes, and it is therefore surprising that the idea should have presented itself of trying to remedy men's unemployment by aggravating women's. This, however, is the tendency indicated by a variety of measures taken recently in several different countries."

He then analyses the reasons for the employment of women, and studies possible methods of achieving a general reduction of unemployment, among men and women alike. His conclusion is that the present difficulties are merely transitory, and that as soon as economic equilibrium has been re-established on

firmer foundations of social justice, there will be work for all, both men and women.

### **Labour Legislation in United States**

The new United States National Labour Relations Bill (LABOUR GAZETTE, April, page 343) has passed both the Senate and the House of Representatives and has been signed by the President. Designed to protect workers in organizing and bargaining collectively, the bill would declare certain activities of employers "unfair labour practices," and create a National Labour Relations Board to prevent such practices. Briefly, these unfair practices are held to be:—

"To interfere with, restrain, or coerce employees in organizing or bargaining; to dominate or interfere with the formation of unions; to discriminate against workers for union membership; to discharge or discriminate against an employee for filing charges against the employer; to refuse to bargain collectively with representatives of the employees."

President Roosevelt's program for social security (LABOUR GAZETTE, February, page 100, and April, page 343) has also cleared Congress. As approved by both Houses, it provides for immediate state-federal old age relief; tax on employers and employees for old age insurance; and state federal payments for child welfare, the blind and other purposes.

### **Unemployed youth in the United States**

More than one-third of the high-school and college graduates in the United States between the ages of 18 and 29 were unemployed in July, 1934. It is estimated that of the 6,800,000 employable high-school and college graduates in this age group 2,450,000 were out of work. The younger element, those between 18 and 24, were most affected. Within this group 44 per cent of the high-school graduates and 35 per cent of the college graduates were out of work. Approximately 300,000 persons on relief in October, 1934, had never held a job. Nine out of every ten of these were youths between the ages of 16 and 25.

These facts were revealed in a report to the United States Senate by the Secretary of Labor in response to a Senate resolution which requested an estimate of the extent of unemployment among youth and suggestion for meeting the problem.

To meet this problem, President Roosevelt, on June 26, signed an Executive Order allocating \$50,000,000 from work relief funds to provide educational and vocational opportunities for approximately 500,000 young American boys and girls. The Order created a National

Youth Administration under the direct supervision of Aubrey Williams, Assistant Federal Emergency Relief Administration Administrator, whose purpose will be to formulate a unified program to school and find employment for those between 16 and 25 years of age. Employment for such persons will be sought in private industry. Meanwhile the organization will train young people for industrial, technical and professional employment opportunities; will provide for continuing attendance at high school and college, and will plan work relief projects designed to meet the needs of youth.

The annual report of the directors of the Quebec Pulp and Paper Safety Association has recently been made public. According to this publication, the very substantial increase in employment in the pulp and paper industry during the past year has resulted in a general increase in the number of accidents. In view of the fact that one of the most serious problems confronting the association is the number of accidents occurring in wood operations, more attention has been given to this section of the work than to the mills.

### Measures of Dust Control

Dust as a cause of disease and measures for its control, has recently been made a subject of study by W. J. McConnell, M.D., assistant medical director, Metropolitan Life Assurance Company. According to this report there are very few industrial processes in which dust is not given off and rarely is there found, in the air of a plant environment dust of a single element but rather a mixture of dusts whose physical and chemical natures determine their harmfulness.

Following an analysis of various types of dust, Dr. McConnell proceeds to discuss methods of dust control. In general, he states, preventive methods include the substitution of harmless or less harmful substances for harmful ones; the segregation of dust-producing operations; enclosure of dusty processes; local exhaust ventilation and increased general ventilation; wet methods for dry; protective devices; good housekeeping; shop education; and medical supervision. He found that segregation of dusty operations usually can be done without loss in efficiency, thus limiting the exposure to a minimum number of workers. Those engaged in non-dusty operations, and even office employees, are often needlessly exposed to dust, owing to failure to isolate dusty processes.

However, the preferred method of dust control, is to entrap the dust at its source of origin by localized exhaust and dispose of it in such a manner as to prevent its dispersion.

He considered that the effectiveness of dust control measures in preventing diseases produced by dusts can be determined only by careful physical examinations of the workers so exposed under the guidance of competent medical supervision. In this respect he outlines the essential features in medical supervision of workers including the establishment of a medical department, the routine examination of all applicants for employment (with X-ray of chest), rating and placement of applicants, periodical physical examinations and provision for the disabled.

Industrial injuries to women compared with injuries to men has been studied by the Women's Bureau of the U.S. Department of Labour. According to a bulletin recently published, women's injuries decreased less than men's. While injuries to women are still absolutely and relatively fewer than those of men, they are an increasing proportion of total injuries. In the case of both men and women, (1) cuts and lacerations and (2) bruises, contusions, and abrasions were the most frequent injuries. A much larger proportion of women than of men suffered from infections.

A much greater proportion of injuries to women than to men are indicated in the group of persons 20 years of age or under. In each State the women under 21 years had more injuries than any other women's age group. The proportion of injuries to these young women is greater than can be accounted for by their number among all gainfully occupied women. On the other hand, women over 45 years of age, from these statistics, seem to be particularly good accident risks. Falls are the most frequent source of injury to women over 21, while machinery causes most of the accidents to girls under 21.

Manufacturing outranked other industries in number of injuries both to women and to men, and generally had a larger proportion of women's accidents than of men's. Clerical, professional, and other services were important groups in number of women's injuries; construction and mining were important in men's injuries.

Ontario government investigation of a plan for hospital insurance for all residents of the Province was urged by the Ontario Mayors' Association at the closing session of a two-day convention held recently in Kitchener. According to the proposal advanced by the mayors, no one earning less than \$10 per week would contribute to the fund. The proposal included a scale of premiums ranging from \$1.04 to \$9.36 a year for persons earning \$10 to \$100 a week. For persons earning more than \$100 a week it was suggested the Government could work out a fair scale of contributions.

## RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

**A**PPPLICATIONS for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were received in the Department of Labour recently as follows:—

(1) from certain employees of various metal mines in the Bridge River District in British Columbia. The employees concerned, approximately 600 underground and surface workers, request increased wages and a general improvement in working and living conditions. The mines involved are the Pioneer Gold Mines of British Columbia, Limited, the Bralorne Mines, Limited, the Bradian Mines, Limited, the Wayside Consolidated Gold Mines, Limited, and the Congress Gold Mines, Limited. A strike had occurred in these mines on May 5, and, following discussions with the provincial authorities, a scale of wages proposed by the Minister of Mines and Labour for British Columbia was accepted tentatively on May 23rd by the Pioneer, Bralorne and Bradian Mines and their employees, pending reference of the dispute to a Board of Conciliation and Investigation under the federal Industrial Disputes Investigation Act. Later the Wayside Consolidated Gold Mines, Limited, and their employees, made a similar arrangement, and operations were resumed in this mine early in June. The Congress Gold Mines, Limited, employs but a small number of men, and these men were still on strike when application for a Conciliation Board was made. A Board was established by the Minister of Labour on July 12 and members thereof were appointed as follows: on the companies' recommendation, Mr. T. W. Bingay, of Vancouver, B.C.; on the employees' recommendation, Mr. W. A. Pritchard, also of Vancouver. Messrs. Bingay and Pritchard have been requested to confer looking to a joint recommendation for third member, who will be chairman of the Board.

(2) from certain employees of the Hamilton By-Product Coke Ovens, Limited, being locomotive, hoisting and stationary engineers, and firemen, members of the International Union of Operating Engineers. Forty-four employees are stated to be directly affected and 55 indirectly affected by the dispute, which relates to the men's request for increased wages, shorter hours and improved working conditions. A mediator of the Department has been instructed to interview the disputing parties in Hamilton and endeavour by conciliation to effect a settlement of the matters

at issue, if at all possible, without the necessity of Board procedure.

The Western Stevedore Company, Limited, and the Canadian National Railways notified the Department during May that they were not agreeable to accepting the findings of the Board of Conciliation and Investigation which dealt recently with a dispute involving their employees at Fort William and Port Arthur, respectively, being truckers, stowers, loaders, sealers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The representatives of the employees, on the other hand, stated that, although not satisfied with the recommendations of the Board, they were willing to accept them as a settlement of the dispute. The text of the report of this Board, and of the minority report submitted by the Board member representing the employers, appears in the May issue of the *LABOUR GAZETTE* at page 397. Neither side would recede from the position taken, and on June 19, at meetings held simultaneously in both lakehead cities, the employees authorized the officials of the union to take a strike ballot. An officer of the Department subsequently interviewed the officials at Winnipeg and Fort William of the companies concerned, and held a lengthy conference with a committee representing the freight handlers of Fort William and Port Arthur. He also conferred with various officers of the union. A basis of settlement had not been reached, however, at the close of the month.

It was reported in the February issue of the *LABOUR GAZETTE*, page 101, that an application for a Board of Conciliation and Investigation had been received from certain shopmen employed by the Canadian National Railways at Winnipeg, being members of the Fort Rouge Railroad Workers' Unit, One Big Union. The dispute related to the question of seniority rights, the applicants claiming that the company had re-employed junior machinists while senior machinists were available. The matter was taken up by the Department with the officials of the railways in Montreal, and, after considerable correspondence on the subject, the employees notified the Department on June 24 that the points at issue had been adjusted to their satisfaction.

A Board of Conciliation and Investigation was established on May 31 to enquire into a dispute between members of the Shipping Federation of British Columbia, Limited, and certain of their employees being members of

the Vancouver and District Waterfront Workers Association (LABOUR GAZETTE, June, 1935, p. 512). Subsequently members of this union refused to handle cargo from Powell River, where a strike of longshoremen was in progress, and the ship was loaded by non-union labour. The Shipping Federation thereupon notified the Waterfront Workers' Association that, in view of their action, the agreement under which they had been working was terminated, and telegraphed the Minister of Labour that they desired to withdraw their application for a Board. The disputing parties were notified that the opinion held in the Department was that it would be in the interests of both sides that all matters in dispute be dealt with through Board pro-

cedure at the earliest possible moment, and that in the meantime the conditions of the agreement which had been in effect up to that time should be strictly observed by both parties. The Shipping Federation replied that it had entered into contractual relations with another labour union, the Canadian Waterfront Workers' Association, and that it could not therefore meet the views of the Department. As neither the Shipping Federation nor the Waterfront Workers' Association submitted a nomination for Board member, the Department did not proceed with the constitution of the Board during June. A statement with respect to the cessation of work in this case will be found in the next succeeding article.

### STRIKES AND LOCKOUTS IN CANADA DURING JUNE 1935

THE following table shows the number of disputes, workers involved and time loss for June, 1935, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in working days
*June, 1935.....	14	4,997	57,081
*May, 1935.....	22	5,189	32,357
June, 1934.....	24	3,184	31,689

\* Preliminary figures.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time is frequently not received until some time after its commencement.

The increase in the time loss due to strikes and lockouts in June over the figures for May, when the numbers of disputes and employees show decreases, was due chiefly to the strike of longshoremen at Vancouver, B.C., and the sympathetic strike of other water transport workers in that district as well as to the strike of loggers in the Nipigon district of Ontario. The only other strikes

causing much time loss were those of salmon fishermen in the Gulf of Georgia and gold miners in the Cariboo district of British Columbia. The last two also accounted for considerable time loss in May when there were in addition important strikes of longshoremen at Montreal, P.Q., and steel workers at Hamilton, Ont. In June last year most of the time loss was due to a strike of metal miners at Flin Flon, Man.

Eight disputes, involving 811 workers, were carried over from May, and six disputes commenced during June. Of these fourteen disputes, five were terminated during the month, one resulting in favour of the employer involved, while compromise settlements were reached in four cases. At the end of June, therefore, there were nine disputes in progress recorded as strikes or lockouts, namely: gold miners, Bridge River, etc., B.C.; leather garment workers, Toronto, Ont.; compositors, Calgary, Alta.; compositors, Winnipeg, Man.; furniture factory workers, Toronto, Ont.; longshoremen, Powell River, B.C.; loggers, Nipigon District, Ont.; longshoremen, Vancouver, B.C.; and water transport workers, Vancouver, New Westminster, Chemainus, etc., B.C.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to three such disputes, namely: photo engravers, Toronto and London, Ont., Montreal and Quebec, P.Q., and Winnipeg, Man., May 4, 1931, one employer; motion picture pro-

jectionists, Toronto, Ont., July 11, 1932, two employers; and moulders, Peterborough, Ont., February 27, 1934, one employer. The dispute involving hat factory workers employed by one firm in Montreal, P.Q., commencing March 5, 1935, and carried in the above list since April, is recorded as lapsed by the end of June and has accordingly been removed from the list.

Disputes involving men on unemployment relief work, who are not paid wages but receive subsistence for which work is performed or may be required, are not included in the record, no relation of employer and employee being involved.

A cessation of work by fifty of the employees in a woodworking establishment in Vancouver, B.C., on May 28 and May 29 was reported too late for inclusion in the June issue of the LABOUR GAZETTE. The employees alleged that the wages of some employees were below the rates of the provincial male minimum wage scale but the employer claimed they were in accordance with the scale or better. A satisfactory adjustment is reported to have been made.

A cessation of work by fishermen on the west coast of Vancouver Island in May was noted in the June issue of the LABOUR GAZETTE. Further information indicates that this dispute was confused with a strike of salmon fishermen in the Gulf of Georgia.

A dispute involving electrical workers and other building trades early in June on one building in Vancouver, B.C., has been reported in the press. The representatives of the parties concerned have reported that no strike occurred. The owner of the building had stipulated that union wages and conditions were to be observed by contractors and work was suspended for a short time to draw up a scale for the sub-contractors.

A dispute involving painters on one building in Toronto, Ont., on June 3 has been reported. It appears that the unions objected to the rate of 25 cents per hour paid to painters instead of the union rate of 75 cents per hour and picketed the job, but that no cessation of work occurred.

A cessation of work by longshoremen at Picton, Ont., at the end of June has been reported in the press. Full particulars have not been received but it appears that work was resumed on July 2, the wage rate having been increased from 30 cents per hour to 40 cents.

Floorlayers (hardwood) numbering about forty, working for a number of firms in Toronto, Ont., are reported to have ceased work between June 10 and June 15, securing in-

creases in wages from 25 cents and 30 cents per hour to 50 cents and 80 cents, also a reduction in hours to forty per week.

In connection with a strike of restaurant employees in Edmonton, Alta., from May 7 to May 9, 1935 (LABOUR GAZETTE, June, 1935, p. 518), a number of persons were arrested on charges of unlawful assembly, etc. Thirteen were convicted by the magistrate and on appeal to the District Court Judge, in June, the charges against two were dismissed owing to insufficient identification, two were released on recognizance of \$200.00 each for six months, and sentences of imprisonment were confirmed in the cases of the others, one being for six months and the others for three months.

In connection with the strike of coal miners at Corbin, B.C., January 2 to March 7, 1935 (LABOUR GAZETTE, June 1935, page 514 and preceding issues), a disturbance occurred on April 17 as a result of which a number were arrested on charges of assault, etc. One man convicted of assault was also charged with perjury and in June elected for trial by jury at the fall assizes. Appeals against convictions for assault have been entered by six men, and will be dealt with in October.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

**SALMON FISHERMEN, GULF OF GEORGIA, B.C.**—A large percentage of the fishermen involved in a strike commencing about May 16, demanding higher prices for fish from the canning companies, resumed work early in June, a compromise having been reached. The remainder similarly resumed work about June 26. It has been reported also that a number of employees in one cannery at Deep Bay secured an increase in wages.

**GOLD MINERS, BRIDGE RIVER, ETC. (CARIBOO DISTRICT), B.C.**—As stated in the last issue of the LABOUR GAZETTE most of the employees involved in this dispute resumed work in the three large mines on May 23, an increase in wages having been agreed upon. As suggested by the western representative of the Department of Labour, a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was applied for in June and work was resumed by the middle of the month in the other mines except one employing a small number of workers.

**FUR DRESSERS, ST. JOHN'S, P.Q.**—As stated in the last issue of the LABOUR GAZETTE a number of the employees on strike were replaced, partly by men from Montreal. The latter returned to Montreal, and other workers were secured locally. Finally on June 10 about thirty of the strikers were re-engaged.

**LOGGERS, NIPIGON DISTRICT, ONT.**—Employees, cutting and peeling logs for a number of pulpwood and railway tie contractors, ceased work on June 19, demanding increases in piece rates and improvements in camp conditions. Increases in piece rates from \$3.25 per cord to \$4.00 were demanded and for monthly paid men from \$35.00 with board to \$45.00.

**WOMEN'S CLOTHING FACTORY WORKERS (CLOAKMAKERS), GUELPH, ONT.**—Operations in one factory were suspended from June 21 to June 25, owing to a dispute between the employer and the International Ladies' Garment Workers' Union. The union officials demanded increases in wages and as a result of mediation by an officer of the provincial Department of Labour a compromise was reached.

**GRANITE AND STONE CUTTERS, IBERVILLE, P.Q.**—Employees in two stone cutting establishments ceased work on June 8 demanding increases in wages from 50 cents per hour to 75 cents. About forty helpers were indirectly affected. Work was resumed on June 13, increases to 60 cents and 65 cents per hour being granted, while labourers in one establishment received increases of 5 cents and 10 cents per hour.

**STRUCTURAL STEEL WORKERS, WINNIPEG, MAN.**—Employees on one building ceased work on June 20 demanding an increase in wages from 75 cents per hour to 90 cents and recognition of the Structural Steel and Ornamental Iron Workers Unit of the One Big Union. As a result of the mediation of the Chief Conciliation Officer of the Department of Labour, the rate was increased to 80 cents per hour and work was resumed on June 27.

**LONGSHOREMEN, VANCOUVER, B.C.**—A cessation of work by longshoremen, loading and unloading ocean going ships, occurred on June 5, following notification by the Shipping Federation of British Columbia that the agreement between the Federation and the Vancouver and District Waterfront Workers' Association, to be in effect from November, 1934, to October 31, 1937 (LABOUR GAZETTE, November, 1934, page 1,062), was cancelled. The union had required its members to refuse to handle cargoes to and from Powell River, where a longshoremen's dispute was in progress. Similar action had been taken on several occasions previously. A dispute as to the assignment of men from the union hall instead of the employers' hall had arisen and the Shipping Federation had applied for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act (LABOUR GAZETTE, June 1935, page 512). On cancelling the agreement,

the Federation withdrew the application. Further proceedings in this connection are outlined on page 607. The Federation then signed an agreement with the Canadian Waterfront Workers' Association, incorporated under the Societies Act of British Columbia. Work was carried on to some extent by members of this union and the docks were picketed by the strikers. On June 19 a disturbance occurred in which a number of police, pickets and bystanders were injured. Twenty-three persons including one woman and two boys were arrested on charges of inciting to riot, rioting, assault, damaging property, carrying offensive weapons, etc. From time to time the number of men engaged at loading and unloading boats was increased so that by the end of the month nearly 700 men were working and nearly all cargoes were being handled. On June 24 the strikers were reported to have voted 500 to 66 against resuming work. A sympathetic strike of water transport workers is outlined below.

**COASTAL LONGSHOREMEN, SHIPS CREWS, SHIP LINERS, BOOM LOG WORKERS, VANCOUVER, AND LONGSHOREMEN, NEW WESTMINSTER, CHEMAINUS, ETC.**—The Vancouver and District Waterfront Workers' Association is affiliated with the Longshoremen and Water Transport Workers of Canada, which on June 15 called out the members of its other affiliated unions on a sympathetic strike, in Vancouver and other ports, except some working under recently signed agreements with employers. The representatives of these unions had met the executive of the Shipping Federation and proposed that negotiations with the Vancouver and District Waterfront Workers' Association should be re-opened but this was refused. The strike involved about 400 seamen and members of ship's crews on some boats, members of the Seafarers' Industrial Union, longshoremen handling cargoes for coastal boats, about 270, members of the Coastwise Longshoremen and Freight Handlers' Association, longshoremen at New Westminster, about 300, and at Chemainus, about 60, also boom log workers, members of the Log Export Workers' Association, and members of the Shiplining and Fitting Workers' Association. The crews on most of the ships did not strike but parts of the crews of some ships ceased work, in some cases delaying the ship until they were replaced. The longshoremen at other ports did not cease work but in some cases refused to handle cargoes from Vancouver. In most cases these were handled by other men. At New Westminster the Mayor attempted to bring about a resumption of work and, when the strikers refused, arranged that the work would be done by other men under police pro-

## STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1935\*

Industry occupation and locality	Number of workers involved	Time lost in working days	Remarks
<b>(a) Strikes and Lockouts in progress prior to June, 1935</b>			
<b>FISHING AND TRAPPING—</b> Salmon fishermen, Gulf of Georgia, B.C.....	500	5,000	Commenced May 16, 1935; for increase in rates for salmon; terminated June 26, 1935; compromise.
<b>MINING, ETC.—</b> Gold miners, Bridge River, etc. (Cariboo District), B.C.....	100	2,000	Commenced May 5, 1935; for increase in wages; untermiated.
<b>MANUFACTURING—</b> <i>Fur, Leather, Etc.—</i> Fur dressers, St. Johns, P.Q...	30	200	Commenced May 21, 1935; for increased wages, improved conditions and reinstatement of discharged workers; terminated June 8, 1935; in favour of employer.
Leather garment workers, Toronto, Ont.....	6	120	Commenced May 7, 1935; for recognition of union and changes in working conditions; untermiated.
<i>Printing and Publishing—</i> Compositors, Calgary, Alta...	30	720	Commenced Jan. 10, 1935; against decrease in wages; untermiated.
Compositors, Winnipeg, Man..	55	1,250	Alleged lockout; April 7, 1935; re employment of members of one union only; untermiated.
<i>Other Wood Products—</i> Furniture factory workers, Toronto, Ont.....	25	575	Commenced May 16, 1935; alleged violation of agreement; untermiated.
<b>TRANSPORTATION—</b> <i>Water—</i> Longshoremen, Powell River, B.C.....	65	1,500	Commenced May 17, 1935; for union recognition and union wage scale; untermiated.
<b>(b) Strikes and Lockouts commencing during June, 1935</b>			
<b>LOGGING—</b> Loggers, Nipigon District, Ont..	2,100	15,000	Commenced June 19, 1935; for increase in piece rates and improved camp conditions; untermiated.
<b>MANUFACTURING—</b> <i>Textiles, Clothing, Etc.—</i> Women's clothing factory workers (cloakmakers), Guelph, Ont.....	75	300	Commenced June 21, 1935; for increased wages; terminated June 25, 1935; compromise.
<i>Non-Metallic Minerals—</i> Granite and stone cutters, Ibrerville, P.Q.....	44	176	Commenced June 8, 1935; for increased wages; terminated June 12, 1935; compromise.
<b>CONSTRUCTION—</b> <i>Building and Structures—</i> Structural steel workers, Winnipeg, Man.....	40	240	Commenced June 20, 1935; for increased wages and recognition of union; terminated June 26, 1935; compromise.

\*In this table the date of commencement is that on which time loss first occurred, and the date of termination is the last day on which time was lost to an appreciable extent.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1935—*Concluded*

Industry occupation and locality	Number of workers involved	Time loss in working days	Remarks
TRANSPORTATION— Water— Longshoremen, Vancouver, B.C.....	927	20,000	Commenced June 5, 1935; against cancellation of agreement; unternminated.
Coastal longshoremen, ships' crews, ship liners, boom log workers, etc., Vancouver, and longshoremen, New Westminster, Chemainus, etc.	1,000	10,000	Commenced June 15, 1935; sympathy with longshoremen on strike at Vancouver from June 5; unternminated.

tection. These became members of a new union, the Royal City Waterfront Workers' Association, incorporated under the Societies Act of British Columbia. Employers organized the Fraser River Shipping Board which signed an agreement with the new union, one of the provisions being that all disputes shall be referred to the Mayor whose decision is to be final. A sawmill at Chemainus was closed as

a result of longshoremen refusing to handle the cargoes. Some logging camps were also reported to be closed down, in some cases owing to fire risk. Many of the members of ships crews and longshoremen on the coast are working under agreements between their employers and unions not involved in the sympathetic strike. Several of these are outlined elsewhere in this issue.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the issue of February, in the review of Strikes and Lockouts in Canada and Other Countries, 1934. The latter review included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the latest figures are not for relatively recent dates. Statistics given in the annual review and in this monthly article are taken as far as possible directly from the government publications of the various countries concerned, while information as to particular disputes is obtained for the most part from newspaper reports.

## Great Britain

The number of disputes reported as beginning in May was 47 and 9 were still in effect from the previous month, making a total of 56 disputes in progress during the

month, involving 14,000 workers with a time loss of 88,000 working days for the month. Of the 47 disputes beginning in May, 4 were over demands for increases in wages, 5 over proposed wage reductions and 9 over other wage questions, 3 over questions respecting working hours, 16 over questions respecting the employment of particular classes or persons, 7 over other questions of working arrangements and 3 over questions of trade union recognition. During May settlements were reached in 38 disputes, of which 9 were in favour of workers, 16 in favour of employers and 13 resulted in compromise. In 3 other disputes, work was resumed pending negotiations.

A dispute involving 2,000 coal miners at Blaenavon, Monmouthshire, which began March 25 against a dismissal of some of the older miners, was still in effect at the end of May.

## Belgium

Following a decision of the National Joint Commission for Mines in March to regulate wages in coal mines according to variations in the cost of living, which decision involved a reduction of 5 per cent in wages, a number

of strikes occurred in the Charleroi coal fields during May, involving at one time nearly 20,000 miners in a demand for an increase of 5 per cent in wages. A settlement was reached May 25 providing for an advance of  $2\frac{1}{2}$  per cent and further adjustments to be made later.

#### France

A dispute involving 4,000 leather glove workers at Millau which began December 27, 1934 against proposed wage reductions of 25 per cent and more was reported to have terminated May 31, but no information as to the terms of settlement has been noted.

#### Netherlands

The number of disputes which began in the year 1934, was 148 and 152 in effect during the year involving 432 establishments and directly affecting 5,830 workers. The time loss for the year was 114,200 working days.

#### India

Statistics for the year 1934 show the number of disputes for the year as 159, involving 220,808 workers, with a time loss of 4,775,559 working days. Over 90 per cent of the total time loss for the year occurred in cotton and woollen mills. Of the 140 disputes which began during the year, 107 were over wages questions, one over bonus, 24 over personnel, 6 over leave and hours and 2 over other causes. Of the 157 disputes which terminated during the year, the workers were successful in 32, partially successful in 25 and unsuccessful in 100.

#### Philippine Islands

The number of strikes and other industrial disputes adjusted through the Philippine Bureau of Labour reported for the year 1933 was 59 and 8,066 workers were involved.

#### United States

The number of disputes beginning in the year 1934 was 1,740, and 1,770 were in progress during the year, involving 1,392,860 workers with a total time loss for the year of 19,308,650 working days. While these figures are much greater than those for the year 1929, the numbers of disputes and workers involved are considerably less than during the war and the years immediately after the war. The time loss figures for these latter years are not available but the time loss for 1934 was not much more than half as great as that for the year 1927 and for the year 1928.

The number of disputes beginning in March was 142 and 123 were still in progress from the previous month, making a total of 265 disputes in progress during the month, involving 98,000 workers with a time loss of 1,200,000 working days.

The strikes of lumber workers in the State of Washington and also in Oregon and California which were mentioned in the last issue of the LABOUR GAZETTE continued in June. In a number of mills where settlements had been made, the strike was resumed early in June. By June 20, compromise settlements had been reached in some towns in Washington and several thousand workers were returning to work, but in other places the strikes continued.

At Toledo, Ohio, on June 5, a one day strike of electrical workers was temporarily settled on agreement to refer the matter to arbitration, but the strike was resumed when negotiations broke down and electrical power was seriously reduced in the city for four days until a settlement was reached through government intervention June 17, when an immediate increase in wages of 5 per cent was conceded, and further demanded increases referred to arbitration.

A two months' strike of street car employees at Omaha, Nebraska, ended June 21, during which time there were outbreaks of violence and the militia was called out to enforce order.

According to recent information published by the Dominion Bureau of Statistics, coal production in Canada during the first quarter of 1935 amounted to 3,559,083 tons, a 7 per cent increase over the output in the corresponding period of 1934. The January, February and March, 1935 output included 2,292,858 tons of bituminous coal, 167,293 tons of sub-bituminous coal, and 1,098,932 tons of lignite coal. Imports of coal into Canada during the first three months of 1935 were recorded at 1,502,659 tons or 10 per cent below the total for corresponding period of 1934. Customs' records show that 91,754 tons of Canadian coal were exported during the first quarter of the current year.

Canadian coal mines furnished employment to 27,563 men in January, 26,066 men in February and 27,766 men in March. These mines produced approximately 68 per cent of their possible output; 30.2 per cent of the output loss was due to lack of orders. The average output per man during January, February and March was 131 tons or 2.6 tons per man day.

## CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

### Summary of Recent Decisions

**T**HREE new decisions were given recently by the Canadian Railway Board of Adjustment No. 1. Earlier decisions were outlined in the *LABOUR GAZETTE*, April, 1935, page 319, and in previous issues; and the fifth report of the proceedings of the Board, covering the period from October 1, 1930, to September 30, 1933, was issued as a supplement to the issue of December, 1933.

The Board was established under a voluntary agreement, concluded in 1918, between the various railway companies and certain of the railway organizations, its original purpose being to secure uninterrupted service on the railways during the continuance of the war. It has power to determine all differences arising between the railway companies and members of any of the six railway brotherhoods, "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railway companies and six representatives of labour, one for each of the following railway Brotherhoods: the Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

#### Case No. 441.—Canadian National Railways (Central Region) and Order of Railroad Telegraphers.

On January 5, 1935, the position of telegraph operator in the freight office at Depot Harbour, Ontario, was temporarily abolished for the duration of the closed season of navigation. The employees contended that when the operator's position was thus abolished, the post was filled by a clerk who did the work previously assigned to the operator, with the exception of sending and receiving telegrams on the wire direct. This action, the employees claimed, was a violation of Clause "B" Article 1, Schedule of Rules and Wages for Telegraphers and Assistants, which declared that:

"Established positions shall not be discontinued and new ones created under a different title covering the same class of work, for the purpose of reducing rates of pay."

The Railway's contention was that during the open season of navigation the staff in the General Agent's Office at Depot Harbour con-

sisted of twelve regular positions, including that of telegraph operator. Excluding the telegrapher, the balance of the staff was embraced under another wage schedule. In accordance with practice of many years' standing, upon cessation of navigation last Fall this staff was materially reduced, due to decline in volume of business handled through that port; and included in this seasonal reduction of staff was the position of telegraph operator. The winter staff at Depot Harbour now consists only of the General Agent and three clerks. As it is only during the open season of navigation that it is necessary to have direct telegraphic communication with Depot Harbour, any additional clerical duties which may be assigned to this telegrapher by the General agent cannot thereby be regarded as work to which such telegrapher is exclusively entitled.

The Board found that the question resolved itself into one as to whether in changes consequent upon reductions of staff a position should be filled by an employee under the telegraphers' agreement or under the clerks and freight handlers' agreement. The fact that employees at a station may be working under two agreements does not justify the engagement of two employees when the service of only one employee is required. It was not admitted that the action taken in the case in question was a violation of Clause "B," Article 1 of the Schedule of Rules and Wages of Telegraphers. It further developed that the operator's position was re-established on April 25, and is to be maintained at least until after the close of navigation at the end of the current season. The operator was retained in employment throughout previous winter seasons.

The Board's decision was therefore that the operator's position, having been re-established for the current season of navigation, arrangements should be made to reinstate the former operator in the position and the parties should confer further as to subsequent seasons.

#### Case No. 442.—Canadian National Railways (Western Region) and the Order of Railroad Telegraphers.

A dispute arose as to the method of filling the position involving charge of the station at Westfort, Ontario. The employees' contention was that this station had been maintained for many years and since December 1, 1910, the Order of Railroad Telegraphers have incor-

porated the position in the Telegraphers' Agreement.

Under the terms of the current agreement, clause (g), Article 2, telegraphers have the exclusive right to any position incorporated in the wage schedule. This was carried out until September 30, 1934, on which date the regularly assigned agent was retired on pension, thereby creating a vacancy. It was claimed that the management then disregarded the agreement by extending the authority of the agent at Fort William to include Westfort and place one of the clerical staff at Fort William in charge of the agency at Westfort, and have declined to assign the vacancy to an employee carried on the Telegraphers' seniority list. The employee placed in charge of the agency at Westfort is not carried on the Telegraphers' seniority list; therefore has no legitimate right to a job included in the Telegraphers' agreement.

The employees also pointed out that this agency has not been discontinued, as when a station is discontinued it is entirely abandoned, but this has not been done. They further contended that the railway had violated the last paragraph of Article 1, viz:

"Established positions shall not be discontinued and new ones created under a different title covering the same class of work for the purpose of reducing the rate of pay."

The railway's contention was that after the removal of the station from its former location in the town of Westfort to its present location near the outskirts of the town, the work was materially changed, the accounting and similar work being transferred to the Fort William agency, while the handling of express, baggage, tickets and money orders has been retained at Westfort. In view of this change and as the former agent was retiring from the service, it was decided to change the status to that of a sub-agency, and the man who had previously been employed at this point as checker was placed in charge as sub-agent at a rate of \$125 per month.

The Board considered that while existing conditions are maintained at Westfort the agency should be regarded as continuing to come within the provisions of the telegraphers' agreement. It having been made evident that there was justification for a revision of the rate of pay of the position, the parties should confer in regard to this question and subject to this consideration the claim of the employees is sustained.

**Case No. 443.—Canadian National Railways (Western Region) and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen.**

A dispute arose as to whether moves made by trains at six specified points constituted side trips under Article 3 (E) of Engineers' and Firemen's Schedules.

This clause reads:—"Engineers (or Firemen) will be paid not less than ten (10) miles for doubling and actual miles in excess of ten (10) miles.

"Engineers (or Firemen) except on assigned runs, making side trips on subdivisions will be paid on the same basis as doubling and be paid terminal switching at the turn-around point on the side trip.

"Engineers (or Firemen) on assigned runs which include a side trip as part of their regular assignment will be paid actual miles, plus detention and switching at turn-around point on side trip."

The employees contended that in all cases where trains are required to make movements of more than one-half mile off their direct route on to another subdivision such movement constitutes a side trip within the meaning of the foregoing schedule rules. They directed the attention of the Board to the decision in Case No. 177 which, in their opinion, fully supports their contention in regard to this dispute.

The railway conceded that one point in the six specified constituted a move from a station to an outside function point, but in the other five cases the contention is that it never was the intention that such moves, within station limits, should be classed and paid for as side trips. These cases were paid as side trips, for a time, due to misunderstanding on the part of the timekeeper, but when the error was noted the payments were stopped.

The Board found that following its decision in Case No. 177, it was arranged between representatives of the Railways and of the Employees that the arbitrary allowance of ten miles previously paid for side trips on regularly assigned runs should be discontinued, actual mileage plus detention and switching at turn-around points on the side trips being substituted therefor. This arrangement continued in effect for approximately seven years. A new schedule rule, Article 3, Clause E, was adopted for the engineers in 1930, and for the firemen in 1931; it was indicated that under these rules detention and switching at turn-around points on side trips were paid for up to 1933 in all the

cases mentioned. This practice would appear to indicate that there was a mutual understanding of the intent of the existing rules at the time they were adopted which

became effective in practice for a period of approximately three years.

On the basis of the existing rules, the claim of the employees was sustained.

## CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

### Summary of Recent Decisions

A REPORT has been received of one case recently settled by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the LABOUR GAZETTE, May, 1935, page 406, and in previous issues.

The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925 (the date of the inception of the Board), to December 31, 1927, appeared in the issue of October, 1928, page 1,060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "Clerks and other Classes of Employees as herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to re-appointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made, in the agreement constituting the Board, for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award.

#### Case No. 170—Operating Department (Atlantic Region)

On October 1, 1934 the position of senior clerk, Rockingham, N.S., (rate of pay \$140.00 per month) became vacant owing to the death of the then occupant. The position was not bulletined but was filled by a clerk who was paid the scheduled rate until January 8, 1935,

at which time it is contended it was abolished. In the meantime on December 3, 1934, the position of record clerk, rate \$121.00 was set up temporarily for the winter season, and on January 9, the clerk who had been paid the senior clerk's rate was reduced to car checker.

The employees contended that the duties of senior clerk were still in existence and were being performed by a lower rated employee, and claimed that under Article 3, Rule "D" of the schedule, the management was required to bulletin the vacancy, but this they did not do, although they were requested on several occasions to do so.

The contention of the railways was that when the senior clerk's position was abolished on January 8, 1935, any supervisory duties which had been attached to this position were assumed by the station agent and the yard agent, and the claim that the senior clerk's work was performed by the record clerk cannot be substantiated. It was also contended that the record clerk's position had been set up temporarily during the previous winters and the same practice was followed this year, so that when the senior clerk's position was abolished in January additional staff was not taken on to perform the work over and above the normal staff of previous years. In view of the fact that there is a station agent, yard agent and yardmaster, all located in the same office at Rockingham, it was considered there was no necessity for a senior clerk.

The Board was of the opinion that when the position of senior clerk rated at \$140.00 per month, became vacant on October 1, 1934, and was filled, that it should have been bulletined in accordance with Article 3, Rule "D" of the existing schedule. In view of the oral evidence adduced at the time of hearing the Board considered that when additional clerical staff is required at Rockingham Yard the two parties should confer and mutually agree upon the classification and rate of the position or positions, having due regard to the nature of the work and the provisions of the schedule applicable thereto.

## LABOUR LEGISLATION ENACTED BY THE PARLIAMENT OF CANADA IN 1935

THE Parliament of Canada during its recent session, which opened on January 17 and closed on July 5, 1935, enacted new laws providing for unemployment insurance, unemployment relief and for public works to stimulate employment, for minimum wages, the eight-hour day and a weekly rest-day in industrial undertakings in accordance with draft conventions adopted by the International Labour Conference, and for fair wages and hours on public works, for loans to assist in the construction of houses, and for the establishment of an Economic Council and a Trade and Industry Commission. Amendments to the Criminal Code were also of interest to wage-earners.

Motions were adopted by Parliament to approve the draft conventions of the International Labour Conference regarding seamen's articles of agreement, the marking of heavy weights on packages for transportation by vessels and the protection of workers employed in loading and unloading ships, providing for a weekly rest-day, and eight-hour day and forty-eight hour week in industrial undertakings and for minimum wage-fixing machinery. Legislation to implement the seamen's and dockers' conventions was embodied in the Canada Shipping Act, 1934. This statute, however, has not been proclaimed in effect. The formal ratifications of the conventions on weekly rest, hours of labour and minimum wages were transmitted to the League of Nations on March 21 and April 25, 1935, respectively.

### Unemployment Relief and Public Works

The Relief Act, 1935, which received the Royal Assent on May 4, is generally similar in its terms to the Relief Act of 1934. The text of the 1935 statute was given in the April issue of the LABOUR GAZETTE at p. 321.

The Supplementary Public Works Construction Act provides that, in addition to the works and undertakings provided for by the Public Works Construction Act, 1934, further projects shall be undertaken for the purpose of accelerating recovery of trade and industry. The Act enables the Governor in Council to authorize the execution and completion of the works and undertakings in the Schedule to the Act which include work throughout Canada on railways, rivers, harbours and canals, geological surveys, conservation works, public buildings, camp sites, landing fields, etc. In the execution of such works, as far as practicable and consistent with reasonable efficiency and economy, first consideration is

to be given to the employment of those who, if available and competent, are most in need in the locality in which the works are to be performed without any discrimination whatsoever, preference being shown to unemployed ex-service men and unemployed married and single men with dependants. The sum of \$18,000,000 is appropriated to meet obligations arising under these sections of the Act.

The Governor in Council may also authorize the guarantee as to principal and interest, over a period of two years, of equipment securities of the Canadian National Railways up to a principal amount of \$8,000,000 and of the Canadian Pacific Railway Company up to a principal amount of \$7,000,000, to assist these railways in bettering their equipment.

### Unemployment and Social Insurance

A summary of the Bill which has become the Employment and Social Insurance Act and which was based on the Unemployment Insurance Act of the United Kingdom was given in the February issue of the LABOUR GAZETTE at pp. 135-139 and the principal amendments made by Parliament were outlined in the June issue at pp. 507-508. The full title of this Act, which received the Royal Assent on June 28 is "An Act to establish an Employment and Social Insurance Commission, to provide for a National Employment Service, for insurance against unemployment, for aid to unemployed persons, and for other forms of Social Insurance and Security and for purposes related thereto." The Act came into force on being assented to but contributions to the Unemployment Insurance Fund are not payable until a date to be fixed by the Commission to be set up to administer the Act.

The Commission to be known as the Employment and Social Insurance Commission is to consist of three members to be appointed by the Governor in Council. One member is to be the Chief Commissioner and of the other two, one is to be appointed after consultation with workers' organizations and the other after consultation with employers' organizations. Each Commissioner is to hold office for ten years subject to his earlier removal for cause or permanent incapacity. Commissioners must retire at the age of seventy years but if under that age are eligible for re-appointment on the expiration of their term of office. They are to be paid such salaries as are fixed by the Governor in Council. The Commission is to

undertake investigations for the purpose of making proposals to the Governor in Council for the extension of insurance to employments at present excepted from the Act, for assisting during unemployment persons who are ordinarily employed in excepted employments and those who, while ordinarily employed in insurable employment, are not for the time being entitled to benefit, and for providing, in co-operation with educational authorities or otherwise, physical and industrial training and instruction for the unemployed with a view to their rehabilitation.

The Commission is to organize and maintain an employment service for the Dominion with regional divisions and employment offices within each division. The central office in each regional division is to be used as a clearing house for information concerning vacancies and applications for employment, and such offices are to be co-ordinated so that the information obtained in any regional division may be available to workers and employers in other divisions. The Commission may establish local committees, including members chosen after consultation with workers and employers, to advise the Commission and it may also authorize loans to workers travelling to places where work is available. The Employment Offices Co-ordination Act passed in 1918 may be repealed on proclamation.

All persons 16 years and over, employed under contract of service or apprenticeship, are to be insured against unemployment, with the following exceptions: persons employed in agriculture, horticulture and forestry, fishing, lumbering and logging, (exclusive of such sawmills as are reasonably continuous in their operation), hunting and trapping, transportation by water or by air, stevedoring, domestic service, excluding employment in a club or in any trade or business carried on for the purposes of gain; persons employed as nurses, teachers, including teachers of music and dancing, whether engaged in schools, colleges, or in a private capacity, members of the military, naval or air forces and of the Royal Canadian Mounted Police or other police, members of the permanent public service of the Dominion or of a province or employees of a municipal authority; any person employed as agent paid by commission or fees or a share of the profits, who is mainly dependent on earnings from some other occupation or is ordinarily employed as agent by more than one employer, and his employment under no one of them is that on which he is mainly dependent for his livelihood; persons employed otherwise than by way of manual labour and at a rate of remuneration exceeding in value two thousand dollars a year or,

in cases where such employment involves part time service only, at a rate of remuneration which, in the opinion of the Commission, is equivalent to a rate of remuneration exceeding two thousand dollars a year for full time service, provided that any person in respect of whom contributions have been paid for not less than five hundred weeks may continue as an insured contributor; persons in employment of a casual nature otherwise than for the purpose of the employer's trade or business or in employment of any class which may be specifically excepted by the Commission as being a subsidiary employment and not the principal means of livelihood; any person employed by his consort or any person employed without wages for his parent or the person on whom he is dependent for his maintenance, and finally, persons paid for playing in any games. The Commission may add to or restrict the list of excepted employments in order to remove any anomalies in the operation of the Act.

Any person employed in a seasonal occupation lasting ordinarily twenty-four weeks or less in a year and not ordinarily employed in any other insurable employment or one who habitually works for less than the ordinary working day may claim exemption from the Commission.

An Unemployment Insurance Fund is to be established, made up of contributions by employers, workers, and the Government of Canada. The weekly contribution in respect of an adult male worker is 25c from the worker and a like sum from his employer. In respect of an adult female worker the contribution is 21 cents from each. Lower rates are fixed for those between 18 and 21 years of age and those 17 years and 16 years respectively. The employer is to pay both contributions but may deduct the worker's share from wages. The Governor in Council may make regulations for the payment of contributions by means of unemployment insurance stamps affixed to unemployment books or cards. The Dominion Government contribution to the Unemployment Insurance Fund is fixed at one-fifth of the aggregate amount contributed by employers and workers.

The three statutory conditions for the receipt of benefit by an insured contributor are:—(1) that not less than forty weekly contributions have been paid during the two years immediately preceding the date of claiming benefit; (2) that he has made application for benefit in the prescribed manner and proves that since the date of the application he has been continuously unemployed; and (3) that he is capable of, and available for, work but is unable to obtain suitable

employment. Special terms are laid down for contributors who, during any part of the two years, are incapacitated for work or employed in an excepted employment or in business on their own account. A person is deemed to be "continuously unemployed" if he is unemployed for three days, whether consecutive or not, within a period of six consecutive days. Two such continuous periods separated by not more than six weeks are to be treated as one continuous period of unemployment. But any period during which a person fails to satisfy the third statutory condition or is disqualified for benefit or deemed not to be unemployed is to be excluded in the computation of continuous unemployment unless it is proved in the first two cases that he was incapable of work through definite physical or mental disability. As to the third statutory condition, a person is not deemed to have refused "suitable employment" if he has refused an offer of a job arising in consequence of a strike or lockout or at wages lower or on conditions less favourable than those he might reasonably have expected to obtain having regard to his usual occupation or has refused employment in his usual occupation at lower wages or on less favourable conditions than those laid down in collective agreements or recognized by reasonable and fair employers. It is stipulated, however, that after the lapse of a reasonable interval, employment shall not be considered unsuitable only because it is at lower wages or in another occupation but no contributor is to lose his right to benefit for refusing to accept a job on condition that he refrain from joining a trade union or if he would lose his membership or right to membership in a trade union.

An insured contributor is disqualified for the receipt of benefit:—(a) if he has lost work owing to a trade dispute at the premises where he was employed unless he proves that he is not interested in the dispute and does not belong to the class of workers affected by it; (b) if it is proved by an officer of the Commission that he has neglected to avail himself of an opportunity for work; (c) if he has lost his work owing to misconduct, or left it without good cause; (d) while he is an inmate of a prison or other public institution or is, permanently or temporarily, out of Canada; or (e) while he is in receipt of an old age pension under an Old Age Pensions Act.

The unemployment benefit payable to insured persons who fulfil the statutory conditions is \$1 a day or \$6 per week for adult males with proportionate amounts for other classes. Benefit is payable for not more than an aggregate of 78 days of continuous unemployment in any benefit year. Additional

benefit is payable to any person who is entitled to ordinary benefit and who has made not less than 100 contributions during the preceding five or less complete insurance years. Such additional benefit is calculated at the rate of one day's benefit for every weekly contribution paid for him in the five years or less preceding the year in which additional benefit is to be paid, less one day for every three days' benefit he has already received on account of those years. Two contributions on behalf of a person under 18 are reckoned as one, fractions of days are disregarded for the purposes of this section and the additional days must not extend beyond twelve months from the date on which he first makes application for benefit after having fulfilled the first statutory condition.

Questions as to the employments and persons covered by the Act and as to rates of contribution are to be decided by the Commission. Machinery is provided for the determination of claims for benefit. The Commission, with the approval of the Governor in Council, is empowered to appoint one or more insurance officers for each regional division. Courts of referees to be set up in each regional division are to consist of an equal number of representatives of employers and insured contributors chosen from panels of persons in these classes constituted by the Commission. The Governor in Council may appoint an umpire and deputy umpires from among the Judges of the Exchequer Court of Canada and the Superior Courts of the provinces. Claims for benefit are to be made in the first instance to an insurance officer, who if of the opinion that the claim ought to be allowed, may allow it. If the insurance officer is not satisfied, he may refer the claim to the court of referees or, in certain cases, may himself disallow it. At the instance of an insurance officer or of an association of employees of which the claimant is a member, and, in certain cases at the instance of the claimant, appeal may be taken from a decision of a court of referees to the umpire whose decision is final.

The Act provides for the appointment by the Governor in Council of an Unemployment Insurance Advisory Committee consisting of a chairman and not less than four or more than six members representing equally employers and employees. The Committee will advise and assist the Commission, report on the condition of the Unemployment Insurance Fund and if the fund is, or is likely to become, insufficient or more than sufficient to discharge its liabilities, the Committee is to make such recommendations for the amendment of the Act or regulations as may be appropriate in the circumstances.

The Commission may, with the approval of the Governor in Council, make regulations for carrying out the Act and may appoint inspectors to ensure compliance with it. Penalties are provided for fraudulently obtaining benefit or evading payments and for other violations of the Act or the regulations under it.

With regard to national health, the Commission is charged with the duty of collecting information concerning any scheme, actual or proposed, for providing medical, dental, surgical and hospital care, and compensation for loss of earnings due to ill-health or accident, making such information available to persons interested, and examining and reporting on schemes on request of any province, municipality or group of persons. In performing this duty the Commission is to co-operate, as far as possible, with any department of the Government of Canada, the Dominion Council of Health, or with provinces, municipalities, or associations. The Commission may also from time to time submit to the Governor in Council proposals for co-operation by the Dominion and may undertake special investigations with regard thereto subject to the approval of the Governor in Council concerning the scope and nature of such investigation.

### Minimum Wages

The Minimum Wages Act, which received the Royal Assent on June 28, is designed to give effect to the provisions of the Draft Convention concerning the creation of minimum wage-fixing machinery adopted by the International Labour Conference in 1928. The Act empowers the Governor in Council, on the recommendation of the Minister of Labour, to create and by regulation provide for the operation by or under the Minister of machinery whereby minimum rates of wages can be fixed for workers in specified rateable trades. Employers and workers concerned are to be associated in the operation of such machinery in such manner as the Governor in Council may by regulation determine, but in any case in equal numbers and on equal terms. "Rateable trades" are defined as "those trades or parts of trades (in particular, home-working trades) in which no arrangements exist for the effective regulation of wages by collective agreement or otherwise and wages are exceptionally low." "Trade" includes manufacture and commerce and "worker" includes any employed person not under 16 years of age. Minimum wages so fixed are to be binding on employers and workers concerned so as not to be subject to abatement by means of individual agreement, or, except with the general or particu-

lar authorization of the Minister, by collective agreement.

The Governor in Council, on the recommendation of the Minister which is to be made after the Minister has consulted or caused consultation as the Convention requires, may by regulation declare which trades or parts of trades are those rateable trades to which the minimum wage-fixing machinery shall be applied. Such trades are to be known as specified rateable trades. The machinery is to be applied only in rateable trades after the Minister has consulted or caused consultation as required by the Convention\* and has declared, by regulation of his Department, the nature and form of, and the methods to be followed in the operation of, the machinery as it is to be applied to that particular trade. This section and that providing for the creation of the minimum wage-fixing machinery are to come into force on proclamation. The International Labour Convention on which these sections are based provides that it shall come into force in any country twelve months after it has been ratified by the Government of that country. The Minimum Wage Convention was ratified by Canada on April 25, 1935, and cannot come into force in Canada until April 25, 1936. The Prime Minister stated in the House of Commons on June 20, 1935, that "it is desirable, therefore, that these sections that depend upon the convention for their validity should not come into force until proclamation on a date subsequent to the 25th day of April, 1936."

In other sections of the Act which came into force on enactment, it is provided that the Governor in Council, when satisfied that the trade and commerce or the public revenue of Canada is being injuriously affected by the absence of uniform minimum rates of wages or that workers throughout Canada are being oppressed by reason of the insufficiency of the wages being paid to them to enable them to maintain a suitable standard of living, may, by regulation, fix uniform minimum wages or fair and suitable rates of wages in the trade concerned and provide or indicate the necessary machinery for enforcing observance and for punishing non-observance of such regulation.

The Governor in Council is further empowered to make regulations enabling the Minister or his nominee to permit any em-

\*Article 3 (1) of the Convention requires that before minimum wage-fixing machinery is applied in a trade or part of a trade, representatives of employers and workers concerned including representatives of their organizations, if any, shall be consulted, as well as any other specially qualified persons whom the competent authority deems it expedient to consult.

ployer or employers to pay wages at less than the minimum rate to workers who, by reason of age, infirmity or inexperience are incapable of doing the work of a competent worker, or to authorize any person, including an officer or employee of any provincial government, to act as inspector or supervisor in connection with the enforcement of the Act; ensuring that employers and workers concerned are informed of the minimum rates of wages in force; prescribing the procedure for making orders as to wages effective; providing that whenever minimum rates have been fixed by one of the two methods laid down in the Act, the rates so fixed shall apply to employers and workers engaged in that trade in lieu of the minimum rates fixed in that trade by the other method provided in the Act; granting to any board, commissioner, etc., authorized under the Act to fix minimum wages the powers of a commissioner under the Inquiries Act; empowering the Minister to permit delays to enable the orderly and proper application of the Act to industry and commerce and all necessary consultation and arrangement with relation thereto to be made; and making such other provision as, being consonant with the Convention, is necessary to enforce the Act and carry out its true intent and meaning.

The Minister, or his nominee, with the powers conferred by the Inquiries Act, may, at any time, on the application of representatives of employers or workers, conduct an inquiry as to the minimum rates of wages required to enable a worker to maintain a suitable standard of living.

An employer in a trade for which minimum wages have been fixed who is convicted of paying or agreeing to pay to any worker a wage less than the rate fixed is liable to a penalty not exceeding \$5,000. A worker in the trade who has been paid less than the minimum rate may recover the difference as an ordinary debt but on a prosecution of an employer for paying less than the fixed minimum wage, the Court, in addition to imposing a penalty, may order payment to the employee concerned of the amount due. Every person who fails or omits to comply with the Act or regulations is liable, if the offence is one for which no other penalty is prescribed, to a fine not exceeding \$50.

Nothing in the Act is to be construed as relieving any employer from the obligation to pay any minimum wages fixed by or under any provincial statute if such minimum wages are higher than the relevant minimum wage fixed under the Dominion Act.

### Hours of Labour

The Limitation of Hours of Work Act, which received the Royal Assent on July 5, 1935, and is to come into force three months thereafter, gives effect to the draft convention respecting hours of work in industrial undertakings adopted by the International Labour Conference in 1919. The Bill, as presented to the House of Commons, was summarized in the March issue of THE LABOUR GAZETTE at p. 233. During its progress in Parliament a number of amendments were made.

The Act applies to mining and quarrying, manufacturing (including shipbuilding and electrical works), construction and transportation, including the handling of goods at docks, warehouses, etc., but excluding transport by hand. Industries in which only members of the same family are employed are excluded and the Governor in Council is authorized to define the line of division separating industry from commerce and agriculture for the purpose of determining the employers to whom the Act applies.

The Act establishes an eight-hour day and forty-eight-hour week for persons in the specified industries except those who hold positions of supervision or management or who are employed in a confidential capacity. Where, by law, custom or agreement between employers' and workers' organizations, or, where no such organizations exist, between employers' and workers' representatives, the hours of work on one or more days of the week are less than eight, the limit of eight hours may be exceeded on the remaining days of the week by the sanction of the Governor in Council or by agreement between such organizations or representatives but in no case may the daily limit be exceeded by more than one hour.

Where persons are employed in shifts they may be employed for more than 8 hours per day and 48 per week if the average number of hours over a period of three weeks does not exceed that limit. The limit of hours may also be exceeded in case of accident, actual or threatened, or of urgent work to be done to machinery or plant, or in case of *vis major* but only so far as may be necessary to avoid serious interference with the ordinary working of the undertaking. In continuous processes carried on by a succession of shifts the limit of hours may also be exceeded provided that the number of working hours does not average more than 56 per week. A clause added by the Senate provides that such regulation of hours must in no case affect any rest days which may be secured by the law of Canada to

the workers in such processes in compensation for the weekly rest day.

The Bill as introduced provided that in exceptional cases, where it is recognized that the daily limit of hours of work cannot be applied, and where agreements have been made between employers' and workers' organizations to increase the daily limit, the Governor in Council may give effect to such agreements provided that the average number of hours per week over the number of weeks covered by such agreement does not exceed forty-eight. In the House of Commons, a further proviso was added that where such an agreement, embodying the basic principle of the eight-hour day, had been made, prior to December 31, 1934, between a railway company and any employees' organization, the provisions of such agreement relating to hours of employment are to continue in effect for "one year from the 31st March, 1935, unless suspended during such period by the Governor in Council." A Senate amendment replaced the words quoted by the words "three months from the date of the coming into force of this Act." The Act, itself, is to come into force three months after receiving the Royal Assent.

Whenever the Governor in Council after consultation as required by the Convention (i.e. with the employers' and workers' organizations concerned, if any) is satisfied that the work or any class of work in any industrial undertaking or any class of industrial undertaking is preparatory or complementary so that it must necessarily be carried on outside the limits laid down for the general working of an establishment, or is essentially intermittent as when it does not require the worker to be continuously occupied, or must necessarily be performed in variable periods of employment, or is seasonal or subject to intervals of discontinuance or variations in the supply of raw materials, or exceptional owing to pressure of work for the time being, he may, by regulation, except all or any employment at such work or class of work in such undertaking or class of undertakings. Such regulations are to provide that fair and humane conditions of labour with relation to hours of work shall prevail in such excepted employment and that any regulation made by reason of pressure of work shall be temporary. Whenever practicable, the maximum additional hours permitted are to be fixed by the regulations and in such case the rate of pay for overtime is not to be less than one and one-quarter times the regular rate.

Employers must post notices showing the hours of work in conspicuous places or notify them by such other method as may be approved

by the Governor in Council. The hours must be so fixed that the duration of the work does not exceed the limits prescribed by the Act and when so notified may not be changed except in a manner approved by the Governor in Council. Rest intervals not reckoned as part of the working hours are to be notified in the same way. Employers must keep overtime records in prescribed form. An employer who violates or fails to comply with the Act or regulations is punishable on summary conviction for each offence by a fine not exceeding \$100. A minimum fine of \$20 in the original Bill was struck out. A section added by the House of Commons provides that nothing in the Act is to be construed as relieving any employer from any obligation under any provincial statute establishing shorter hours of work than those established by the Dominion Act.

### Public Works and Contracts

The Fair Wages and Hours of Labour Act, 1935, which received Royal Assent on June 28, 1935, and is to come into force on May 1, 1936, repeals the Fair Wages and Eight-Hour Day Act, 1930, but re-enacts a number of sections of that statute, adding new provisions to comply as far as possible with the recommendations of the Royal Commission on Price Spreads. The Act, like its predecessor, makes provision for "fair wages" and an eight-hour day on construction works undertaken by the Government of Canada directly or by contract. It provides also, however, for a forty-four-hour week on such works and extends the Federal Government's policy of fair wages and an eight-hour day to works towards which Federal aid is granted by way of contribution, subsidy, loan, advance or guarantee, by stipulating that an agreement must be entered into with the Government of Canada by the party intended to receive such grant setting forth that "fair wages" as defined in the Act will be observed and working hours will not exceed eight a day except in special cases to be determined by the Governor in Council or in cases of emergency approved by the Minister of Labour. This provision includes works carried out by any provincial or municipal authority to which financial aid is given by the Dominion as well as other works aided by the Government of Canada. A grant or payment by the Dominion may be excepted from this provision by statutory authority or by agreement with the Government of Canada. Regulations may be made by the Governor in Council to require the furnishing of any necessary information to ensure the enforcement of the Act. The Act, however, does

not apply to such contracts, agreements or works as are, by order of the Governor in Council made before the execution of the contract, declared to be excepted from the operation of the Act.

### Weekly Rest Day

The Weekly Rest in Industrial Undertakings Act, which gives effect to the draft convention of the International Labour Conference on that subject adopted in 1921, received the Royal Assent on April 4, 1935, and comes into effect three months thereafter. The Act applies to industrial undertakings, defined as in the Limitation of Hours of Work Act, and requires employers to grant a rest period of at least twenty-four consecutive hours in every seven days to all employees, with the exception of persons who hold positions of supervision or management or who are employed in a confidential capacity. The rest period is, wherever possible, to be granted to the whole staff simultaneously and to fall upon the Lord's Day, as defined by the Lord's Day Act of Canada.

The Governor in Council may make regulations authorizing total or partial exceptions and, in so doing, is to have special regard to proper humanitarian and economic considerations and to consult with responsible associations of employers or workers, if any. Such regulations are also to provide, as far as possible, for compensatory periods of rest, except where agreements or custom already make such provision.

Where the weekly-rest day given does not coincide with the Lord's Day, the employer must make known the days and hours of rest by notices posted in conspicuous places in the establishment or other convenient place or in any other manner determined by the regulations. The Act repeals that clause of the Lord's Day Act which provided that the prohibition of employment (other than emergency employment) on the Lord's Day without a compensatory rest day during the following week should not apply to any employee engaged in an industrial process in which the regular day's labour of such employee does not exceed eight hours. Nothing in the Weekly Rest in Industrial Undertakings Act is to be construed as affecting the operation of any provision of the Lord's Day Act as thus amended.

A fine not exceeding \$20 may be imposed on any employer who violates or fails to comply with any provision of the Act.

### Criminal Law

An Act to amend the Criminal Code, assented to on July 5, 1935, carries out certain recommendations of the Commission on Price Spreads designed to prevent evasion of the minimum wage or other labour laws. It adds to the Code a section, effective September 1, 1935, declaring everyone guilty of an indictable offence and liable to two years' imprisonment or to a fine not exceeding \$5,000, or to both, who, knowingly, employs a person at a rate of wage less than the minimum wage fixed by any law in Canada, falsifies an employment record or punches a time clock with intent to deceive; puts the wages of more than one employee in the same envelope with intent to evade the provisions of any law of Canada; employs a child or a minor contrary to any law of Canada.

### National Economic Council

The Economic Council of Canada Act was assented to on July 5, 1935. An honorary advisory council on social and economic questions, to be known as the Economic Council of Canada, is to be set up under the Act. The Council is to consist of the Prime Minister as chairman and fifteen members appointed by the Governor in Council who are to serve without remuneration but necessary expenses may be paid. Not more than seven of the members must be selected from the officers of the Dominion public service whose duties require consideration of social and economic problems; not more than five are to be representatives of organizations of a social or economic character and not more than three are to be other persons with special knowledge or experience of economic problems. Committees may be set up by the Council to consider special questions and persons not members of the Council may be appointed to such committees as associate members. The Dominion Statistician is to be secretary of the Council which is to meet at least twice a year and the necessary staff may be appointed. The duties of the Council, all of which are of an advisory nature and to be undertaken at the request of the Chairman, include the investigation of general or particular economic or social conditions or problems in Canada, the promotion and co-ordination of economic and social research in Canada, the co-ordination of activities of a social and economic character carried on by the various departments of the Government, consideration of the organization of statistics required for social and economic inquiries and the publication of such reports as are deemed to be in the public interest. The Dominion Statistician

is to make such special statistical investigations as the Council requires. Regulations governing procedure may be made by the Governor in Council and an annual report is to be submitted to Parliament.

### Housing

The Dominion Housing Act, assented to on July 5, 1935, provides that the Economic Council, when so required by the Governor in Council, shall investigate and advise as to the best means to be adopted to improve housing conditions in Canada; advise upon proposals for housing schemes submitted by local authorities, and particularly as to the necessity for and feasibility of establishing a housing scheme in any locality for the construction of houses with the assistance of the State to be leased to low wage earners, and for the clearance and re-development of overcrowded areas; as to proposals that have been adopted outside of Canada and the results achieved; as to the factors that enter into the cost of construction and means of securing economy and increased efficiency. The Minister of Finance may, with the approval of the Governor in Council, enter into contracts with approved lending institutions or local authorities to join with such institutions or authorities in the making of loans to assist in the building of houses under conditions laid down in the Act. The sum of \$10,000,000 is appropriated for the purposes of the Act.

### Trade and Industry Commission

The Dominion Trade and Industry Commission Act, which received the Royal Assent on July 5, and will come into effect on October 1, 1935, is designed to carry out certain recommendations of the Price Spreads Commission. The Act provides for a Dominion Trade and Industry Commission of three members and that the members of the Tariff Board shall act as the Commissioners. The Commission is charged with the administration of the Combines Investigation Act and is given power to investigate complaints regarding unfair trade practices, to promote fair trade conferences, to co-operate with boards of trade and to conduct economic investigations alone or in co-operation with the Economic Council to be set up under the Economic Council Act. The Commission may recommend the approval of an agreement to control and regulate prices or production if it is unanimously of the opinion that wasteful or demoralizing competition exists in an industry and that the agreement would not be against the public interest. If the Governor in Council approves of the agree-

ment, no prosecution under the Combines Investigation Act or Section 498 of the Criminal Code may be instituted except with the consent of the Commission. If, after investigation, the Commission considers that any practice complained of constitutes an offence against any Dominion law relating to unfair trade practices, it may investigate and communicate the complaint, and any evidence in support thereof, to the Attorney-General of Canada with a recommendation that the parties be prosecuted. The Attorney-General may refer the matter to the Attorney-General of the province concerned or to the Director of Public Prosecutions whose appointment is provided for in the Act. The latter, who must be a barrister of at least ten years' standing, is charged with the duty of instituting, at the instance of the Attorney-General of Canada, criminal proceedings for violation of any of the laws prohibiting unfair trade practices in cases which appear to be of importance or difficulty, or in special circumstances, to assist the Attorney-General of any province in prosecuting offenders against such laws and to assist the Commission in the conduct of investigations. The National Research Council may, at the request of the Commission, investigate, report and advise upon all matters relating to commodity standards, prepare draft specifications or grades and analyze and report upon any commodity.

The Combines Investigation Act was amended so as to transfer the administration of the Act from the Minister of Labour to the Dominion Trade and Industry Commission. The words "merger, trust or monopoly" are defined in the Act as amended and the definition includes one or more persons who either substantially or completely control the class or species of business in which they are engaged.

### Other Measures

The Canadian Fisherman's Loan Act, which received Royal Assent on July 5, 1935, establishes a system of long-term mortgage credits for fishermen under the administration of the Canadian Farm Loan Board, and authorizes the Government of Canada to provide initial capital in an amount not exceeding \$300,000, to subscribe for the \$1 shares, issued as capital stock as loans are made, up to an amount equal to 5 per cent of the loans, to purchase fishermen's long-term loan bonds in an amount not exceeding \$500,000, and to guarantee the principal and interest of such bonds to an amount not exceeding \$1,000,000.

A Bill to amend the Industrial Disputes Investigation Act, as recommended by the Royal

Commission on Price Spreads but drafted to confine it to industries within federal legislative jurisdiction, was introduced in the House of Commons on May 23, 1935, and passed by the House but thrown out by the Senate. The Bill was designed to enable a board of conciliation and investigation to be appointed under the Act "in any industry subject to the legislative jurisdiction of the Parliament of Canada", whether or not it was an industry to which other sections of the Act applied, that is, mines and public utilities, if complaint was made to the Minister of Labour "that intimidation has been practised or other discriminatory action taken either by employers or employees" and it seemed expedient to the Minister to appoint a board. The text of the Bill and an account of the circumstances attending its rejection were given in the June issue of THE LABOUR GAZETTE at pp. 508-509.

A resolution was agreed to in favour of the adoption of a Federal health policy to be carried out in co-operation with the provincial governments.

Another resolution to provide old age pensions for blind persons over forty years of age by an amendment to the Old Age Pensions Act was referred to the Select Standing Committee of the House on Industrial and International Relations on January 30. On April 3, the committee reported its approval of the motion while expressing its regret that since the Old Age Pensions Act was in force in only seven of the nine provinces, an amendment to it would not benefit blind persons in New Brunswick and Quebec unless subsequent action was taken by the legislatures of those provinces. It was estimated by the committee on the evidence submitted that the cost to the Dominion of pensions to the blind between 40 and 70 years of age under the Old Age Pensions Act would be under \$500,000 apart from administration expenses. On presentation of this report, it was moved that the report be referred back to the committee with power to amend it by recommending the enactment of a special Act applicable to all the provinces and providing pensions for the blind over 40 years of age on the same basis as old age pensions. On June 12 the committee submitted its amended report stating—

In view of all the circumstances including possible constitutional difficulties, the committee recommends that the Government of Canada consider amendments to the Old Age Pensions Act in such manner as to make that act apply to blind persons of forty years of age and over. The committee are of the opinion that in drafting such amendment provision should be made whereby any province might by appropriate provincial action, provide for the operation of that portion of the act dealing with pensions for the blind without the necessity of providing for the operation of the whole act within such province.

The motion for concurrence in this report was allowed to stand over and on June 27, the Prime Minister stated that no action would be taken by the Government requiring the present session. As to amendment of the Old Age Pensions Act for this purpose, there was strong opposition to this course on the ground that as two provinces had not adopted the Act, an invidious distinction might be made by giving pensions to a given category of persons in the other provinces.

### New Labour Organizations in Canada

Charters have been issued by the Trades and Labour Congress of Canada to the following organizations:

Toronto Paper Box Makers' Federal Labour Union, No. 76.—President, F. F. McCarthy, Toronto, Ont.; Secretary, J. J. McAuliffe, 180 Jones Ave., Toronto, Ont.

Truckers' Federal Labour Union, No. 77.—President, Thomas Chisamore, Port Arthur, Ont.; Secretary, Alexander Reynard, 212 McIntyre St., Port Arthur, Ont.

Kenora Trades and Labour Council.—President, Fred Rivers, Kenora, Ont.; Secretary, T. J. Thomas, Box 773, Kenora, Ont.

Border City School Maintenance Association, No. 72, Windsor, Ont.—President, F. E. Mason, Windsor, Ont.; Secretary, Frank Harding, 709 Dougall Ave., Windsor, Ont.

Federal Labour Union, No. 65, Brantford, Ont.—President, W. Rodgers, 9 Blossie St., Brantford, Ont.; Secretary, J. R. Dutton, 131 Drummond St., Brantford, Ont.

Charlottetown General Labourers' Protective Association, No. 66.—President, Harry Redmond, Charlottetown, P.E.I.; Secretary, Henry Ford, Charlottetown, P.E.I.

Amalgamated Workers' Federal Union, No. 73.—President, W. L. Myles, Kenora, Ont.; Secretary, D. C. Talbot, Box 893, Kenora, Ont.

The following new local unions have been chartered recently by the All-Canadian Congress of Labour:

Montreal Sheet Metal Workers' Union.—Secretary, R. Senecal, 1288 Beaubien St., Montreal, Que.

London Civic Employees' Union, Local No. 1.—Secretary, J. Hughes, 371 King St., London, Ont.

Winnipeg Projectionists', Local No. 8, National Union of Theatrical Employees.—Secretary, Ed. Barr, 1248 Downing St., Winnipeg, Man.

Calgary Newspaper Printers' Association, Local No. 1, The Canadian Printers' Union.—Secretary, R. H. Thornton, 327 Second Ave. N.E., Calgary, Alta.

Edmonton Local No. 2, National Cleaners and Dyers' Union.—Acting Secretary, R. LeMaitre, 11319—87th St., Edmonton, Alta.

## LABOUR LEGISLATION IN ALBERTA IN 1935

THE Alberta Legislature, which was in session from February 7 to April 23, 1935, enacted a number of laws of labour interest including new statutes dealing with collective agreements, regulation of quarries, and health insurance, and amendments to acts relating to unemployment relief, regulations of steam boilers and pressure vessels and the employment of children.

The Industrial Standards Act, which is designed to encourage the making of agreements between employers and employees in the various industries and to enable the terms of such agreements as to wages and hours to be given the force of law for a period of one year, was summarized in the LABOUR GAZETTE for June, 1935, at pp. 534-536.

The Quarries Regulation Act, which will come into force on Proclamation, empowers the Lieutenant-Governor in Council to make regulations governing the working of quarries. "Quarry" is defined to include workings in any land for the purpose of obtaining rock, stone, gravel, sand, clay, or earth, not being a mine within the meaning of the Coal Mines Regulation Act, and all machinery and equipment used in connection with such workings. The regulations may be made generally for the purpose of ensuring the safety of workers and prescribing the manner of operation. They may deal in particular with the storage and use of explosives, the prevention of insanitary conditions and the accumulation of gas, may require the appointment of quarry managers and prescribe the minimum ages for employees, the hours of employment, and the places and times of payment of wages and the deductions to be allowed. Inspectors appointed under the Coal-Mines Regulation Act are charged with the duty of inspecting quarries as occasion may require, or as the Minister may direct. For contravention of any regulation a fine not exceeding \$25 and costs may be imposed, and, in default of payment, the offender may be imprisoned for not more than thirty days.

The Alberta Health Insurance Act, which will come into force on Proclamation, provides for the appointment by the Lieutenant-Governor in Council of a Health Insurance Commission of three members, including one medical practitioner. Where, by resolution of a majority of the governing bodies of the municipalities or improvement districts concerned or by a petition of at least 25 per cent of their residents, it appears to the Commission that there is a desire for the formation of a medical district, the commission may direct the taking of a vote of the electors on

the question in the manner prescribed by the Municipal Hospitals Act. The Commission may of its own motion direct the taking of such a vote. If a majority of the electors favour the constitution of the area into a medical district, the Commission, with the approval of the Lieutenant-Governor in Council, may issue an order forming the district. "Elector" is defined to include any British subject twenty-one years of age and over, who has resided in the Province for twelve months and in the district for three months immediately preceding the taking of the vote.

Provision is made for an advisory board for each medical district, consisting of one member from each municipality or improvement district included. This board is to make recommendations to the Commission for the conduct of affairs in the territory under its charge. The Commission is empowered to appoint professional boards of reference to inquire into and report on any question relating to dental, hospital, medical or nursing services. Such boards are to consist of three persons all of whom must be members of the profession concerned. The chairman is to be nominated by the Commission, one member by the advisory board of the district in which the question arises, and the remaining member by the governing body of the profession concerned. The member of the local advisory board for each municipality and the chairman and secretary of the advisory board are to be a local board of reference for that municipality to hear and determine questions which are not of a professional nature as to the claim of a resident to receive benefit, or to deal with emergency situations.

Upon the constitution of a medical district, every municipality wholly or partly included therein must, as soon as possible, take a census and ascertain what persons are residents or income earners or likely to become earners and any other information prescribed by the regulations. "Income earner" does not include a married woman whose income, independently of her husband, does not exceed \$100 per annum, a female domestic servant whose remuneration over and above board and lodging, does not exceed \$12 per month, or a male person under 18 years of age who is a relative of, and resides with, an income earner but receives no remuneration for services other than board and lodging, and has no other income. Residents of a medical district who become income earners or income earners who become residents subsequently to the taking of the census, must register with the secretary of the municipality in which

they reside and residents removing from a district must notify the secretary.

The scheme is to be financed by contributions from the municipality, the province, employers and residents. Each municipality wholly or partly within a medical district is to pay \$11.28 per annum and the Provincial Treasurer \$3.22 per annum to the Commission for each resident of such district. Residents who are wage-earners are to pay \$2.01 per month, and those who are casual labourers one cent per month for each hour of employment. The employer will contribute in respect of each employee who is a resident of a medical district 81 cents per month in the case of a salary or wage earner, and one-half cent for each hour of employment in the case of a casual worker. The employee's contribution is payable to the employer who acts as collector for the municipality entitled to the payment. Income earners other than wage or salary earners, are to pay on demand to the municipality in which they reside the sum of \$33.83 per annum or \$2.82 per month. Each employer must keep accounts and produce them for inspection by the secretary of the municipality or any person authorized by him, and must also make a monthly return to the secretary in the form prescribed by the regulations. Amounts payable under the Act are recoverable as taxes.

Benefits afforded to residents of medical districts include medical, surgical and dental advice and treatment; hospital and nursing services; laboratory, X-ray and biochemical services; hospital facilities necessary for purposes of diagnosis; and drugs, medical and surgical supplies and appliances prescribed by the medical practitioner. A resident may consult any medical practitioner or dentist practising in the district who is to be paid for his services by the Commission according to the tariff and subject to the conditions laid down in the Act and regulations. The medical practitioner is to decide in the first instance as to the necessity for benefit but a patient may appeal from his decision to the local advisory board. A local board of reference may disqualify for the receipt of benefit any person who appears to have taken up residence for the purpose of receiving benefit without becoming a bona fide resident of the district, and, with the approval of the Commission, any person who is persistently unreasonable in his demands for services.

The Commission is authorized to institute and carry on clinics for the promotion of the public health of medical districts and, generally, all services for the maintenance of health and the prevention of disease, and may maintain a trained staff to provide such services. The Commission may also, with the

approval of the Lieutenant-Governor in Council, make regulations prescribing the procedure to be followed in proceedings under the Act, defining the extent of benefits to be granted and providing for any event or contingency for which no express provision is made in the Act.

A sum not exceeding ten per cent of all moneys received by the Commission is to be appropriated to defray the expenses of the Commission; two per cent of the moneys received from each medical district is to be kept in a separate contingency fund for that district to be used only for dealing with emergencies and unusual conditions; the balance of the funds received from each district is to be available for the payment of benefits in the district.

Clauses added to the Town and Village Act enable the council of a town or village to pass a by-law making provision for medical care of its residents by means of a contract or agreement with a medical practitioner, either alone or in conjunction with the council of one or more cities, towns, villages or municipal districts, and such contract or agreement may be by way of guarantee or upon any other basis. No by-law for medical care is to be finally passed until it has been assented to by two-thirds of the electors who are property-owners and who vote thereon, and no contract or agreement made under such by-law is to have any force until approved in writing by the Minister of Health.

The provisions relating to the imposition in towns of a minimum tax of \$4 for school purposes were redrawn and the tax may now be imposed upon every person twenty-one years of age and over who has been resident in the town for one month in any calendar year, is gainfully employed and has not been assessed for that year. Formerly all male persons of 21 years of age, so resident were subject to this tax whether employed or not.

The Unemployment Relief Act, 1933, Continuation Act, 1935, revives the Unemployment Relief Act, 1933, as from the date of its expiration, (March 31, 1934) and continues it in effect until March 31, 1936. The Act authorized the making of agreements with the Government of Canada and with the municipalities and improvement districts for the carrying out of measures to relieve unemployment. The Unemployment and Agricultural Relief Borrowing Act provides for the ratification of borrowings by the province from the Dominion in 1934 for unemployment and agricultural relief a total of \$2,145,000 particulars of which are set forth in the Schedule. The Relief Liability Act, 1934, was amended to correct a verbal error.

The Income Tax Act was amended to permit any person whose income does not exceed \$3,000 per annum and who in the year 1935 or 1936 has living with him a son between 21 and 25 years of age who by reason of unemployment is wholly dependent upon him, to deduct \$300 from the amount of his income in respect of such son.

An amendment to the Boilers Act forbids any person to use any second-hand pressure vessel acquired by him until he has obtained permission from an inspector to do so.

An amendment to the Theatres Act requires moving-picture machine operators to be licensed after an examination as to competency and provides for the payment of fees by candidates at such examinations.

The Alberta Natural Products Marketing Act was amended to enable the Lieutenant-Governor in Council by Proclamation to declare all or part of the Natural Products Marketing Act and the Dairy Industry Act passed by the Parliament of Canada, as well as any amendment thereto, or regulations made thereunder, to be in force in Alberta so far as they relate to any commodity produced in the province and to any other commodity to the extent that such commodity is not within the legislative competence of the Parliament of Canada and is within the legislative competence of the province.

A Bill to amend the Labour Disputes Act, 1926, was introduced but not passed. This Bill would have added to the Act sections similar to the Industrial Disputes Investigation Act of the Dominion prohibiting a strike or lockout pending or during a reference of a dispute to a Board of Conciliation.

On April 15, 1935, the Legislature agreed to a Resolution pointing out the serious effect on the wages of miners of the proposed reduction of fifty cents per ton in the coal supplied to the Canadian National Railways and directing the Legislature to request the Fuel Department of the Canadian National Railways to maintain the then price levels.

On April 18, a resolution was passed recommending that the Workmen's Compensation Act and its administration be reviewed by a Special Commission of three members, any or all of whom might be members of the Legislature, the Commission to present its report during the next session.

A Resolution adopted on April 22, favoured the financing by the Government of a program of public works so as to eliminate direct relief as far as possible.

A resolution of March 7, dealing with old age pensions was noted in the LABOUR GAZETTE for April at p. 321.

## COLLECTIVE LABOUR AGREEMENTS EXTENSION ACT OF QUEBEC

### Agreements Recently Made Obligatory and Further Applications

RECENT proceedings under the Collective Labour Agreements Extension Act of Quebec include the extension to all employees and employers in the same trade, industry or business and the same district, by Orders in Council, of eleven agreements which are summarized below and an amendment to an Order in Council affecting plumbers at Three Rivers, also summarized below. Notices of application for changes in agreements already in force under Orders in Council have appeared in various issues of the *Quebec Official Gazette*, as follows: building trades, Three Rivers, in June 8 and June 15; plumbers, Three Rivers, in June 8; painters, Three Rivers, in June 8; bricklayers, Three Rivers, in June 15; building trades, Montreal, in June 15 and June 22; men's and boys' clothing workers throughout the province, in June 22. Statements of correction to applications for change in agreements already in force under Orders in Council have appeared in the *Quebec Official Gazette*, as follows: plumbers, Three Rivers, in June 8, and plumbers, Quebec, in June 22.

Notices of application for the extension of agreements to all employees and employers in the same trade, industry or business and the same district have appeared in the *Quebec Official Gazette* as follows: structural steel workers, Montreal in June 8; barbers, Hull in June 8; barbers, Joliette in June 8; barbers, Shawinigan Falls in June 15, and printers, Chicoutimi in June 29. Statements of corrections to applications for extension of agreements already under consideration have appeared in the *Quebec Official Gazette*, as follows: plumbers, Quebec, in June 8; barbers, Saint Hyacinthe in June 8.

The text of the Collective Labour Agreements Extension Act, Quebec, was printed in the LABOUR GAZETTE, May, 1934, page 417, and amendments to the Act were summarized in the issue of June, 1935, page 526. Under this Act applications may be made to the provincial Minister of Labour by either party to a collective agreement made between, on the one hand, one or more associations of *bona fide* employees, and, on the other hand, em-

ployers or one or more associations of employers, to have those terms of such agreement which concern rates of wages, hours of labour and apprenticeship made obligatory on all employees and employers in the same trade, industry or business within the territorial jurisdiction determined by the agreement. The application is then printed in the *Quebec Official Gazette*, and during the following thirty days, objections may be made to the Minister of Labour. After this delay, if the Minister of Labour deems that the provisions of the agreement "have acquired a preponderant significance and importance" that would make the establishment of these conditions advisable, an Order in Council may be passed making the terms obligatory on all employees and employers in the trade, industry or business in the territory included in the agreement from the date of the publication of the Order in Council in the *Quebec Official Gazette* and for the duration of the agreement. The provisions of an agreement thus made obligatory govern all individual labour contracts in the trade, industry or business and district, except that those individual contracts which are to the advantage of the employee will have effect unless expressly prohibited in the agreement which has been approved by Order in Council. The applications for extension of agreements have been noted and the conditions of the various agreements made obligatory by Orders in Council have been given in the *LABOUR GAZETTE* beginning in the issue of June, 1934. In this issue and in future, the terms of agreements will be outlined instead of being given in full.

**BUILDING TRADES, VICTORIAVILLE.**—An Order in Council approved June 13, and published in the *Quebec Official Gazette*, June 15, makes obligatory the terms of an agreement (as amended following objections) between certain building contractors and La Federation Ouvrière de Victoriaville et des environs No. 19865 (The Workers' Federation of Victoriaville and district, No. 19865). The application for the extension of this agreement was noted in the *LABOUR GAZETTE*, April, page 323.

The territorial jurisdiction comprises the county of Arthabasca. The agricultural industry is exempt.

The agreement is to be in effect from June 15, 1935, to June 15, 1936, and thereafter from year to year until notice.

Hours in accordance with regulations under the limiting of working hours Act, 8 per day and 40 per week for skilled workers, except on public works, etc., 6 per day and 36 per week, two shifts from May 1 to October 1 on large contracts. (*LABOUR GAZETTE*, July, 1933, page 701.)

For any contracts exempt from this Act, the agreement provides for an 8-hour day for qualified workmen and 9 for labourers and helpers.

Wage rates per hour: bricklayers, masons and plasterers, 50 cents; electricians, steam engine-men (construction), carpenters and joiners, tin-smiths, plumbers and steamfitters, 35 cents; painters, 30 cents; carters with single horse 40 cents, with two horses, 55 cents; labourers, 25 cents.

Lower minimum rates are specified for small buildings in municipalities of small population and for persons partially incapacitated by age, etc.

Wages for apprentices: 15 cents per hour during first year, 20 cents during second year, and 25 cents during third year and until journeymen's licences be obtained.

**PLUMBERS, HULL.**—An Order in Council approved June 13, and published in the *Quebec Official Gazette*, June 15, makes obligatory the terms of an agreement between certain plumbing and steamfitting contractors and l'Association des Employés en Plomberie et en Chauffage (the Plumbing and Heating Employees' Association). The application for the extension of this agreement was mentioned in the *LABOUR GAZETTE*, June, page 532.

The territorial jurisdiction comprises the counties of Hull, Gatineau, Pontiac, Abitibi, Temiscamingue, Labelle and Papineau so far as public buildings are concerned and applies to the county of Hull only, for other buildings, except that the agricultural industry is not included in any county.

The agreement is to be in force from June 15, 1935, to March 31, 1936.

Hours are limited to the same as governs building trades at Victoriaville noted above.

Wages per hour: master plumbers (personal services) \$1.25, journeymen 75 cents, apprentices from 10 cents during first year to 25 cents during fourth year, improvers 40 cents during first six months and 50 cents during second six months.

Each journeyman or improver to be entitled to one apprentice only; one improver only shall be allowed to each two journeymen.

For work away from residence of the employee, transportation and board to be paid by the employer.

**BREAD AND CAKE DELIVERY MEN, QUEBEC.**—An Order in Council approved June 7 and published in the *Quebec Official Gazette* June 15, (correction in June 22) makes obligatory the terms of an agreement between certain bakers and confectioners and l'Union Nationale Catholique des Compagnons Boulangers de Québec, section des distributeurs de pain, gâteaux et pâtisseries (the National Catholic Union of Journeymen Bakers of Quebec, bread, cake and pastry distributors section).

The application for the extension of this agreement was noted in the *LABOUR GAZETTE*, May, page 427.

The territorial jurisdiction of the agreement comprises the judicial district of Quebec except that in the counties of Portneuf and Lotbinière, only master bakers selling all or any part of their production in one or more adjoining counties will be subject to it.

The agreement is in effect from June 15, 1935 to November 1, 1935, when it will be renewed if no notice or change has been given by either party.

Hours: 72 per week.

Minimum weekly wage rates: a man in charge of one delivery \$15, second employee on a delivery \$6; when paid on a commission basis, the minimum of \$15 to be paid. Employees who only deliver orders which they have not solicited, to be paid a minimum of \$10 per week. Outside the city of Quebec and the town of Levis and within a radius of 15 miles of their limits these wage rates may be reduced 10 per cent. If a chauffeur is employed on a delivery truck, he must be paid a minimum of \$15 per week.

Bread, cake and pastry delivery men are not responsible for the collection of money.

**PLUMBERS AND ELECTRICIANS, QUEBEC.**—An Order in Council, approved June 28, and published in the *Quebec Official Gazette*, June 29, makes obligatory the terms of an agreement between certain contractors and la Fraternité des Plombiers-Electriciens de Québec, Inc. (the Brotherhood of Plumbers and Electricians of Quebec, Inc.). The application of the extension of this agreement was noted in the *LABOUR GAZETTE*, June, page 532.

The territorial jurisdiction determined by the agreement comprises the judicial districts of Quebec, Beauce, Montmagny, Kamouraska, Saguenay and Gaspé.

The agreement is in effect from May 20, 1935, to April 30, 1936, and for another year if neither party gives notice of intention of changing it. In case of a revision of wages for May 1, 1936, if the parties do not come to a signed agreement, the present agreement will remain in force until the completion of the works underway and until the expiration of negotiations.

Hours are limited under the limiting of working hours Act, to be same as governs building trades at Victoriaville noted above. Or in case of non-application or of derogation granted by the proper authority, hours would be 9 per day, a 54 hour week except during June, July and August when they would be 50 per week.

Overtime: time and one half till midnight; from midnight to 7 a.m. double time; work on Sundays or holidays, double time.

Wages per hour: journeymen plumbers and electricians, 45 cents; apprentices from 10 cents per hour during first year to 18 cents during fourth year. However in any municipality outside a radius of 10 miles of Quebec and Levis, which has a population of less than 5,000, for work on contracts of less than \$5,000, the rate will be 40 cents.

Plumbers and electricians employed permanently in the maintenance of public buildings or industrial establishments to receive at least \$19 per week.

The number of apprentices must not exceed one per three journeymen for work in the shop and one apprentice for every journeyman for work done on a construction job, but every workshop is entitled to one apprentice.

If the employee rooms or boards in the establishment, the employer may deduct from the worker's wages \$3 per month for room and

20 cents per meal. The travelling expenses and board of workers sent outside the town will be paid by the employers.

**BARBERS AND HAIRDRESSERS, SHERBROOKE.**—An Order in Council, approved June 28, makes obligatory the terms of an agreement between Les Syndicats des Maîtres-Barbiers et Coiffeurs du District de Saint-François (The Master Barbers and Hairdressers Unions of the District of Saint Francis) and Le Syndicat des Employés-Barbiers du District de Saint-François (The Union of Employed Barbers of the District of Saint Francis). The application for the extension of this agreement was noted in the *LABOUR GAZETTE*, June, page 533.

The territorial jurisdiction of the agreement includes the Counties of Sherbrooke, Richmond, Wolfe, Compton, Frontenac and Stanstead.

Agreement to be in effect from June 29, 1935 to June 28, 1938, and until a new agreement is made. With the consent of both parties, the joint committee may modify the agreement in the interest of the trade.

Hours: the regular hours for the shops vary in different localities in the district from 66 to 71 hours per week, but in this time each employee is entitled to 6 consecutive hours off each week except the weeks when there is a holiday.

Minimum wages per week: barbers and men and ladies' hairdressers \$13 per week, plus 50 per cent on any receipts over \$20 made by the employee; extra employees 45 cents per hour. Employees receiving higher wages than these at the time the agreement is signed are not to have their wages reduced. For master or employed barbers and hairdressers who work by contract, by the piece or by the job, minimum rates are set for each piece of work. Wages of female hairdressers in no case to be lower than the minimum fixed by the Minimum Wage Commission of the Province. Provision is made for arranging for lower rates of wages for persons partially incapacitated on account of age, etc.

Apprentices to be at least 16 years and must serve 3 years and follow the regular barber's course. Not more than one apprentice in each shop.

Wages for apprentices: \$5 per week after six months, \$7 after one year and \$9 after two years.

**BARBERS AND HAIRDRESSERS, MONTREAL.**—An Order in Council, approved June 28, makes obligatory the terms of an Agreement (as amended following objections) between Le Syndicat Professionnel des Maîtres-Barbiers et Coiffeurs de l'Île de Montréal (the Trade Union of Master Barbers and Hairdressers of the Island of Montreal) and Le Syndicat Professionnel des Employés-Barbiers et Coiffeurs de l'Île de Montréal (the Trade Union of Employed Barbers of the Island of Montreal). The application for the extension of this agreement was noted in the *LABOUR GAZETTE*, June, page 533.

The territorial jurisdiction comprises the Island of Montreal and a radius of 10 miles of its limits.

The agreement does not govern ladies' beauty parlours with the exception of the minimum

tariff for ladies' hairdressing or any other service that can be done either in a barber shop or in a ladies' beauty parlour.

The agreement is in effect from June 29, 1935 to June 28, 1938, and until a new agreement is made. With the consent of the two parties, the joint committee may make any modifications in the interest of the trade.

Hours: 55 per week.

Overtime: 45 cents per hour.

Minimum wages per week: barber hairdressers \$15 plus 50 per cent of all receipts in excess of \$25 made by the employee in the week; extra employees 45 cents per hour. For tradesman, master or employee, barber, barber-hairdresser working on contract, piecework or by the job, minimum rates are set for each piece of work.

No object or service of any value which may serve to decrease the rates in the agreement may be given to a customer. Provision is made for arranging for lower rates of wages for persons partially incapacitated through age, etc.

Not more than one apprentice in any shop. Apprentices must be at least 16 years of age and serve two years, during the first six months of which they must attend a barbers' school and continue a special course throughout the two years.

Wages for apprentices: \$7.50 per week after six months at the school, \$10 after 12 months apprenticeship and \$12.50 after 18 months.

**BARBERS AND HAIRDRESSERS, SAINT HYACINTHE.**—An Order in Council, approved June 28 and published in the *Quebec Official Gazette*, June 29, makes obligatory the terms of an agreement between "Le Syndicat Catholique National des Maîtres-Barbiers et Coiffeurs de Saint-Hyacinthe" (The National Catholic Union of Master Barbers and Hairdressers of Saint-Hyacinthe) and Le Syndicat Catholique National des Employés-Barbiers et Coiffeurs de Saint Hyacinthe (The National Catholic Union of Employed Barbers) and l'Union Internationale des Ouvriers Barbiers d'Amerique, District de Saint Hyacinthe, (the International Union of Journeymen Barbers, district of Saint Hyacinthe).

The territorial jurisdiction comprises the towns of Saint Hyacinthe and Drummondville and within a radius of two miles of their limits.

Agreement to be in effect June 29, 1935 to June 28, 1938 and until a new agreement is made. Modification may be made with the consent of both parties, through the joint committee, if in the interest of the trade.

Hours: 59 per week.

Minimum wages: for barbers and men's and ladies' hairdressers, \$13 per week, plus 50 per cent of all receipts in excess of \$18 made by the employee; but after the agreement is in effect one year, the minimum wage will be \$14 per week plus 50 per cent of all receipts over \$20; for female hairdressers, \$12.50 per week but in no case less than the minimum wage fixed by the Minimum Wage Commission. Extra employees, 45 cents per hour. The minimum wages for employees working by the job are set. No object of any value may be given to a customer with a view to reducing the minimum rates mentioned. Journeymen who due to advanced age or infirmity cannot give the regular

service may arrange through the Joint Committee to work for lower minimum wage rates.

The regulations for apprentices are similar to those for Montreal noted above in the Montreal agreement except wage rates which are \$7 per week after six months at the school, \$9 after twelve months and \$11 after 18 months.

**BARBERS AND HAIRDRESSERS, QUEBEC.**—An Order in Council, approved June 28, and published in the *Quebec Official Gazette*, June 29, makes obligatory the terms of an agreement (as amended, following objections) between Le Syndicat des Maîtres Barbiers et Coiffeurs de Québec, Inc. (The Master Barbers and Hairdressers Union of Quebec, Inc.) and l'Union Catholique des Compagnons-Barbiers de Québec, Inc. (The National Catholic Union of Journeymen Barbers of Quebec, Inc.).

The territorial jurisdiction comprises the City of Quebec.

The agreement is in effect from June 29 to May 1, 1936.

Hours: 58 per week, except in hairdressing parlours where they are 55 per week.

Overtime: 25 cents per hour over the regular.

Minimum wages for journeymen: \$15 per week, plus 50 per cent commission on the gross receipts exceeding \$25 each week, except that journeymen who earn \$1,500 or more per annum, in barber shops, are to be paid a straight 50 per cent on gross receipts. Temporary employees to be paid \$2.50 per day except for Saturdays or the eve of feasts, when rate is \$5 per day. Women hairdressers to be paid the minimum established by the Minimum Wage Board. For employees who work on commission, special rates are established for each piece of work, and no premium may be given to anyone with a view to reducing these rates. No particular agreement more advantageous than this to the employee may be changed by this agreement.

If a barber or hairdresser boards with employer, not more than \$2 per week for lodging and \$4 per week for board to be charged.

No master barber or hairdresser may rent one or more chairs to a journeyman barber or hairdresser or to another master barber, barber-hairdresser or female hairdresser.

One apprentice may be employed for each two journeymen in a shop, but not more than two apprentices in any shop. Apprentices to serve three years, but three months in an approved barbers' school may replace one year's apprenticeship.

Wages of apprentices: \$3 per week during first year, \$5 during second year and \$7 during third year.

No strike or counter-strike shall be declared unless all means of conciliation have been previously tried.

**BARBERS AND HAIRDRESSERS, THREE RIVERS.**—An Order in Council, approved June 28, and published in the *Quebec Official Gazette*, June 29, makes obligatory the terms of an agreement (as amended following objections) between l'Union Nationale Catholique des Maîtres-Barbiers et Coiffeurs des Trois-Rivières (The National Catholic Union of Master Barbers and Hairdressers of Three Rivers) and l'Union Nationale Catholique des Em-

ployés-Barbiers et Coiffeurs des Trois-Rivières (The National Catholic Union of Journeymen Barbers and Hairdressers of Three Rivers).

The territorial jurisdiction comprises the towns of Three Rivers, Cap-de-la-Madeleine and Pointe du Lac.

Hours: 57 per week.

Wages for barbers and hairdressers: \$15 per week plus 50 per cent of all receipts exceeding \$25 or \$18 without the percentage; \$12.50 for ladies' hairdressers. In no case may women hairdressers be paid less than provided by the minimum wage board. No employer to reduce the wages for an employee receiving more than these minimum rates. Minimum rates are specified for each piece of work by employees working on contract or piece work.

Provision is made for arranging that partially incapacitated employees may work for less than regular rates.

Any agreement with a view to reducing the rates enumerated either per hour or contract shall be null and void. No object of any value with a view to reducing the rates may be given to a customer.

Not more than one apprentice allowed to any one shop. Apprenticeship calls for a six months, course in hygiene.

Wages of apprentices: after six months' practice \$5 per week, after one year \$7.50 and after 18 months, \$10.

**BUILDING TRADES, DRUMMONDVILLE.**—An Order in Council, approved June 28 and published in the *Quebec Official Gazette*, June 29, makes obligatory the terms of an agreement (as amended following objections) between certain building contractors and le Syndicat Nationale Catholique des Métiers de la Construction de Drummondville (The National Catholic Union of Building Trades of Drummondville).

The territorial jurisdiction comprises the county of Drummond.

The agreement is in effect from June 29, 1935, to June 28, 1936, and shall be renewed automatically if no notice of change is given 30 days before its expiration.

The agricultural industry and also contracts signed before the publication of the Order in Council are exempt.

Hours are limited to 8 per day and 48 per week under the limiting of working hours Act, but for contracts exempt from this Act, hours are limited to 8 per day for journeymen and 9 per day for helpers and common labourers.

Minimum hourly wage rates: bricklayers and masons 55 cents, electricians, plasterers and plumbers and steamfitters 50 cents, carpenters and joiners 45 cents; cement finishers, marble setters, ornamental iron workers (erectors), painters, slate and tile roofers, sheet metal workers, tile setters and terrazzo layers 40 cents; hod carriers, lathers (metal and wood), composition roofers, stationary engineers and ornamental iron workers' helpers 35 cents, common labourers 30 cents. For workmen who cannot perform the normal amount of work due to old age or invalidity, lower rates are specified. Lower rates are also provided for work on small contracts in municipalities of a small population.

Maintenance men employed permanently may be paid \$15 per week for qualified workmen and \$12 for unqualified workmen and labourers. Hours for maintenance men, 55 per week and any overtime to be paid at regular hourly rates mentioned above.

The number of apprentices allowed for journeymen employed on a job are: for the trades of painters, bricklayers, masons, plasterers, electricians and joiners, one apprentice to four journeymen, 2 apprentices to 10 journeymen, 3 apprentices to 15 journeymen, and in the other trades one apprentice to 10 journeymen.

Wages for apprentices: first year 12½ cents per hour, second year 18 cents, third year, 25 cents.

**LONGSHOREMEN, MONTREAL.**—An Order in Council approved June 28, and published in the *Quebec Official Gazette* June 29, makes obligatory the terms of an agreement between certain inland navigation companies and l'Union des Travailleurs du Port de Montreal. (The Longshoremen's Union of the Harbour of Montreal.) The Order in Council covers employers and employees interested in the loading and unloading of ships engaged in inland navigation in the Montreal harbour.

Wages for longshoremen and for checkers and coopers except those paid weekly or monthly: 42 cents per hour for all work done between 7 a.m. and 7 p.m., and 45 cents for all work done between 7 p.m. and 7 a.m.

If required to work more than six consecutive hours without a meal hour, all such extra time to be paid at time and one half. For work on Sundays, St. Jean Baptiste day, Ascension Day, Labour Day, Confederation Day and All Saints' Day, 60 cents per hour.

Time used for shifting and rigging of ships to be paid at prevailing rate.

For the handling of nitrate, bulk sulphur and full cargoes of china clay and fertilizer, shifting bunker coal and cargoes in refrigerators which are to be transported at 32° F. or under, 70 cents for day work and 78 cents for night work; for work performed in open deck when grain is running in a hatch connected with the said deck, the whole gang to be paid 70 cents for day work and 78 cents per hour for night work; for grain handling and bagging and cleaning 70 cents for day work and 78 cents for night work.

When in the course of their work, longshoremen are required to move from one place to another to continue their work, they shall be paid during transfer time at prevailing rates.

**PLUMBERS, THREE RIVERS.**—An Order in Council approved June 20, and published in the *Quebec Official Gazette*, June 22, adds a clause to the original Order in Council (LABOUR GAZETTE, December, 1934, page 1146) by specifying wage rates for apprentices at 10 cents per hour during first year, 15 cents during second year, 20 cents during third year, 25 cents during fourth year.

## INDUSTRIAL STANDARDS ACT OF ONTARIO

### Agreements Recently Approved by Order in Council

THE Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, page 534, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene a conference or series of conferences of employees and employers in the industry in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If in the opinion of the Minister a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force for a period not exceeding twelve months and thereupon such schedule shall be binding upon every employee or employer in such industry in such zone or zones to which the schedule applies, the schedule not coming into effect until ten days after publication of the Order in Council in the *Ontario Gazette*. The Minimum Wage Board has authority to enforce the provisions of the Act and of the regulations and schedules. A summary is given below of three schedules which have thus been approved by Order in Council.

**PLUMBERS, TORONTO.**—An Order in Council, dated May 30, and published in the *Ontario Gazette*, June 1, makes obligatory on all employers and employees in the trade a schedule of wages and hours governing plumbers and steamfitters in the city of Toronto and surrounding district.

Agreement to be in effect from June 1, 1935, to May 30, 1936.

The agreement applies to all those engaged in the plumbing, steamfitting and hot water heating, gas fitting and the installation of all pipe work and fittings, but not including sprinkler fitting.

Hours: 8 per day, a 40-hour week. No men will be employed for more than 40 hours per week without the sanction of the Board.

Overtime to be paid for at time and one half regular rates. Work on Saturdays (not otherwise provided for), Sundays and eight statutory holidays to be paid for at double time. If finishing up a repair job on regular working days, if to finish will not take more than one hour's time, it will be done at regular rate.

Emergency work, the setting of sleeves and inserts on Saturday morning may be done at the

regular rate. Men instructed to report for work on Saturday mornings to be paid a minimum of two hours single time.

Minimum wage rates: from June 1 to June 30, 1935, journeymen plumbers and steamfitters 85 cents per hour, fifth year junior mechanics 55 cents; from July 1, 1935, to termination of agreement, journeymen plumbers and steamfitters 90 cents, fifth year junior mechanics 60 cents. It is however provided that any work contracted for and accepted before July 1, 1935, of which due notice has been given to the Board is to be completed at the wage rates in effect during June, 1935. Any night shift will commence at end of the regular working day and be paid for at the rate of 8 hours' pay for 7 hours' work.

Not more than one junior mechanic allowed on each job to each branch of the trade, except where there are more than five journeymen plumbers or five journeymen steamfitters employed when two improvers will be allowed to six journeymen, three to eleven and four to sixteen journeymen.

All apprentices to be employed in accordance with the Ontario Provincial Apprenticeship Act.

**PLASTERERS, TORONTO.**—An Order in Council, dated, June 12, and published in the *Ontario Gazette*, June 15, makes obligatory on all employers and employees in the trade a schedule of wages and hours governing plain and ornamental plastering in interior work or exterior work.

Agreement to be in effect from June 25, 1935, to June 1, 1936.

Hours: 8 per day, 40 per week. No work on Saturday until 5 p.m. and then only at overtime rates, except that in case of emergency permission may be given to work Saturday or nights by arrangement with the Board. Where three shifts are worked, 8 hours pay for 7 hours work if the overtime shifts equal at least two thirds of the regular shift.

Overtime to be paid at time and one half the regular rates. Work on Sundays and eight specified holidays at double time.

Wages for journeymen plasterers: 90 cents per hour.

On all work contracted for and accepted before June 10, 1935, of which due notice has been given to the Board on or before July 1, 1935, shall be completed at a rate set by the Board.

A rate of wages may be determined by the Board for aged or handicapped employees.

**BREWERS, PROVINCE OF ONTARIO.**—An Order in Council dated June 19 and published in the *Ontario Gazette*, June 22, makes obligatory on all employers and employees in the industry the terms of an agreement governing the brewing industry throughout the province.

Agreement to be in effect from July 2, 1935 to July 1, 1936.

Hours: from April 1 to September 30, 9 per day with 5 on Saturdays; from October 1, to March 31, 8 per day with 5 on Saturdays. If a longer period than 9 hours is required to complete the process of manufacture or a trip in connection with the delivery, the Board may authorize employees to continue to work at the regular rate of wages until the completion of such operation or trip, but in no case to work for a longer period than the hours per week stipulated in this agreement.

Overtime (except as noted above) and work on legal holidays, time and one half the regular rates.

Minimum wage scale per week; coopers \$30, truck drivers \$25; bottlers operating machines, watchmen, fermenting room and cold storage, brew house and wash house \$24.50; other bottlers \$22.50; helpers \$22.50.

Drivers and their helpers who have been continuously employed for 6 months to be given one week's holiday with pay, and if employed one year, two weeks' holiday with pay, during the winter months.

All drivers delivering half barrels and barrels and large loads to have helpers.

Additional agreements negotiated under the Act, for approval by Order in Council, have been reported in the press. In Toronto and district in the building industry these provide for the forty-hour week and wages

per hour as follows: bricklayers and masons, 98 cents; spray painters, 80 cents, paper hangers, glaziers and decorators, 70 cents, 5 cents to be added to both rates on September 1; electricians, \$1; sheet metal workers, 75 cents; metal lathers, on metal furring 90 cents, on wood furring 70 cents, wood lathers, 62½ cents per hour or 7 cents per yard; unskilled labour, 50 cents. An agreement for plasterers' labourers at 60 cents per hour with a 48-hour week is also reported.

For the furniture and woodworking industry throughout Ontario except in the Toronto district, an agreement has been reported providing for minimum rates for skilled and unskilled workers, apprentices, etc., according to district.

For the jewelry industry, negotiations between representatives of the employers and workers are reported to have been initiated under the Act.

A violation of the plumbers' agreement outlined above is reported to have been dealt with by the plumbers' board, a question as to classification of work, the employer concerned paying labourers' wages instead of the plumbers' rate.

## BRITISH COLUMBIA BOARD OF INDUSTRIAL RELATIONS

### Recent Orders Governing Minimum Wages and Hours of Work

THE British Columbia Board of Industrial Relations, administering the Minimum Wages and Hours of Work Acts, has recently gazetted orders establishing the minimum rates for women employed in the mercantile industry and manufacturing industry.

ORDER No. 24—*Establishing a minimum wage in the mercantile industry.*

Subject to certain exemptions, the Board has fixed the minimum rate for employees over eighteen years of age in the mercantile industry at \$12.75 per week of 40 hours or more. For employees working less than 40 hour per week, the minimum rate is 35 cents per hour, provided that the wages in any one day shall not be less than \$1.40.

The minimum scale for employees under eighteen years of age for a week of 40 hours or more is as follows: \$7.50 a week during the first three months of such employment; \$8 a week during the second three months; \$8.50 a week during the third three months; \$9 a week during the fourth three months; \$9.50 a week during the fifth three months; \$10 a week during the sixth three months; \$10.50 a week during the seventh three months; \$11 a week thereafter until the said employee reaches the age of eighteen years.

For employees under eighteen years and working less than 40 hours per week the schedule is: 20 cents per hour during the first three months of such employment; 21 cents per hour during the second three months; 23 cents per hour during the third three months; 25 cents per hour during the fourth three months; 26 cents per hour during the fifth three months; 27 cents per hour during the sixth three months; 29 cents per hour during the seventh three months; and 30 cents per hour thereafter until the said employee reaches the age of eighteen years. In this group, however, it is provided that the wages in any one day shall not be less than one dollar.

Inexperienced employees, eighteen years or over, working 40 hours a week or more are to be paid the following minimum rates: \$9 a week during the first three months of such employment; \$10 a week during the second three months; \$11 a week during the third three months; \$12 a week during the fourth three months; \$12.75 a week thereafter.

For inexperienced employees eighteen years or over, working less than forty hours per week the minimum established is: 25 cents per hour during the first three months of such employment; 27 cents per hour during the

second three months; 30 cents per hour during the third three months; and 35 cents per hour during the fourth three months, with the proviso that the minimum in any one day shall not be less than \$1.25.

No woman or girl is to be employed for a greater number of hours than 48 in any one week unless special permission has been obtained from the Board.

This order becomes effective on July 1, 1935, and is in substitution of Order No. 18, of September, 1927.

**ORDER No. 25—Establishing a minimum wage in the manufacturing industry.**

This Order, which replaces Orders No. 16 and 16A of September, 1923, establishes a minimum rate for every experienced employee in the manufacturing industry (whether on time work or piece work) of \$14 per week of 48 hours, or 29½ cents per hour.

According to the regulations, the minimum wage—

“for every inexperienced employee in any branch of the manufacturing industry in which any of the articles or commodities mentioned in the following list are manufactured, prepared, or adapted for use or sale, or in any branch of the manufacturing industry ancillary or accessory thereto: Tea, coffee, spices, essences, sauces, jelly-powders, baking-powders, molasses, sugar, syrups, honey, peanut butter, cream and milk products, butter, candy, confectionery, bread, biscuits, cakes, macaroni, vermicelli, meats, eggs, soft drinks, yeast, chip and shoe-string potatoes, cereals, cooked foods, salads, ice-cream cones, other food products, cans, fruit and vegetable containers, paper boxes, wooden boxes, buttons, soap, paint, varnish, drug and toilet preparations, photographs, ink, seeds, brooms, brushes, whisks, pails, wash-boards, clothes-pins, matches, explosives, munitions, gas-mantles, window-shades, veneer products, batteries, plant fertilizers, maps, saw-teeth and holders, mats, tiles, ropes, and shingles, whether on a time-work or piece-work basis, shall be at the rate of:—Not less than \$8 a week for the first two months' employment; not less than \$10 a week for the second two months; not less than \$12 a week for the third two months; not less than \$14 a week thereafter.

The minimum wage for every inexperienced employee in any branch of the manufacturing industry in which any of the articles or commodities mentioned in the following list are manufactured, prepared, or adapted for use or sale, or in any branch of the manufacturing industry ancillary or accessory thereto: Cotton bags, paper bags, envelopes, overalls, shirts, ladies' and children's wear, uniforms, gloves, hats, caps, men's neckwear, water-proof clothing, boots and shoes, tents, awnings, regalia, carpets, furniture, bedding, pillow-covers, loose covers, mattress-covers, draperies, casket furnishings, factory-made millinery, knitted goods, blankets, machine-made cigars, pulp and paper-mill products, artificial flowers, lamp-shades, flags and other decorations, worsted-mill products, baskets, wreaths and other floral pieces, pianos, optical goods, aeroplanes, toys and novelties, rayon products, stockings and lingerie (including repair of same), and dipped choco-

lates, whether on a time-work or piece-work basis, shall be at the rate of:—Not less than \$8.00 a week for the first four months' employment; not less than \$10 a week for the second four months' employment; not less than \$12 a week for the third four months' employment; not less than \$14 a week thereafter.

The minimum wage for every inexperienced employee in any branch of the manufacturing industry in the following list, or in any branch of the manufacturing industry ancillary or accessory thereto: Bookbinding, embossing, engraving, printing, dressmaking, men's and women's tailoring, taxidermy, and the manufacture of ready-to-wear suits, jewellery, furs, leather goods, hand-made cigars, and hand-made millinery, whether on a time-work or piece-work basis, shall be at the rate of:—Not less than \$7 a week, for the first six months' employment; not less than \$10 a week for the second six months' employment; not less than \$13 a week for the third six months' employment; not less than \$14 a week thereafter.

The above provisions shall not apply to regularly indentured apprentices whose indentures have been approved by the Board.

No employee is to be employed for more than eight hours per day or forty-eight hours in any week unless permission has been obtained in accordance with the provisions of the Factories Act.

The order becomes effective on July 1, 1935.

**Male Minimum Wage Act**

**ORDER No. 26.—Establishing a minimum wage in the transportation industry.**

Under the Male Minimum Wage Act, the Board of Industrial Relations has issued orders fixing the minimum rates of pay for employees under twenty-one years of age engaged in the transportation industry (exclusive of rail, water, or air transportation) as follows:—

1.—Operators of Motor-vehicles of 2,000 Pounds Net Weight or over, as specified on the Motor-vehicle Licence, exclusive of those specified in Section 7 hereof.

- (a) Not less than the sum of forty cents (40c.) per hour when their week consists of not less than forty (40) hours and not more than fifty (50) hours.
- (b) Not less than the sum of forty-five cents (45c.) per hour when their week consists of less than forty (40) hours.
- (c) Not less than the sum of sixty cents (60c.) per hour for every hour in excess of fifty (50) hours per week and up to and including fifty-four (54) hours per week.

2.—Operators of Motor-vehicles of less than 2,000 pounds net weight, as specified on the Motor Vehicle Licence, exclusive of those specified in Sections 3 and 7 hereof.

- (a) Not less than the sum of thirty-five cents (35c.) per hour when their week

consists of not less than forty (40) hours and not more than fifty (50) hours.

- (b) Not less than the sum of forty cents (40c.) per hour when their week consists of less than forty (40) hours.
- (c) Not less than the sum of fifty-two and one-half cents (52½c.) per hour for every hour in excess of fifty (50) hours per week and up to and including fifty-four (54) hours per week.

### 3.—Operators of Motor-cycles.

- (a) Not less than the sum of twenty-five cents (25c.) per hour when their week consists of not less than forty (40) hours and not more than forty-eight (48) hours.
- (b) Not less than the sum of thirty cents (30c.) per hour when their week consists of less than forty (40) hours.

### 4.—Bicycle-riders and Foot-messengers employed exclusively on Delivery or Messenger Work.

- (a) Not less than the sum of seventeen cents (17c.) per hour when their week consists of not less than forty (40) hours and not more than forty-eight (48) hours.
- (b) Not less than the sum of twenty cents (20c.) per hour when their week consists of less than forty (40) hours.

### 5.—Swampers and Helpers.

- (a) Not less than the sum of thirty-five cents (35c.) per hour when their week consists of not less than forty (40) hours and not more than fifty (50) hours.
- (b) Not less than the sum of forty cents (40c.) per hour when their week consists of less than forty (40) hours.
- (c) Not less than the sum of fifty-two and one-half cents (52½c.) per hour for every hour in excess of fifty (50) hours per week and up to and including fifty-four (54) hours per week.

### 6.—Drivers of Horse-drawn Vehicles other than those covered by Section 7 hereof.

- (a) Not less than the sum of forty cents (40c.) per hour when their week consists of not less than forty (40) hours and not more than fifty (50) hours.
- (b) Not less than the sum of forty-five cents (45c.) per hour when their week consists of less than forty (40) hours.
- (c) Not less than the sum of sixty cents (60c.) per hour for every hour in excess of fifty (50) hours per week and up to and including fifty-four (54) hours per week.

### 7.—Drivers of Vehicles employed in the Retail Delivery of Bread or in the Retail Delivery of Milk.

Not less than the sum of forty cents (40c.) per hour.

The order, which becomes effective on July 4, 1935, also provides that where the vehicle is provided by the employee "all reasonable costs in connection therewith while the vehicle is actually in use on the employer's behalf shall be in addition to the minimum wages fixed."

When uniforms are required to be worn, these are to be furnished without cost to the employee. Time spent by an employee waiting on call for employment shall be paid for according to the rates established.

## Hours of Work Act

The Board of Industrial Relations under authority vested in it by the Hours of Work Act, 1934, and Amendment Act 1935, has recently issued regulations (Nos. 22 and 23) governing working hours in the transportation industry (exclusive of rail, air, or water transportation). These regulations stipulate:

"That employees in the transportation industry, other than those employed as (a) operators of motor-cycles, (b) bicycle-riders and foot-messengers employed exclusively on delivery or messenger work, and (c) drivers of vehicles employed in the retail delivery of milk, are hereby permitted to work six (6) hours per week in excess of the hours prescribed by section 3 of the said "Hours of Work Act, 1934," in accordance with the provisions of Order No. 26 of the said Board of Industrial Relations dated the 19th day of June, 1935, fixing minimum wages in the transportation industry: Provided that no such employee in the transportation industry shall work more than ten (10) hours in any one day.

"That employees in the transportation industry employed as drivers of vehicles in the retail delivery of milk are hereby permitted to work fifteen (15) hours per week in excess of the hours prescribed by Section 3 of the said "Hours of Work Act, 1934": Provided that over a period of seven (7) weeks no such employee shall work more than three hundred and seventy-eight (378) hours, nor more than ten (10) hours in any one day.

A "History of wages in the United States from Colonial Times to 1928" has been recently published by the United States Bureau of Labour Statistics. The main reason for the preparation of the present report was "the desire to preserve in permanent form the principal contents of the Bureau's early wage studies as well as the still earlier records of colonial America."

## MINING IN BRITISH COLUMBIA IN 1934

THE annual report of the Minister of

Mines, British Columbia, covering the calendar year 1934, indicates that this industry has recovered to an appreciable extent the loss in value sustained between the peak year of 1929 and the low of 1932. The value of mine production declined from \$68,245,443 in 1929 to \$28,798,406 in 1932, a loss in three years of \$39,447,037. During 1933 the value of mine production increased \$3,804,266 to \$32,602,672, and in 1934 it increased a further \$9,702,625 to \$42,305,297. The low point apparently was reached in the first six months of 1933, when the estimated value for this period was \$12,887,984. Subtracting the estimated value for the first six months from the actual value of mine production for the year, it is found that the production for the last six months of 1933 was about \$19,719,688. The estimated production for the first six months of 1934 was \$20,697,827, and, subtracting this figure from the final value for the year, it is found that the production for the last six months was about \$21,607,470. It is apparent that the greater part of the recovery to date took place in the latter part of 1933, since when the industry has progressed slowly but steadily.

Gold production accounted for by far the greatest increase in value for any one metal or material in 1934, followed in order by lead, silver, zinc, copper, coal, and miscellaneous metals, minerals, and materials. The output of structural materials showed a slight decline in value.

Gold production established an all-time high in both volume and value. Lead established an all-time high in volume production and zinc fell just short of the all-time high volume production attained in 1930.

During the year some of the larger operations brought their production back to capacity, several operations increased their milling capacity, and a number of properties were brought into production.

The number of shipping metalliferous mines increased from 109 in 1933 to 145 in 1934, and those shipping over 100 tons increased from 47 to 69.

*Labour and Employment.*—During 1934, 2,893 persons were employed in and about the coal mines of the Province, a decrease of about 6.5 compared with 1933. Taking the average of all the mines in Vancouver Island District, about 30 per cent of the working-days was lost through lack of trade. In the Nicola-Princeton District the different collieries worked from 40 to 77 per cent of the working-days, averaging for the district about 59 per cent of

the working-days. In the East Kootenay District the mines worked from 50 to 89 per cent of the working-days during the year, and worked on an average for the whole district about 72 per cent of the time.

*Accidents.*—Six fatal accidents occurred during the year, in coal mining, as compared with three for 1933. The ratio of fatal accidents per 1,000 persons employed was 2.07, as compared with 0.97 in 1933. In 1932 the ratio was 2.21; in 1931 1.22; in 1930, 11.62; in 1929, 2.38; in 1928, 2.64; in 1927, 2.10; in 1926, 1.88; in 1925, 1.10; the average for the ten-year period being 2.89.

The number of fatal accidents per 1,000,000 tons produced during 1934 was 4.45; during 1933 the figure was 2.37; in 1932, 5.21; in 1931, 2.81; in 1930, 28.64; in 1929, 5.33; in 1928, 5.54; in 1927, 4.46; in 1926, 4.3; in 1925, 2.45; the average for the ten-year period being 6.53 per 1,000,000 tons of coal mined.

There were twenty-two fatal accidents in and about the metalliferous mines in 1934, being an increase of twelve from the figures for 1933. There were 4,525 persons employed under and above ground in the metalliferous lode mines in 1934. The ratio of fatal accidents was 4.86, compared with 3.20 in 1933. The ratio for the last ten-year period was 2.95. The tonnage mined per fatal accident was 446,390 tons for the last ten-year period.

*Mine Safety and First Aid.*—The Department of Mines through its Inspectors in the different districts has continued to assist in keeping up the safety and first-aid organizations in all the mining areas of the Province.

There are now active centres of this work at the mines in the Crowsnest Pass, Kimberley, Princeton, Nanaimo, Britannia, Anyox, and at the newer mines in the Bridge River area.

There is a growing realization, states the report, that the utmost safety can be attained only by the fullest co-operation between the mine employees, the mine operators, and the Inspectors of Mines.

*Government Rescue Stations.*—The Department of Mines has now four mine-rescue stations in different parts of the Province and centrally located in the mining districts—namely, at Nanaimo, Cumberland, Princeton, and Fernie. During the year many requests were received from medical men for oxygen and the inhalators for use in emergencies, and immediate service was rendered in every case. In the larger coal-mining districts of Crowsnest, Cumberland, and Nanaimo, experienced teams maintain a

regular schedule of training throughout the year and so keep ready for any emergency calls.

The preliminary training course consists of twelve two-hour lessons in the actual use of the oxygen apparatus and Burrell all-service

gas-masks in an irrespirable atmosphere, and instruction on the approved method of dealing with mine fires and recovery-work. The training itself is strenuous work, and all candidates have to undergo a special physical examination, and must be under 34 years of age.

## MOTHERS' ALLOWANCES IN MANITOBA

THE last annual report of the Department of Health and Public Welfare, Manitoba reviews the administrative activities under the jurisdiction of the Department during the fiscal year ending April 30, 1934. It includes the report of the the Division of Child Welfare, which has charge of the administration of the Child Welfare Act. This enactment which combines in one statute practically all of the child welfare legislation of Manitoba, consists of several parts, each of which is concerned with some phase of the protection and care of children.

The section dealing with bereaved and dependent children takes the place of the Mothers' Allowance Act which was repealed in 1924 when the Child Welfare Act was enacted (LABOUR GAZETTE, May, 1924, page 273 and August, 1924, page 626).

During the year under review there were 268 applications for allowances, of which 204 were accepted, bringing the total number of families to 1,092 and the total number of enrolled children to 3,313. Children over the age of 14 years are not enrolled unless they are so handicapped physically as to be unable to earn their own livelihood. It is pointed out that under the act a child under the specified age may be enrolled as a "bereaved and dependent child," when, because of the death of the father or both parents, or confinement of the father to a hospital for mental diseases, or the total and permanent disability of the father, such child is likely to suffer want. As already indicated the children of 204 families were considered as falling within the above definition.

The distribution of cases—now totalling 1,092—remains fairly constant as between rural and urban Manitoba. Greater Winnipeg has 328 enrolled families; there are 59 families in the other three cities of the Province and 705 cases in the rest of the Province. There were 154 cases of "total disability" of the father during the fiscal year ending April 30, 1934—an increase of 23. In regard to this problem, the Director of Child Welfare Division states:—

"This feature of the work has been given a considerable amount of study by your officials and two methods suggest themselves whereby

a closer check might be kept on this type of case; first: That there should be a requirement that the totally disabled father must be domiciled in some Institution for the care of chronic diseases; or secondly: That a medical board be set up to personally examine and pass on this type of application; before allowances can be granted. These suggestions have been made in the new Child Welfare Act, which will be presented at the next Session of the Legislature; and we trust that something may be evolved which will give the Department Officials better control."

*Neglected Children.*—The administrative activities of the section of the Act relating to neglected children indicates that the number of wards in charge of the Child Welfare Division at the close of the fiscal year was 238. Of these, 25 were temporary wards and 213 permanent wards. In the case of the temporary wards there is still hope of reunion of the child with the family.

During the year representatives dealt with 664 families involving 1,059 adults and 2,232 children in unorganized territory and in areas not covered by a Children's Aid Society. In 1.95 per cent, or in 13 of these families only, was it necessary to remove the children by court action.

The report shows that during the year under review nine temporary wards were discharged to their parents through the courts, six became of age, one was married, one was accidentally drowned and for fifteen children decrees of absolute adoption were granted, so that the year closed with two hundred and thirty-two wards under care.

The disbursement for wards from the appropriation was \$17,330.56; from collections on municipalities, \$6,234.10, and from relatives \$254.18; making a total of \$23,818.84.

Other activities under the Child Welfare Act deal with legal supervision and adoption.

Included also in the main report of the Department are the annual reports of the administrator of Estates of Insane Persons; the Welfare Supervision Board; the Fiscal Supervision of Public Institutions and Relief; Vital Statistics Division; the Public Health Nursing Service and Health Education.

## CONVENTION OF LABOUR EDUCATIONAL ASSOCIATION OF ONTARIO

**T**HE thirty-third annual convention of the Labour Educational Association of Ontario was held recently in St. Catharines. After conveying greetings on behalf of the organized workers of the City, Mr. Peter Grant, President of St. Catharines Trades and Labour Council called on Mayor N. J. M. Lockhart, who welcomed the visiting delegates.

Mr. Tom Moore, President of the Trades and Labour Congress of Canada, in addressing the delegates referred to the need for legislative action to correct existing conditions, and he stated that "success in this direction depended upon the workers themselves." The speaker touched briefly on various measures dealt with during the present session of Parliament, such as the Employment and Social Insurance and the Eight Hour Day Acts, stating with regard to the former that "it was not all that organized labour desired but that it established the principle for which Labour stood, that of state responsibility."

The President, Mr. Humphrey Mitchell, M.P., expressed gratification at the large attendance. In referring to the question of legislation in the interest of the workers he emphasized that there could be no substitute for well organized, well led trade unions.

Others who addressed the delegates were: James F. Marsh, Deputy Minister of Labour of Ontario; F. H. Avery, M.L.A.; R. J. Tallon, vice-president of the Trades and Labour Congress of Canada, and Stephen L. Clark, first president of the Association when it was founded at Woodstock, Ont., thirty-three years ago.

The first section of the officers report dealt with the reactionary forces at work in other countries which tend to reduce the standards of the workers and curtail the workers' freedom of organization. The membership was called upon to use every effort to ensure the continuance of democratic government in Canada, and to take advantage of legislation enacted in the interests of the wage earner.

Opposition was expressed to changes made in the Workmen's Compensation Act during the last session of the Legislature which provided that members of the Board hold office at the pleasure of the Government. It was considered that members of such an important body should be free from political control or influence.

The efforts of dual organizations to supersede the international trade union movement was dealt with at some length.

Attention was also drawn to the following:—(1) Unemployment and relief; (2) Hours of labour; (3) Minimum wages and control of

industry; (4) Freedom of organization and collective bargaining; (5) Old age pensions; (6) Amendments to the Workmen's Compensation Act, and (7) The Industrial Standards Act of Ontario.

The recommendations contained in some of the resolutions adopted were:

Reduction of qualifying age for old age pensions from 70 to 65 years.

Nationalization of the banking and credit system of Canada.

Legislation prohibiting piece work, task and bonus systems in industry.

Assistance to civic employees' organizations chartered by Trades and Labour Congress in efforts to secure protection under existing schemes of superannuation.

Equalization of the income tax levied by municipalities throughout the province, with mandatory collection of same.

The placing under superannuation of employees of the Federal Government who are employed at "prevailing rates."

Opposition to the application of the provincial amusement tax to admissions of 25 cents and under.

Condemning the practice of municipalities in using relief labour for maintenance works.

That both the federal and provincial governments consider the worker over 45 years in drafting further legislation to cope with present economic conditions.

Publication of liquor advertising within the province.

Opposition to the provisions of the Milk Control Act which prohibits the payment of purchaser dividends.

Establishment of a minimum wage for house workers and custom dressmakers.

Inclusion of boys within the scope of the Minimum Wage Act.

Protesting the closing of manual training and domestic classes in public schools and the closing of libraries in workers' districts.

Condemning the practice in some municipalities of deducting a percentage off relief vouchers from merchants.

Chief officers elected were: President, Humphrey Mitchell, M.P., Hamilton; vice-president, O. H. Hughes, Kitchener; secretary-treasurer, Rod Plant, 172 McLaren St., Ottawa.

Hamilton was selected as the next convention city.

## NATIONAL CONFERENCE ON SOCIAL WORK

### Summary of Proceedings of 62nd Annual Meeting

WITH an attendance of approximately six thousand social workers from fifty-two welfare organizations, public and private, in Canada and the United States, together with representatives from Great Britain and other countries, the 62nd annual meeting of the National Conference of Social Work was convened in Montreal on June 8 in a week's program for the "discussion, orientation and inspiration" of social work on this continent. The work of the Conference was divided into four main sections, each of which covered a wide field of social and welfare activity. Section 1 dealt with social case work; Section 2 with social group work; Section 3 with community organization; and Section 4 with social action. In addition, there were a large number of special committees, each concerned with some aspect of social welfare.

This international assembly was welcomed by Hon. Alfred Duranleau, Minister of Marine, on behalf of the Dominion Government; Hon. (Senator) C. P. Beaubien; Hon. E. L. Patenaude, Lieutenant-Governor of the Province of Quebec; and His Worship, Camillien Houde, Mayor of Montreal. Featuring the opening sessions were the addresses of Sir Francis Floud, British High Commissioner of Canada; Miss Frances Perkins, Secretary of Labour in the United States administration; and Miss Katherine Lenroot, Chief of the Children's Bureau, United States Department of Labour and President for 1935 of the National Conference on Social Work.

Sir Francis Floud dealt with the outlook for economic and social security in Great Britain and Miss Perkins on the same subject in the United States. The British High Commissioner reviewed the operations of the British systems of old age pensions, health insurance, unemployment insurance, educational and youth training schemes, employment agencies, and public housing programs. He emphasized that the British social services generally had contributed more than could be estimated to national stability, the buttressing of the morale of the unemployed, the breaking down of class barriers and the building up of a communal co-ordination.

Miss Perkins, after outlining the benefits accruing from the N.R.A. program, claimed that the gains made were not all obliterated by the recent Supreme Court decision. She contended that wages had increased more than prices. Touching on the new Social Security Bill, she considered it as indicative that the United States was still determined to progress towards social rehabilitation. The keynote of

this new measure, she explained, was close co-operation between federal and state authorities. In old age care, child welfare, unemployment relief and allied branches of social service, the new legislation would provide aid, both financial and advisory, to local administration units from federal authorities, having regard for the particular circumstances of each district.

In her presidential address, Miss Lenroot defined the great task of the century as "the reconciliation of individual freedom and social security." She outlined the objectives of organized social service as being: national security through economic and political organization to ensure satisfaction of basic needs; social justice through an ordered relationship between groups, social achievement through collective endeavour; emotional security through personal and social adjustment; and spiritual power through philosophic insight and adventure.

Preliminary to the opening of the Conference itself, were meetings of the American Public Welfare Association. A dinner meeting of this body on June 8 was presided over by Mrs. Franklin D. Roosevelt, wife of the President of the United States. Mrs. Roosevelt brought best wishes from her husband and spoke of her interest in social service work. Other speakers were Hon. C. H. Cahan, Secretary of State, representing the Dominion of Canada; Hon. David A. Croll, Minister of Public Welfare and Labour, for Ontario; and Hon. Harry L. Hopkins, administrator of the United States Federal Emergency Relief Administration.

Government intervention in the labour movement formed the major topic of the Tuesday morning address of Miss Mary Van Kleeck, Director of industrial studies of the Russell Sage Foundation, New York. In a subsequent address, Miss Van Kleeck criticized the American Medical Association's resistance to health insurance schemes. She viewed with disfavour certain tendencies toward governmental intervention as reflected in legislative proposals in both United States and Canada. "Experience in both countries seems to indicate," she declared, "that these are false hopes for labour, and that instead of this type of legislation a program is needed to guarantee civil liberties, the right of free speech, free assemblage, the right to picket and to carry on other peaceful activities connected with the collective withholding of labour, and the persuading of others to withhold their labour in time of strikes."

Paul H. Douglas, Professor of Economics, Chicago University, contributed an analysis of the problem of social justice from the United States point of view, in which he developed a fourfold theme—preservation of U.S. neutrality in war (which he saw as imminent); redistribution of wealth; establishment of material security, and maintenance of individual liberty. He favoured a “managed” monetary system and credit system, and a public works program concentrating on housing.

Among the other labour “features” of the Conference were the following subjects and discussions:

“The Place of Government in Organized Economic Society,” by John A. Lapp, Director of The Petroleum Labour Board, Washington.

“State responsibility for the Handicapped Worker,” discussed by W. Frank Persons, Director of United States Employment Service; Professor Fritz Morstein Marz, Princeton University; Dr. G. N. Patterson-Smyth, Women’s General Hospital, Montreal; Ida M. Cannon, Chief of Social Service, General Hospital, Boston, and Dr. B. Silverman, Mental Hygiene Institute, Montreal.

Housing and Slums, by Paul L. Stannard, Cleveland; Professor Percy Nobbs, McGill University; and John Ihlder, Executive Director of the Alley Dwelling Authority, District of Columbia.

Health Service and Insurance, by H. M. Cassidy, Director of Social Welfare, British Columbia.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Nineteenth Session of the International Labour Conference

THE Nineteenth Session of the International Labour Conference (League of Nations), constituted under the provisions of the Treaties of Peace, was held at Geneva, Switzerland, from June 4 to June 25, 1935. The eighteen previous sessions were held as follows: Washington, D.C., 1919 (LABOUR GAZETTE, December, 1919); Genoa, Italy, 1920 (LABOUR GAZETTE, October, 1920); Geneva, 1921 (LABOUR GAZETTE, January, 1922); Geneva, 1922 (LABOUR GAZETTE, December, 1922); Geneva, 1923 (LABOUR GAZETTE, December, 1923); Geneva, 1924 (LABOUR GAZETTE, August, 1924); Geneva, 1925 (LABOUR GAZETTE, July, 1925); Geneva, 1926 (8th and 9th Sessions), (LABOUR GAZETTE, July, 1926); Geneva, 1927 (LABOUR GAZETTE, July, 1927); Geneva, 1928 (LABOUR GAZETTE, July, 1928); Geneva, 1929 (LABOUR GAZETTE, July, 1929); Geneva, 1929 (LABOUR GAZETTE, December, 1929); Geneva, 1930 (LABOUR GAZETTE, July, 1930); Geneva, 1931 (LABOUR GAZETTE, July, 1931); Geneva, 1932 (LABOUR GAZETTE, May, 1932); Geneva, 1933 (LABOUR GAZETTE, August, 1933); and Geneva, 1934 (LABOUR GAZETTE, July, 1934).

The Treaty of Peace requires that “the meetings of the general conference of representatives of the members shall be held from time to time as occasion may require, and at least once in every year.” It will be observed that two sessions of the conference were held in 1926 and also in 1929.

Each Member State is entitled, under the terms of the Treaties of Peace, to send four delegates to the International Labour Confer-

ence, two of whom must be government delegates and the two others are to be delegates representing, respectively, the employers and the workpeople of the country, chosen in agreement with the industrial organizations, if such organizations exist, which are most representative of employers or workpeople, as the case may be, in the respective countries. Each delegate may be accompanied by advisers not exceeding two in number for each item of the agenda.

The decisions of the Conference may take the form of either a Recommendation or a Draft Convention. A two-third majority of the votes cast by the delegates is required for the adoption of any Recommendation or Draft Convention by the Conference. The Recommendations and Draft Conventions are afterwards transmitted through the Secretariat of the League of Nations to the different countries represented in the International Labour Organization for acceptance or otherwise. Each country is obliged under the Treaties, within the period of one year at most from the closing of the Conference, or if it is impossible owing to exceptional circumstances to do so within one year, then at the earliest practicable moment and in no case later than eighteen months from the closing of the Conference, to bring the respective Recommendation or Draft Conventions before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action.

In Canada, the provisions of the different Draft Conventions and Recommendations

have been examined in all cases by the Law Officers of the Crown to determine whether the subject-matters were within federal or provincial jurisdiction, and they have thereupon been brought before the Dominion Parliament and the respective Provincial authorities, together with the law officers' reports on the subject of jurisdiction.

### Conference Agenda

The agenda of the Nineteenth Session of the Conference comprised seven items, namely:—

(1) Maintenance of rights in course of acquisition and acquired rights under invalidity, old-age, and widows' and orphans' insurance on behalf of workers who transfer their residence from one country to another. (Second discussion.)

(2) Employment of women on underground work in mines of all kinds. (Second discussion.)

(3) Unemployment among young persons. (First or single discussion.)

(4) The recruiting of labour in colonies and in other territories with analogous labour conditions. (First discussion.)

(5) Holidays with pay. (First discussion.)

(6) Reduction of hours of work, with special reference to—

(a) Public Works undertaken or subsidized by Governments.

(b) Iron and steel.

(c) Building and contracting.

(d) Glass bottle manufacture.

(e) Coal mines.

(7) Partial revision of the Hours of Work (Coal Mines) Convention, 1931, in respect of the following five questions:—

(a) The question of allowing a normal shift to work during certain hours on Sunday and legal public holidays, and of the amount of the rest period for these workers which fall within the Sunday or legal public holiday.

(b) The question of extending the additional time allowed for workers employed on operations which by their nature must be carried on continuously, so as to enable the necessary work to be done by three shifts.

(c) The question of extending the additional time allowed for preparatory and complementary work, in the case of underground storemen, enginemen and drivers of locomotives, so as to enable them to complete the work of this kind on which they are employed.

(d) The question of allowing additional time to be worked on the day of the periodical change-over of shifts of men (working on the three-shift system) in charge of main underground ventilation and pumping machinery which has to be operated continuously for seven days in the week.

(e) The question of modifying Article 22 of the Convention (the Article relating to the legal consequences of revision) for the purpose of making it uniform with the Article upon this subject included in other Conventions submitted to the Conference at its Nineteenth Session.

### Countries Represented

Of the sixty-two countries which are members of the Organization, fifty-two were represented at this session of the Conference. Sixteen states, however, sent only Government delegates. The total number of delegates in attendance at the Conference was 159, of whom 89 were Government delegates, 35 Employers' delegates and 35 Workers' delegates. There were also 242 advisers in attendance. A list of the countries represented follows: Afghanistan, Albania, Argentine Republic, Australia, Austria, Belgium, Brazil, Bulgaria, Canada, Chile, China, Columbia, Cuba, Czechoslovakia, Denmark, Ecuador, Estonia, Finland, France, Great Britain, Greece, Guatemala, Hungary, India, Iraq, Iran, Irish Free State, Italy, Japan, Latvia, Liberia, Lithuania, Luxemburg, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Peru, Poland, Portugal, Rumania, Siam, Sweden, Switzerland, Spain, Turkey, Union of South Africa, Union of Soviet Socialist Republics, United States of America, Venezuela and Yugoslavia.

Egypt, although not a member of the International Labour Organization, was represented by an observer, who participated in the Conference proceedings.

### Canadian Delegation

The Canadian delegation to the Conference was made up as follows:—

*Delegates representing the Government of Canada:* Dr. W. A. Riddell, Canadian Advisory Officer, League of Nations, Geneva, Switzerland; and Mr. P. E. Renaud, Secretary, Office of the Canadian Advisory Officer, League of Nations, Geneva, Switzerland.

*Delegate representing the Employers of Canada:* Mr. A. R. Goldie, Galt, Ontario, President of the Goldie-McCulloch Company, and Chairman of the Industrial Relations Com-

mittee of the Canadian Manufacturers Association.

*Delegate representing the Workpeople of Canada:* Mr. P. M. Draper, Ottawa, Ontario, Secretary-Treasurer of the Trades and Labour Congress of Canada.

*Technical Advisers to the Government Delegates:* Mr. H. Quevillon, Hull, P.Q.; Mr. A. R. Mosher, Ottawa, Ontario; Mr. W. L. Best, Ottawa, Ontario; Mr. R. H. McGowan, Cobalt, Ontario.

*Technical Adviser to the Employers' Delegate:* Mr. H. W. Macdonnell Toronto, Ontario, Secretary of the Industrial Relations Department, Canadian Manufacturers Association.

*Technical Adviser to the Workpeople's Delegate:* Mr. Robert J. Tallon, Montreal, P.Q., Vice-President of the Trades and Labour Congress of Canada, and President of Division No. 4, Railway Shop Crafts.

Mr. A. R. Goldie was elected Vice-President of the Employers' Group, and Dr. W. A. Riddell and Mr. P. M. Draper served on the Selection Committee. Canada was also represented on a number of important committees of the Conference, namely: on the Committee on Hours of Work by Mr. Tallon; on the Maintenance of Pension Rights by Doctor Riddell; on the Committee on the Employment of Women on Underground Work by Doctor Riddell; on the Committee on Unemployment among Young Persons by Doctor Riddell and Mr. Goldie; on the Committee on Holidays with Pay by Dr. Riddell and Mr. Goldie; on the Application of Conventions (Article 408) by Mr. Goldie.

### Officers of the Conference

The following were elected as officers of the Conference:—

*President.*—Colonel the Hon. F. H. P. Creswell, Government delegate of the Union of South Africa.

*Vice-Presidents.*—Mr. Berg, Government delegate of Norway; Mr. Mircea, Employers' delegate, Roumania; and Mr. Jouhaux, Workers' delegate, France.

*Secretary-General.*—Mr. Harold Butler, Director of the International Labour Office.

### Decisions of the Conference

The following is a summary of the decisions of the Conference:—

**MAINTENANCE OF MIGRANTS' PENSION RIGHTS (Item I of the Agenda).**—The Conference adopted by 85 votes to 0 a Draft Convention for the establishment of an international scheme for the maintenance of rights in course of acquisition and acquired rights, under invalidity, old-age and widows' and orphans' insurance, on

behalf of workers who transfer their residence from one country to another.

**EMPLOYMENT OF WOMEN ON UNDERGROUND WORK in MINES (Item II of the Agenda).**—The Conference adopted by 117 votes to 0 a Draft Convention for the prohibition, with certain specified exceptions, of the employment of women on underground work in mines of all kinds.

**UNEMPLOYMENT AMONG YOUNG PERSONS (Item III of the Agenda).**—The Conference decided by 96 votes to 17, in view of the urgency of the problem, to deal with it at this Session after a single discussion, and not to defer action in accordance with the normal procedure until a second discussion had been held next year. It adopted by 106 votes to 0 a Recommendation embodying principles which Governments were invited to apply with regard to the raising of the school-leaving age, vocational education, recreational and social services for the young unemployed, special employment centres, special public works for the young unemployed, placing facilities, etc. It also adopted, by 61 votes to 18, a Resolution requesting the Governing Body of the International Labour Office to consider *inter alia* the desirability of placing on the Agenda of an early Session of the Conference the revision of the Conventions relating to the minimum age for employment, with a view to the raising of the age from 14 to 15 years. The Resolution further invited the Office to continue its enquiries with a view to arriving at international regulations for unemployment insurance or assistance for agricultural workers.

**RECRUITING OF COLONIAL LABOUR (Item IV of the Agenda).**—After a first discussion, the Conference decided by 94 votes to 0 to place on the agenda of the next Session, for second and final discussion, the question of the regulation of certain special systems of recruiting workers. It adopted a list of points on which a Questionnaire should be framed by the Office with a view to the consultation of Governments prior to the second discussion, notably as to the possibility of dealing with the subject by means of a Draft Convention and two supplementary Recommendations.

**HOLIDAYS WITH PAY (Item V of the Agenda).**—The Conference decided by 107 votes to 15 to place this question on the Agenda of the next Session for second discussion, with a view to the adoption of international regulations in the form of a Draft Convention or a Recommendation or both. It approved the points on which Governments should be consulted in the meantime. It also adopted, by 64 votes to 19, a Resolution requesting the Governing Body to place the question of holidays with pay in agriculture (which had been excluded from the question on this year's Agenda) on the Agenda of the next Session.

**REDUCTION OF HOURS OF WORK (Item VI of the Agenda).**—The Conference adopted by 79 votes to 30 a general Draft Convention embodying the principle of the forty-hour week, with the maintenance of the standard of living, it being contemplated that the principle would be applied to particular industries by separate Conventions. It also adopted by 75 votes to 27 a supplementary Resolution relating to the maintenance of the standard of living.

It adopted by 72 votes to 34 a Draft Convention for the application of this principle to glass-bottle works. The Draft Convention provides for an average working week not exceeding 42 hours, and the institution of a system of at least four shifts.

A proposed Draft Convention for the application of the forty-hour week to public works failed to obtain the necessary two-thirds majority on the final vote (67 to 38). It was therefore decided by 84 votes to 31 to place the question on the Agenda of the 1936 Conference for second discussion.

A proposed Draft Convention for the application of the forty-hour week to the building and civil engineering industry failed to obtain the two-thirds majority on the final vote (57 to 40). It was decided by 83 votes to 26 to place the question on the Agenda for 1936.

It was decided by 81 votes to 23 to place on the 1936 Agenda the question of a Draft Convention for the forty-hour week in iron and steel works.

Finally, it was decided by 76 votes to 25 to place on the 1936 Agenda the question of a Draft Convention providing for a week of 38½ hours in underground hard coal and lignite mines, and for a week of 40 hours on the average in open hard coal or lignite mines.

**PARTIAL REVISION OF THE HOURS OF WORK (COAL MINES) CONVENTION, 1931** (Item VII of the Agenda).—The Conference adopted by 72 votes to 18 a Draft Convention revising that of 1931 on certain technical points which had been found by several Governments to preclude its ratification.

**RESOLUTIONS.**—Resolutions were adopted to the following effect: That the Governing Body should instruct the Office to continue its investigation of the problem of nutrition, in collaboration with other Bodies, and to report on the subject to the 1936 Session of the Conference (adopted unanimously); that the Governing Body should instruct the Office to expedite its study of the conditions of agricultural workers, should develop action to organize measures relating to such conditions, and should set up a permanent Agricultural Committee (unanimous); that the Governing Body should consider the desirability of placing on the Agenda of an early Session of the Conference the question of the workers' right of association (89 votes to 1); that the Governing Body should instruct the Office to urge States to constitute minimum wage-fixing machinery where it did not already exist (71 to 20); that the Governing Body should consider placing on the Agenda of the next Session the question of reduction of hours of work in the textile industry (63 to 26); a similar resolution with regard to reduction of hours in the printing and book-binding trades (66 to 25); a similar resolution with regard to hours in the chemical industry (73 to 19); that the Governing Body should consider placing on the Agenda of the 1937 Session the question of the regulation of written contracts of employment (74 to 23); and that the Office should extend its investigations into the truck system and related practices, with a view to reporting to an early Session of the Conference (unanimous). A resolution in favour of the early holding of an Asiatic Labour Conference obtained a majority (70 to 2), but was not adopted owing to failure to attain the quorum.

### Opening Proceedings

The Conference was opened by Mr. Giuseppe de Michelis (Government delegate, Italy), the Chairman of the Governing Body of the International Labour Office, who welcomed the delegates and specially mentioned Afghanistan, the United States of America,

and the Union of Soviet Socialist Republics as three states which had recently joined the Organization. He noted with satisfaction that the International Labour Organization is full of life and energy. Its work had not of course been perfect. The Conventions adopted by the Conference in the past had established some degree of equality of treatment in a large number of countries and brought about uniform regulation both from the social and from the economic points of view. The progress made in the ratification of the Conventions of the International Labour Conference was clear evidence of the success of the work. Up to the present time there had been 647 ratifications of the forty-four Conventions which had been individually adopted since 1919; further, apart from ratification, the adoption of these Conventions by the International Labour Conference had exercised a stimulating effect on the development of national legislation in all parts of the world. The Organization had contributed materially towards bringing about a state of equilibrium in industrial and social relations. The new stabilization which is coming into being is based on the fundamental principle that the general interest must prevail over individual interests and that the life and activity of the individuals must be subordinated to the needs and to the life of the State. Yet that principle, which is the underlying idea of many schemes and movements in different parts of the world, is not in contradiction to, but implies, the right of all those who form part of the same community to life, labour and subsistence.

The work of the International Labour Organization must not, he said, be based solely on the idea of protecting the workers, but on the necessity of allowing the worker to play the active part which is his due in the harmonious interplay of the various elements of production and in the life of the nation. One of the means of achieving that object is to embark deliberately and as soon as possible on the problems of the constitutional rights of labour, trade union relationships, collective agreements, labour disputes, arbitration, labour courts, the essential principles of the contract of labour, and kindred problems.

Colonel the Hon. H. P. Creswell (Government delegate, South Africa), the former Minister of Labour of the Union of South Africa, on taking the chair as President of the Conference, referred to the immense and rapid transformation which economic life had undergone in the last one hundred and fifty years. Machinery had taken the place of muscular energy, with increasing intensiveness and extensiveness. Changes so great and so rapid could not fail to create difficulties, having re-

gard to the inertia of habit of mankind in the mass and the tangle of material interests interwoven with the very texture of society. In the last analysis, surely, he said, the natural concomitant to this endowment with power over matter beyond the ability of man to conceive in the long ages past should seem to civilized man to be a shorter part of his span of life, whether measured by hours in his week or years in his lifetime, being absorbed in arduous toil to satisfy his material needs, and a greater part being free to satisfy his higher aspirations and faculties.

This International Labour Organization and its annual Conference, constituted as it is and dealing as it does with matters touching so nearly the root causes of our economic troubles, can and should render immense service in clearing the way to a less anxious and troubled world outlook than is ours to-day. It is true, he continued, that it is constituted in groups which no doubt often, from the nature of things, take strongly divergent views on matters coming before it. But it is constituted of groups which each have special knowledge of aspects of any problem confronting the Conference, and knowledge the pooling of which when once any definite line of advance has been decided upon can, as far as possible, ensure that the steps in that advance shall be well placed and on firm ground.

### Reduction of Hours of Work

One of the main items on the agenda of the Conference was the question of the reduction of hours of work. This matter had also been under consideration at the 18th Session of the International Labour Conference last year. The International Labour Office had proposed to the present Session the adoption of a resolution on the reduction of hours of work declaring approval of the principle of the 40 hour week as a general international standard and declaring that the Conference should proceed at the present and subsequent sessions to the adoption of conventions for the progressive application of this principle to the whole field of employment, having regard to the special circumstances of particular groups of establishments or classes of workers. The proposal made by the International Labour Office was discussed early in the proceedings of the Conference and met with strong opposition from the employers' group.

Mr. A. R. Goldie, employers' delegate for Canada, in the course of the discussion of the subject, observed that it might be all right for a rich and resourceful country like the United States to indulge in a great and expensive gamble but that other and smaller countries

had to look before they leaped. He was himself opposed to a compulsory 40 hour week convention. Canada had just ratified the 48 hour week convention and it would be almost ridiculous to start immediately afterward to apply a 40 hour week, especially as most other countries have not yet ratified the 48 hour week. There was one cure only for unemployment and that was work. The reduction of hours would raise costs and reduce the amount of work available. It would be injurious to industry and in the long run to the worker and the consumer as well. The prices of farm produce in Canada are extremely low; hence purchasing power of 50 per cent of our people is low also. A wide disparity exists between the prices paid for agricultural products and those being paid for factory products. If we increased the price of factory products it was merely going to make matters worse. In the United States this difficulty also arose and an attempt had been made to correct it by the wholesale destruction of farm products, with rather indifferent results.

The Conference instead of accepting the draft resolution proposed by the International Labour Office decided, on the initiative of the workers' group, to adopt instead a general draft convention in favour of the 40 hour week and to apply this principle to separate industries by individual convention. The text of the general draft convention on the reduction of hours of work is included in the present article. Dr. W. A. Riddell, Canadian Government Delegate, speaking in the Conference on this proposed general draft convention made the following declaration:—

"Canada has shown its sympathetic attitude towards the reduction of hours of work. Not only has my country unconditionally ratified the Washington Hours Convention, but the Federal Government has at present before Parliament a Bill to reduce working hours in certain Government undertakings to 44 in the week. Our provinces have also shown great interest in this matter. Within the past year, the Federal Legislatures of Quebec and Nova Scotia have passed legislation to restrict working hours in various industries by Order-in-Council, and the Province of Quebec has also reduced working hours in building and construction enterprises to 40 per week. The Provinces of Ontario and Alberta have adopted legislation to give legal effect to agreements limiting the hours of work. The Canadian Government Delegates have always supported the principle of full and thorough discussion of all questions on the Agenda of the Conference by consultation with Governments between the first and second readings. We can see no rea-

son why any exception should be made in the present instance. The Government of Canada would like to have a further interval for closer examination of the possible implications of this proposal. We will therefore support the double-discussion procedure. If, however, the draft Convention is submitted to the Conference for final decision at this present Session, it will be necessary for the Canadian Government Delegates not to participate in the vote."

### Discussion of Director's Report

The annual report of the Director of the International Labour Office (a summary of which appeared in the June issue of the *LABOUR GAZETTE*) was discussed at a number of successive sittings of the Conference.

*Address by Dr. W. A. Riddell.*—Dr. W. A. Riddell, Government Delegate for Canada, in the course of this debate referred to the changes which had been made recently by the Governing Body in the list of the eight states of chief industrial importance entitled to permanent seats on this Body. He gave reasons for the opinion held by the Government of Canada (see pages 248-9, March 1935, *LABOUR GAZETTE*) that the International Labour Conference, functioning through the Government group therein, was alone competent to change the list of eight states in question. Further, he contended that the selection made by the Governing Body of criteria for determining the respective importance of the states members of the International Labour Organization was contrary to the letter and spirit of the constitution. The selection should have been left to an independent body of experts. He was confident that steps would be taken, before the next triennial reconstitution of the Governing Body, to place this matter on a satisfactory basis.

Dr. Riddell concluded by calling attention to recent ratifications by Canada of various conventions of the International Labour Conference, and especially the ratification of the Conventions on Hours of Work in Industry, Weekly Rest, and the Minimum Wage-Fixing Machinery as proof of the determination of Canada to carry out her obligations as a member of the Organization, notwithstanding certain disabilities arising under the Federal Constitution. Dr. Riddell mentioned also the resolutions which had been approved by the Canadian Parliament approving of the Conventions concerning Seamen's Articles of Agreement, the Marking of Weights on Heavy Packages Transported by Vessels, and the Protection Against Accidents of Dockers, with a view to their ratification.

"In Canada," he said, "the economic depression, as in other countries, has accentuated the problems of unemployment and low wages to such an extent that the feeling has grown that solution must be sought on a national scale under centralized authority. It has been considered that the application in Canada of a number of International Labour Conventions would not only provide nation-wide solutions of labour problems, but would serve to strengthen the efforts which are being made internationally to solve world-wide labour problems."

### Reply of the Director

Mr. H. B. Butler, Director of the International Labour Office, replied at length to the different points which had been raised in the discussion of his annual report. The debate, he said, had covered the whole of the economic and social field. It had had a breadth and a perspective which tended to create what might in the past have been a somewhat too European outlook.

*Facts and Theories.*—The upshot was that, in spite of undoubted progress in many directions, no one could pretend that the world had recovered anything like normality. He had made no attempt in his report to suggest any golden remedy; all he had done was to attempt to set down what was actually happening and to make a few tentative deductions from the facts. They were not all pleasant facts; they were not all easily reconciled to each other; they did not support any cut-and-dried theory; they did not fit into any single doctrinal explanation. But that was not a reason for not looking at them and trying to understand what they meant.

In so doing, one was inevitably forced to use certain expressions which tended to become misleading. "Planning," "orthodox methods" and "Liberal economy," words which often meant different things to different people, tended to be elevated into catchwords and slogans. What was essential was to get at underlying realities, remembering that because some remedies had been successful in certain cases it by no means followed that they were applicable everywhere, and conversely, that because they were not applicable everywhere it by no means deprived them of their validity in the cases where they had succeeded. The test one ought to apply to all these measures was the pragmatic test—Had they worked or had they not worked?

In the course of the discussion, the upholders of the self-adjusting system had made a number of rather sweeping statements. At the same time, the need for some regulation of the industrial process was not altogether denied. It might, perhaps, be established as a first elementary point that there must be some degree of planning, co-ordination or systematization—whatever one liked to call it. The question was, by what methods and by whom was the economy of the future to be organized on rational lines. Could it be left entirely to the initiative of private individuals or, failing that, did the intervention of the State necessarily imply the destruction of private enterprise? The further question was, what forms of organization were bad and obstructive to the economic process, and what forms could be justified as working

towards the general aims which both planners and anti-planners had in view—the happiness and welfare of mankind, based on a rising standard of living and an expanding volume of employment?

*Commercial Policy and Expansion.*—The first sphere in which the clash of opinions became apparent was that of commercial policy. Here the planners had certainly occupied nearly the whole field. The pure free trader seemed nowadays to be regarded as almost a prehistoric animal. But it did not follow that all or even most of the restrictive measures taken had been wise or profitable. Indeed, most speakers in the debate had agreed with the suggestion in his report that there could be no real recovery until a freer and broader flow of international trade was restored. It was now beginning to be realized that methods which might be individually justifiable might in the aggregate be pernicious.

What forms of positive action might contribute to loosening the shackles of trade? The main suggestion which emerged from the debate was the adoption of expansionist policies. Here there seemed to be a good deal of misunderstanding and confusion. Some speakers appeared to think that expansionist policy and currency devaluation were the same thing. It had even been suggested that his report advocated devaluation as a universal remedy for the depression. He had expressed no such view. Indeed, he entirely agreed with those who said that the world must finally get back to stabilization. He had, however, pointed out the fact that in many of the countries which had resorted to devaluation a distinct improvement of economic activity and employment had taken place. These results could not be attributed to devaluation alone. In itself it was no remedy. It was a temporary and emergency measure which could not be continued indefinitely. But in the case of many countries it was probably an indispensable first step towards applying measures for restoring adequate buying power on the home market and counteracting the withering effects of the deflationary process.

*Public Works.*—Next came the question of public works and other forms of expansionist policy. Some delegates had condemned public works as incapable of reviving economic activity and imposing a dangerous burden on the public finances. On the other hand, the Swedish Minister of Labour had come to the conclusion, as a result of his own practical experience, that State expenditure on public works, financed by loans, did counteract the forces making for depression during the earlier stages and strengthened the impulse towards revival. Sweden was not alone in having successfully adopted such measures; there were also the experience of Japan, Belgium, Argentina, Rumania and the United States of America.

Speaking generally, it could hardly be gained that public works carried with them three advantages. First, no one would deny that work was better than subsidized idleness; secondly, public works properly planned possessed an economic value which remained a permanent asset; thirdly, public works properly used restored large sums of money into circulation at a time when private borrowing was stagnant. It had been argued that to revive purchasing power with borrowed money was to mortgage the future. But if the operation were successful, as it had been in various countries, one of the first results was to improve the state of public finances. Monetary circulation was an essential adjunct of production and distribu-

tion, and unless they were in a healthy state the whole economic mechanism was out of gear. If by calling in the doctor a person succeeded in restoring his health, he had some chance of being able to pay the bill; if he died, his finances were apt to collapse altogether.

*State Intervention in Industry.*—There had been a good deal of controversy about the intervention of the state in industry. His report gave many examples of such intervention. While each of them must be judged separately, it was difficult to suppose that all of them had been unnecessary and harmful. Here, however, the restriction on liberty was most acutely feared. In his opinion, the assumption that all state interference in industry must logically lead to a complete state management of production could hardly be maintained. In countries which were previously mainly agricultural and which were building up their industrial structure from the bottom, it was natural that the state should play a very active part. But it was altogether improbable that the tendency towards closer integration of industry would result in any general system of state management in countries in which industry was already highly developed by the efforts of private enterprise. There was, in fact, room for a great variety of forms of planning in this field. Each case must be judged on its merits, but the principal test of merit was to be found in its social consequences.

Social legislation had hitherto been the classical form of state intervention. At the present state, however, social legislation was not enough. The problem had broadened out into finding the right formula for each country, and perhaps in some cases for individual industries, to allow social justice to keep pace with technical progress. The difficulty was not to foster production in the old industrial communities. There was no lack of brains or of equipment to multiply it indefinitely. The real problem was the human problem. The machine's power to produce was increasing faster than the demand for labour, and hence the Conference had witnessed the tragic spectacle of the unemployed youth pleading for action.

Unemployment as it now faced the world was not a problem which could be readily dismissed by appealing to the experience or the formulae of the past. It contained new elements and could only be solved by new measures. That was why new policies were being applied—not from any love of novelty or economic adventure, but under the pressure of dire necessity.

*Future Tasks of the Organisation.*—The debate had been rich in suggestions as to the immediate future tasks of the International Labour Organisation. First, reference had been made to what he might call its geographical expansion. The representative of the Government of Chile had proposed that a Conference should be convened under the auspices of the Organisation in Santiago de Chile, to discuss questions of particular interest to the American countries as they arose out of the work of the Organisation. That proposal had been supported by every delegate from Latin America as well as by the United States delegation.

He was gratified by the invitation extended to him by delegates from India and China to visit those countries. It had long been his desire to do so, and as soon as a suitable occasion presented itself he would not miss it.

References had been made to the representation of different nationalities on the staff of the Office. In these matters he was not a free agent, for he could not exceed the funds provided in the budget of the Organisation. The budget for 1936 which would be submitted to the Assembly of the League made provision for the creation of certain new posts, and if it were adopted it would be much easier for him to meet the legitimate wishes which had been expressed. In this connection, he would mention that in the last three years sixteen vacancies had occurred on the staff. Nearly all of these posts were formerly held by Europeans, but eleven of them had been allotted to extra-European countries.

*Ratification and Conventions.*—Proceeding, the DIRECTOR called attention to the steady progress of ratifications of International Labour Conventions, particularly by the extra-European countries.

*The Key to Social Progress.*—After referring again to the problem of population, and the prospect of a reopening of the avenues of emigration as trade improved, the DIRECTOR reaffirmed his reasons for believing that the industrial development of the East and the industrialisation of other countries which had hitherto been mainly agricultural were bound in the long run to be beneficial to the world. The solution of present troubles must be found in the expansion of the consumption of the masses throughout the world, rather than in the cutting down of the standards of living in the old industrial countries.

But (concluded the DIRECTOR) that can only be achieved by restoring not only the freer flow of goods but also the freer flow of capital. As Mr. Cemal Hüsnü said, the great need of the present time is to employ the capital now lying idle and to give buying power to those who lack it. That can only be done by returning to an international outlook. As Mr. Watanabe expressed it,

"the world's troubles cannot be cured by isolated national policies". Before we can emerge from the present depression, what is narrow and selfish and shortsighted in those policies has to be discarded. There must be a genuine and not a hypocritical desire for international co-operation. In the end it will be imposed by the logic of facts, which will induce nations not to plan against each other but with each other. That is not an inconceivable or even a very difficult ideal.

It can be realised as soon as the will to it exists. The world will then recover its sense of interdependence, which Mr. Yoshisaka very truly called the "key to social progress". That is the aim which this Organisation must hold steadily before it. Its object is not merely to prevent abuses, to reduce accident and disease in industry, to eliminate hardship and distress. It has a more positive task in making possible a freer and better life for all those engaged in industry and agriculture, in raising the standard of material comfort and in making available to all the opportunities for physical, intellectual and spiritual culture which have been won for us by the machine. But no nation can gain these benefits by its own unaided efforts. There is no autarkic road to a higher civilisation. It is only through international effort and understanding that the path lies to the greater happiness and prosperity of mankind. This Organisation was founded to that end. It has a long and arduous task before it. It offers no short cut to Utopia, but its growing strength and purpose are the best proof that its past labours have not been in vain and that a widening sphere of usefulness is opening out to it in the future.

The full texts of the Draft Conventions and of the recommendation adopted by the Conference follow:—

## DRAFT CONVENTION CONCERNING THE ESTABLISHMENT OF AN INTERNATIONAL SCHEME FOR THE MAINTENANCE OF RIGHTS UNDER INVALIDITY, OLD-AGE, AND WIDOWS' AND ORPHANS' INSURANCE

The General Conference of the International Labour Organisation,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Nineteenth Session on June 4, 1935, and

Having decided upon the adoption of certain proposals with regard to the maintenance of rights in course of acquisition and acquired rights under invalidity, old-age and widows' and orphans' insurance on behalf of workers who transfer their residence from one country to another, which is the first item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention,

adopts this 22nd day of June of the year one thousand nine hundred and thirty-five, the following Draft Convention which may be cited as the Maintenance of Migrants' Pension Rights Convention, 1935:

### Article 1

(1) There is hereby established between Members of the International Labour Organ-

isation a scheme for the maintenance of rights in course of acquisition with and of rights acquired with compulsory invalidity, old-age and widows' and orphans' insurance institutions (hereinafter called insurance institutions).

(2) References to Members in Parts II, III, IV and V of this Convention shall be construed as including only Members of the International Labour Organisation bound by this Convention.

### Article 2

(1) The insurance periods spent by persons who have been affiliated to insurance institutions of two or more Members shall, irrespective of the nationality of such persons, be totalised by each such institution in accordance with the following rules.

(2) For the maintenance of rights in course of acquisition the periods to be totalized shall be:

- (a) contribution periods;
- (b) periods in respect of which contributions were not payable but during which rights are maintained under the laws or regulations under which they were spent;

- (c) periods during which a cash benefit has been paid under an invalidity or old-age insurance scheme of another Member; and
- (d) periods during which a cash benefit has been paid under some other social insurance scheme of another Member, in so far as a corresponding benefit would, under the laws or regulations governing the institution which is totalising, maintain rights in course of acquisition.
- (3) For the purposes of:
  - (i) determining whether any conditions as to the qualifying period (minimum duration of liability to insurance) or the number of contributions prescribed for entitlement to special advantages (guaranteed minima) have been fulfilled;
  - (ii) the recovery of rights;
  - (iii) the right to enter voluntary insurance; and
  - (iv) the right to medical treatment and attendance;
 the periods to be totalised shall be:
  - (a) contribution periods; and
  - (b) periods in respect of which contributions were not payable but which are counted for the purpose of the qualifying period both under the laws or regulations under which they were spent and under the laws or regulations governing the institution which is totalising.
- (4) Provided that, where under the laws or regulations of a Member periods spent in an occupation covered by a special scheme are alone to be taken into account for the purpose of determining whether a claimant is entitled to certain advantages, the periods to be totalised for the purpose set forth in paragraphs 2 and 3 shall be restricted to periods spent under the corresponding special insurance schemes of other Members or, in respect of a Member with no special insurance scheme for the occupation concerned, to periods spent in that occupation under the insurance scheme applicable thereto.
- (5) Contribution periods and assimilated periods spent simultaneously with institutions of two or more Members shall be reckoned once for the purpose of totalisation.

#### Article 3

- (1) Each insurance institution from which on the basis of the totalised insurance periods the claimant is entitled to benefit shall calculate the amount of such benefit according to the laws and regulations governing the said institution.
- (2) Benefits or benefit components which vary with the time spent in insurance and are determined with sole regard to the periods spent under the laws and regulations governing the institution liable shall be payable without reduction.
- (3) Benefits or benefit components which are determined independently of the time spent in insurance and consist of a fixed sum, a percentage of the remuneration taken into account for insurance purpose, or a multiple of the average contribution, may be reduced in the ratio of the periods counted for the purpose of reckoning benefits according to the laws and regulations governing the institution liable to the total of the periods counted for the purpose of reckoning benefits according to the laws and regulations governing all the institutions concerned.

(4) The provisions of paragraphs 2 and 3 shall apply to any subsidy or supplement to or fraction of a pension which is payable out of public funds.

(5) The apportionment of the cost of medical treatment and attendance is not regulated by this Convention.

#### Article 4

In cases in which the total of the insurance periods spent with the insurance institutions of a Member does not amount to twenty-six contribution weeks, the institution or institutions with which they were spent may decline to recognise any liability for benefit. Periods in respect of which liability for benefit has been so declined shall not be taken into account by any of the other institutions concerned when making the reduction permitted by Article 3, paragraph 3.

#### Article 5

(1) If a person who is entitled to benefit from the insurance institutions of at least two Members would but for this Convention be entitled to receive from any such institution in respect of periods spent with it a benefit greater than the total of the benefits to which he is entitled under Article 3, he shall be entitled to receive from that institution a complementary benefit equal to the difference.

(2) Where such complementary benefits are due from more than one institution, the total amount due to the beneficiary shall be the highest such benefit due from any one of them and the liability for this amount shall be apportioned among them in proportion to the complementary benefit which would have been due from each individually.

#### Article 6

Provision may be made by agreement between the Members concerned for:

- (a) the reckoning of benefits by a method which differs from that prescribed in Article 3 but gives a result which is at least equivalent on the whole to that given by applying the said Article, subject to the total of the benefits payable never being less than the highest benefits payable by any one insurance institution in respect of periods spent with it;
- (b) enabling an insurance institution of one Member to discharge its liability to the insured person and his dependants by paying to the insurance institution of another Member to which he has become affiliated the capital representing the rights in course of acquisition by him at the date at which he ceased to be affiliated to the institution, subject to the latter institution consenting thereto and undertaking to apply the capital for the purpose of crediting rights;
- (c) limiting the total of the benefits granted by the insurance institutions of the Members to the amount due on the basis of the totalised insurance periods from the institution governed by the most favourable laws and regulations.

#### Article 7

A claimant shall not be required to submit his claims for benefit to more than one of the insurance institutions to which he has been affiliated. This institution shall then

inform the other institutions mentioned in the claim.

#### Article 8

For the purpose of converting sums expressed in the currency of another Member, insurance institutions shall, when dealing with claims for benefit, adopt the relation between the two currencies which, on the first day of the quarter during which the claim was submitted, obtained on the principal foreign exchange market of the Member in the currency of which the sum is expressed: Provided that provision may be made for another method of conversion by agreement between the Members concerned.

#### Article 9

Any Member may decline to apply the provisions of this Part of this Convention in its relations with a Member the laws and regulations of which do not cover the risk in respect of which a benefit is claimed.

#### Article 10

(1) Persons who have been affiliated to an insurance institution of a Member and their dependants shall be entitled to the entirety of the benefits the right to which has been acquired in virtue of their insurance:

- (a) if they are resident in the territory of a Member, irrespective of their nationality;
  - (b) if they are nationals of a Member, irrespective of their place of residence.
- (2) Provided that any subsidy or supplement to or fraction of a pension which is payable out of public funds may be withheld from persons who are not nationals of a Member.

(3) Provided also that, for a period of five years from the first coming into force of this Convention, a Member may reserve the payment of any subsidy or supplement to or fraction of a pension which is payable out of public funds to the nationals of Members with which it has concluded supplementary agreements to that effect.

#### Article 11

(1) Pensions the right to which is maintained under Article 10 shall not be commuted for lump sums smaller than their capital value.

(2) Provided that the insurance institution liable for benefit may commute pensions the monthly value of which is inconsiderable for lump sums calculated according to the laws and regulations governing the said institution, subject to the said sums not being reduced on the ground of residence abroad.

#### Article 12

(1) The provisions of the laws or regulations of a Member permitting the reduction or suspension of benefit if the person concerned has concurrent rights to other social insurance benefits or is in employment involving compulsory insurance may be applied to beneficiaries under this Convention in respect of benefits payable under an insurance scheme of another Member or in respect of employment in the territory of another Member.

(2) Provided that provisions permitting reduction or suspension in the case of concurrent benefits in respect of the same risk shall not apply to benefits the right to which is acquired under Part II of this Convention.

#### Article 13

An insurance institution liable for benefit in virtue of this Convention may discharge in the currency of its own country its liability to all persons entitled to such benefit.

#### Article 14

(1) The authorities and insurance institutions of each Member shall afford assistance to those of other Members to the same extent as if they were applying their own laws and regulations relating to social insurance, and more particularly shall, at the request of an institution of any Member, carry out the investigations and medical examinations necessary to determine whether the persons in receipt of benefits for which the latter institution is liable satisfy the conditions for entitlement to such benefits.

(2) In so far as the Members concerned do not otherwise agree, the expenses to be repaid for assistance so afforded shall be an amount determined according to the scale of charges of the institution or authority which has afforded assistance or, in the absence of such a scale, the expenditure incurred.

#### Article 15

Any exemption from fees granted by the laws or regulations of a Member in respect of documents furnished to its authorities or insurance institutions shall be extended to the corresponding documents furnished in connection with the application of this Convention to the authorities and insurance institutions of any other Member.

#### Article 16.

With the consent of the competent central authorities of the Members concerned, an insurance institution liable for benefit to a beneficiary resident in the territory of another Member may, on terms agreed between the two institutions, entrust the insurance institution of the place of residence of the beneficiary with the payment of such benefit on its behalf.

#### Article 17.

Every Member which at the date of its ratification of this Convention has not established such a scheme undertakes to establish within twelve months from that date either:

- (a) a compulsory insurance scheme under which pensions are payable at an age not later than sixty-five to the majority of persons employed in industrial and commercial undertakings; or
- (b) a compulsory invalidity, old-age and widows' and orphans' insurance scheme covering a substantial proportion of the persons employed in industrial and commercial undertakings.

#### Article 18.

(1) Each Member shall treat the nationals of other Members on the same footing as its own nationals for the purpose of liability to compulsory insurance and for the purpose of insurance benefits, including any subsidy or supplement to or fraction of a pension which is payable out of public funds.

(2) Provided that any Member may restrict to its own nationals the right to any subsidy or supplement to or fraction of a pension which is payable out of public funds and granted solely to insured persons who have exceeded a prescribed age at the date when

the laws or regulations providing for compulsory insurance come into force.

#### Article 19.

The provisions of this Convention may be derogated from by treaties between Members which do not affect the rights and duties of Members not parties to the treaty and which make definite provision for the maintenance of rights in course of acquisition and of acquired rights under conditions at least as favourable on the whole as those provided for in this Convention.

#### Article 20.

(1) For the purpose of assisting Members in applying this Convention there is hereby established in connection with the International Labour Office a Commission consisting of one delegate for each Member together with three persons appointed respectively by the Government, Employees' and Workers' representatives upon the Governing Body of the Office. The Commission shall regulate its own procedure.

(2) At the request of one or more Members concerned, the Commission, which shall be guided by the principles and purposes of this Convention, shall make recommendations as to the manner in which it shall be applied.

#### Article 21.

(1) Where, prior to the coming into force of this Convention, a pension has not been awarded or the payment of a pension has been suspended on account of the residence abroad of the person concerned, the pension shall be awarded or the payment of the pension resumed in pursuance of the Convention as from the date of the coming into force thereof for the Member concerned.

(2) In applying this Convention account shall be taken of insurance periods prior to its coming into force if account would have been taken of such periods if this Convention had been in force during these periods.

(3) At the request of the person concerned claims settled before the coming into force of this Convention shall, unless they have been settled by the payment of a lump sum, be reviewed. Review shall not involve the payment of arrears of, or the refund of, benefits for the period prior to the coming into force of the Convention for the Member concerned.

#### Article 22.

(1) The denunciation of this Convention by a Member shall not affect the liabilities of its insurance institutions in respect of claims which matured before the denunciation took effect.

(2) Rights in course of acquisition which are maintained in pursuance of this Convention shall not lapse by reason of the denunciation thereof: their further maintenance during the period subsequent to the date on which the Convention ceases to be in force shall be regulated by the laws and regulations governing the institution concerned.

#### Article 23

The formal ratification of this Convention shall be communicated to the Secretary-General of the League of Nations for Registration.

#### Article 24

(1) This Convention shall be binding only upon those Members of the International La-

bour Organization whose ratifications have been registered with the Secretary-General.

(2) It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Secretary-General.

(3) Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

#### Article 25

As soon as the ratifications of two Members of the International Labour Organization have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organisation. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organisation.

#### Article 26

(1) A Member which has ratified this Convention may denounce it after the expiration of five years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

(2) Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of five years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of five years and, thereafter, may denounce this Convention at the expiration of each period of five years under the terms provided for in this Article.

#### Article 27

At the expiration of each period of five years after the coming into force of this Convention, the Governing Body of the International Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

#### Article 28

(1) Should Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 26, above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

(2) This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 29

The French and English texts of this Convention shall both be authentic.

## DRAFT CONVENTION CONCERNING THE EMPLOYMENT OF WOMEN ON UNDERGROUND WORK IN MINES OF ALL KINDS

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Nineteenth Session on June 4, 1935, and

Having decided upon the adoption of certain proposals with regard to the employment of women on underground work in mines of all kinds, which is the second item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Draft International Convention adopts, this 21st day of June of the year one thousand nine hundred and thirty-five, the following Draft Convention which may be cited as the Underground Work (Women) Convention, 1935:

### Article 1

For the purpose of this Convention, the term "mine" includes any undertaking, whether public or private, for the extraction of any substance from under the surface of the earth.

### Article 2

No female, whatever her age, shall be employed on underground work in any mine.

### Article 3

National laws or regulations may exempt from the above prohibition:

- (a) females holding positions of management who do not perform manual work;
- (b) females employed in health and welfare services;
- (c) females who, in the course of their studies, spend a period of training in the underground parts of a mine; and
- (d) any other females who may occasionally have to enter the underground parts of a mine for the purpose of a non-manual occupation.

### Article 4

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

### Article 5

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Secretary-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

## DRAFT CONVENTION CONCERNING THE REDUCTION OF HOURS OF WORK TO FORTY A WEEK

The General Conference of the International Labour Organization,

Having met at Geneva in its Nineteenth Session on June 4, 1935,

Considering that the question of the reduction of hours of work is the sixth item on the Agenda of the Session;

### Article 6

As soon as the ratifications of two Members of the International Labour Organization have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

### Article 7

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

### Article 8

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

### Article 9

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides:

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 7 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force, this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

### Article 10

The French and English texts of this Convention shall both be authentic.

Considering that unemployment has become so widespread and long-continued that there are at the present time many millions of workers throughout the world suffering hardship and privation for which they are not themselves responsible and

from which they are justly entitled to be relieved;

Considering that it is desirable that workers should as far as practicable be enabled to share in the benefits of the rapid technical progress which is a characteristic of modern industry; and

Considering that in pursuance of the Resolutions adopted by the Eighteenth and Nineteenth Sessions of the International Labour Conference it is necessary that a continuous effort should be made to reduce hours of work in all forms of employment to such extent as is possible;

adopts, this 22nd day of June, 1935, the following Draft Convention which may be cited as the Forty-Hour Week Convention, 1935:—

#### Article 1

Each Member of the International Labour Organization which ratifies this Convention declares its approval of:

- (a) the principle of a forty-hour week applied in such a manner that the standard of living is not reduced in consequence; and
  - (b) the taking or facilitating of such measures as may be judged appropriate to secure this end;
- and undertakes to apply this principle to classes of employment in accordance with the detailed provisions to be prescribed by such separate Conventions as are ratified by that Member.

#### Article 2

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 3

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force twelve months after the date on which the ratifications of two Members have been registered with the Secretary-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

#### Article 4

As soon as the ratifications of two Members of the International Labour Organization have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization.

### TEXT OF THE DRAFT CONVENTION HOURS OF WORK IN

The General Conference of the International Labour Organization,

Having met at Geneva in its Nineteenth Session on June 4, 1935;

Considering that the question of the reduction of hours of work is the sixth item on the Agenda of the Session;

Confirming the principle laid down in the Forty-Hour Week Convention, 1935, including the maintenance of the standard of living;

Having determined to give effect to this reduction forthwith in the case of glass-bottle works;

adopts this 25th day of June, 1935, the following Draft Convention, which may be cited as the

He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

#### Article 5

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

#### Article 6

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

#### Article 7

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides:

(a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 5 above, if and when the new revising Convention shall have come into force;

(b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 8

The French and English texts of this Convention shall both be authentic.

### CONCERNING THE REDUCTION OF GLASS-BOTTLE WORKS

Reduction of Hours of Work (Glass-Bottle Works) Convention, 1935:

#### Article 1

1. This Convention applies to persons who, in glass works where bottles are produced by automatic machinery, work in successive shifts and are employed in connection with generators, tank furnaces, automatic machinery, annealing furnaces and operations accessory to the working of the above.

2. For the purpose of this Convention the term "bottles" includes similar glass articles produced by the same processes as bottles.

### Article 2

1. The persons to whom this Convention applies shall be employed under a system providing for at least four shifts.

2. The hours of work of such persons shall not exceed an average of forty-two per week.

3. This average shall be calculated over a period not exceeding four weeks.

4. The length of a spell of work shall not exceed eight hours.

5. The interval between two spells of work by the same shift shall not be less than sixteen hours: Provided that this interval may where necessary be reduced on the occasion of the periodical change over of shifts.

### Article 3

1. The limits of hours prescribed in paragraphs 2, 3 and 4 of Article 2 may be exceeded and the interval prescribed in paragraph 5 reduced, but only so far as may be necessary to avoid serious interference with the ordinary working of the undertaking,

(a) in case of accident, actual or threatened, or in case of urgent work to be done to machinery or plant, or in case of *force majeure*; or

(b) in order to make good the unforeseen absence of one or more members of a shift.

2. Adequate compensation for all additional hours worked in accordance with this Article shall be granted in such manner as may be determined by national laws or regulations or by agreement between the organizations of employers and workers concerned.

### Article 4

In order to facilitate the effective enforcement of the provisions of this Convention, every employer shall be required:

(a) to notify, by the posting of notices in conspicuous positions in the works or other suitable place or by such other method as may be approved by the competent authority, the hours at which each shift begins and ends;

(b) not to alter the hours so notified except in such manner and with such notice as may be approved by the competent authority; and

(c) to keep a record in the form prescribed by the competent authority of all additional hours worked in pursuance of Article 3 of this Convention and of the compensation granted in respect thereof.

### Article 5

Nothing in this Convention shall affect any custom or agreement between employers and workers which ensures more favourable conditions than those provided by this Convention.

### Article 6

The formal ratifications of this Convention shall be communicated to the Secretary-General of the League of Nations for registration.

### Article 7

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretary-General.

2. It shall come into force twelve months after the date on which the ratifications of

two Members have been registered with the Secretary-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification has been registered.

### Article 8

As soon as the ratifications of two Members of the International Labour Organization have been registered, the Secretary-General of the League of Nations shall so notify all the Members of the International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

### Article 9

1. A Member which has ratified this Convention may denounce it after the expiration of the years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention at the expiration of each period of ten years under the terms provided for in this Article.

### Article 10

At the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

### Article 11

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

(a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 9 above, if and when the new revising Convention shall have come into force;

(b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

### Article 12

The French and English texts of this Convention shall both be authentic.

## DRAFT CONVENTION LIMITING HOURS OF WORK IN COAL MINES (REVISED 1935)

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Nineteenth Session on June 4, 1935, and

Having decided upon the adoption of certain proposals with regard to the partial revision of the Convention limiting Hours of Work in Coal Mines adopted by the Conference at its Fifteenth Session, which is the seventh item on the Agenda of the Session, and

Considering that the proposals must take the form of a Draft International Convention,

adopts, this 21st day of June of the year one thousand nine hundred and thirty-five, the following Draft Convention which may be cited as the Hours of Work (Coal Mines) Convention (Revised), 1935:

### Article 1

1. This Convention shall apply to all coal mines, that is to say, to any mine from which only hard coal or lignite, or principally hard coal or lignite together with other minerals, is extracted.

2. For the purpose of this Convention, the term "lignite mine" shall mean any mine from which coal of a geological period subsequent to the carboniferous period is extracted.

### Article 2

For the purpose of this Convention, the term "worker" shall mean:

- (a) in underground coal mines, any person occupied underground, by whatever employer and on whatever kind of work he may be employed, except persons engaged in supervision or management who do not ordinarily perform manual work;
- (b) In open coal mines, any person employed directly or indirectly in the extraction of coal, except persons engaged in supervision or management who do not ordinarily perform manual work.

### Article 3

1. Hours of work in underground hard coal mines shall mean the time spent in the mine calculated as follows:

- (a) time spent in an underground mine shall mean the period between the time when the worker enters the cage in order to descend and the time when he leaves the cage after re-ascending;
- (b) in mines where access is by an adit the time spent in the mine shall mean the period between the time when the worker passes through the entrance of the adit and the time of his return to the surface.

2. In no underground hard coal mine shall the time spent in the mine by any worker exceed seven hours and forty-five minutes in the day.

### Article 4

The provisions of this Convention shall be deemed to be complied with if the period between the time when the first workers of the shift or of any group leave the surface and the time when they return to the surface is the

same as that laid down in paragraph 2 of Article 3. The order of and the time required for the descent and ascent of a shift and of any group of workers shall, moreover, be approximately the same.

### Article 5

1. Subject to the provisions of the second paragraph of this Article, the provisions of this Convention shall be deemed to be complied with if the national laws or regulations prescribe that for calculating the time spent in the mine the descent or ascent of the workers is to be calculated according to the weighted average duration of the descent or ascent of all shifts of workers in the whole country. In this case, the period between the time when the last worker of the shift leaves the surface and the time when the first worker of the same shift returns to the surface shall not in any mine exceed seven hours and fifteen minutes; provided that no method of regulation shall be permitted by which the hewers as a class of workers would on the average work longer hours than the other classes of underground workers in the same shift.

2. Any Member which, having applied the method laid down in this Article, subsequently applies the provisions of Articles 3 and 4 shall make the change simultaneously for the whole country and not for any part thereof.

### Article 6

1. Workers shall not be employed on underground work in coal mines on Sundays and legal public holidays:

Provided that this requirement shall be deemed to be complied with if the workers enjoy a rest period of twenty-four consecutive hours, of which at least eighteen fall upon the Sunday or legal public holiday.

2. National laws or regulations may authorize the following exceptions to the provisions of the preceding paragraph for workers over 18 years of age:

- (a) for work which, owing to its nature, must be carried on continuously;
- (b) for work in connection with the ventilation of the mine and the prevention of damage to the ventilation apparatus, safety work, work in connection with first aid in the case of accident and sickness, and the care of animals;
- (c) for survey work in so far as this cannot be done on other days without interrupting or disturbing the work of the undertaking;
- (d) for urgent work in connection with machinery and other appliances which cannot be carried out during the regular working time of the mine, and in other urgent or exceptional cases which are outside the control of the employer.

3. The competent authorities shall take appropriate measures for ensuring that no work is done on Sundays and legal public holidays except as authorized by this Article.

4. Work permitted under paragraph 2 of this Article shall be paid for at not less than one-and-a-quarter times the regular rate.

5. Workers who are engaged to any considerable extent on work permitted under paragraph 2 of this Article shall be assured either a compensatory rest period or an adequate extra payment in addition to the rate specified in paragraph 4 of this Article. The detailed ap-

plication of this provision shall be regulated by national laws or regulations.

#### Article 7

Lower maxima than those specified in Articles 3, 4 and 5, shall be laid down by regulations made by public authority for workers in work places which are rendered particularly unhealthy by reason of abnormal conditions of temperature, humidity or other cause.

#### Article 8

1. Regulations made by public authority may provide that the hours specified in Articles 3, 4, 5 and 7 may be exceeded in case of accident, actual or threatened, in case of *force majeure*, or in case of urgent work to be done to machinery, plant or equipment of the mine as a result of a breakdown of such machinery, plant or equipment, even if coal production is thereby incidentally involved, but only so far as may be necessary to avoid serious interference with the ordinary working of the mine.

2. Regulations made by public authority may provide that the hours specified in Articles 3, 4, 5 and 7 may be exceeded in the case of workers employed on operations which by their nature must be carried on continuously or on technical work, in so far as their work is necessary for preparing or terminating work in the ordinary way or for a full resumption of work on the next shift, provided, however, that this shall not refer to the production or transport of coal. The additional time so authorized for any individual worker shall not, except as specified in paragraphs 3 and 4 of this Article, exceed half an hour on any day.

3. Regulations made by public authority may provide that the hours specified in Articles 3, 4, 5 and 7 may be exceeded to an extent exceeding half an hour in the case of the following grades:

- (a) workers whose presence is indispensable for the work of ventilation and pumping stations and of such compressed air stations as are necessary for ventilation;
- (b) underground store-men; and
- (c) winchmen and locomotive drivers and their indispensable assistants.

Provided that no worker in the above grades who is employed on operations which by their nature must be carried on continuously may be employed for more than eight hours per day exclusive of the time spent in the mine by that worker in reaching and returning from his place of work, it being understood that in each case this time will be reduced to the indispensable minimum.

Provided also that in the case of

- (a) underground store-men;
- (b) enginemen and men in charge of internal shafts who are engaged upon the transport of workers;
- (c) drivers of locomotives who are engaged upon the transport of workers; and
- (d) the indispensable assistants of the grades specified in clauses (b) and (c):

the limits of such extension shall be that fixed by the regulations of the public authority.

4. Regulations made by public authority may provide that the limit of hours specified in Articles 3, 4, 5 and 7, and in paragraphs 2 and 3 of this Article may be exceeded in the case of workers whose presence is indispensable for the work of underground ventilation, pumping and compressed air stations but only to such extent as may be necessary to permit the periodical change-over of shifts, and time worked in virtue of this provision shall not be deemed to be overtime, so however that during any

period of three weeks no worker shall work more than twenty-one shifts of the length prescribed for his grade by paragraph 2 or paragraph 3 of this Article as the case may be.

5. In the case of mines in normal operation the number of persons coming under paragraphs 2 and 3 of this Article shall at no time exceed 5 per cent of the total number of persons employed at the mine.

6. Overtime worked in virtue of the provisions of this Article shall be paid for at not less than one-and-a-quarter times the regular rate.

#### Article 9

1. Regulations made by public authority may, in addition to the provisions of Article 8, put not more than 'sixty hours' overtime in the year at the disposal of undertakings throughout the country as a whole.

2. This overtime shall be paid for at not less than one-and-a-quarter times the regular rate.

#### Article 10

The regulations mentioned in Articles 7, 8 and 9 shall be made by public authority after consultation with the organizations of employers and workers concerned.

#### Article 11

The annual Reports to be submitted under Article 408 of the Treaty of Versailles and the corresponding Articles of the other Treaties of Peace shall contain all information as to the action taken to regulate the hours of work in accordance with the provisions of Articles 3, 4 and 5. They shall also furnish complete information concerning the regulations made under Articles 7, 8, 9, 12, 13 and 14 and concerning their enforcement.

#### Article 12

In order to facilitate the enforcement of the provisions of this Convention, the management of every mine shall be required:

- (a) to notify by means of notices conspicuously posted at the pithead or in some other suitable place, or by such other method as may be approved by the public authority, the hours at which the workers of each shift or group shall begin to descend and shall have completed the ascent.

These hours shall be approved by the public authority and be so fixed that the time spent in the mine by each worker shall not exceed the limits prescribed by this Convention. When once notified, they shall not be changed except with the approval of the public authority and by such notice and in such manner as may be approved by the public authority.

- (b) to keep a record in the form prescribed by national laws or regulations of all additional hours worked under Articles 8 and 9.

#### Article 13

1. In underground lignite mines Articles 3 and 4 and Articles 6 to 12 of this Convention shall apply subject to the following provisions:

- (a) in accordance with such conditions as may be prescribed by national laws or regulations, the competent authority may permit collective breaks involving a stoppage of production not to be included in the time spent in the mine, provided that such breaks shall in no case exceed thirty minutes for each shift. Such permission shall only be given after the necessity for

such a system has been established by official investigation in each individual case, and after consultation with the representatives of the workers concerned.

(b) the number of hours' overtime provided for in Article 9 may be increased to not more than seventy-five hours a year.

2. In addition, the competent authority may approve collective agreements which provide for not more than seventy-five hours' further overtime a year. Such further overtime shall likewise be paid for at the rate prescribed in Article 9, paragraph 2. It shall not be authorized generally for all underground lignite mines, but only in the case of individual districts or mines where it is required on account of special technical or geological conditions.

#### Article 14

In open hard coal and lignite mines Articles 3 to 13 of this Convention shall not be applicable. Nevertheless, Members which ratify this Convention undertake to apply to these mines the provisions of the Washington Convention of 1919 limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week, provided that the amount of overtime which may be worked in virtue of Article 6, paragraph (b), of the said Convention shall not exceed one hundred hours a year. Where special needs so require, and only in such cases, the competent authority may approve collective agreements which provide for an increase of the aforesaid one hundred hours by not more than a further hundred hours a year.

#### Article 15

Nothing in this Convention shall have the effect of altering national laws or regulations with regard to hours of work so as to lessen the guarantees thereby afforded to the workers.

#### Article 16

The operation of the provisions of the Convention may be suspended in any country by the Government in the event of emergency endangering the national safety.

#### Article 17

The formal ratifications of this Convention under the conditions set forth in Part XIII of the Treaty of Versailles and in the corresponding Parts of the other Treaties of Peace shall be communicated to the Secretary-General of the League of Nations for registration.

#### Article 18

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Secretariat.

2. It shall come into force six months after the date on which the ratifications of two of the following Members have been registered by the Secretary-General of the League of Nations: Belgium, Czechoslovakia, France, Germany, Great Britain, Netherlands and Poland.

3. Thereafter the Convention shall come into force for any Member six months after the date on which its ratification has been registered.

#### Article 19

As soon as the ratifications of two of the Members mentioned in the second paragraph of Article 18 have been registered with the Secretariat, the Secretary-General of the League of Nations shall so notify all the Members of the

International Labour Organization. He shall likewise notify them of the registration of ratifications which may be communicated subsequently by other Members of the Organization.

#### Article 20

1. A Member which has ratified this Convention may denounce it after the expiration of five years from the date on which the Convention first comes into force, by an act communicated to the Secretary-General of the League of Nations for registration. Such denunciation shall not take effect until one year after the date on which it is registered with the Secretariat.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of five years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of five years and, thereafter, may denounce this Convention at the expiration of each period of three years under the terms provided for in this Article.

#### Article 21

1. At the latest within three years from the coming into force of this Convention the Governing Body of the International Labour Office shall place on the Agenda of the Conference the question of the revision of this Convention on the following points:

- (a) the possibility of a further reduction in the hours of work provided for in paragraph 2 of Article 3;
- (b) the right to have recourse to the exceptional method of calculation laid down in Article 5;
- (c) the possibility of modifying the provisions of Article 13, paragraphs (a) and (b), in the direction of a reduction of the hours of work;
- (d) the possibility of a reduction in the amount of overtime provided for in Article 14.

2. Moreover, at the expiration of each period of ten years after the coming into force of this Convention, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall consider the desirability of placing on the Agenda of the Conference the question of its revision in whole or in part.

#### Article 22

1. Should the Conference adopt a new Convention revising this Convention in whole or in part, then, unless the new Convention otherwise provides,

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 20 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

#### Article 23

The French and English texts of this Convention shall both be authentic.

## RECOMMENDATION CONCERNING UNEMPLOYMENT AMONG YOUNG PERSONS

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its Nineteenth Session on June 4, 1935, and

Having decided upon the adoption of certain proposals with regard to unemployment among young persons which is the third item on the Agenda of the Session, and

Having determined that these proposals shall take the form of a Recommendation, adopts, this 25th day of June of the year one thousand nine hundred and thirty-five, the following Recommendation which may be cited as the Unemployment (Young Persons) Recommendation, 1935:

The Conference,

Recalling that it has on several occasions drawn the attention of Governments to the economic measures that should be adopted as a remedy for the general depression, as a result of which large numbers of workers are unemployed;

Considering that this unemployment continues and affects a large number of young persons, whose involuntary idleness may undermine their characters, diminish their occupational skill, and menace the future development of the nations;

Considering that the Conference at its Eighteenth Session adopted a Draft Convention and Recommendation concerning unemployment insurance and various forms of relief for the unemployed which apply to young persons among others;

Considering that many countries have adopted other measures to remedy a situation the gravity of which has rightly alarmed public opinion;

Recommends, in the light of the experience already gained in this field, that each Member should apply the following principles and should submit to the International Labour Office a report stating the extent to which, and manner in which, the said principles have been applied:

### SCHOOL-LEAVING AGE

1. The minimum age for leaving school and being admitted to employment should be fixed at not less than 15 years, as soon as circumstances permit.

2. (1) Juveniles over the school-leaving age who are unable to find suitable employment should, where the organization of the school allows, be required to continue full-time attendance at school until suitable employment is available for them.

(2) For the purpose of this paragraph the term "suitable" refers primarily to the continuity of the employment and to future prospects therein.

(3) For the purpose of applying this paragraph there should be close co-operation between the education, placing and unemployment insurance authorities.

3. For the purpose of this Recommendation, "juvenile" means a person under 18 years of age.

4. In countries where compulsory education does yet not exist, it should be introduced as soon as possible in conformity with paragraphs 1 and 2.

5. Maintenance allowances should, if necessary, be granted to parents by the competent public authorities during the additional periods of education recommended in paragraphs 1 and 2.

6. The curricula for juveniles whose period of school attendance is prolonged by the application of the measures recommended above should be designed primarily to promote their general education, but should also provide general training for occupational activity.

7. (1) Measures should be adopted to encourage juveniles with the necessary aptitudes to attend secondary or technical schools beyond the minimum school-leaving age.

(2) Exemption from the payment of fees or the reduction of fees would be suitable methods of applying this principle.

8. Juveniles who are no longer in full-time attendance at school should, until they reach the age of eighteen, be required to attend continuation courses providing a combination of general and vocational education.

9. (1) Where such attendance is not compulsory for all juveniles it should at least be made compulsory for unemployed juveniles, who should be required to attend for a prescribed number of hours every day or, where this is not possible, for a prescribed number of hours every week.

(2) In districts in which there is a sufficient number of unemployed juveniles special courses should be organized for them.

(3) Measures should be taken to enable juveniles who have attended courses organized in accordance with the two preceding sub-paragraphs to continue similar instruction if possible after having found work.

10. Any unemployed juvenile unable to show good cause for his having refused to attend the course which he is required to attend in application of paragraph 9 may, under suitable circumstances, be temporarily disqualified, entirely or partly, for the receipt of unemployment benefit and allowances.

11. (1) There should be organized for unemployed persons between the ages of eighteen and twenty-five vocational training centres in which some provision is made for general education. Whether these centres are residential or non-residential should be decided according to circumstances.

(2) These centres should be organized in co-operation with employers' and workers' organizations.

12. (1) The programs of such centres should include, in addition to practical subjects, general courses of vocational and cultural interests.

(2) The persons responsible for giving the courses at such centres should be suitably remunerated and should be selected with special care, as far as possible from among qualified unemployed young persons.

13. Persons attending a course or centre organized in application of paragraphs 9 or 11 should be allowed supplementary grants to cover their travelling and other necessary expenses.

14. In the case of persons unable to secure employment on the termination of secondary, technical or higher studies measures should be taken:

- (a) to enable such persons to supplement their theoretical training by obtaining practical experience in industrial, commercial and other undertakings and in public administration, every precaution being taken to prevent such persons displacing regular workers;
- (b) to facilitate, by such methods as the provision of free courses and of study and research scholarships, their continued attendance at the institution where they terminated their technical or higher studies or at some other institution of general or vocational education;
- (c) to give such persons information concerning overcrowded occupations and to assist them to counteract prejudices which constitute barriers to their occupational readjustment.

15. Special measures should be adopted to train a qualified staff for educational, recreational, social service and employment centres for the young unemployed. It would be appropriate for such training to be given in special centres to which unemployed young persons with the necessary qualifications are admitted.

#### RECREATIONAL AND SOCIAL SERVICES FOR THE YOUNG UNEMPLOYED

16. (1) Measures for promoting the general and vocational education of the young unemployed should be accompanied by measures to facilitate the useful and agreeable utilization of their spare time, such as the establishment of recreational centres, physical training centres, reading rooms, etc.

(2) Such centres should not be reserved for the exclusive use of the unemployed but should also, with a view to avoiding any systematic separation of employed and unemployed be open to young employed persons.

(3) Such centres should be under the supervision of a qualified person, but their activities should be arranged as far as possible by co-operation with and among the young persons themselves.

17. In districts where there is a sufficient number of young unemployed, measures should be taken to establish social service centres and hostels where they can obtain board and lodging at low cost.

#### ACTION BY TRADE ORGANIZATIONS AND PRIVATE ORGANIZATIONS

18. The public authorities should assist educational and other social services for the young unemployed organized by trade organizations and other associations.

#### SPECIAL EMPLOYMENT CENTRES

19. Where it is considered desirable to establish, for unemployed persons between the ages of 18 and 24 inclusive, employment centres, the principal object of which is not to give vocational training but to provide work under other than normal conditions of employment, adequate safeguards should be adopted to prevent these abnormal conditions resulting in abuses.

20. Attendance at employment centres should be strictly voluntary.

21. Every care should be taken to prevent centres, whether public or private, from becoming institutions for military training.

Privately organized centres should be under the supervision of public civil authorities.

22. No person should be admitted to an employment centre unless he has been medically examined and found physically fit for the work proposed for him.

23. The strictest hygienic conditions should prevail in all centres.

24. Special attention should be devoted to living conditions and discipline. The organization of the centres should as far as possible be such as to enable the young unemployed to govern themselves, particularly as regards discipline.

25. In order to enable the young persons to maintain regular contact with their families, centres should be as near to their homes as circumstances permit.

26. (1) The work programs of the centres should be such as to avoid competition by the centres with workers in normal employment.

(2) In so far as possible, the work provided should be appropriate to the age, sex, strength and occupation of the persons concerned.

27. The remuneration of young persons employed at centres should include a cash payment, in addition to board and, where these are provided, working clothes and lodging.

28. Persons employed at centres should be admitted to social insurance schemes and the contributions due in respect of them should be payable by the centres.

29. Where there is no general scheme of compulsory accident compensation insurance, centres should, unless directly organized by public authorities, which act as their own insurance carriers, cover their compensation liability by insurance.

30. (1) With a view to the inclusion in the programs of centres of adequate provision for general education, vocational training, games, sports and free time, the time spent on productive work should be considerably less than forty hours per week.

(2) Centres should have libraries.

31. (1) There should be detailed regulations for the training and selection of the staff of centres, and members of centre staffs should have a thorough knowledge of social questions generally and of the problems of youth in particular.

(2) The staff of centres specially organized for young women should consist chiefly of women.

(3) Intermediate posts should in all possible cases be reserved for persons in attendance at the centres who are found to be suitably qualified.

(4) These centres should be placed under the supervision of a qualified person, but their activities should as far as possible be regulated by co-operation with and among the young persons themselves.

32. (1) A central supervisory council should be instituted for the purpose of general supervision over the employment centre system.

(2) The central supervisory council should include representatives of the most representative organizations of workers and employers and of the public departments responsible for placing, public works, agriculture, public health, safety, education and for other aspects of the welfare of the young.

(3) Among these representatives there should be a certain number of women.

33. The central supervisory council or some other appropriate body should collaborate closely with the public employment exchanges with a view to placing in normal employment the persons attending the centres.

34. Measures should be taken to develop team spirit among the persons attending the centres and to encourage them to form co-operative working groups for employment on land settlement schemes, public works, handicrafts, etc.

#### SPECIAL PUBLIC WORKS FOR UNEMPLOYED YOUNG PERSONS

35. (1) Special public works should be organized to assist unemployed young persons and such works should as far as possible be adapted to the age and occupation of such persons.

(2) For young unemployed persons who have terminated secondary, technical or higher studies, such works should be adapted as far as possible to the training of such persons.

(3) In so far as they are appropriate and possible, the safeguards recommended for Special Employment Centres should also be applied to public works organized to assist unemployed young persons.

#### PLACING AND DEVELOPMENT OF OPPORTUNITIES FOR NORMAL EMPLOYMENT

36. The national system of public employment exchanges should include special local and central arrangements for the placing of juveniles

37. Placing services for juveniles:

(a) should seek to place juveniles in suitable occupations as defined in paragraph 2 (2); and

(b) should either include a vocational guidance department or be co-ordinated with independent bodies for vocational guidance.

38. Employed should be required to notify the local placing service for juveniles of vacancies for juveniles and of any engagements of juveniles which they have made without recourse to the placing service.

39. Placing services for juveniles should be required:

(a) to supervise, in co-operation with vocational guidance services, apprenticeship committees and similar bodies, the results of the placings made, with a view to obtaining information likely to further the occupational prospects of juveniles; and

(b) to maintain close relations with all other public and private institutions interested in young persons and notably with the education authorities.

40. In the development of placing services for young persons of eighteen years of age and over, provision should be made whenever possible for assisting such persons in their occupational readjustment.

41. Measures should be taken to transfer to expanding occupations and to districts in which such occupations are carried on young persons who are without employment in districts where the principal industries appear to be in permanent decline.

42. Governments should conclude agreements for the purpose of facilitating the international exchange of student employees, that is to say, of young persons desirous of improving their occupational qualifications by a knowledge of the customs of other countries.

43. Present attempts to promote re-employment by a reduction in ordinary hours of work should be pursued with special vigour in respect of employment in which young persons engage.

#### STATISTICS

44. (1) Unemployment insurance institutions public employment exchanges, and other institutions which compile unemployment statistics should include in their statistics figures showing the extent of unemployment among persons below the age of twenty-five.

(2) These figures should be classified so as to show the distribution of such unemployment according to:

(a) sex;

(b) age, juveniles and other young persons being classified separately;

(c) occupation, persons who have never been in paid employment being classified separately and according to the occupation for which they have been trained or in which they have applied for employment.

45. For the purpose of supplementing such statistics, and in substitution for them where they do not exist, special enquiries should be made from time to time with a view to obtaining the above information and complementary information upon such matters as the length of unemployment and occupational history of the persons concerned

46. Where the general census returns include information concerning unemployment, the returns should be analyzed for the purpose of obtaining in so far as possible the information referred to in paragraph 44.

47. Until such time as the recommendation made in paragraph 1 is fully applied in the various countries, annual returns should be compiled showing the number of children still under the school-leaving age who during the year have been engaged in employment out of school hours. Such returns should be classified by sex, age group and occupation, and should give details of the days of the week and the seasons during which such employment was carried on, and the number and incidence of the hours of employment.

Following are the texts of two Resolutions of special importance adopted by the Conference:—

#### RESOLUTION ON THE MAINTENANCE OF THE STANDARD OF LIVING OF THE WORKERS.

The Conference,  
Having adopted a Draft Convention declaring its approval of the principle of the forty-hour week.

Considering that the application of this principle should not as a consequence reduce the weekly, monthly or yearly income of the

workers, whichever may be the customary method of reckoning, nor lower their standard of living.

Invites Governments:

(1) to take appropriate measures in order to ensure that any adjustment of wages and

salaries should be effected as far as possible by means of direct negotiations between employers' and workers' organizations concerned; and

(2) after consultation with the organizations of employers and workers concerned, to take or facilitate appropriate measures to enable either of the parties concerned, if agreement between them cannot be reached, to submit the dispute to bodies competent to

deal with wage questions, such bodies being set up, where they do not exist, for the purpose; and

(3) to furnish to the International Labour Office periodic reports upon the measures they have taken for the introduction of the forty-hour week and for the maintenance of the standard of living of the workers.

When submitted to the Committee, this text was adopted by 33 votes to 1.

## RESOLUTION RESPECTING UNEMPLOYMENT AMONG YOUNG PERSONS

(1) The Conference,

Having considered the problem of unemployment among young persons and having recommended Governments to apply a number of measures including in particular:

(a) the fixing at 15 of the minimum compulsory school-leaving age and the minimum age for admission to employment;

(b) the development of technical education; and

(c) the setting up of vocational guidance services attached to or in co-operation with the public employment exchanges;

Is of the opinion that these measures concern not only unemployed young persons but all young workers,

And requests the Governing Body to consider urgently the desirability of placing on the Agenda of an early Session of the Conference:

(1) the revision of the Conventions fixing the minimum age for admission of children to industrial employment (1919), to employment at sea (1920), to employment in agriculture (1921) and to non-industrial employment (1932) with a view to raising the age from 14 as laid down in those Conventions to 15, and

(2) the question of vocational guidance apprenticeship and technical education of young workers.

The Conference invites the Governing Body of the International Labour Office:

(1) to submit to its unemployment Committee the reports referred to in the preamble of the Recommendation and to ask the Governments of the countries which have sent in such reports to send experts to the meeting of the Committee;

(2) to submit to an early Session of the Conference of Labour Statisticians that part of the Recommendation dealing with statistics with a view of facilitating its application.

Considering that the measures recommended should be applied also to unemployed young agricultural workers; considering that in any case such workers will not receive adequate and effective protection until the fundamental question of unemployment insurance in the case of agricultural workers is settled, the Conference, having regard to the resolution on unemployment among agricultural workers adopted at its Eighteenth Session, invites the International Labour Office urgently to pursue the necessary enquiry with a view to adopting international regulations regarding an effective system for the prevention of agricultural unemployment and a special system of unemployment insurance or assistance in agriculture.

## "Safest Mill in Canada Contest"

The final report on the contest conducted by the magazine, *Pulp and Paper of Canada*, for the six-months period ending December 31, 1934, awarded the trophy for Class A to the Wayagamack Division of the Consolidated Paper Corporation. Class A mills consist of all those having over 200 employees, while Class B mills have 200 or less employees.

At a safety rally held at the St. Maurice Division of the Consolidated Paper Company at the time the presentation of the trophy was made, R. Collins, Mill Manager, reviewed the accident experiences of the mill, stressing the wonderful improvement that had been effected since 1930 when intensive safety work was instituted. In 1929 the mill employees lost over \$20,000 in wages due to accidents, in 1934 they lost but \$2,000. This enormous saving to the men, he stated, had been ob-

tained by the whole-hearted co-operation of every person in the mill.

Trophies have been awarded annually by *Pulp and Paper of Canada* for the past nine years. The purpose of the contest is to create a "safety complex" in the industry that will make pulp and paper mills safer places to work in. The reports of the contest show the number of accidents in connection with the work of each competing mill; the days of lost time, the total payroll hours of exposure to risk, and the points gained or lost by the contestants.

The fifteenth annual meeting of the Employers' Association of Manitoba was held recently in Winnipeg. Featuring the report of the secretary, were observations concerning such matters as spreading employment, wages and hours, industrial accidents, industrial disputes, etc.

## EMPLOYMENT CONDITIONS IN CANADA AT THE END OF JUNE, 1935

### Reports of the Superintendents of the Employment Service

THE employment situation at the end of June was reported by the superintendents of the Employment Service to be as follows:—

Crop conditions in the Maritime Provinces were very promising and farm produce abundant. Loggers were still cutting and pulpwood peeling was brisk. Large quantities of lumber were being shipped to the Old Country, and sawmills were working night and day shifts. Fishing was fair, for although lobster packers were experiencing a dull season, with returns much below those of last year, the salmon run was at its height and cod and haddock were plentiful. The majority of mines in the New Glasgow area operated three to six days per week, while those in Cape Breton and vicinity worked five days. Manufacturing was not very busy, except in the iron and steel group, where several large orders for structural steel had been received. Sugar refineries and wood products were also busy. Building construction was slack, but highway work was continuing under government contract, and shipbuilding and repairs were active. Transportation and trade were fair. No change was reported in the Women's Division, the usual placements in domestic service being made.

Farming in the Province of Quebec showed little change, except at Montreal, where improvement was noted. River drivers were in demand at Rouyn; less elsewhere logging was quiet. Manufacturing showed no noteworthy variations, the situation being generally quiet throughout the province. Some building construction was in progress, particularly at Hull, but few orders were received at Montreal under this heading, although the call for common labourers was good. Road construction, also, was under way and more was expected to be undertaken shortly. Transportation was active at Quebec. Trade increased slightly. Many requests for cooks and domestic help were listed in the Montreal Women's Section and placements were effected.

The demand for farm help in Ontario was very good, a number of offices reporting that the call for experienced men exceeded the supply. There was also considerable casual work available in the fruit growing districts for berry and cherry pickers. Logging was quiet, being hampered in some districts by strikes. Sawmills, however, were busy. Mining also was dull, only the large producers running as usual. No marked change was

registered in manufacturing. Factories in the majority of cases were busy. Some slackness was reported in the textile and iron and steel group, which appeared to be seasonal only. Building construction in many centres was mainly confined to alterations and erection of residences, but more skilled tradesmen were employed this year than last year and prospects were brighter. Highway and airport construction continued as relief work. Trade was rather dull. In the Women's Division the shortage continued of cooks and cooks-general. A number of women were placed as berry pickers, also some in factories, while various other orders for institutional help and casual workers were also received.

The crop situation in the Prairie Provinces was reported to be most favourable, with general weather conditions ideal for excellent growth and very little damage, as yet, from grasshoppers. Logging was quiet in Manitoba but busy in Alberta, although there was no call for men. Mining also showed little activity. Manufacturing was only fair. Building construction, likewise, was inactive and building tradesmen unemployed. Highway construction continued as a relief measure. Trade was dull, with collections slow. There was a good demand for farm domestics, with a scarcity of suitable applicants, but a marked increase in the placement of charwomen in city work.

Farming was quiet in British Columbia, few helpers being required as yet in the fruit industry, owing to the lateness of the season. Logging was somewhat slack, labour difficulties considerably hampering this industry. Saw and shingle mills, however, were working fairly steadily. Mining continued active, especially in the Northern Interior. Fishermen were hoping for a good return with the opening of the sock-eye fishing season near at hand. Little new building construction was in evidence, but National Defence camps and provincial highways as relief centres provided employment. Drydocks and shipyards were quiet at Prince Rupert, but longshoremen had resumed work there. A strike, however, in Vancouver delayed loading operations in that port. Waterfront workers were kept busy at Victoria. The demand for house-workers was large, but the supply limited, as many applicants either refused domestic work or were inexperienced.

## EMPLOYMENT AND UNEMPLOYMENT IN CANADA IN MAY, 1935

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on June 1 was 9,270, the employees on their payrolls numbering 915,792 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for May was 1,755 having an aggregate membership of 164,320 persons, 15·9 per

cent of whom were without employment on June 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from the 64 offices of the Employment Service of Canada showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 61 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

### (1) Employment Situation at the Beginning of June, 1935, as Reported by the Employers

According to data tabulated by the Dominion Bureau of Statistics from 9,270 firms throughout Canada, there was a considerable expansion in employment at the beginning of June, in which most industrial groups shared. The payrolls of these employers were enlarged from 893,088 on May 1 to 915,792 at the beginning of June, or by 22,704 persons. The crude index at the latest date stood at 97·6, as compared with 95·2 in the preceding month, and 96·6 on June 1, 1934. On the same date in the thirteen preceding years, the index (average 1926=100) was as follows: 1933, 80·7; 1932, 89·1; 1931, 103·6; 1930, 116·5; 1929, 122·2; 1928, 113·8; 1927, 107·2; 1926, 102·2; 1925, 95·6; 1924, 96·4; 1923, 98·5; 1922, 90·3 and 1921, 87·7. Although the advance on June 1, 1935, provided work for many persons, it was smaller than the average increase indicated between May and June in the years since 1920, so that the index, after adjustment for seasonal variation, declined from 97·4 on May 1 to 95·1 at the latest date.

Pronounced advances were reported in manufacturing, the additions to staffs considerably exceeding the average seasonal gain noted on June 1 in the last fourteen years. The favourable movement extended to practically all classes of factory employment. In the non-manufacturing industries, there were important increases in logging, mining, communications, local and railway transportation, building and railway construction and maintenance, services and trade. On the other hand,

shipping and stevedoring was slackier, and there were temporary losses in highway construction owing to the closing of certain unemployment relief camps.

#### Employment by Economic Areas

Improvement was indicated in all of the five economic areas except Ontario, where there was a minor contraction; firms in Quebec and the Prairie Provinces employed the greatest number of extra workers.

*Maritime Provinces.*—Gains that exceeded the average increase between May 1 and June 1 in the last fourteen years were noted in the Maritime Provinces, according to statistics received from 661 employers with a combined working force of 72,427 persons, as compared with 69,437 on May 1. This increase was very much larger than that reported on June 1 of last year, when employment generally was in rather smaller volume. Manufacturing registered heightened activity at the latest date, particularly in the lumber, iron and steel, pulp and paper and animal food divisions. Construction and coal-mining also afforded greater employment, but transportation and logging were seasonally slackier.

*Quebec.*—Transportation, construction and manufacturing recorded important increases in personnel in Quebec, and there were also gains in logging, mining and services. Within the manufacturing division, pulp and paper, lumber, clay, glass and stone, textile, iron and steel, mineral product, non-ferrous metal and

vegetable food factories reported the greatest improvement, while leather plants showed a falling off in personnel. The general gain indicated by the co-operating establishments did not provide work for so many persons as were added to the payrolls on the same date of last year; the index, however, was then nearly three points lower. Statements were tabulated from 2,209 firms employing 257,837 workers on June 1, 1935, or 11,165 more than in their last monthly report.

*Ontario.*—There were considerable increases in manufacturing, logging, mining, communications, transportation, building and railway construction, services and trade on June 1, 1935, but the temporary release of large numbers of

June in 1934, when important advances had been indicated. This was the first report since July, 1933, in which activity in Ontario was at a lower level than in the corresponding month of the preceding year, but as already stated, it was expected that the contraction in employment would be temporary.

*Prairie Provinces.*—Construction (especially railroad construction and maintenance), transportation and manufacturing reported improvement in the Prairie Provinces; the food, lumber, iron and steel, clay, glass and stone and pulp and paper industries showed the greatest advances in the factory employment group. The firms whose statistics were tabulated employed 116,247 persons, as against

#### EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

men from the unemployment relief camps offset these gains, with the result that there was a small decline in employment in the province as a whole. The payrolls of the 4,094 co-operating establishments aggregated 388,720 employees at the latest date; as compared with 388,963 on May 1, this was a loss of 243 persons. Within the group of factory employment, the tendency was generally upward except in textiles and iron and steel, in both of which the falling-off was seasonal in character. The general index of employment stood at 101.6 on June 1, as compared with 101.7 on May 1, 1935, and 104.4 at the beginning of

110,869 in the preceding month. Rather smaller increases were indicated on June 1, 1934, and the index then was lower by nearly three points.

*British Columbia.*—An aggregate payroll of 80,561 was employed by the 969 reporting firms, which had 77,147 employees at the beginning of May. This increase considerably exceeded the average gain on June 1 in the years since 1920, being also much larger than that noted on the same date in 1934, when the index of employment was lower than at the first of June of the present year. Manufacturing recorded the most noteworthy ex-

pansion on the date under review; within this group, the improvement was most pronounced in edible animal, lumber and vegetable food factories. Among the non-manufacturing groups, mining, logging, transportation and construction recorded heightened activity.

Table 1 gives index numbers by economic areas.

### Employment by Cities

The trend was upward in six of the eight cities for which separate compilations are made: Montreal, Toronto, Ottawa, Hamilton, Winnipeg and Vancouver all showed considerable gains, while declines were noted in Quebec City and Windsor and the adjacent Border Cities. Employment in all these centres, except Quebec, was in greater volume than at the same date of last year.

*Montreal.*—Further improvement was recorded in Montreal, where the 1,299 co-operating firms employed 130,353 persons, an increase of 1,305 over their May 1 staffs. Manufacturing, especially of food, clay, glass and stone, iron and steel and mineral products, reported increases, and construction and trade were also busier. On the other hand,

transportation was slacker. The index, at 87.2, was slightly higher than in June, 1934, when the indicated gains were on a much larger scale.

*Quebec.*—On the whole, there was a contraction in Quebec City; this was chiefly due to losses in manufacturing, while construction was brisker. Statements were tabulated from 166 establishments having 12,567 workers, as against 12,697 in the preceding month. Advances had been indicated at the beginning of June of a year ago, when the index was two points higher.

*Toronto.*—Returns were furnished by 1,382 employers in Toronto with 118,969 persons on their payrolls, compared with 117,439 on May 1. Manufacturing as a whole was brisker; there were reductions in iron and steel and textile factories, but the trend was upward in food, fur, printing and publishing, electrical apparatus and some other industries. Transportation and construction also afforded more employment. The general index was higher than on June 1, 1934, when the indicated expansion had been on a smaller scale.

*Ottawa.*—Manufacturing reported moderately heightened activity of a general character, while construction and trade also showed

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia

June 1.....	97.6	101.6	93.8	101.6	92.2	96.6
Relative Weight of Employment by Economic Areas as at June 1, 1935.....	100.0	7.9	28.2	42.4	12.7	8.8

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns for the date under review.

improvement. The gain was rather greater than that noted at the beginning of June of last year; the index was then slightly lower. A combined working force of 13,333 employees was recorded on June 1, 1935, by the 172 co-operating firms, who had had 13,035 on their staffs in the preceding month.

*Hamilton.*—Considerable improvement was noted in Hamilton, where 270 employers reported 29,914 workers on their paylists, as compared with 28,883 at the beginning of May. This increase was larger than on June 1 in any other year since 1922, except 1933. Most of the increase took place in manufacturing, notably in textile, clay, glass and stone and iron and steel plants, while transportation and construction were also rather more active. Employment was brisker than on the same date a year ago, when a smaller advance had been reported.

*Windsor and the adjacent Border Cities.*—Employment in the Border Cities showed a seasonal decrease on June 1, for which data were received from 166 firms with 16,727 employees, or 1,334 fewer than at the beginning of May. Most of the loss took place in automobile factories, while there were only slight

general changes in the other groups. A decline had also been registered on June 1, 1934, but employment was then in lesser volume.

*Winnipeg.*—An aggregate working force of 37,125 persons was indicated by the 443 employers whose statistics were received, and who had 36,499 employees on May 1. This increase was decidedly larger than that noted at the beginning of June of last year, when the index was several points lower. Most of the gain recorded on the date under review was in manufacturing, food, iron and steel and other factories showing heightened activity; the changes in the remaining industrial groups, on the whole, were slight.

*Vancouver.*—Manufacturing and construction reported gains in Vancouver, the advance in the former taking place mainly in food and lumber factories. Statements were tabulated from 401 employers with 30,588 workers in their employ, as compared with 29,598 on May 1. A much smaller increase had been indicated on June 1 of a year ago, and the index was then lower by over ten points.

Index numbers for cities are given in Table 2.

TABLE II.—INDEX NUMBERS OF EMPLOYMENT BY PRINCIPAL CITIES  
(AVERAGE CALENDAR YEAR 1926=100)

Relative Weight of Employment by Cities as at June 1, 1935	14.2	1.4	13.0	1.5	3.3	1.8	4.1	3.3

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated city to the total number of all employees reported in Canada by the firms making returns for the date under review.

**Employment by Manufacturing Industries**

There was a strongly upward movement in manufacturing, which extended to most of the industries so classified, and to the five economic areas, with the result that factory employment showed an advance considerably exceeding the average gain recorded between May and June 1 in the years 1921-1934. Statements were tabulated from 5,523 manufacturers employing 494,194 operatives, as compared with 480,145 in the preceding month. The crude index rose from 95.6 on May 1 to 98.4 at the latest date; this was higher than in any other month since June 1, 1931, while the seasonally adjusted index, at 95.4 (or half a point higher than in the preceding month) was also at its highest point in forty-eight months.

Gains were registered on June 1, 1935, in the lumber, pulp and paper, fish-preserving, vegetable food, iron and steel, non-ferrous metal, clay, glass and stone, electrical apparatus, electric current, textile, tobacco and mineral product industries. The increases in lumber were greater than in any other month since June 1, 1930; those in iron and steel and textiles, though comparatively small, were

interesting because the trend of employment in these industries has usually been unfavourable at the beginning of June in the experience of the years since 1920. The only declines at the latest date were in leather and musical instrument factories, and were of a minor character in both cases.

*Animal Products, Edible.*—There were further and more pronounced increases in the number employed in this group, particularly in the fish-preserving division in the Maritime Provinces and British Columbia. Statistics were tabulated from 300 firms employing 22,753 persons, as compared with 20,961 in the preceding month. This advance was smaller than that reported on June 1, 1934, but the index was then some five points lower.

*Fur and Fur Products.*—There was an upward trend in employment in fur factories, 58 of which enlarged their payrolls from 1,781 persons at the beginning of May to 2,071 on June 1. A rather smaller gain had been indicated on the same date last summer, when activity was at a lower level.

*Leather and Products.*—Employment in this group showed a moderate falling-off in the

TABLE III.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES

(AVERAGE CALENDAR YEAR 1926=100)

—	All industries	Manufacturing	Logging	Mining	Communications	Transportation	Construction	Services	Trade
June 1, 1921.....	87.7	87.8	85.4	92.8	91.2	90.6	68.7	86.7	91.8
June 1, 1922.....	90.3	91.1	67.7	96.9	86.5	98.1	79.4	83.8	89.3

Nov. 1.....	100.2	92.8	171.9	121.2	80.7	83.9	111.0	114.9	121.3
Dec. 1.....	98.9	91.3	198.6	122.9	79.8	80.1	100.3	115.2	126.0
Jan. 1, 1935.....	94.4	87.4	181.3	119.1	78.6	76.2	87.9	115.2	130.6
Feb. 1.....	94.6	90.1	183.4	120.3	77.8	76.2	87.2	111.9	116.6
Mar. 1.....	96.4	92.7	166.9	118.8	77.5	76.5	94.2	111.7	116.7
Apr. 1.....	93.4	93.9	104.3	117.7	77.7	76.3	80.2	111.4	117.4
May 1.....	95.2	95.6	93.9	116.2	77.5	81.1	84.7	116.4	119.3
June 1.....	97.6	98.4	96.0	119.2	79.2	79.9	89.5	118.5	119.9
Relative Weight of Employment by Industries as at June 1, 1935.....	100.0	54.0	2.9	5.9	2.3	10.3	11.5	2.8	10.3

NOTE.—The "Relative Weight," as given just above, shows the proportion of employees in the indicated industry to the total number of all employees reported in Canada by the firms making returns for the date under review.

latest month, which, however, was slightly larger than that indicated in the same month last year; the index then stood at 99.9, compared with 108.1 on the date under review. The working forces of the 284 co-operating employers totalled 21,999 persons, as against 22,124 in the preceding month. There were losses in footwear factories in Quebec, while the tendency was upward in Ontario.

*Lumber and Products.*—Continued, seasonal improvement took place in lumber mills, and there were also gains in container, furniture and other wood-using factories. Returns were compiled from 806 manufacturers in the lumber group having 39,643 workers on their staffs, compared with 35,219 at the beginning of May. All provinces shared in the upward movement on June 1, but Quebec and Ontario showed the largest increases; the general advance was greater than in any other month since June 1, 1930. Smaller additions to staffs

were made on the same date last year, and the index then was a few points lower.

*Plant Products, Edible.*—Expansion was noted in this group at the beginning of June when 1,888 persons were added to the forces of the 431 co-operating manufacturers, who had 28,463 employees. Fruit and vegetable canning, sugar and syrup, flour and cereal, bakery and confectionery and other vegetable food establishments reported improvement, which occurred mainly in Ontario. A smaller increase had been registered on June 1, 1934, when the employment index was fractionally lower than on the date under review.

*Pulp and Paper Products.*—All branches of this group showed heightened activity, that in pulp and paper establishments being most pronounced. The index number stood at 96.7, compared with 93.6 at the beginning of June of last year; the gains then recorded, however, were rather larger. An aggregate pay-

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY MANUFACTURING INDUSTRIES (AVERAGE 1923=100)

Industries	Relative Weight	June 1, 1935	May 1, 1935	June 1, 1934	June 1, 1933	June 1, 1932	June 1, 1931	June 1, 1930

Miscellaneous.....	.6	123.5	118.7	112.5	97.8	97.5	108.6	113.6

\* The "Relative Weight" column shows the proportion that the number of employees in the indicated industry is of the total number of employees reported in all industries by the firms making returns on the date under review.

roll of 58,443 workers was reported by the 581 establishments whose statistics were compiled; these had employed 56,490 in the preceding month.

*Rubber Products.*—Fifty-two rubber factories recorded a combined working force of 11,638 persons, or 13 more than in their last return. Employment was in lesser volume than at the beginning of June a year ago, when a large increase had been indicated.

*Textile Products.*—Contrary to the unfavourable movement usually noted in the early summer, there was an improvement in the textile industries on the date under review, chiefly in cotton and knitting mills. Most of the advance occurred in Quebec. On the other hand, garment and headwear factories were seasonally slack. Data were received from 982 firms employing 96,196 persons, as against 95,901 in the preceding month. A reduction had been reported on June 1, 1934; the index was then some three points lower than at the date under review.

*Tobacco, Distilled and Malt Liquors.*—Activity in this group showed an advance, according to 167 employers whose staffs were enlarged from 14,389 in the preceding month to 15,145 at the beginning of June in the present year. Tobacco manufacturing in Ontario absorbed most of the extra workers. A downward movement was indicated on June 1, 1934, when the index was lower by 5.7 points.

*Clay, Glass and Stone Products.*—Further improvement was noted in building material plants, 198 of which employed an aggregate working force of 8,605 persons, or 888 more than on May 1. The index stood at 77.9; this was a few points higher than that recorded on June 1, 1934, when a rather greater increase had been made. Quebec reported the bulk of the gain, in which factories producing all kinds of building materials shared.

*Electric Current.*—A general advance as compared with May was shown in electric current plants, in which activity was higher than on the same date in 1934. The 99 co-operating companies increased their staffs by 241 workers to 14,009 at the beginning of June, 1935.

*Electrical Apparatus.*—Greater activity was shown in electrical appliance factories, 108 of which enlarged their payrolls by 263 employees to 11,840 on the date under review. A gain had also been recorded on June 1, 1934, when employment was at a lower level.

*Iron and Steel Products.*—There was a further increase in the iron and steel group, mainly in the crude, rolled and forged, mach-

inery, heating appliance, iron and steel fabrication and wire divisions, while automobile and other vehicle factories were slacker. Though comparatively slight, the general advance is interesting because it reverses the trend in employment usually shown in this group at the beginning of June. Returns were tabulated from 839 manufacturers employing 113,557 persons, compared with 113,342 on May 1. Improvement was noted in all provinces except Ontario, that in the Maritimes being greatest. Larger gains had been made on June 1, 1934, but the index was then many points lower.

*Non-ferrous Metal Products.*—These industries reported heightened activity according to 155 firms employing 19,225 persons, compared with 18,847 in the preceding month. The increase took place mainly in Quebec and Ontario. More extensive improvement had been recorded at the beginning of June of a year ago, but employment was then in smaller volume.

*Mineral Products.*—Continued seasonal advances were noted generally in this group; these were larger than those indicated on June 1, 1934, when the index number was practically the same as at the latest date. An aggregate payroll of 13,617 persons was reported for June 1, 1935, by the 122 co-operating employers, who had 13,077 workers on May 1.

*Miscellaneous Manufacturing Industries.*—production in the manufacturing establishments listed under this heading showed an increase, 202 workers having been added to the forces of the 107 firms whose returns were tabulated and who employed 5,470 at the beginning of June.

### Logging

Employment in logging camps increased to some extent, in Quebec, Ontario and British Columbia. Returns were received from 284 firms employing 26,681 persons, or 495 more than on May 1. Reductions had been indicated on June 1, 1934, and the index, at 75.0, was then many points lower than at the beginning of June in the present year, when it stood at 96.0.

### Mining

*Coal Mining.*—Employment in the Western coal fields showed little general change, while there was an advance in the Maritime Provinces. Statements were compiled from a total of 99 operators with 22,487 employees, or 256 more than at the beginning of May. The index was higher than on June 1, 1934, when a decline had been recorded.

**Metallic Ores.**—A further gain was shown in metallic ore mines, mainly in Quebec, Ontario and British Columbia; 153 employers enlarged their staffs from 25,011 workers on May 1, to 25,693 on the date under review. A similar increase had taken place at the beginning of June of last year, but the index was then over 40 points lower than on June 1, 1935.

**Non-Metallic Minerals (other than coal).**—According to data received from 79 firms in this group, they employed 6,336 persons, or 510 more than in the preceding month. Employment was rather more active than on the same date of last year, when larger additions to staffs had been reported by the co-operating firms.

### Transportation

**Street Railways and Cartage.**—An increase was registered in local transportation on June 1, when 198 companies added 286 employees to their payrolls, bringing them to 24,390. Additions to staffs had also been noted at the beginning of June, 1934, but the index was then fractionally lower than on the date under review.

**Steam Railways.**—Improvement was indicated in steam railway operation, in which the 101 co-operating employers enlarged their personnel from 55,544 in the preceding month to 55,999 on June 1. The Maritime Provinces reported seasonal reductions, while there were increases in the remaining provinces. Employment was at a slightly lower level than on June 1 of last year, when more extensive gains had been recorded.

**Shipping and Stevedoring.**—There were pronounced seasonal losses in employment in the Maritime Provinces, partly offset by increases in Quebec and Ontario. Statistics were received from 96 firms with 13,907 employees, as compared with 15,007 in the preceding month. An advance had been noted on June 1, 1934; the index then, at 83·6, was the same as at the date under review.

### Communications

Improvement was indicated on telegraphs and telephones. The 85 companies and branches reporting had 20,962 persons on their paylists at the beginning of June, or 424 more than on May 1. Employment was at a slightly higher level than on the same date a year ago, when a smaller gain had been indicated.

### Construction and Maintenance

**Building.**—An aggregate staff of 21,829 was reported by the 666 contractors furnishing

statistics, who had 19,023 workers on May 1. Activity increased in all provinces, the largest gains being in Quebec and Ontario. The general advance was greater than in any other month since June 1, 1931. Building generally was more active than on the same date of a year ago, or of 1933.

**Highway.**—The 338 highway and road contractors furnishing returns had 53,994 persons in their employ, or 3,128 fewer than at the beginning of May. This decline occurred wholly in Ontario, where large numbers of men were temporarily released from unemployment relief camps; employment in the other economic areas increased. Activity was decidedly greater at June 1, 1934, when very large increases had been indicated.

**Railway.**—Continued important advances were registered by the track departments of the railways, whose employment was brisker than at the beginning of June of 1934 or 1933. The working forces of the 34 co-operating employers totalled 29,077 persons, as against 23,109 in the preceding month. This increase exceeded that noted in any other month since June 1, 1931. The most noteworthy gains were in the Prairie Provinces, but all provinces reported improvement.

### Services

Hotels and restaurants showed a seasonal increase, and laundries and dry-cleaning establishments also recorded improved conditions. Statements were compiled from 458 firms employing 25,630 workers, as compared with 25,082 on May 1. The index, at 118·5, was some three points higher than on the same date in 1934, when greater seasonal advances had been made.

### Trade

Improvement was indicated in retail and wholesale trade; 1,156 establishments employed 94,613 persons, or 453 more than in their last return. A larger increase had been noted on June 1, 1934, when the index was over three points lower. Most of the advance on the date under review took place in wholesale establishments.

### TABLES

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "relative weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada on the date under review.

## (2) Unemployment in Trade Unions at the Close of May, 1935

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trades, or who are idle on account of illness, are not considered as unemployed. Unions involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

factor in the advancement recorded. Gains in employment, on a smaller scale, were registered from British Columbia while conditions in Manitoba were but nominally better. In Quebec, however, activity declined slightly, the garment trades showing pronounced curtailment from April, which was in some measure offset by the improvement recorded in the building and construction trades and in transportation. In Alberta, Saskatchewan and Nova Scotia also the trend was toward a reduction in the employment volume available though the changes were quite small. All provinces with the exception of New Bruns-

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Activity among local trade union members at the close of May tended favourably, both when compared with the previous month and May a year ago, as evident from the returns tabulated from a total of 1,755 labour organizations with 164,320 members. Of these, 26,078 or a percentage of 15.9 were without work on the last day of the month in contrast with 17.0 per cent in April and 18.5 per cent in May of last year. The New Brunswick situation showed improvement of nearly 5 per cent from April, the pulp and paper industry accounting chiefly for this better movement while in Ontario where expansion of about 4 per cent was noted increases in building and construction operations were the determining

wick reflected a higher level of activity during May than in the corresponding month of last year, Nova Scotia with a gain of about 6 per cent showing the most pronounced expansion, the coal mines of the province absorbing a considerably greater number of workers. In Manitoba and Saskatchewan employment increased by about 4 per cent, Ontario showing a 3 per cent gain and Alberta, British Columbia and Quebec advances of lesser degree. In New Brunswick the declines recorded were but of minor importance.

Each month the records of unemployment in the largest city in each province, with the exception of Prince Edward Island are tabulated separately. Considerably more work was

afforded Toronto members during May than in the previous month, while in Regina the gains reported were of moderate proportions, Vancouver showing a slightly better employment level. Conditions in Halifax, however, were distinctly unfavourable, marked increases in slackness being shown from April and declines in activity, on a much smaller scale, were noted in Saint John, Montreal, Winnipeg and Edmonton. Compared with the returns for May last year Edmonton and Toronto unions indicated substantial recovery during the month reviewed. Regina also showed noteworthy gains and Montreal and Winnipeg moderate advancement. Employment for Vancouver members, however, declined slightly from May a year ago and in Halifax and Saint John activity was nominally retarded.

The chart which accompanies this article illustrates the trend of unemployment by months from January, 1929, to date. It will be noticed that the curve remained at a level in May below that of the preceding month, showing a better employment volume during the month reviewed. The trend from May a year ago was also favourable, the projection being downward, though the divergence was greater than in the previous comparison and indicative of improvement on a somewhat larger scale.

Employment in the manufacturing industries showed a falling off during May from the previous month, an outstanding feature in the adverse situation being the inactivity registered in the Quebec garment trades. Much slacker conditions also prevailed for glass, jewellery and leather workers, and among metal polishers and fur workers the curtailment evident was noteworthy. Cigarmakers and hat and cap workers registered moderate recessions in activity, and iron and steel, and textile and carpet workers, and bakers and confectioners decreases of less than one per cent. On the contrary, there was a substantial rise in employment afforded general labourers, wood and brewery workers, and advances, on a smaller scale, were recorded by papermakers and printing tradesmen. For May reports were tabulated from 478 unions in the manufacturing industries, comprising a membership of 52,644 persons, 15.9 per cent of whom were unemployed at the end of the month in contrast with a percentage of 13.5 in April. The level of activity showed little change from May of last year, though the tendency was toward retarded employment, the percentage of idleness for that month standing at 15.6. In this comparison wood and fur workers, general labourers, metal polishers and cigarmakers all were afforded a much better volume of work during the month reviewed, and improve-

ment of much lesser proportions was reflected by iron and steel, textile and carpet, and brewery workers. Among printing tradesmen slight expansion was noted. Of the declines, the most important was shown in the garment trades, though among glass and jewellery workers whose combined membership was quite small, pronounced increases in slackness were recorded. Noteworthy curtailment was evident also among hat, cap and leather workers and papermakers, while bakers and

confectioners reported declines on a smaller scale.

In coal mining, activity was slightly retarded during May from the previous month, though conditions were considerably better than in May a year ago according to the reports forwarded from 52 unions, embracing 15,749 members. Of these, 2,438 or 15.5 per cent were idle at the end of the month in contrast with percentages of 14.9 in April and 22.2 in May, 1934. Alberta unions alone were responsible for the drop in employment noted from April, Nova Scotia and British Columbia members showing slight increases in activity. Compared with the returns for May last year Nova Scotia miners indicated a decidedly better situation during the month reviewed, while in British Columbia there was noteworthy curtailment in employment, and conditions in Alberta remained almost unchanged though the tendency was less favourable.

Extensive revival in building and construction operations was apparent at the close of May, the 204 organizations making returns with a membership aggregate of 18,295 persons showing that 8,319 or 45.5 per cent were unemployed as compared with a percentage of 61.1 in April. Conditions were also substantially better than in May last year when 63.7 per cent of the members reported were idle. All tradesmen participated in the total advancement noted from April, carpenters and joiners showing gains involving the greatest number of members, though the percentage increases recorded by tile layers, lathers and roofers, and hod carriers and building labourers were more pronounced, but their membership was small. Electrical workers, painters, decorators and paperhangers, plumbers and steamfitters, and bridge and structural iron workers also were much busier than in April, and gains on a smaller scale, though noteworthy, were registered by bricklayers, masons and plasterers, granite and stonecutters, and steam shovelmen. As in the previous comparison a favourable employment movement was indicated in every group of trades when compared with May, 1934, carpenters and joiners showing the most important gains. Recovery on a large scale was also apparent among electrical workers, granite and stonecutters, plumbers and steamfitters, tile layers, lathers and roofers, and hod carriers and building labourers. Bricklayers, masons and plasterers reported noteworthy improvement from May a year ago, and moderate increases were shown by painters, decorators and paperhangers. Among bridge and structural iron workers and steam shovelmen the expansion recorded was small.

The level of employment for transportation workers during May was slightly higher

than in either the previous month or May a year ago, the same degree of change being shown in both comparisons. Reports for May were tabulated from 768 unions in the transportation industries, with 54,812 members, 4,906 of whom were idle at the end of the month, a percentage of 9.0 as compared with 9.9 per cent in both April, 1935, and May, 1934. Steam railway employees, whose returns involved about 79 per cent of the entire group membership reported, were slightly better engaged than in April. Among teamsters and chauffeurs fair-sized increases in activity were recorded, navigation workers also reflecting somewhat better conditions. Street and electric railway employees showed practically no variation in the volume of work accorded from April. When a comparison is made with the returns for May of last year, steam and street and electric railway employees were slightly more active during the month reviewed. Some increase in slackness, however, was apparent among navigation workers, and the trend of employment for teamsters and chauffeurs was nominally adverse.

Retail shop clerks with 5 associations reporting 1,825 members during May, indicated an unemployment percentage of 13.3 in contrast with percentages of 11.5 at the close of April and 6.6 in May last year.

The situation for civic employees showed little variation during May from either the previous month or May, 1934, the 75 organizations making returns with a membership total of 7,600 persons showing an unemployment percentage of 1.9 as contrasted with 1.7 per cent in April and 1.8 per cent in May last year.

Minor improvement in conditions was reported in the miscellaneous group of trades during May from the preceding month as shown by the reports received from 127 unions covering a membership of 4,190 persons. Of these, 634 were out of work at the end of the month, a percentage of 15.1 as compared with 15.9 per cent in April. Theatre and stage employees, barbers, and stationary engineers and firemen all shared slightly in this better trend, while among hotel and restaurant employees and unclassified workers the percentage of idleness remained the same in both months. Activity was very slightly restricted in the miscellaneous group of trades as a whole from May a year ago when 14.7 per cent of the members reported were idle. A less favourable situation obtained for hotel and restaurant employees during the month reviewed, and among theatre and stage employees and barbers a small drop in available work was noted. On the other hand, stationary engineers and firemen were somewhat better engaged than in May, 1934, and

gains of lesser importance were shown by unclassified workers.

Extensive increases in employment were reflected by fishermen during May, the 3 unions furnishing reports with 558 members showing an unemployment percentage of 3.4 as contrasted with 47.4 per cent in April. Slight improvement was indicated from May of last year when 4.3 per cent of the members reported were idle.

Among lumber workers and loggers activity subsided slightly during May from the preceding month, and curtailment of somewhat larger proportions was evident from May a year ago. This was shown by the reports

received from 3 unions with an aggregate of 632 members, 58 of whom or 9.2 per cent were without employment on the last day of the month as contrasted with 8.2 per cent of inactivity in April, and 6.1 per cent in May, 1934.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1934 inclusive, and also the percentage of unemployment by provinces for May of each year from 1919 to 1932 inclusive, and for each month from January, 1933, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

### (3) Employment Office Reports for May, 1935

During the month of May, 1935, reports from the offices of the Employment Service of Canada showed an increase of almost 12 per cent in the average daily placements when compared with those of the preceding month, but a loss of nearly 27 per cent was reported

in all other groups considerably lowered the total number recorded. This loss was largely due to a heavy reduction in the highway division of construction and maintenance, where the greater part of relief work was effected, although fairly heavy declines were

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements o-o-o-o-o

in comparison with the average daily placements effected in May a year ago. All groups, except farming and mining, registered gains over April, the highest being in construction and maintenance, services, logging and trade, and the largest decline in farming. When compared with May last year, increases were shown in farming and trade, but fewer place-

also shown in services and manufacturing. Other changes were nominal only.

The accompanying chart shows the trend of employment from January, 1933, to date, as represented by the ratio of vacancies offered and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, computations

being made semi-monthly. It will be noted that the curves of vacancies and placements in relation to applications rose about 3 points during the first half of the period, but remained practically stationary during the latter half of the month. At the end of May both levels were about 5 points below those recorded at the close of the corresponding period a year ago. The ratio of vacancies to each 100 applications was 59.0 and 59.1 during the first and the second half of May, 1935, respectively, in contrast with ratios of 58.9 and 63.8 during the corresponding periods of 1934. The ratio of placements to each 100 applications during the month under review was 54.4 and 55.3, as compared with 54.7 and 60.5 during May a year ago.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during May, 1935, was 1,234, as compared with a daily average of 1,133 in the preceding month and with 1,667 in May, 1934.

The average number of applications for employment received daily by the offices during the month under review was 2,091, in comparison with 2,184 in April and with 2,714 in May last year.

The average number of placements made daily by the offices of the Service during May, 1935, was 1,147, of which 681 were in regular employment and 466 in work of one week's duration or less, as compared with a total daily average of 1,027 in the previous month. Placements during May a year ago averaged 1,565 daily, consisting of 904 placements in regular and 661 in casual employment.

During the month of May, 1935, the offices of the Service referred 30,429 persons to vacancies and effected a total of 28,672 placements. Of these, the placements in regular employment were 17,032, of which 12,536 were of men and 4,496 of women, while placements in casual work numbered 11,640. The number of vacancies reported by employers was 20,324 for men and 10,523 for women, a total of 30,847, with applications for work numbering 52,251, of which 38,215 were from men and 14,036 from women. Reports for April, 1935, showed 27,183 positions available, 52,397 applications made and 24,641 placements effected, while in May, 1934, there were recorded 43,338 vacancies, 70,548 applications for work and 40,688 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service, each year, from January, 1925, to date:

Year	Placements		
	Regular	Casual	Totals
1925.....	306,804	106,021	412,825
1926.....	300,226	109,929	410,155
1927.....	302,723	112,046	414,769
1928.....	334,604	135,724	470,328
1929.....	260,747	137,620	398,367
1930.....	187,872	180,807	368,679

1934.....	223,564	182,527	406,091
1935 (5 months).....	76,835	51,978	128,813

#### NOVA SCOTIA

Opportunities for employment, as indicated by orders received at employment offices in Nova Scotia during May, were over 1 per cent better than in the preceding month but over 26 per cent less favourable than during the corresponding month of last year. There was a gain of over 4 per cent in placements when compared with April, but a loss of nearly 28 per cent in comparison with May, 1934. Except for nominal gains in manufacturing and farming, all industrial divisions showed losses in placements when compared with May a year ago. The only declines of importance, however, were in construction and maintenance, services and logging. During the month there were 680 placements under construction and maintenance and 442 in services. Of the latter, 310 were of household workers. Regular placements numbered 244 of men and 108 of women.

#### NEW BRUNSWICK

During the month of May, positions offered through employment offices in New Brunswick were over 14 per cent higher than in the preceding month and nearly 13 per cent above the corresponding month of last year. Placements also were nearly 17 per cent above April and nearly 20 per cent in excess of May, 1934. Except for a small decline in transportation, increased placements were reported in all industrial divisions over May of last year, the most important gain being in services. Placements by industrial divisions included manufacturing 44; logging 42; construction and maintenance 179; and services 701, of which 514 were of household workers. There were 268 men and 88 women placed in regular employment during the month.

\*596 Placements effected by offices since closed.

## QUEBEC

There was an increase of over 1 per cent in the number of positions offered through employment offices in the Province of Quebec during May when compared with the preceding month and of nearly 13 per cent in comparison with the corresponding month of last year. Placements also were over 6 per cent higher than in April and nearly 24 per cent above May, 1934. The improvement over May of last year was nearly all attributable to increased placements under construction and maintenance, as small gains in services and logging were nearly offset by declines in mining and trade, and the changes in other groups were nominal only. Industrial divisions in which most of the placements were effected during the month were manufacturing 95; logging 225; farming 58; construction and maintenance 1,187; trade 94; and services 2,362, of which 2,023 were of household workers. During the month 1,709 men and 1,559 women were placed in regular employment.

## ONTARIO

Employment opportunities, as indicated by orders received at employment offices in Ontario during May, were nearly 38 per cent better than in the preceding month, but nearly 44 per cent less favourable than during the corresponding month of last year. There was a gain of over 41 per cent in placements when compared with April, but a loss of nearly 45 per cent in comparison with May, 1934. A large reduction in relief placements on highway construction was mainly responsible for the decline from May of last year, supplemented by losses in services and manufacturing. The only gains of importance were in logging and trade. Placements by industrial divisions included manufacturing 506; logging 1,188; farming 732; transportation 98; construction and maintenance 5,244; trade 519; and services 4,547, of which 2,625 were of household workers. There were 5,857 men and 1,481 women placed in regular employment during the month.

## MANITOBA

Employment offices in Manitoba were notified of over 9 per cent less vacancies during the month of May than in April and nearly 21 per cent less than in May, 1934. Placements also were over 8 per cent less than in the preceding month and over 23 per cent below the corresponding month of last year. Reduced placements under construction and maintenance, logging and services accounted for the decline from May, 1934, as with the exception of a moderate gain in farming, small

changes only were reported in all other groups. Placements by industrial divisions included farming 275; construction and maintenance 901; and services 805, of which 662 were of household workers. Regular placements numbered 1,174 of men and 345 of women.

## SASKATCHEWAN

The demand for workers, as indicated by orders received at employment offices in Saskatchewan during May, was nearly 9 per cent less favourable than in the preceding month, but over 5 per cent above the corresponding month of last year. Placements were nearly 7 per cent less than in April, but over 6 per cent above May, 1934. Farm placements were considerably higher than in May of last year, but the increase in this group was partly offset by declines in construction and maintenance and services. Placements by industrial divisions included manufacturing 49; farming 842; construction and maintenance 311; trade 52; and services 844, of which 565 were of household workers. There were 1,012 men and 358 women placed in regular employment during the month.

## ALBERTA

During the month of May, orders received at employment offices in Alberta were over 14 per cent higher than in the preceding month and nearly 3 per cent above the corresponding month of last year. There was an increase also in placements of over 18 per cent when compared with April and of 5 per cent in comparison with May, 1934. Placements in farming and services were higher than during May of last year, but these gains were partly offset by losses in construction and maintenance and logging. The changes in other groups were unimportant. Industrial divisions in which most of the placements were effected during the month were manufacturing 61; farming 957; transportation 71; construction and maintenance 1,041; and services 629, of which 450 were of household workers. There were 1,617 men and 343 women placed in regular employment.

## BRITISH COLUMBIA

Orders received at employment offices in British Columbia during May called for 9 per cent less workers than in the preceding month and nearly 41 per cent less than during the corresponding month of last year. Similar percentages of loss were reported in placements under both comparisons. A large reduction in relief placements on highway construction was responsible for the decline from May of last year, but small losses were also reported in manufacturing and logging. All

other groups showed small to moderate improvement, the largest gain being in services. Placements by industrial divisions included farming 168; mining 54; construction and maintenance 1,561; and services 681, of which 384 were of household workers. During the month 655 men and 214 women were placed in regular employment.

### Movement of Labour

During the month of May, 1935, the offices of the Employment Service of Canada effected 17,032 placements in regular employment, 8,159 of which were of persons for whom the employment located was outside the immediate vicinity of the offices at which they were registered. Of the latter, 1,301 were granted the Employment Service reduced transportation rate, 1,254 journeying to centres within the same province as the despatching office and 46 to other provinces. The reduced transportation rate, which is 2·7 cents per mile with a minimum fare of \$4, is granted by the railway companies to bona fide applicants at the Employment Service who may wish to travel to distant employment for which no workers are available locally.

Vouchers for transportation were granted in Quebec during May to 13 bushworkers who were conveyed to employment in the Pembroke zone on certificates secured at Hull. Transfers at the reduced rate from Ontario centres during May totalled 975, all of which were for provincial points. This movement was largely of bushworkers, Port Arthur despatching 754, Fort William 118, and Sudbury 53, to situations within their respective zones. In addition, Port Arthur shipped 36 mine workers, 5 hotel employees, 2 cooks, one restaurant kitchen girl, one fisherman, and one town housekeeper to employment in the territory covered by that city office, and Fort William 2 mine workers and one hotel waitress within its own zone. The one remaining certificate was granted at Pembroke to a highway foreman going to Timmins. In Manitoba 46 certificates for reduced transportation were issued during May, 13 provincial and 33 inter-provincial. The former were granted at Winnipeg to 12 farm hands and one hotel waitress

going to employment within the same zone. The transfers outside the province were also effected by the Winnipeg office, which was instrumental in the despatch of 17 bushworkers, 4 saw mill labourers, 3 farm hands, 3 cooks, one mechanic and one town domestic to the Port Arthur zone, and of 4 farm hands to Saskatchewan agricultural areas. Benefiting by the reduced rate in Saskatchewan during May, 7 persons proceeded to employment within the province. These received their certificates at the Regina office, included among whom were one laundry checker going to Prince Albert, 2 farm hands to Saskatoon, one town housekeeper to Moose Jaw and 2 farm hands and one teacher within the Regina zone. The labour movement in Alberta during May was to provincial points and comprised the transfer of 235 persons. Of these, 228 travelled from Edmonton, one farm hand each going to the Drumheller and Calgary zones and 109 highway construction workers, 44 steamship employees, 21 farm hands, 2 farm domestics, 12 building construction workers, 12 mine workers, 6 saw mill workers, 5 hotel employees, 4 Dominion Parks employees, 3 bushmen, 2 restaurant workers, 2 bridge carpenters, one garage mechanic, one blacksmith, one fire ranger and one labourer to various sections of the Edmonton zone. In addition, from Calgary 4 farm hands were carried to Drumheller, one farm housekeeper to Edmonton and 2 farm hands within the Calgary zone. The Vancouver office was responsible for all transfers at the reduced transportation rate in British Columbia during May, which numbered 25. Proceeding to Penticton were 4 mine workers; to Nelson 2 musicians and one hotel cook; to Kamloops 2 mine workers and one farm hand; to Prince Rupert one saw mill engineer; and to centres within the Vancouver zone 10 mine workers, one farm hand, 2 hotel workers and one telegraph lineman.

Of the 1,301 workers who took advantage of the Employment Service reduced transportation rate during May, 685 were conveyed by the Canadian National Railways, 603 by the Canadian Pacific Railway, 11 by the Pacific Great Eastern Railway and 2 by the Northern Alberta Railway.

### (4) Building Permits Issued in Canada During May, 1935

The value of the building permits issued by 61 cities during May, 1935, was lower by 23·7 per cent than in April, 1935, but was higher by 58·9 per cent than in May, 1934, a comparison of greater significance. According to statements tabulated by the Dominion Bureau of Statistics, the authorizations amounted to \$4,799,285, as compared with

\$6,292,152<sup>1</sup> in the preceding month, and \$3,019,761 in May, 1934.

So far this year, the value of building authorized in each month has been higher than in the same month of 1934, while in

<sup>1</sup> Revised to include figures from Charlottetown, which arrived too late for inclusion in the April report.

each of the last four months, the total has also exceeded that for the corresponding month of 1933. The cumulative total for the first five months of the present year is higher than in the period January-May of any of the last three years. The improvement is partly due to the granting of construction permits for public buildings in several centres as an unemployment relief measure, but the movement in general building operations has also been much more favourable than in the last few years. In comparison with earlier years of the record, from 1920 to 1931, however, the value of building authorizations continues low. The index number of wholesale prices of building materials during the elapsed months of the present year, at 81.7 per cent of the 1926 average, was lower than in the same period of any preceding year for which building statistics for the 61 cities are on record, with the exception of 1932 and 1933.

Some 50 cities furnished detailed statistics, showing that they had issued over 400 permits for dwellings valued at approximately \$1,373,000 and for more than 2,300 other buildings estimated to cost nearly \$3,260,000. In addition, engineering projects, having an estimated cost of \$119,152, were authorized in four cities, viz., Brantford, Guelph, Moose Jaw and Calgary. In April, authority was given for the erection of some 350 dwellings and 1,800 other buildings, valued at approximately \$2,500,000 and \$3,200,000, respectively, while there was also an engineering project estimated to cost approximately \$8,000.

Nova Scotia, New Brunswick, Manitoba, Saskatchewan and British Columbia reported increases in the value of the permits issued as compared with April, 1935, that of \$84,150 in Saskatchewan being the most pronounced. The remaining provinces showed declines in this comparison, that of \$1,366,111 or 38.8 per cent in Ontario being greatest.

As compared with May, 1934, Nova Scotia, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia registered increases, of which those of \$806,451 or 191.5 per cent in Quebec and \$785,583 or 57.5 per cent in Ontario were most noteworthy. In New Brunswick, there was a decline of \$18,876 or 33.1 per cent, while no report for May was received from Prince Edward Island.

Of the four largest cities, Toronto, Winnipeg and Vancouver showed improvement as

compared with last month and also with the same month of 1934; Montreal registered a loss as compared with April, 1935, but an increase over May of last year. Of the other centres, Halifax, New Glasgow, Sydney, Quebec, Brantford, Chatham, Galt, Kingston, Kitchener, Oshawa, Ottawa, Port Arthur, St. Thomas, Woodstock, Moose Jaw, Lethbridge, Nanaimo, Prince Rupert, North Vancouver and Victoria showed increases in the value of the building authorized as compared with either the preceding month or the same month of 1934.

*Cumulative Record for First Five Months, 1935.*—The following table gives the value of the building authorized by 61 cities in May and in the first five months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first five months of the same years are also given (1926=100).

Year	Value of permits issued in May	Value of permits issued in first five months	Indexes of value of permits issued in first five months (1926 = 100)	Average indexes of wholesale prices of building materials in first five months (1926 avge. = 100)
1935.....	\$ 4,799,285	\$19,486,105	32.5	81.7
1934.....	3,019,761	7,999,917	13.3	83.0
1933.....	2,065,372	6,726,695	11.2	75.2
1932.....	5,488,845	19,312,720	32.1	78.8
1931.....	12,115,291	50,356,550	83.9	83.6
1930.....	20,321,160	66,792,498	111.2	95.5
1929.....	24,185,738	96,792,675	161.2	99.4
1928.....	27,515,522	79,285,027	132.0	95.8
1927.....	20,138,657	62,479,480	104.1	96.1
1926.....	18,504,296	60,042,369	100.0	101.3
1925.....	15,520,435	50,983,833	84.9	103.1
1924.....	14,807,589	46,544,689	77.5	111.3
1923.....	18,937,638	57,946,608	96.5	111.1
1922.....	19,527,061	54,040,922	90.0	107.9
1921.....	14,460,878	41,530,750	69.2	134.4
1920.....	13,082,015	47,640,916	79.3	144.7

The aggregate for the first five months of 1935 was very substantially greater than in the same period in 1934 or 1933, being also slightly higher than in the months January-May, 1932; the increase over last year was 243.6 per cent. The average index number of wholesale prices of building materials, as already mentioned, was lower than in 1934, and all other years since 1920, except 1932 and 1933.

## EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

### Great Britain

THE British *Ministry of Labour Gazette*, June, 1935, summarized the employment situation as follows:—

There was some further improvement in employment, on the whole, between April 15 and May 20, the estimated numbers of insured persons in employment showing an increase of 14,000.

The industries in which an improvement was recorded included building, public works contracting and certain ancillary trades, general engineering, the cotton, hosiery and tailoring industries, some of the food manufacturing industries, the distributive trades, and hotel and boarding house service. On the other hand there was a large increase in the numbers temporarily stopped in the coal mining industry, mainly in Yorkshire and the Midlands, and there was also a decline in employment in motor vehicle building, steel melting, rolling, etc., the linen industry, textile bleaching, dyeing and finishing, and musical instruments etc. manufacture.

Among those workpeople of ages 16-64 who were insured against unemployment in Great Britain and Northern Ireland the percentage unemployed at May 20, 1935 (including those temporarily stopped as well as those wholly unemployed), was 15·6, as compared with 15·7 at April 15, 1935, and with 16·2 at May 14, 1934. The percentage wholly unemployed at May 20, 1935, was 13·1, as compared with 13·5 at April 15, 1935; while the percentage temporarily stopped was 2·5, as compared with 2·2. For males alone the percentage at May 20, 1935, was 17·9 and for females, 9·5; at April 15, 1935, the corresponding percentages were 17·9 and 9·7.

At May 20, 1935, the number of persons on the Registers of Employment Exchanges in Great Britain was 1,641,969 wholly unemployed, 314,775 temporarily stopped, and 88,008 normally in casual employment, making a total of 2,044,752. This was 292 more than a month before, but 45,629 less than a year before. The total included 1,630,572 men, 65,120 boys, 293,662 women, and 55,398 girls. There was an increase of 10,375 between April 15 and May 20, in the total number of juveniles, under 16 years of age, on the registers, due to the registration of boys and girls who left school at Easter.

The persons on the Registers included 923,231 persons with claims for insurance benefit; 761,061 insured persons with applications for unemployment allowances; 218,766 insured per-

sons (including 21,904 insured juveniles under 16 years of age), not in receipt of insurance benefit or unemployment allowances, and 141,694 uninsured persons. In Great Britain and Northern Ireland the total number of persons on the Registers of Employment Exchanges at May 20, 1935, was 2,113,996.

### United States

*Manufacturing Industries.*—Factory employment decreased 1·5 per cent from April to May and pay rolls decreased 3·2 per cent, marking the first recessions to be reported since November 1934. Employment normally declines in May, decreases having been reported in 10 of the preceding 16 years. An important factor in depressing the levels of employment and pay rolls in May 1935, were strikes in the automobile and lumber industries.

Gains in employment over the month interval were shown in 37 of the separate 90 manufacturing industries surveyed and gains in pay rolls were reported in 33 industries.

The declines in employment and pay rolls from April to May were less pronounced in the durable goods group of industries than in the nondurable goods group. Employment decreased 0·6 per cent in the durable goods group and pay rolls declined 2·8 per cent, while in the nondurable goods group decreases of 2·2 per cent in employment and 3·9 per cent in pay rolls were reported.

The Bureau of Labor Statistics' preliminary index of factory employment for May 1935, (81·2) is 1·6 per cent lower than the May 1934, index (82·5). The index of factory pay rolls is 68·5 (preliminary) or 2·1 per cent above the May 1934, index (67·1).

The indexes of factory employment and pay rolls are computed from returns supplied by representative establishments in 90 manufacturing industries. The base used in computing these indexes is the 3-year average, 1923-25, taken as 100. In May reports were received from 23,434 establishments employing 3,685,772 workers whose weekly earnings were \$76,514,338. The employment reports received from these co-operating establishments cover more than 50 per cent of the total wage earners in all manufacturing industries of the country.

*Non-manufacturing Industries.*—Gains in employment were shown in May 1935, in 13 of the 17 non-manufacturing industries surveyed by the Bureau of Labor Statistics. The only industries in which employment declines were reported were wholesale and retail trade,

metalliferous mining, and hotels. Gains in pay rolls were shown in 10 of the 17 non-manufacturing industries for which data are available.

**WHOLESALE AND RETAIL TRADE.**—Reacting from the marked expansion reported in retail trade establishments in April, recessions in employment and pay rolls were shown in May. Reports received from 54,367 establishments employing 844,972 workers in May 1935, indicated that employment decreased 1·7 per cent over the month interval. In the general merchandising group, which is composed of department, variety, and general merchandise stores and mail-order establishments, employment decreased 3·2 per cent while in the remaining 50,854 retail establishments a decrease of 1·2 per cent was reported. Gains in employment were shown in several lines of retail trade, among which were dealers in automotive products, lumber and building materials, and furniture and household goods. Employment in the group of apparel stores showed a sharp decline and retail food stores showed fewer employees in May than in the preceding month.

Employment in wholesale trade establishments decreased 0·8 per cent from April to May. This percentage change was based on reports supplied by 16,742 establishments employing 293,361 workers in May. Sharp declines in employment were shown in the packing and shipping of fruits and vegetables. Firms engaged in the wholesale leaf tobacco trade also showed pronounced declines. The group of wholesale grocery establishments showed practically no change in number of workers over the month interval while the dry goods and apparel group showed a decline of 1·8 per cent.

**PUBLIC UTILITIES.**—Each of the 3 public utility industries surveyed showed small gains in employment from April to May. The electric light and power and manufactured gas industry showed an increase of 0·8 per cent, telephone and telegraph 0·4 per cent, and electric-railroad and motor-bus operation and maintenance 0·3 per cent.

**SERVICE INDUSTRIES.**—Each of the service industries surveyed, with the exception of hotels, showed gains in number of workers from April to May. Employment in brokerage firms increased 1·9 per cent., laundries and dyeing and cleaning establishments reported gains of 1·3 per cent each, and small gains were reported by banks and insurance. The hotel industry reported 0·9 per cent fewer employees in May than in the preceding month.

**MINING.**—Four of the 5 industries in the mining group showed gains in employment from April to May. The quarrying and non-metallic mining industry reported a seasonal

expansion of 9·4 per cent. Employment increased 1·8 per cent in anthracite mining and 1·6 per cent in the crude-petroleum producing industry.

The bituminous coal mining industry showed a slight recovery from the pronounced decreases of the preceding month, employment increasing 1·4 per cent and pay rolls 9·1 per cent. In the metalliferous mining industry the decrease of 3·5 per cent in employment was due primarily to strikes in lead and zinc mines in Oklahoma, Kansas, and Missouri.

**BUILDING CONSTRUCTION.**—Further expansion was shown in the private building construction industry from April to May, employment increasing 11·2 per cent and pay rolls increasing 15·3 per cent. These gains exceed the increases reported in May in any of the four preceding years for which data are available. The changes in May 1935, are based on reports supplied by 10,274 contractors employing 84,692 workers, whose weekly earnings during the pay period ending nearest May 15 totalled over \$2,000,000. These workers were employed in private building projects not aided by PWA funds. Increases in employment were generally reported in the localities for which data are available.

The Industrial Health Research Board of Great Britain has recently published the results of a survey on "The Performance of Weavers under Varying Conditions of Noise."

In its summary and conclusions the report states:—

"The two experiments (with two groups, each consisting of ten weavers), clearly show that excessive noise has some effect upon weavers, which handicaps them in the performance of their normal daily work. This effect is not a temporary one, occurring only in the initial stages of exposure to noise, but has been shown to exist in individuals who have for years been accustomed to excessive noise as a normal accompaniment to their work. In view of this, it may be doubted whether complete immunity from the inimical effects of excessive noise can ever be acquired so long as normal hearing is retained, and the development of partial deafness appears to be the only effective protection which the individual can acquire. Tolerance of noise can be established in some measure, but chiefly in the psychological sense. Thus it is possible to become so accustomed or acclimatized to noise that consciousness of its subjective effects—irritation, annoyance, distraction—ceases or becomes much less acute, but some of its effects remain and are revealed only by objective measurement. Excessive noise is to the human organism very much as excessive friction is to the machine; it wastes energy."

## FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Governmental supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the *LABOUR GAZETTE* for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the Provincial Minimum Wage Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wage scales of the respective provinces.

As respects contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924 provided for the observance of the wages rates generally accepted as current in the district for competent workmen, or if there were no current rates, then fair and reasonable rates, and for adherence to the hours of work generally accepted as current in the district, or fair and reasonable hours. These "A" conditions, in so far as wages and

hours are concerned, were superseded in 1930 by the adoption of an Act of Parliament entitled "The Fair Wages and Eight Hour Day Act" (chapter 20-21, Geo. V), the full text of which was published in the *LABOUR GAZETTE* of June, 1930, p. 652. The clause relating to wages and hours in this Act is in the terms following:—

All persons in the employ of the contractor, sub-contractor, or of any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall be paid such wages as are generally accepted as current from time to time for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged; provided that wages shall in all cases be such as are fair and reasonable.

The working hours of persons while so employed shall not exceed eight hours per day except in such special cases as the Governor in Council may otherwise provide, or, except in cases of emergency, as may be approved by the Minister.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wages rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the Department concerned in the terms of contract.

In addition to the schedule of fair wages and working hours, Government contracts for the construction, remodelling, repair or demolition of any work contain certain other labour conditions for the protection of the workpeople employed, sanctioned by the Fair Wages Order in Council of June 7, 1922, as amended on April 9, 1924.

Both in the case of contracts for building and construction work, and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for

governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and address of all workmen in his employ and the wages paid to and time worked by such workmen, these records to be open for inspection by fair wage officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workman employed, claim therefor may be filed with the Minister of the Department with which the contract has been made and payments of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the Minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contract for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contract are specially directed by the Fair Wages Orders in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Orders in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours,

and empower the Minister of Labour to deal with any disputes which may arise.

The Department of Labour is furnished from month to month with information regarding the contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed. During the past month, statements were received in the Department of Labour showing that the following contracts, containing fair wages conditions, have been recently executed by the Government of Canada:

#### DEPARTMENT OF IMMIGRATION AND COLONIZATION

##### *Contract in Group "B" (Manufacture of Supplies, etc.)*

A contract was awarded recently by the Department of Immigration and Colonization to the Muir Cap & Regalia Ltd., Toronto, Ontario, for uniform caps, which contract contained the "B" labour conditions above referred to.

#### DEPARTMENT OF INDIAN AFFAIRS

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

Contracts were awarded during the month of June, 1935, by the Department of Indian Affairs, containing the "B" labour conditions above referred to, as follows: to Grant, Holden, Graham, Ltd., Ottawa, Ont., for the manufacture of trousers; to Bates & Innes, Ltd., Carleton Place, Ont., for the manufacture of kersey cloth and tweed; and to the Dominion Woollens and Worsteds Ltd., Hespeler, Ont., for the manufacture of serge.

#### DEPARTMENT OF THE INTERIOR

##### *Contract in Group "B" (Manufacture of Supplies, etc.)*

A contract was awarded recently by the Department of the Interior to the Woods Manufacturing Co., Ltd., Ottawa, Ont., for tents and tarpaulins, which contract contained the "B" labour conditions above referred to.

#### DEPARTMENT OF JUSTICE

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

Contracts were awarded recently by the Department of Justice, containing the "B" labour conditions above referred to, as follows: to J. A. Humphrey & Son, Ltd., Moncton, N.B., for the manufacture of blue prison cloth; and to Wm. Scully, Ltd., Montreal, P.Q., for the manufacture of helmets.

## DEPARTMENT OF MINES

*Contracts in Group "B" (Manufacture of Supplies, etc.)*

Contracts were awarded recently by the Department of Mines, containing the "B" labour conditions above referred to as follows: to Grant, Holden, Graham, Ltd., Ottawa, Ont., for tents; to J. J. Turner & Sons, Ltd., Peterborough, Ont., for tent flies; and to the Woods Manufacturing Co., Ltd., Ottawa, Ont., for camp equipment.

## DEPARTMENT OF NATIONAL DEFENCE

*Contracts in Group "A" (Construction, Remodelling, etc.)*

Construction of an Armoury for the 1st Battalion, Seaforth Highlanders of Canada, Vancouver, B.C. Name of contractors, Smith Bros. & Wilson Ltd., Vancouver, B.C. Date of contract, May 7, 1935. Amount of contract, \$161,555.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Asbestos journeymen.....	\$ 85	8
Asbestos improvers.....	0 62½	8
Blacksmiths.....	0 67½	8
Blacksmiths' helpers.....	0 50	8
Bricklayers and masons.....	1 10	8
Bricklayers' mortar mixers.....	0 50	8
Labourers.....	0 45	8
Carpenters.....	0 80	8
Caulkers.....	0 78½	8
Cement finishers.....	0 75	8
Cement mixer operator.....	0 60	8
Compressor operator.....	0 58½	8
Coppersmiths.....	0 75	8
Electricians (wiremen).....	1 00	8
Electricians' helpers.....	0 50	8
Engineers—Elec. hoist.....	0 60	8
Engineers—Hoisting steel.....	1 00	8
Engineers—Road roller.....	0 75	8
Floor layers—hardwood.....	0 50	8
Floor polishers—hardwood.....	0 50	8
Lathers—wood.....	0 75	8
Lathers—metal.....	1 00	8
Mastic floor layers.....	0 75	8
Ornamental iron workers.....	0 75	8
Painters and glaziers.....	0 80	8
Paving asphalt layers.....	0 50	8
Paving asphalt rakers.....	0 60	8
Paving cement finishers.....	0 75	8
Paving cement labourers.....	0 45	8
Pipe layers.....	0 56½	8
Plasterers.....	1 00	8
Plasterers' helpers.....	0 62½	8
Plumbers and steamfitters.....	1 00	8
Plumbers' and steamfitters' helpers.....	0 50	8
Powdermen.....	0 50	8
Roofers—patent.....	0 55	8
Roofers—sheet metal.....	0 90	8
Sheet metal workers.....	0 90	8
Structural steel workers.....	1 00	8
Teamsters.....	0 45	8
Motor truck drivers.....	0 50	8
Teamster, team and wagon.....	1 00	8
Teamster with team only.....	0 80	8
Tile setters.....	1 12½	8
Tile setters' helpers.....	0 50	8
Sheet metal workers' helpers.....	0 50	8
Hoisting engineers—1 drum.....	0 75	8
Hoisting engineers—2 drums.....	0 90	8
Marble setters.....	1 00	8

N.B.—Where, by agreement or current practice, the working hours of any class of workmen are less than 48 per week, such lesser hours shall not be exceeded on this work.

Construction of Armoury for the 17th Duke of York's Royal Canadian Hussars, Montreal, P.Q. Name of contractors, A. F. Byers & Co., Ltd., Montreal, P.Q. Date of contract, June 12, 1935. Amount of contract, \$206,934.00.

A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Asbestos insulation workers.....	\$ 65	8
Asbestos insulation workers' helpers.....	0 45	8
Blacksmiths.....	0 60	8
Bricklayers and masons.....	0 90	8
Carpenters and joiners.....	0 70	8
Cement finishers.....	0 60	8
Concrete mixer operators.....	0 50	8
Compressor operators.....	0 50	8
Fireman—Stationary.....	0 45	8
Hoist engineers—steam.....	0 65	8
Hoist engineers—gasoline.....	0 55	8
Excavator, bear cat and gas shovels.....	0 75	8
Electricians.....	0 70	8
Labourers.....	0 40	8
Lathers, metal.....	0 70	8
Lathers, wood.....	0 65	8
Linoleum layers, waxers and polishers.....	0 60	8
Machinists.....	0 65	8
Marble and tile setters.....	0 90	8
Motor truck drivers.....	0 45	8
Ornamental iron workers.....	0 60	8
Painters and glaziers.....	0 60	8
Plasterers.....	0 80	8
Plasterers' helpers.....	0 45	8
Plumbers and steamfitters.....	0 75	8
Roofers, felt and gravel.....	0 45	8
Roofers, slate and tile.....	0 60	8
Roofers, composite.....	0 50	8
Sheet metal workers.....	0 70	8
Shinglers.....	0 70	8
Stonecutters.....	0 75	8
Structural iron workers.....	0 80	8
Teamster, team and wagon.....	0 75	8
Teamsters.....	0 40	8
Terrazzo layers.....	0 70	8
Steam shovel cranemen.....	0 65	8
Steam shovel firemen.....	0 50	8
Steam shovel engineers.....	0 85	8
Drill rumers.....	0 45	8
Powdermen.....	0 45	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 a week, such lesser hours shall not be exceeded on this contract.

Construction of an administration building at the Permanent Force Barracks, Calgary, Alberta. Name of contractors, Bennett & White Construction Co., Ltd., of Calgary, Alberta. Date of contract, June 18, 1935. Amount of contract, \$156,035.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Asbestos insulation workers.....	\$0 80	8
Blacksmiths.....	0 70	8
Bricklayers and masons.....	0 90	8
Carpenters.....	0 75	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 a week, such lesser hours shall not be exceeded on this work.

Supply and installation of a Gas Operated Steam Steel Boiler, Hot Water Storage Tank, Gas Operated Hot Water Heater, Piping, Fittings, Valves, etc., in Barrack Block No. 2, Permanent Force Barracks, Calgary, Alberta. Name of contractors, Anderson Plumbing Co., Calgary, Alta. Date of contract, June 11, 1935. Amount of contract, \$4,140.00. The same fair wages schedule was used in this contract as in the one immediately above mentioned.

#### DEPARTMENT OF NATIONAL DEFENCE

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Department of National Defence during the month of June, 1935, for various classes of manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Goods contracted for	Contractor
Ankle boots.....	A. E. Wry-Standard Ltd., Amherst, N.S.
Ankle boots.....	The Acton Shoe Co., Acton Vale, P.Q.
Hand towels.....	Stauffer Dobbie Co., Ltd., Galt, Ont.
L. W. shirts and drawers.....	Jos. Simpson Sons Ltd., Tor- onto, Ont.
L. W. shirts and drawers.....	Schofield Woollen Mills Ltd., Oshawa, Ont.
Camp cooking ranges.....	Galt Stove & Furnace Co., Preston, Ont.
Drab chevrons.....	William Scully Ltd., Montreal, P.Q.
Socks.....	Burritt's Rapids Woollen Mills, Burritt's Rapids, Ont.
Arm embroidery badges.....	Madame Raoul Vennat, Mont- real, P.Q.
Household soap.....	Royal Crown Soaps Ltd., Calgary, Alta.
Battleship linoleum.....	Dominion Oilcloth and Lino- leum Co., Ltd., Montreal, P.Q.
Drab serge.....	Paton Mfg. Co., Montreal, P.Q.
Blue serge.....	Paton Mfg. Co., Montreal, P.Q.
White flannel.....	Paris Winney Mills Co., Ltd., Paris, Ont.
Razor sets.....	Gillette Safety Razor Co. of Canada, Montreal, P.Q.
Blue serge pantaloons and trousers.....	Grant-Holden-Graham Ltd., Ottawa, Ont.
Earthenware bowls, plates, cups and saucers.....	Sovereign Potters Ltd., Ham- ilton, Ont.
Braces.....	W. A. Brophy Co., Ltd., Tor- onto, Ont.
Canvas shoes.....	Great West Felt Co., Elmira, Ont.

#### POST OFFICE DEPARTMENT

##### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Post Office Department during the month of June, 1935, for various classes of manufactured supplies, which contracts included in all cases the "B" labour conditions above referred to:—

Goods contracted for	Contractor
Metal dating stamps and type, brass crown seals, cancellers, etc.....	Pritchard-Andrews Co. Ltd., Ottawa, Ont.
Making and repairing rubber stamps, daters, etc.....	Pritchard-Andrews Co., Ltd., Ottawa, Ont.
Letter carriers' uniforms.....	Uniform Cap Co., Ottawa, Ont.
Letter carriers' uniforms.....	Yamaska Garments Ltd., St. Hyacinthe, P.Q.
Letter carriers' uniforms.....	J. R. Shuttleworth & Sons, Ltd., London, Ont.
Letter carriers' uniforms.....	Needlecraft Mills Ltd., St. Hyacinthe, P.Q.
Letter carriers' uniforms.....	Miner Rubber Co., Ltd., Granby, P.Q.
Letter carriers' uniforms.....	Kaufman Rubber Co., Ltd., Kitchener, Ont.
Mail bag fittings.....	F. W. Carling, Ottawa, Ont.
Mail bag fittings.....	J. A. Mayer, Montreal, P.Q.
Stamping machines, etc.....	Machine Works Ltd., Mont- real, P.Q.
Letter box locks.....	Pritchard-Andrews Co., Ltd., Ottawa, Ont.
Scales.....	Pritchard-Andrews Co., Ltd., Ottawa, Ont.

## DEPARTMENT OF PUBLIC WORKS

*Contracts in Group "A" (Construction, Re-modelling, etc.)*

Construction of a warehouse, etc., for the Hydrographic Survey of Canada, Victoria, B.C. Name of contractors, Luney Bros., Ltd., Victoria, B.C. Date of contract, May 21, 1935. Amount of contract, \$42,540.00. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 50	8
Cement finishers.....	0 55	8
Brick and hollow tile layers.....	0 90	8
Structural steel workers (erectors and riveters).....	0 90	8
Engineers, steam (hoisting steel).....	0 90	8
Engineers, gasoline.....	0 50	8
Ornamental iron workers.....	0 65	8
Carpenters and joiners.....	0 75	8
Sheet metal workers.....	0 65	8
Roofers, felt and gravel.....	0 50	8
Roofers, patent.....	0 50	8
Painters and glaziers.....	0 65	8
Plumbers and steamfitters.....	0 75	8
Electricians.....	0 45	8
Labourers.....	0 65	8
Driver, team and wagon.....	0 65	8
Motor truck driver.....	0 45	8

Reconstruction of a wharf at Keewatin, Ontario. Name of contractors, Messrs. Macaw & Macdonald, Winnipeg, Man. Date of contract, June 15, 1935. Amount of contract, approximately \$13,889.91. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Pile driver runner.....	\$0 65	8
Hoist operators—steam.....	0 65	8
Hoist operators—gas.....	0 50	8
Steel erectors.....	0 75	8
Labourers.....	0 35	8
Teamster, team and wagon.....	0 65	8
Teamster.....	0 35	8
Motor truck driver.....	0 40	8

Construction of a public building at Amherst, N.S. Name of contractors, Rhodes, Curry Ltd., Amherst, N.S. Date of contract, June 7, 1935. Amount of contract, \$126,482.00, and unit prices. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Asbestos insulation workers.....	\$0 60	8
Blacksmiths.....	0 50	8
Boilermakers.....	0 55	8
Brick and hollow tile layers and masons.....	0 75	8
Carpenters and joiners.....	0 55	8
Cement finishers.....	0 50	8
Compressor operators.....	0 45	8
Concrete mixer operators—gas.....	0 45	8
Derrick and hoist engineers—gas or electric (other than on steel erection).....	0 55	8
Drill runners—machine.....	0 45	8
Electricians.....	0 60	8
Fireman—stationary.....	0 40	8
Hollow metal workers—erectors.....	0 45	8
Labourers.....	0 35	8
Lathers, metal.....	0 55	8
Linoleum layers, waxers, polishers.....	0 50	8
Machinists.....	0 55	8
Marble setters.....	0 75	8
Mastic floor layers:		
Kettlemen.....	0 45	8
Finishers, rubbers and spreaders.....	0 60	8
Motor truck drivers.....	0 35	8
Ornamental iron and bronze erectors.....	0 45	8
Plasterers.....	0 75	8
Plasterers' helpers.....	0 40	8
Painters and glaziers.....	0 50	8
Plumbers and steamfitters.....	0 70	8
Powdermen.....	0 45	8
Roofers—slate and tile.....	0 60	8
Roofers—composite.....	0 45	8
Man in charge felt and gravel roofers.....	0 50	8
Sheet metal workers.....	0 60	8
Steam shovel engineers.....	0 80	8
Steam shovel cranimen.....	0 60	8
Steam shovel fireman.....	0 45	8
Stonecutters.....	0 70	8
Stonemasons.....	0 75	8
Structural steel workers.....	0 65	8
Teamster, team and wagon.....	0 65	8
Teamster.....	0 35	8
Terrazzo layers.....	0 65	8
Tile setters.....	0 75	8

N.B.—In any cases where, by agreement or current practice, the working hours of any class of workers are less than 48 a week, such lesser hours shall not be exceeded on this work.

Construction of a public building at Gagetown, N.S. Name of contractors, Walter F. Lutz, Sussex, N.B. Date of contract, May 16, 1935. Amount of contract, \$8,245.00, and unit prices for any additional work. A fair wages schedule was inserted in the contract as follows:—

Trade or class of labour	Rates of wages not less than	Hours of labour not more than
	per hour	per day
Concrete mixer operator.....	\$0 40	8
Cement finishers.....	0 50	8
Stonemasons.....	0 70	8
Stone cutters (granite, sandstone and limestone).....	0 60	8
Brick and hollow tile layers.....	0 70	8
Ornamental iron workers.....	0 50	8

N.B.—Where, by agreement or current practice, the working hours of any class of workers are less than 48 per week, such lesser hours shall not be exceeded on this work.

Dredging Grandoon Flats Miramichi Bay, N.B. Name of contractors, The Federal Dredging Co., Ltd., Ottawa, Ont. Date of contract, May 25, 1935. Amount of contract approximately \$66,150.00. The General Fair Wages Clause was inserted in this contract.

Dredging at Sault Ste. Marie, Ont. Name of contractors, Messrs. A. B. McLean & Sons, Sault Ste. Marie, Ont. Date of contract, May 23, 1935. Amount of contract, approximately \$14,800.00. The General Fair Wages Clause was inserted in the contract.

Dredging at Donnacona, Portneuf Co., P.Q. Name of contractors, Cummins Construction

Co., Ltd., Montebello, P.Q. Date of contract, June 7, 1935. Amount of contract, approximately \$31,115.70. The General Fair Wages Clause was inserted in the contract.

Dredging at Pictou, N.S. Name of contractors, Beacon Dredging Co., Ltd., Halifax, N.S. Date of contract, June 15, 1935. Amount of contract, approximately \$5,225.00. The General Fair Wages Clause was inserted in the contract.

Dredging in the Bay of Quinte, Trenton, Ont. Name of contractors, Russell Construction Co., Ltd., Toronto, Ont. Date of contract, June 17, 1935. Amount of contract, approximately \$14,935.05. The General Fair Wages Clause was inserted in the contract.

Dredging at the eastern entrance to the Harbour at Toronto, Ont. Name of contractors, J. P. Porter & Sons Ltd., St. Catharines, Ont. Date of contract, June 12, 1935. Amount of contract, approximately \$7,614.00. The General Fair Wages Clause was inserted in the contract.

Dredging channel from Lake St. Pierre to Fisherman's Village Baie St. Francois, P.Q. Name of contractors, Southern Working Ltd., Montreal, P.Q. Date of contract, May 27, 1935. Amount of contract, approximately \$18,840.00. The General Fair Wages Clause was inserted in the contract.

### *Contract in Group "B" (Interior Fittings, Supplies, etc.)*

Installation of interior fittings in the public building at Boissevain, Manitoba. Name of contractor, Office Specialty Mfg. Co., Ltd., Newmarket, Ont. Date of contract, May 30, 1935. Amount of contract, \$1,112.00. The "B" Labour Conditions above referred to were inserted in this contract.

### ROYAL CANADIAN MOUNTED POLICE

### *Contracts in Group "B" (Manufacture of Supplies, etc.)*

The following is a statement of contracts awarded by the Royal Canadian Mounted Police during the month of June, 1935, for different manufactured goods, which contracts included in all cases the "B" labour conditions above referred to:—

Goods contracted for	Contractor
Blanket straps.....	J. E. Lortie Co., Ltd., Montreal, P.Q.
Leather gloves.....	Acme Glove Works, Ltd., Montreal, P.Q.
Riding boots.....	Eagle Shoe Co., Ltd., Montreal, P.Q.

## FAIR WAGE SCHEDULE FOR PUBLIC AND CERTAIN PRIVATE CONSTRUCTION WORKS IN MANITOBA

UNDER the authority of section 11 of the Fair Wage Act of Manitoba, 1916 (Consolidated Amendments, 1924, chapter 99—as amended, 1934, chapter 13, and 1935, chapter 17) the provincial Minister of Public Works has approved a schedule effective June 15, 1935, establishing the minimum rate per hour and the maximum working hours applicable on public works for building construction under contract and on private works as described in the Act.

"Private Works," as defined by the Act "means the building, construction, remodelling, demolition, or the repairing at a cost of all work done irrespective of the number of contracts made exceeding one hundred dollars, of any building or construction work within the Greater Winnipeg Water District or any city or town which has a population exceeding two thousand, or any other portion of the Province to which the provisions of this Act are extended by the Lieutenant-Governor in Coun-

cil, but shall not include work which is done on property by or under the immediate direction and control of the owner, tenant or occupant thereof if no more than three men are employed in addition to the regular maintenance staff, if any, and if such work be not undertaken with a view to sale or rental of the property and shall not include work which is done by a maintenance man, or men, employed by the month."

### Fair Wage Schedule

The following schedule shall apply from and after June 15, 1935, on "Public Works" and on "Private Work."

"Winnipeg and Environs" means Winnipeg and within a radius of thirty miles.

"Other than Winnipeg and Environs" means all portions of the province outside said radius of thirty miles.

Occupation	Winnipeg and radius of 30 miles	Other than Winnipeg and radius of 30 miles	Maximum hours per week	Occupation	Winnipeg and radius of 30 miles	Other than Winnipeg and radius of 30 miles	Maximum hours per week

N.B.—All men hired in Winnipeg to go into the country to work on buildings shall be

paid the city schedule rate, excepting where other definite agreements are made.

The growth and activities of "self-help" organizations in the United States have been reviewed from time to time in the LABOUR GAZETTE, (October, 1934, page 910 and April 1933 page 363). A recent survey made by the Division of Self-Help Co-Operatives Federal Emergency Relief Administration, outlines the history and organization of Self-Help Co-operatives. This study shows that up to August 1, 1934, a total of \$1,100,715 had been granted to 147 "self-help" co-operatives in the United States with an active membership at that time of about 20,000. Since each member had on an average of three dependents,

nearly 80,000 people were sharing in the earnings of these groups; furthermore, since the membership keeps changing, in the course of a few months many more than 80,000 people were getting some benefits from the co-operatives. Only about one-half of the funds granted had been used, and the greater part of this went for tools, machines, and equipment. For every dollar of the government's money that the co-operatives spent their reports show that they gave their members anywhere from 42 cents to \$13.10 worth of goods and services—\$2.25 on an average.

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received in the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both the employers and the employees. Verbal agreements, which are also included in the records, are schedules of rates of wages and hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In each agreement, the rates of wages for the principal classes of labour are given, with other information of general interest. Certain other agreements are outlined on pages 628 and 633.

### Manufacturing: Pulp, Paper and Paper Products

IROQUOIS FALLS, STURGEON FALLS, ESPANOLA, SAULT STE. MARIE AND FORT WILLIAM, ONTARIO.—ABITIBI POWER AND PAPER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS AND OTHER UNIONS.

The agreement which was outlined in the LABOUR GAZETTE, July 1934, page 701, with wage increase noted in the LABOUR GAZETTE, December, 1934, page 1148, has been renewed from May 1, 1935 to May 1, 1936, and thereafter from year to year until notice.

Following a conference in July 1934, the company announced its intention of maintaining the 6 hour day at least until May 1, 1935, in its operating mills. The wage rates for 1935 to 1936 are the same as in effect prior to May 1935 except for an increase of one cent per hour for grindermen.

### Construction: Buildings and Structures

MONCTON, N.B.—MASTER PLUMBERS AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL No. 600.

This agreement came into effect May 1, 1934, to remain in effect until May 1, 1935, and from year to year until notice. Under this clause the agreement continues until May 1, 1936.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. For work out of Moncton, a 9 hour day is optional with the men, but only 4 hours on Saturdays.

Overtime: all time worked after 6 p.m. on eight hour days and after 1 p.m. on Saturdays

to be paid at time and one half rates until midnight; double time for work after midnight and for work on Sundays and five specified holidays; work on Labour Day, treble time.

Minimum wages for journeymen plumbers and steamfitters: 70 cents per hour.

Apprentices limited to one apprentice for from one to five journeymen and one additional apprentice for from six to ten journeymen; apprentices employed at the time the agreement was signed are exempted. All future apprentices to be registered with the New Brunswick Examining Board and with the union.

Provision is made for arbitration of any disputes which cannot be settled between the parties.

TORONTO, ONTARIO.—TORONTO BUILDING AND CONSTRUCTION ASSOCIATION AND THE SHEET METAL WORKERS INTERNATIONAL ASSOCIATION LOCAL No. 30.

Agreement to be in effect from May 1, 1935, to Feb. 29, 1936, and thereafter from year to year until notice.

Only journeymen sheet metal workers and registered apprentices recognized by the union to be employed. If no members available, other qualified journeymen may be employed who are to join the union.

Hours: 8 per day, 5 days per week, a 40 hour week. Where three shifts are worked, 8 hours pay for 7 hours work, where the overtime shifts equal at least two thirds of the regular shift. If work cannot be done during the day, straight time to be paid for night work.

Overtime to be worked only in case of emergency and then to be paid at time and one half rates to 10 p.m.; after 10 p.m. and on Saturdays after 5 p.m. and all work on Sundays and holidays, double time.

Minimum wages for journeymen sheet metal workers in shop or on job: 75 cents per hour.

A joint arbitration committee is provided for the settlement of disputes, and no strike or lockout to occur before a dispute has been referred to this committee for settlement.

TORONTO, ONTARIO.—THE EXCAVATING CONTRACTORS ASSOCIATION OF TORONTO AND THE NATIONAL UNION OF SHOVELMEN AND OPERATING ENGINEERS, DISTRICT No. 1.

Agreement to be in effect from June 12, 1935 to May 1, 1936 and thereafter until notice.

Employers may choose men from the union's list or employ them direct, but always subject to the approval of the union's representative. Employers agree not to rent their own or any other contractor's shovels or excavators or cranes unless union men are employed thereon under union regulations.

Hours: 8 per day, 4 on Saturdays, a 44-hour week; but if both parties agree to work a shorter day, payment may be made on hourly basis.

Overtime: time and one-half for overtime after 8 hours and for repairing on Sundays and holidays; if ordered to dig or move machine on these days, double time.

Firemen will receive the same time as engineers, plus one and a half hours for raising steam and greasing. Oilers straight time, overtime pay plus one hour for having machine ready before working time.

Wage rates: shovel engineers \$48.40 per 44 hour week or \$1.10 per hour; crane engineers, material rehandling and pile driving \$39.60 per 44-hour week or 90 cents per hour; shovel firemen \$28.60 per 44-hour week or 65 cents per hour; shovel oilers \$24.20 per 44-hour week or 55 cents per hour.

TORONTO, ONTARIO.—GENERAL CONTRACTORS SECTION OF THE TORONTO BUILDING AND CONSTRUCTION ASSOCIATION AND THE BRICKLAYERS, MASONS AND PLASTERERS INTERNATIONAL UNION, LOCALS No. 2 (BRICKLAYERS) AND No. 26 (STONEMASONS).

The agreement which was summarized in the LABOUR GAZETTE, August 1934, page 787, was renewed without change from March 1, 1935 to March 1, 1936.

Hours and the wage rate are unchanged with a 40-hour week and wages 90 cents per hour.

REGINA, SASK.—REGINA BUILDERS' EXCHANGE AND THE BRICKLAYERS, MASONS AND TILE SETTERS' INTERNATIONAL UNION, LOCAL No. 1, REGINA.

Agreement to be in effect from May 31, 1935 to March 1, 1936.

No members of the union from outside locals to be brought in unless the local union cannot supply sufficient journeymen.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: from 5 p.m. to 7 p.m. except Saturdays, time and one-half; after 7 p.m. and work on Saturday afternoons and holidays, double time.

Wages for journeymen bricklayers and stonemasons: \$1 per hour. Foremen to be paid at least 10 cents per hour extra.

Any recognized firm in business for one year employing five journeymen may employ one

apprentice, but not more than two apprentices to be allowed to work on one job unless 20 or more bricklayers are employed on it.

In case of any dispute, a joint committee to be appointed. Any settlement reached by this committee is to be binding. No strike or lockout to occur before a dispute has been brought before this committee.

### Construction: Shipbuilding

VANCOUVER, B.C.—CERTAIN SHIPBUILDING AND DRYDOCK COMPANIES AND THE BOILERMAKERS AND IRON SHIPBUILDERS UNION OF CANADA, LOCAL No. 1.

Agreement to be in effect from June 12, 1935 to June 12, 1936 and thereafter until 30 days notice.

Only union members to be employed, if available and no discrimination to be shown any employee belonging to the union.

Hours: 8 per day, 44 per week, except for second and third shifts for which hours are limited to 40 per week. The third shift (from 12.30 a.m. to 8 a.m.) to be paid for 9 hours.

Overtime: time and one-half for first four hours and double time thereafter; double time also for work on statutory holidays. When the second and third shifts do not last for three nights or more for any employee, these shifts to be paid at overtime rates.

Wages: anglesmiths, boilermakers, electric welder, chippers and caulkers, riveters, shipfitters, drillers and tappers, 83 cents per hour, \$6.64 per day; acetylene welders and acetylene burners 76 cents per hour, \$6.08 per day; holder-on, drilling out rivets, punch and shearman 70 cents per hour, \$5.60 per day; reamers and countersinkers 65 cents per hour, \$5.20 per day; rivet heaters 63 cents per hour, \$5.04 per day; ironworkers' helpers 62 cents per hour, \$4.96 per day; passer boys 42 cents per hour, \$3.36 per day; passer boys over the age of 21 years 50 cents per hour. (These wage rates are an increase of 5 per cent over the rates previously in effect.)

For all dirty work and work in confined places full of gas from rivet fires and torches, time and one quarter of regular wages to be paid; the foreman, shop steward and committee to decide if work is to be so classed.

### Transportation and Public Utilities: Water Transportation

BRITISH COLUMBIA.—VARIOUS STEAMSHIP OPERATING COMPANIES AND THE NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA, COUNCILS NOS. 6 AND 7.

Agreements in effect from January 1, 1935, to May 1, 1935, continue until either party

gives 60 days' notice of desire to negotiate changes.

Hours on duty in port or at sea, or partly in port and partly at sea, in vessels requiring three or more engineers not more than 8 per day except in exceptional circumstances. For duty in port, only 4 hours on Saturday. One day off in the week as far as possible, in some cases 4 days per month, except local night vessels where two days per month only are provided. If not possible to have the day off in any week, the day will be added to annual holidays. Two weeks vacation each year with pay after a year's service.

In case of necessity of any vessel sailing without the full complement of crew, the wages of the absentee to be equally divided between the men who perform his duties, a substitute to be procured as early as possible.

*Canadian Pacific Railway Company, re B. C. Coast Service, Victoria*

Basic minimum wages per month vary according to the steamships on which employed: chief engineer \$200 to \$285; second engineer \$145 to \$190; third engineer \$120 to \$160; fourth engineer \$125 to \$150; junior engineer \$115. From these rates, a reduction of 12 per cent was in effect from January 1 to May 1, 1935, changing to a 10 per cent deduction from May 1, 1935.

*Canadian National Steamship Company Ltd. re B.C. Coastal Trade*

Basic minimum wages per month according to the vessel on which employed: chief engineer \$200 to \$285; second engineer \$150 to \$190; third engineer \$125 to \$160; fourth engineer \$125 to \$150; fifth, sixth and seventh engineers \$120; juniors \$115. From these basic rates, a reduction of 12 per cent was in effect January 1 to May 1, 1935, and from this date a reduction of 10 per cent only.

Provision is made for assisting continuous employment by disrating engineers when necessary, in order of seniority, with provision being made for junior engineers during the winter season in other services, when possible.

In case of any dispute, the engineers' committee to meet officials of the company in order to reach an agreement; if this is not successful an arbitrator agreeable to both parties to be appointed.

*Canadian National Railway, re Tug Boats operated from Port Mann, B.C.*

Basic minimum wages per month on the specified tug boats: chief engineer \$190 to \$210; second engineer \$135 to \$155; from which

a reduction of 12 per cent was in effect January 1 to May 1, 1935, which was changed to a 10 per cent reduction from May 1, 1935.

Provision is made for arbitration of disputes which cannot be settled between the parties.

*Canadian National Railway re Barge and Ferry Service Vessels operated on the Okanagan Lake.*

Minimum basic wage rates; chief engineers \$160 to \$190 per month; second engineer \$135 to \$145, from which a reduction of 12 per cent was in effect from January 1 to May 1, 1935, and of 10 per cent only from May 1, 1935. The hours are not specified in the agreement for these vessels, but for all work in excess of 10 hours per day, running time, or in the examination and overhaul of their engines, engineers to be paid *pro rata* for all hours worked.

*VICTORIA, B.C.—CERTAIN STEVEDORING COMPANIES AND THE ASSOCIATION OF TRANSPORT WORKERS OF VICTORIA AND THE VICTORIA RIGGERS AND STEVEDORES ASSOCIATION.*

Agreement to be in effect from August 20, 1934 to August 20, 1935, and thereafter subject to notice.

The unions will be advised of the arrival of vessels and preference to be given to union members in employing men.

Straight time to be paid for work between 8 a.m. and 5 p.m. Any work at any other time and all work on Sundays and holidays to be paid at overtime rates; for working through meal hours, time and one half until released.

Basic wage rates in the Port of Victoria to be governed by the rates prevailing in the Port of Vancouver (81 cents per hour dock, 85 cents, ship, for straight time and \$1.22, dock, \$1.28, ship, for overtime, effective in Vancouver from November 1, 1934, *LABOUR GAZETTE* November 1934, page 1062). Ten cents per hour extra to be paid cranemen, double winch drivers, donkey drivers, hatch tenders, siderunners, holdmen and winch drivers working on lumber and piled from water for all work on certain specified cargoes. Twenty cents per hour extra to boom men and sling men working on lumber and piled from water; bulk salt same as Vancouver rate; high explosives and for damaged cargo \$1.20 straight time, \$1.80 overtime; for salvage work on a stranded vessel \$1.50 per hour straight or overtime.

When ordered out to work and no work is given, men to be paid one, two or three hours' time according to the time of day they are called out. If called out to work and it

lasts for less than two hours in any day, at least two hours' pay to be given. When called out and work not provided at specified time, one half time to be paid for waiting time except when delay is due to a shortage of men; half hourly rates also for travelling time.

**PORT ALBERNI AND DISTRICT, B.C.—A CERTAIN STEVEDORING COMPANY AND THE ALBERNI DISTRICT WATERFRONT WORKERS' ASSOCIATION.**

Agreement to be in effect from February 14, 1935 to February 13, 1936, when it may be renewed or revised as agreed upon, 60 days notice of any change to be given. A conference on revision of the wage scale may be secured by either party on 60 days notice.

Members of the union to be given preference in employment but the company reserves the right of selecting its own employees, work to be divided as equally as possible between all

gangs and between individuals as far as possible.

Hours not to exceed 12 per day, except by agreement on the job and in such case at double the wage rates, except that to finish a ship for sea 13 hours may be worked at ordinary rates if agreed to by the gang.

Hourly wage rates for hold men and sling men working on lumber 85 cents straight time and \$1.28 overtime; hatch tenders, side runners and double winch drivers working on lumber, hold men working with logs and hatch tenders, hold men, sling men and double winch drivers 95 cents for straight time and \$1.38 overtime; hatch tenders, side runners, double winch drivers and boom men \$1.05 straight time and \$1.48 overtime.

A minimum of 2 hours' pay for any work done on any job. If called to work and none provided, a minimum of two hours' pay at half rates; half time rates to be paid also for waiting time on the job.

There are at the present time 341,451 families on the relief rolls in New York, according to a report recently published by Mayor La Guardia's committee on Unemployment Relief. In its recommendations and conclusions the report states:—

"Independence and the will to work must be maintained if the men and women on relief are not to become permanently unemployable. In order to do this there should be a minimum of interference with the family whose primary need is a job. The allotment of relief should be in cash so that after it is granted the management of it is given over entirely to the recipient. Men and women should be encouraged to secure part-time and odd jobs by being permitted to retain part of such earnings to raise the inadequate family budgets now allowed."

Increasing popularity of employee representation plans for collective bargaining in the steel industry is indicated by preliminary results of an industry-wide survey just completed by the American Iron and Steel Institute. The survey reveals active support of such plans by 89.1 per cent of the employees in the operating divisions of 101 companies which employ more than 90 per cent of the total number on the steel company payrolls. The survey covers the entire year 1934. A limited survey made last summer showed that employee representation plans at that time

were supported by 86 per cent of the employees of 35 companies. Despite the fact that 1934 was a year in which relations between employers and employees in many industries were unsettled, the steel industry's employee representation plans are shown by the survey to have settled 15,665 questions in a quiet and orderly manner.

During the month of June there were reported to the Ontario Workmen's Compensation Board 4,325 accidents, as compared with 4,734 during May, and 4,886 during June a year ago. The fatal accidents numbered 23, as compared with 17 in May, and 29 in June last year. The total benefits awarded in June amounted to \$428,365.88, of which \$343,445.59 was for compensation and \$84,920.29 for medical aid. This brings the total benefits awarded during the half year ending June 30 to \$2,724,875.91, as compared with \$2,061,064.26 during the corresponding period of 1934, and \$2,438,642.97 in the second half of 1934.

During the first six months the accidents reported numbered 27,429, as compared with 25,016 for the same period last year and 29,714 for the last half of 1934. The fatal accidents for the six months' period were: 1935, 130; first half 1934, 120; second half, 156. The average daily benefits awarded during the half year were \$18,165, and the average number of cheques issued daily, 869.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, JUNE, 1935

### Cost of Living, Prices of Staple Articles and Index Numbers

THE cost of the weekly family budget was little changed from that of the previous month, there being a slight increase in the cost of foods and a fall in the cost of fuel, while the Dominion Bureau of Statistics index number of wholesale prices was somewhat lower, continuing the decline which commenced in May.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in sixty-nine cities was \$7.54 at the beginning of June as compared with \$7.52 for May; \$7.38 for June, 1934; \$6.84 for June, 1933; \$11.10 for June, 1930; \$11.16 for June, 1921; \$16.92 for June, 1920 (the post war peak); and \$7.49 for June, 1914. Changes in the cost of individual commodities were small and advances were more numerous than the declines. The most important of the former occurred in the cost of beef, pork, lard, eggs and evaporated apples, while the principal decrease was in the cost of butter. Including the cost of fuel and rent with that of foods the total budget was \$15.95 at the beginning of June as compared with \$15.97 for May; \$15.78 for June, 1934; \$15.41 for June, 1933 (the low point in recent years); \$21.44 for June, 1930; \$21.74 for June, 1921; \$26.92 for July, 1920 (The post war peak); and \$14.27 for June, 1914. Fuel was somewhat lower owing chiefly to a seasonal fall in the cost of anthracite coal. Rent was unchanged.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics and based upon prices in 1926 as 100 was 71.5 for June as compared with 72.3 for May. The decrease was due mainly to lower prices for farm products, chiefly grains, livestock and dairy products, and for certain non-ferrous metals, chiefly copper and silver. Comparative figures for the index number for certain previous dates are 72.1 for June, 1934; 63.5 for February, 1933 (the low point in recent years); 93.4 for June, 1930; 105.3 for June, 1921; 164.3 for May, 1920 (the post war peak); and 64.4 for June, 1914.

In the grouping according to chief component materials the vegetable products group declined 2.8 per cent, due mainly to lower prices for grains and milled products; the animal products group 1.2 per cent, because of lower quotations for live stock and dairy products; and the non-ferrous metals group 1.5 per cent, due mainly to declines in the prices of silver and copper. Other groups in this classification were little changed. In the group-

ing according to purpose consumers' goods were down less than half of one per cent, while producers' goods declined 1.7 per cent.

### EXPLANATORY NOTE AS TO RETAIL PRICES

The table of retail prices and rentals shows the prices at the beginning of June of seventy-one staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the average of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amounts due.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which statistics were available when first published in the LABOUR GAZETTE in January, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tends to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for

(Continued on page 704)

**COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN  
TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA**

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

conveniences. r Mining company houses in district \$5-\$10 per month; others, five and six rooms, \$10-\$35. s Delivered from mines.

v. In June issue printed \$12.50-\$14.00 instead of \$12.50-\$12.75. x. In June issue printed \$14.00-\$18.00 instead of \$14.00-\$15.00. z. In June issue printed \$8.00-\$12.00 instead of \$7.00-\$10.00.

(Continued from page 696)

the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the budget serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

### Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated

\*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18%; Clothing 18%; Sundries, 20%.

from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

### Retail Prices

Beef prices were higher in most localities in June, continuing the seasonal advance in progress since the beginning of the year. The Dominion average for sirloin steak was 24.8 cents per pound as compared with 23.9 cents in May and 20 cents in January. Rib roast averaged 18.7 cents in June and 18 cents in May. Veal and mutton also showed advances during the month, the former being up from an average price of 12.6 cents per pound in May to 12.9 cents in June, and the latter from 21.4 cents per pound to 21.7 cents. The price of fresh pork was higher, leg roast being up in the average from 20.4 cents per pound in May to 21.3 cents in June. Breakfast bacon averaged one-half cent per pound lower than in the previous month at 33.4 cents.

Egg prices were higher in many localities, the Dominion average for fresh being up from 22 cents per dozen in May to 22.6 cents in June. Milk was fractionally lower at 10.2 cents per quart, seasonal decreases being reported from several localities. The price of dairy butter was down in the average from 24.9 cents per pound in May to 23.3 cents in June and of creamery from 28.6 cents per pound to 26.3 cents. Prices of this commodity average somewhat higher in the Maritime provinces than in other parts of the Dominion. Canned vegetables have changed little in price during the last eighteen months. Onions advanced from an average price of 4.6 cents per pound in May to 6.4 cents in June. Potatoes were little changed, averaging 78 cents per ninety pounds. Prices in the western provinces were substantially higher than elsewhere in the Dominion.

Seasonal decreases in the price of anthracite coal were reported from several localities and the Dominion average declined from \$14.58

\*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

per ton in May to \$14.15 in June. The price of coke was down from \$12.02 per ton to \$11.36, decreases being reported from cities in eastern Canada. Bituminous coal and hard wood prices also averaged slightly lower.

Following are the prices reported for Welsh coal, domestic sizes: Halifax, \$14; Windsor, Nova Scotia, \$16.50; Charlottetown, \$12.90; Moncton, \$16; Saint John, \$13.50; Quebec, \$13.50; Three Rivers, \$15; Sherbrooke, \$16.25; St. Hyacinthe, \$13.25; Montreal, \$13.25; Ottawa, \$15.25; Kingston, \$14.50; Belleville, \$15.50; Peterborough, \$15.75; Oshawa, \$14.25; Toronto, \$14; St. Catharines, \$14.75; Hamilton, \$13.50; Brantford, \$16.75; Galt, \$16.50; Windsor, \$12.50; Sudbury, \$17.50; Cobalt, \$19; Timmins, \$19.50; Port Arthur, \$16; Fort William, \$16; Winnipeg, \$19.50.

### Wholesale Prices

The following is a summary of a statement on wholesale prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices averaged lower in June than in the previous month, while as compared with June, 1934, wheat and oats were higher but rye, barley and flax were lower. No. 1 Manitoba northern cash wheat, Fort William and Port Arthur basis, was down from an average of 85.7 cents per bushel in May to 81.7 cents in June. Uncertainty as to marketing and the prospects of a larger crop than last year were mentioned as factors affecting the market. In coarse grains western oats declined from 40.8 cents per bushel in May to 39.8 cents in June, rye from 46 cents per bushel to 41.2 cents and barley from 42.3 cents to 39.2 cents. The price of flour moved downward in sympathy with that of wheat, the quotation per barrel at Montreal at the middle of the month being 40 cents lower at \$4.90. Raw rubber at New York was about one-half cent per pound higher, a grade of Ceylon averaging 12.6 cents per pound in June. Raw sugar at Montreal was down from \$1.98 per cwt. in May to \$1.90 in June, influenced by the United States' Supreme Court

decision regarding the validity of the National Industrial Recovery Act. In livestock, cattle prices were lower and hogs higher. Choice steers at Toronto declined from \$7.20 per hundred pounds in May to \$6.76 in June and at Winnipeg from \$6.82 per hundred pounds to \$6.22. Bacon hogs in the former market advanced from an average of \$9.39 in May to \$9.92 in June and in the latter from \$8.24 to \$9.06. Cold storage holdings of creamery butter were much higher at the first of June than at May first but considerably lower than for June, 1934. The price at Toronto for prints was down from an average of 24.6 cents per pound in May to 22 cents in June and at Montreal from 23.2 cents to 22.3 cents.

Storage stocks of eggs on June 1st were substantially lower than a year earlier and production also was unusually low for the month. The price for the fresh grade at Montreal rose from 22.1 cents per dozen to 24.4 cents and at Winnipeg from 19.3 cents to 20.8 cents. Raw cotton at New York averaged 11.9 cents per pound in June, as compared with 12.3 cents in May and 12.1 cents in June, 1934. Raw wood advanced 1 cent per pound averaging 15 cents per pound in June. In non-ferrous metals the price of electrolytic copper at Montreal averaged one-half cent per pound lower at 8.22 cents and silver at New York was down from 74.5 cents per ounce to 72 cents.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE accompanying tables, which appear quarterly, give the official and certain other index numbers of cost of living, retail and wholesale prices in Great Britain and several of the principal commercial and industrial countries. The following notes afford information as to recent changes in prices according to groups of commodities in several of these countries.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number, on the base 1930=100, was 88.1 for May, an increase of 0.7 per cent for the month. Decreases were recorded in cereals and in coal, but all of the remaining nine groups were higher than the April level.

The *Statist* index number, on the base 1867-1877=100, was 85.2 at the end of May, an advance of 1.3 per cent for the month. Except for a small decline in the animal foods group and no change in the sugar, coffee and tea group, advances were recorded in all groups, of which vegetable food rose 7.2 per cent.

**COST OF LIVING.**—The Ministry of Labour index number, on the base July, 1914=100, was 140 at June 1, a rise of one point for the month due entirely to higher food prices chiefly potatoes, eggs and bacon.

### France

**WHOLESALE PRICES.**—The index number of the General Statistical Office, on the base 1914=100 (gold index) was 72 for May, an advance of nearly 3 per cent for the month. Animal food was the only group to show a decrease; all other groups contributed to the general upward movement.

### Germany

**WHOLESALE PRICES.**—The index number of the Federal Statistical Office, on the base 1913=100, was 100.8 for May, showing no change from the preceding month. Advances principally in non-ferrous metals and rubber were

offset by declines in a number of other groups.

**COST OF LIVING.**—The official index number on the base 1913-1914=100, was 122.8 for May, an increase of 0.4 per cent for the month. Small increases in food, clothing and sundries were partly offset by a decline in the heat and light group; rent was unchanged.

### Italy

**WHOLESALE PRICES.**—The index number of the Milan Provincial Council of Corporate Economy on the base 1913=100, was 298.70 for April, an advance of 3.2 per cent over the March level. The advance extended to all of the eight groups.

### United States

**WHOLESALE PRICES.**—The Bureau of Labour Statistics index number, on the base 1926=100, was 80.2 for May, an increase of 0.1 per cent for the month. Small increases were recorded in all groups except the foods group which was lower, and miscellaneous commodities which were unchanged.

*Bradstreet's* index number (continued by Dun and Bradstreet, Incorporated) which is the sum total of the prices per pound of 96 commodities of common consumption was \$9.9070 at June 1, an increase of 1.1 per cent from the previous month and the highest point reached since November 1, 1930. Of the 13 groups, 7 were higher, 4 lower and 2 unchanged from the previous month.

*Dun's* index number (continued by Dun and Bradstreet, Incorporated) which is based on the cost *per capita* of a year's supply of commodities was \$174.314 at June 1, a fall of 1.09 per cent for the month due chiefly to lower grain prices.

**COST OF LIVING.**—The index number of the Department of Labour and Industries, Massachusetts, of the cost of living in Massachusetts, on the base 1913=100, was 137.8 for May, remaining practically unchanged from the two previous months.

(a) Average for year. (b) First of month. (c) Middle of month until August, 1933; thereafter this index number is calculated fortnightly and the figure given in this table is for the date nearest to the middle of the month. (d) Cost of weekly family food budget. (e) Figure for previous month. (f) Figure for following month. (g) Quarter beginning in specified month. (h) Highest category workmen's household. (i) December. (j) To end of 1931, 13 articles; from 1932, 34 articles.
